## *Circular of Information*

## ANNOUNCEMENT OF COURSES

THE GREAT SEAL OF THE STATE OF CALIFORNIA

FOR THE YEAR 1944-1945

## STATE DEPARTMENT OF EDUCATION

| | |
|---|---|
| Walter F. Dexter | Superintendent of Public Instruction and State Director of Education |
| J. A. Burkman | Assistant Director of Education |

## STATE BOARD OF EDUCATION

| | |
|---|---|
| Fred W. Smith, President | Ventura |
| William M. Blair | Pasadena |
| Eugene T. Broderick | San Francisco |
| Edward J. Cummings | Pacific Palisades |
| Robert M. Dulin | Beverly Hills |
| Ralph T. Fisher | Oakland |
| Mrs. E. T. Hale | San Diego |
| Gilbert T. Jertberg | Fresno |
| Joseph P. Loeb | Los Angeles |
| J. M. Tadlock | Eureka |

Walter F. Dexter, Secretary and Executive Officer

Mrs. Florence B. Argall, Assistant Secretary

## OFFICERS OF THE COLLEGE

| | |
|---|---|
| WALTER R. HEPNER | President |
| EDWARD L. HARDY | President Emeritus |
| JESSE W. AULT | Director of Placement and Dean of Education |
| ARTHUR G. PETERSON | Dean of Liberal Arts |
| CHARLES E. PETERSON | Dean of Men |
| MARY MENDENHALL | Dean of Women |
| DONALD R. WATSON | Acting Registrar and Director of Student Personnel |
| FAY V. PERRY | Director of Guidance for Two-Year Students |
| SPENCER L. ROGERS | Director of Extension |
| RICHARD MADDEN | Principal of the Campus Elementary School |
| JOHN PAUL STONE | Head Librarian |
| FRANK M. WATENPAUGH | Comptroller |
| GEORGIA C. AMSDEN | Secretary of Faculty |

# CALENDAR 1944-1945

### SUMMER SESSION, 1944.

Term I, six weeks, June 26-August 4.
Term II, three weeks, August 7-August 25.

### FALL SEMESTER, 1944-1945.

| | | |
|---|---|---|
| September 1 | Applications for admission must be filed on or before this date. | |
| September 5 | Entrance examinations for all entering Freshmen who have not previously taken these examinations. No Freshman will be granted admission until these examinations have been taken. | |
| September 8 | Orientation Program. All entering Freshmen must appear on the campus for this program, beginning at 8 a.m. and lasting throughout the entire day. | |
| | 8:30 a.m.-12:00 m. | Fundamentals Tests—Required for admission to Teacher Education. Should be taken at the end of the first semester of the Freshman year where possible. |
| | 1:00-2:30 p.m. | College Aptitude Test for students entering with advanced standing. |
| September 11 | Registration and payment of fees. | |
| September 12 | Instruction begins. Late registration fee becomes effective. | |
| November 23-24 | Thanksgiving Recess. | |
| December 8 | Last day before Christmas Recess begins. | |
| January 2 | Classwork resumes. | |
| January 25-31 | Semester Examinations. | |

### SPRING SEMESTER, 1944-1945.

| | | |
|---|---|---|
| January 25 | Applications for admission must be filed on or before this date. | |
| February 2 | Orientation Program. All entering Freshmen must appear on the campus for this program, beginning at 8 a.m. and lasting throughout the entire day. | |
| | 8:30 a.m.-12:00 m. | Fundamentals Tests—Required for admission to Teacher Education. Should be taken at the end of the first semester of the Freshman year where possible. |
| | 1:00-2:30 p.m. | College Aptitude Test for students entering with advanced standing. |
| February 5 | Registration and payment of fees. | |
| February 6 | Instruction begins. Late registration fee becomes effective. | |
| March 26-30 | Spring Recess. | |
| May 30 | Memorial Day Holiday. | |
| June 7-13 | Semester Examinations. | |
| June 15 | Annual Commencement. | |

### SUMMER SESSION, 1945.

Term I, June 25-August 3.
Term II, August 6-24.

# FUNCTIONS OF THE STATE COLLEGES OF CALIFORNIA

The State Colleges have three major functions, namely, (1) to help the individual student to develop a well-rounded and adjusted personality; (2) to promote civic intelligence and competence; and (3) to create supplies of trained men and women, some to serve as teachers in the elementary and secondary schools, some to fill intermediate places of leadership, and some to transfer to graduate institutions to equip themselves to extend the frontiers of knowledge and to occupy the higher positions of leadership. In terms of publicly supported higher education, the State Colleges and the University together make provision for the realization of all the essential objectives of higher education in our State.

To achieve their unique purposes the State Colleges have developed and are improving offerings as follows:

1. Teacher education curricula for those students who plan to teach in the elementary school, the junior high school, and in the special fields in all secondary schools.
2. Preprofessional curricula.
3. Curricula of varying lengths in such fields as business, industry, governmental services, homemaking, and social service.
4. General education for students who take work which leads toward the bachelor of arts degree or to the higher professions through graduate work.
5. Guidance services to assist the individual student to plan his educational program and to make his college and life adjustments.
6. Extension courses in appropriate fields.

The State Colleges accept the principle that higher education should be available to all capable high school graduates. The preservation and improvement of democracy depends upon the full and unhampered development of all potential citizenship and leadership resources. In keeping with this principle the State Colleges maintain flexible entrance requirements. Each applicant is treated individually in terms of his potential capacity and his potential contribution and not in terms of past academic pattern or accomplishment alone.

The State Colleges purposely maintain not only flexible entrance requirements, but also, adjustive curricula, and adequate and effective guidance and counseling services to promote the personal and educational development of worthy students. The State Colleges modify traditional academic restrictions and provide new curricula and services whenever such modifications and additions seem to serve the legitimate desirable needs of individuals and society.

The promotion of civic intelligence and competence is the underlying aim of all activities on State College campuses. Special emphasis centers on warm personal relationships between instructors and students, on friendly counsel in time of need, and on the day-to-day routine of living in a friendly atmosphere. Because the majority of State College students live at home, it is possible to link together the college, the home, and the community in realistic democratic relationships.

The democratic controls exercised over the State Colleges make them readily and effectively responsive to individual and community needs and encourage them continuously to make significant improvements in both curriculum and personal services. The State Colleges are thus laboratories in which the facts and theories developed in research, in community living, and in daily association with students are reflected in the instructional program.

The State Colleges plan their program of higher education so as to provide educational services inherent in the principle of equality of opportunity.

# THE COLLEGE

## Location and Environment

Renowned as a winter resort with a mild but invigorating climate, San Diego has become equally famous for its cool summers. High cultural standards in art, music, literature, and science create a stimulating environment for a college. Many of these advantages are to be found in the heritage resulting from the expositions of 1915-16 and 1935-36, including the buildings themselves, which portray the best types of Spanish colonial art and architecture. Housed in these buildings are the Fine Arts Gallery, exhibits in anthropology, natural history, and American archaeology, which are in many respects unsurpassed. The outdoor organ, the Ford Bowl, and the horticultural gardens make Balboa Park, in which all these facilities are located, world renowned. The Scripps Institute of Oceanography, operated by the University of California at La Jolla, gives opportunity for important cooperation in the biological sciences.

## Buildings and Equipment

On February 1, 1931, the college was moved to the new campus, located one mile north of the city's principal east-west boulevard, El Cajon Avenue. The buildings are of Spanish-Moorish architecture which is well suited to the landscape and climate of this region. They include the Academic Building (which houses lecture halls, classrooms and administrative offices) ; the Science Building; the Library, the Little Theater; the Music Building; the Campus Elementary School; Scripps Cottage (a social clubhouse for women students) ; the Cafe and Book Store; and the Physical Education Building (a structure with adequate facilities for both men and women). The gymnasium contains a very fine basketball floor with stands that will accommodate 1500 spectators. A fine concrete stadium, constructed in a natural site, has a seating capacity that is adequate for preesnt needs. The open air theater, seating 4200 persons, serves as a meeting place for large groups.

## Facilities for the Education of Teachers

The college maintains a modern elementary school on the campus where it has developed an extensive program for the education of elementary school teachers. The classroom-laboratory plan which calls for the use of work-rooms, the library, and shops, affords unusual opportunities for the induction of students into teaching. By arrangement with the San Diego City Schools, directed teaching is provided in the Euclid elementary school for one-half day throughout a semester. A similar arrangement exists at the Woodrow Wilson Junior High School for students who are preparing to teach junior high and special secondary school subjects. Students preparing to teach only special secondary school subjects may be assigned to one of the senior high schools.

## The Library

The library facilities of this college are noteworthy for an institution of its size. The library consists of well over 80,000 volumes selected to meet the requirements of a modern educational institution. Six professionally trained librarians are available to render assistance to students in their reading and reference work.

For the duration of the war the library service has been further augmented by the loan of a librarian and three special libraries, namely, a collection of 3,000 volumes on Anthropology and Ethnology from the San Diego Museum of Man, the U. S. Grant Memorial Library of 1,375 volumes, and the 25,000 volume Scientific Library of the San Diego Society of Natural History.

The Campus Elementary School Library, representing a collection of 11,000 volumes, possesses equipment and building facilities that are unique.

## Living Accommodations

The college does not maintain dormitories since nearly all of the students live with parents or guardians. Living arrangements for students whose homes are not in San Diego or within commuting distance are made through the offices of the Dean of Women or the Dean of Men. All women students are urged to live in the residence hall adjoining the campus. Careful consideration is given to study conditions, healthful living, and adequate social opportunities. Room and board may be secured for approximately $200 per semester, payable in four installments. Opportunities to reduce this figure by working a few hours each week are occasionally available. Reservations should be made in advance through the Manager of Quetzal Hall, 5192 College Avenue, San Diego 5, California. Where students find other accommodations more desirable, written permission from parents must be secured and filed with the Dean of Women or Dean of Men.

## Student Life

A rich field of extra-curricular activities is available to the student throughout his college life. The student is urged to select these activities carefully in order that he may profit by these extra-class experiences without lowering his standards of scholarship. The *Student Handbook*, available at the time of registration, gives information concerning activities which include organizations in every department of the college, and opportunities for individual and group experience in the social, athletic, fraternal, religious and governmental life of the campus.

## Student Health Service

The Health Department is maintained for the protection and care of student health. A complete physical examination is required of each student upon admission to college. Careful attention is given to cases undergoing remedial treatment or to cases in which a modification of study load or in the amount of participation in physical activities seem advisable.

A representative of the Health Department is available a part of each day for consultation and emergency treatment. Students who have been absent because of illness should receive clearance from the Health Department before returning to classes.

A group plan for accident insurance is in operation for students who desire to participate.

## Placement Service

A Placement Office is maintained by the college, which serves as a clearing house for part time and full time jobs. Employers notify this office of available openings in their organizations, and also turn to the office for information concerning graduates or nongraduates whom they are considering for employment.

Included in the service of the office are the listing of part time jobs of all types available, including opportunities to work for board and room, teacher placement, and full time jobs in commerce and industry.

This service is free to students, who are invited to arrange for interviews with members of the placement staff if in need of assistance in finding work. Students who know of jobs in which they are not themselves interested are encouraged to notify the office of such vacancies.

The Placement Secretary should be seen or called regarding vacancies or work applications.

## Vocational Rehabilitation Service

The Bureau of Vocational Rehabilitation, California State Department of Education, offers its service to students who have an employment handicap resulting from physical disability of any kind. Included are vocational counselling, the payment of tuition and fee, and the providing of textbooks without charge to the trainee. Details of the service may be obtained from the Dean of the College of Liberal Arts.

# FEES AND EXPENSES

## Probable Expenses for One Semester

An estimate of the expense of attendance for one semester is given below. No estimate is made as to the cost of clothing, or other personal items, since these figures vary with the demands of the individual. Laboratory fees are additional.

### A Partial Estimate of Expenses

One Semester

| | Average | *Minimum* | *Maximum* |
|---|---|---|---|
| Fees and Deposits | | $20.00 | $27.50 |
| Books | | 12.00 | 20.00 |
| Board and Room | | 200.00 | ----- |
| Incidentals: | | | |
| Transportation | | 10.00 | 20.00 |
| Lunches (daily in cafe) | | 35.00 | 50.00 |
| Organizations: | *Average* | | |
| Fraternity | | | |
| Initiation and pin | $16.50 | $7.50 | $25.00 |
| Dues and Assessments | 5.50 | | |
| Sorority | | | |
| Initiation and pin | 16.00 | 16.75 | 25.00 |
| Dues and Assessments | 8.00 | | |
| Miscellaneous | | | 5.00 |

Before enrolling in college, the student should possess sufficient resources to meet the minimum expenses for one semester. A limited amount of clerical work in offices and in the library may be offered from time to time, but ordinarily it is not sufficiently remunerative to reduce expenses materially.

## [1]List of Fees and Deposits (Subject to Revision)

### ENROLLMENT FEES AND DEPOSITS

PAYABLE AT TIME OF REGISTRATION

| | |
|---|---|
| By all students: | |
| Tuition: | |
| Regular students (carrying over 5 units) | $6.50 |
| Limited students (carrying 5 units or less) per unit | 2.50 |
| Materials and service: | |
| Regular students | 4.00 |
| Limited students per unit | .50 |
| General service deposit (unexpended portion is refunded) | 3.00 |
| Personnel examination (new students only)<br>(Limited students and graduate students exempted) | 2.00 |
| [2] Student activity fees: | |
| Regular students | 6.00 |
| Limited students | 2.00 |

---

[1] Auditors pay same fees as students enrolled for credit.
[2] Not required by the State.

## MISCELLANEOUS FEES AND DEPOSITS

### DEPOSITS PAYABLE BEFORE LABORATORY WORK IS STARTED

| | |
|---|---|
| Chemistry | $5.00 |
| Geology 21A-21B | 1.00 |

### FEES PAYABLE WHEN SERVICE IS RENDERED

| | |
|---|---|
| Change of program | .50 |
| College Bulletin (free to prospective students) | .20 |
| Duplicate library card | .10 |
| Duplicate registration book | .10 |
| [1] Evaluation of records for advanced standing | 2.00 |
| Fundamentals test | .50 |
| Late filing of registration book | 1.00 |
| Late registration | 1.00 |
| [2] Transcript of record (1st copy free) | .50 |

## GRADUATION FEES

| | |
|---|---|
| State Teaching Credentials (each credential) | $3.00 |
| Kindergarten-Primary<br>General elementary<br>General Junior High<br>Special secondary<br>School administration | |
| Diploma | $1.00 |

The credential fee is collected through the college by cashier's check or post office money order made payable to the State Department of Education.

---

[1] Paid by all students entering with advanced standing.

[2] The 50-cent fee must accompany each application for a transcript of record. Ten cents will be charged for each duplicate of this record which accompanies the original.

# ADMISSION AND REGISTRATION

## General Admission Requirements

High school graduates and other applicants possessing equivalent preparation may be admitted to this college upon evidence of fitness to profit by college instruction, such fitness to be shown by previous scholastic records, by evidence of good moral character and personal qualifications, and by satisfactory scores on tests which the college may require.

**Admission of High School Graduates.** (1) A high school transcript must be presented showing satisfactory scholarship, and (2) applicants must demonstrate readiness for college instruction by making satisfactory scores on such tests as the college may designate.

Students will be granted *regular* status if they have earned recommended grades * in not less than 16 semester courses in English, Social Sciences, Foreign Language, Mathematics, Natural Sciences, and related fields, during the tenth, eleventh, and twelfth years in high school.

Provisional *regular* status will be granted if the student has earned recommended grades * in not less than 12 semester courses in the above subjects. The student will attain full regular status at the end of the first semester in college if a scholarship average of C or better is maintained in at least 12 units of work. Failure to secure a C average will disqualify the student for further attendance.

Students who do not qualify for *regular* (provisional) status may enroll in one of the two-year curricula if they have earned recommended grades * in at least 12 semester courses during the tenth, eleventh, and twelfth years in high school. Individuals who fall slightly below this standard may be admitted to the two-year curricula if qualifying examination scores indicate probable success in these courses.

**Admission by Examination.** Certificates of successful examination before the College Entrance Examination Board will be accepted when candidates can not meet the above scholarship requirements.

**Admission With Advanced Standing.** Credit earned in recognized institutions of collegiate grade will be evaluated and advanced standing allowed accordingly toward the graduation requirements of this institution. Applicants must show an average grade of C or better for all college work, for the last college attended, and for the last semester of attendance in order to qualify for regular status. A student who enters with advanced standing is one who has completed at least 15 units of passing work in another collegiate institution. However, no applicant may disregard his collegiate record and apply for admission only on a basis of his high school work. Not more than 64 semester hours of junior college work may be allowed for credit.

Students seeking admission with advanced standing must furnish complete transcripts for all work attempted beyond the eighth grade. A $2 evaluation deposit must accompany the application for admission. This deposit will be refunded if the student enrolls at the next regular registration period.

**Special Students.** Persons over 21 years of age may be admitted on the basis of maturity, provided they present satisfactory evidence of good character and intelligence. Full matriculation will be granted only upon removal of all entrance deficiencies, and the completion of a full semester of satisfactory college work.

**Auditors.** Properly qualified persons may apply for admission to attend classes as auditors. Such students pay the same fees as those who take equivalent work for credit.

---

* Grades of A or B.

## Registration

Registration date for new students for the fall semester of 1944-1945 is September 8 and for the spring semester it is February 2. An application blank should be secured from the Registrar and filed, with complete transcripts of record, at least two weeks prior to registration date.

The college year is divided into fall and spring semesters of eighteen weeks each, followed by a summer session consisting of two terms of six weeks and three weeks, respectively. Students may enter at the beginning of either semester or either term of the summer session.

The summer session meets the needs of students who wish to secure supplemental credit or to shorten the time for completion of their college course, and of teachers in service.

## Tests Required at Registration Time and Later

1. A physical examination is required of all students upon entering the college. Appointments for this examination are made during the orientation program.

2. All entering students are required to take the College Aptitude Test. Exceptions may be made for graduate students and for those who register for five units or less.

3. All college transfer students who present less than a minimum of 15 units of college credit must take a High School Achievement Examination, and a standard English Examination in addition to the College Aptitude Test. Students whose tests indicate that they are not qualified for the regular English 1B must take English L1A or L1AA. Exceptions may be made for students transferring English credit from other colleges.

4. Passing the Fundamentals Test in reading, spelling, arithmetic and handwriting, and a Speech Test, are prerequisites for admission to upper division courses in teacher education curricula. These tests should be taken at the beginning of the second semester of the freshman year, in order that deficiencies, if any, may be made up before applying for admission to the upper division of teacher education curricula. Exceptions may be made for graduates of California State teacher education institutions who have been teachers in service.

## Late Registration

Students who register after the first week of the semester are subject to a limitation of program and must secure the approval of instructors for late admission to classes. After registration day a fee of $1 is charged for late registration.

## Changes in Registration

Petitions for changes in program may be secured at the Registrar's office. A small fee is charged for changes in program after registration books are filed.

## Loans and Scholarships

Scholarships for both men and women have been made available through the efforts of alumni, patrons of the college, and civic organizations. Superiority in scholarship and worthiness from the point of view of need are the standards upon which selection is based. Scholarship aid is therefore restricted for the most part to students who have completed the lower division of the college.

Both long and short term loans are available to students who have been in attendance for at least one year and who have given evidence of ability to do satisfactory college work. Application for loans is made to the Committee on Loans and Scholarships through the office of the Dean of Men or Dean of Women.

# GENERAL REGULATIONS

## Officers for Consultation

Concerning the housing and living arrangements of students, personal problems, etc.—The Dean of Women; The Dean of Men.

Concerning the scheduling and arrangement for all student social affairs—The Dean of Women.

Concerning study lists and personal problems of *two-year students*—Director of Guidance for Two-Year Students.

Concerning admission, program of studies, credits, degree requirements, etc.—The Registrar; The Dean of Liberal Arts; The Dean of Education.

Concerning health and physical condition—The Health Department.

Concerning student-body affairs, student-body policy—The executive officers of the student body; The Dean of Liberal Arts.

Concerning appointments to teaching positions and other types of full and part time employment—The Placement Secretary.

Concerning admission to Teacher Education Curriculum, directed teaching, credential requirements, etc.—The Dean of Education.

Concerning use of the buildings—The Dean of Women; The Dean of Men.

Concerning entrance requirements and offerings at other institutions—The Registrar; The Dean of Liberal Arts; The Dean of Education.

## Classification

**Full time Students** are those who are registered in more than 5 units of work. They are expected to carry a minimum of 12 units unless excused.

**Limited Students** are those who, for acceptable reasons, have been permitted to register for 5 or fewer units of work.

**Adult Special Students** are mature students who have not satisfied all entrance requirements, but who have been permitted to register for such courses as their ability and preparation justify. Special students may also be limited students.

**Regular Students** are those who are qualified to enroll in curricula leading to the Bachelor of Arts degree.

**Regular-provisional Students** are those whose high school records are slightly deficient in recommended grades. They are permitted to enroll on trial for one semester in a regular curriculum. If they make a C average in 12 or more units they automatically attain regular status.

**Two-Year Students** are those who do not qualify for regular status because of deficiencies in high school scholarship, but who have been permitted to enroll in an adjustive curriculum. These students are not permitted to enroll in courses applying regularly toward the Bachelor of Arts degree except by permission of their adviser until they have earned regular status through satisfactory scholarship.

**Class.** Students who have completed 0 to 29 units of work are classified as freshmen; 30 to 59 units as sophomores; 60 to 89 units as juniors; and 90 or more as seniors.

## Scholarship, Grades, and Grade Points

The following grades are used in reporting the standing of students at the end of each semester: A, excellent; B, good; C, fair; D, passed; E, conditioned; F, failed; I, incomplete, and W, withdrawn.

The grade E is recorded for work which is of low order but which may be made passable. If the work is raised to passing level by the close of the next semester, the grade is changed to D; otherwise it is changed automatically to F.

The grade I is recorded for work of high order but which is incomplete for an acceptable reason. To change an I to another grade, the work must be completed within the next semester; otherwise it is changed to F.

Grade points are assigned as follows: Grade A, 3 points per unit; B, 2 points per unit; C, 1 point per unit; D, no points; E, minus 1 point per unit; F, minus 1 point per unit. The number of grade points a student has earned in a subject is determined by multiplying the number of points he has received by the number of units allowed. The grade point average is determined by dividing the grade points earned by the number of units attempted. Courses in which the student received an I or Cr. or W are disregarded in computing grade point averages. A student must earn at least a C average in all work undertaken at the college to qualify for a diploma or a transcript of record with recommendation to another collegiate institution.

## Units of Work, and Study Lists Limits

A unit of credit represents one hour of lecture or recitation combined with two hours of preparation per week through one semester, or three hours of laboratory or field work in the case of laboratory credit.

Students are not ordinarily permitted to enroll for more than 16 units* for credit toward graduation. This constitutes a normal semester's program.
Certain exceptions to this rule exist. If during the preceding semester the student has carried at least 12 units*: (1) if a grade point average of at least 1.5 was earned, 17 units * may be carried for credit toward graduation, and (2) if a grade point average of 2.0 (B) was earned, 18 units * may be carried.

Any course in which a passing grade is earned may be used in satisfying pattern requirements, even though credit for the course is in excess of the units which may be credited for graduation.
Exceptions to the above regulations may be secured only through a petition to the Scholarship Committee.

No student may register for less than 12 units without the approval of the Dean of Liberal Arts or the Dean of Education.

## Probation and Disqualification

**Probation.** Any student whose scholarship record shows a cumulative deficit of 12 or more grade points below a *C* average for all work undertaken in the college will be placed on probation. A limited student will be placed on probation if his cumulative deficit below a *C* average equals or exceeds the average number of units carried per semester. Probationary status may be continued provided that the student does not add further toward his grade point deficiency.

**Disqualification.** Any probational student whose scholarship falls below an average grade of *C* in any single semester is disqualified for further attendance at the college. A scholarship record below a *D* average for any single semester also disqualifies a student.

A disqualified student may be reinstated after an interval of one semester for reasons satisfactory to the Executive Committee of the Faculty. All applications for reinstatement must be in writing.

## Withdrawals from Class

Forms for withdrawal from class may be obtained at the Registrar's office. If a student withdraws from class during the first seven weeks of a semester, a grade of *W* will be recorded upon his permanent record for each class which he has dropped. If he withdraws during the remainder of the semester, either an *I* or an *F* will be recorded unless a grade of *W* is approved by the instructor and the proper dean. A grade of *I* automatically becomes an *F* unless the work is completed by the end of the next semester.

Students who withdraw from all classes during a semester must petition the Admissions Committee for readmission.

---

* In addition to required physical education courses.

## Transcripts of Record

Students may secure one transcript of record without fee. Thereafter, each request for transcript should be accompanied by the fee of fifty cents. Once a student has matriculated in this college, transcripts from other schools will not be returned, or copies of them made. No fees are charged for transcripts required for military purposes.

Transcripts in the possession of students are to be regarded as unofficial records.

## Eligibility for Directed Teaching

No student shall be eligible for directed teaching (Education 116) who has not completed 75 units, been admitted to Teacher Education, and whose entire record, as well as his record for the preceding semester, does not average at least a 1.2 grade.

## The Honors Group

All students who at the end of the Sophomore year have attained a grade-point average of 2.5, and such others as have attained a high average in the department in which their Major is selected, and who have received the recommendation of that department and the consent of the Committee on Honors, may if they so elect, constitute an honors group, for special treatment in their Major subject.

Such students, so far as the facilities of the department and the best interests of the students under its charge allow, shall be treated as befits their individual needs and as their individual capacities warrant. They shall be eligible to enroll in honors or special study courses, although credit in such courses shall be limited to 5 units a semester. They shall not be held to regular attendance in the established courses of their departments if, in the opinion of the instructor, the course requirements can be met through special assignments and examinations or by satisfactory performance in the regular examinations in the course. With the consent of the major department, requirements concerning minors and specific courses or sequences in the major may be set aside. Each honor student shall be assigned to a member of his Major department for advice and direction.

Students in the honors group who fail to take advantage of the opportunities there offered may at the end of any semester be transferred by the department to the general course. Students in the general course who show unusual capacity, upon recommendation of the department and the Committee on Honors, may at the end of any semester, be transferred to the honors group if such transfer appears practicable.

*Students who wish to apply for entrance in the Honors Group may do so by filling out cards to be obtained from their major departments. The applications should be filed with the chairman of the major department not later than a week after registration opens. Units earned by students doing individual study under this plan will be recorded under the symbol 166 and will be subject to the formulated rules dealing with limitations of student load.*

## The Degree with Honors and with Distinction

Upon recommendation of the Committee on Honors, graduation with honors shall be granted to the upper 10 per cent of the graduating class. Each department shall determine which students it will recommend for Distinction in the major field at graduation, and report its recommendation to the Committee on Honors for transmission to the faculty.

## Examinations

No final examinations shall be given to individual students before the regular time. Any student who finds it impossible to take a final examinaton on the date scheduled must make arrangements with the instructor to have an incomplete grade reported and must take the deferred final examination not later than the end of the first semester following that in which the incomplete was given. No exceptions shall be made to this rule without the approval of an academic dean and the instructor concerned.

All final examinations shall be written in official examination books or other forms which shall be furnished by the college and distributed by the instructor at the beginning of the examination period. No books or papers of any kind shall be brought into the examination room, except by special order of the instructor.

## Extension Courses

An extension program covering a wide range of offerings is made available each semester. Members of the regular college faculty and others expert in special fields instruct extension classes. The extension program is designed to serve the needs of San Diego and neighboring communities for courses on the college level that are not available on the campus, or that should be offered at times and places more convenient to special groups. Extension courses are considered the equivalent of campus courses and the amount of credit available to any one student in one semester through extension courses or a combination of campus and extension courses is subject to the same study-load limitations that apply to students regularly enrolled for campus courses. Fees for extension courses vary somewhat with the place where the instruction is offered, but will not exceed $6 per unit for the year 1944-1945.

Information concerning extension offerings may be obtained on application to the Director of Extension Service.

The amount of credit for extension and correspondence courses acceptable in fulfillment of the requirements for the Bachelor of Arts degree will depend upon the nature of the courses, the quality of the work done, and the student's preparation for work in the field of the course. The college reserves the right to limit credit to such courses as have been approved, and the total of such acceptable credit to 12 units.

# THE BACHELOR OF ARTS DEGREE

## General Requirements for the Bachelor of Arts Degree

San Diego State College offers the following types of curricula leading to the A.B. degree: (1) the curricula leading to the California teaching credentials, and (2) the Liberal Arts curricula. With slight variations in definition, many of the basic requirements are the same.

A minimum of 120 units of college work, representing a four-year course, is required for the Bachelor of Arts degree. At least 30 units must be earned in this college, and not less than 24 of these residence units must ordinarily be taken with the rank of senior. Not fewer than 12 units of this work must be completed during a single semester; or in lieu of this at least 16 units must be completed in not less than two consecutive summer sessions. At least a *C* average in scholarship must be maintained in the major and in all work applied toward the degree.

**Credit Granted for Military Service.** Six units of elective credit will be granted to students who have enlisted in the armed services of this country upon the completion of the prescribed basic training program. Documentary evidence bearing the signature of the proper commanding officer must be filed before credit will be accorded to the student.

Nine additional units of credit will be granted to students who can document the fact that they have completed officer's training, have been granted a commission, and have been assigned to active military duty.

**Requirements for Degree May Be Completed in Three Years.** Although no reduction in course requirements or standards of work are contemplated, provision has been made whereby students may complete what normally constituted a four-year program in three years. Students may secure further information upon this point by addressing inquiries to the Registrar's Office.

### LOWER DIVISION

### Subject Matter Requirements in the Lower Division

| | |
|---|---|
| Physical Education | 2 units |
| Health Education 1 or 2 | 2 units |
| English | 6 units |
| Psychology | 3 units |
| *Foreign Language | 10 units |
| Mathematics LA and LB, 4 units, or high school algebra and geometry | |
| Social Sciences | 12 units |
| Natural Sciences | 12 units |
| **Year-course in foreign language or in mathematics, or in philosophy. | |
| (This year-course is an additional requirement to those listed above) | 6 units |

Electives to make total of 60 units.[1]

---

* Not required in the teacher education and general engineering curricula.

**Not required in the teacher education curricula.

[1] Electives should include lower division preparation for the major. See pages 54-113. Requirements for the minor may be partially satisfied in the lower division. See page 19.

## Explanation of Lower Division Requirements

**English.** This requirement may be satisfied either in the freshman year or in the sophomore year. Courses are to be chosen from the following: English L1A or L1AA, 1B or 2A, 2B, 2C, 2D, 2E, 2F, 2G, 50A, 50B, 52A, 52B, 56A, 56B.

**Psychology.** Psychology 1A.

**Foreign Languages.** At least 10 units in one foreign language are required in the lower division except that no language is required in teacher education and engineering. No degree credit is given for only the beginning college semester of a foreign language.

### HIGH SCHOOL COURSES

The foreign language requirement may be met in part or in whole by high school work completed with grade of C or better, each year course being counted in satisfaction of 3 units of this requirement. Three years of foreign language in high school will satisfy the college requirement in foreign language. No foreign language credit is given for only one year of a high school course unless the grade is B or better or unless the course completed with C grade is continued in college. If two or more years have elapsed since the completion of a high school course in any foreign language the final year of the course may be repeated for college degree credit but not for additional credit in meeting the language requirement.

**Social Sciences.**[1] Twelve lower division units chosen from two or more departments are required in this field. All students must present credit for Social Science 1A or for an acceptable equivalent.

Additional lower division courses to meet the social science requirement must be chosen from the following list and must include one of the year courses marked with an asterisk: Anthropology 1A-1B,* 54, 55; Economics 1A-1B,* 18A-18B; Geography 2 or 10 B; History 4A-4B,* 8A-8B*; Political Science 1A-1B,* 71A-71B*; Social Science 1B; Sociology 50A-50B.*

### HIGH SCHOOL COURSES

Two semesters of fourth year high school courses in the fields of history, political science, sociology, and economics taken with grades of B or better may be used in satisfying 3 units of the social science requirement.

**Natural Sciences.**[1] Twelve lower division units chosen from courses representing each of the following groups are required:

(a) Biology 1 or a year course in high school or college biology, botany, physiology or zoology.

(b) Physical Science 1A or 1B or a year course in high school or college chemistry or physics.

(c) Lower division courses to meet the natural science requirement must be taken from the following lists and must include one of the college or high school laboratory courses marked with an asterisk: Astronomy 1, 2, 9; Bacteriology 1*; Biology 1, 10A-10B*; Botany 2A,* 2B,* 4; Chemistry 1A,* 1B,* 2A-2B,* 7-8*; Geography 1 or 3 (only one course may be counted toward requirement); Geology 1A, 1B,* 2A, 2B; Physical Science 1A, 1B; Physics 1A-1B,* 2A-2B, 3A-3B,* 1C-1D,* 54; Physiology 1A, 1C*; Zoology 1A,* 1B,* 8, 20.

### HIGH SCHOOL COURSES

A maximum of one year (3 units) of courses in botany, chemistry,* physics,* physiology, zoology, and advanced biology taken in the senior year with grades not lower than B may be used in satisfying the 12 unit natural science requirement.

**Mathematics.** High school elementary algebra and high school plane geometry completed with at least C grades or a year course in Mathematics LA-LB.

---

[1] Teacher education students should follow carefully the curricular outlines to meet specific course requirements in this field.

**Additional Year Courses.** In addition to the foregoing minimum requirements in foreign language and mathematics, 6 units must be chosen from one of the following groups by all except teacher education students.

**Modern foreign language:** any two consecutive college courses, or any two consecutive high school year courses.

**Latin:** Two years of high school courses in Latin.

**Mathematics:** C, or D, or equivalent, and either 1, 3A, or 8. Students with the Commerce major may take Mathematics C, or equivalent, and Economics 2.

**Philosophy:** 3A-3B, 5A-5B.

**Lower Division Preparation for the Minor.** See description of requirements for liberal arts minors on page 20 and for teaching minors on page 22.

**Lower Division Preparation for the Major.** See description of requirements for teaching majors on page 21. Specific requirements for the majors in the liberal arts curricula are listed in connection with the descriptive list of courses in each major field (see pages 54-113).

### Limited Electives

A total of not more than 12 units of limited and vocational courses listed below will be counted toward the A.B. degree in Liberal Arts (for limitation in Teacher Education see page 24). Courses in education are included in this list principally because the major emphasis in the liberal arts program is non-professional and non-technical. Art L7, L14A, L65A, L65B; Economics L10A-L10B, L15A, L15B, L16A, L16B, L129, L163; Education, all courses except those listed as available for credit toward a minor (see Education minor on page 20); English L1A, L1AA, L8; Health Education L151; Journalism L53A, L53B, L153A, L153B; Library Science L10; Mathematics LA, LB; Merchandising, all courses; Music, L1A, L2A, L3A, L6A, L7A, L16A-B-C-D, L17A-B-C-D, L18A-B-C-D, L28A-L28B, L116A-B-C-D, L117A-B-C-D, L118A-B-C-D; Physical Education, all courses beyond the requirements specified in the curricular patterns except 30, 51, 170; Secretarial training, all courses; all courses numbered L40 and L45 if grade is below B.

## Specific Upper Division Requirements for the Liberal Arts Curricula

The liberal arts curricula lead to the bachelor of arts degree with majors in ar chemistry, commerce, economics, English, general engineering, geography, histor mathematics, music, physical science, physics, Romance languages, social scienc speech arts, and zoology and qualify for graduate work in these fields in recogniz American colleges and universities. Completion of the requirements of these curricu also enables the graduate to satisfy undergraduate requirements for the gener secondary credential which, with graduate work, will enable the holder to teach in senior high school or junior college.

### UPPER DIVISION

### Subject Matter Requirements

| | |
|---|---|
| Political Science 101 | 2 uni |
| Minor (minimum in upper division courses) | 6 uni |
| Major (upper division courses) | 24 uni |

At least 40 units in upper division courses must be completed, 30 of which must b earned after all lower division requirements have been satisfied.

### Explanation of Requirements

**Political Science 101.** Political Science 113 or 175A-175B or History 171A-171B o 173A-173B will be accepted as substitutes for this requirement.

**Minor.** Minors must be established in one of the following fields: anthropology, ar botany, chemistry, economics, education, English, foreign language, geography, geolog history, journalism, mathematics, music, philosophy, physics, political science, psychology, sociology, speech arts, and zoology.

*A minor consists of at least 12 units of work completed in one of the above fields o study. At least 6 of these units must be earned in upper division courses durin junior or senior years. The entire requirement for a minor may be met with uppe division courses provided these courses have no lower division prerequisites. Prerequisites for each course are listed among the course descriptions on pages 54 to 11*

**Minor in Education.** A student who desires to satisfy the undergraduate requirements for the general secondary teaching credential will minor in education. H should include in his program a major in a subject or field of subjects usually taught i high school and a minor in the field of education. In order to conform to the usua university requirements, this minor should include Education 102A-102B (or Education 130, and Psychology 102), and Education 115A-115B. Consultation with th Dean of Education or the Dean of Liberal Arts is recommended.

**Majors.** The specific requirements for each major are listed at the beginning of eac departmental division among the description of courses. (See pages 54 to 113.) Th student is advised to choose his major as early in his college course as practicable s that he may be able to plan his work according to the major requirements. Failure t meet the lower division requirements of the major department before the junior yea may make it impossible to satisfy the upper division requirements within the norma period of two years.

**Professional and Preprofessional Courses.** See pages 37 to 48.

### The General Major

The general liberal arts major of 36 upper division units must be chosen from thre departments with not more than 15 units from any one department allowed. Thi comprehensive major may be arranged to include minor requirements.

The general major is planned for students who are preparing for law, journalism library work, or for any other vocation requiring a background of general training It is available also to certain students who want a cultural education and who ca present satisfactory reasons for not specializing in any field. When the general majo is not a part of a four-year curriculum published in the college bulletin the tentativ program of the student should be planned in consultation with the Dean of Liberal Art and approved, revised, or rejected by the chairmen of the departments represented i the major.

## Specific Upper Division Requirements for the Teacher Education Curricula

**Admission to the Teacher Education Curricula.** *Admission to the college does not imply that the student will be admitted to the teacher education curriculum.* No student intending to enroll in the teacher education curriculum may enroll in an upper division course in education before being admitted to teacher education. Any exception to this rule must have the written approval of the Dean of Education. Students who have been in regular attendance at the college should make application for admission to the teacher education curricula during the first semester of their sophomore year. The preliminary requirements which must be met before admission to teacher education curricula are

1. A satisfactory score in a college aptitude test taken at the college. (See college calendar for date of test.)
2. Evidence of satisfactory ability in arithmetic, handwriting, reading and spelling indicated by having passed the fundamentals test. (See college calendar for date of test.)
3. Assurance of correct speech habits and voice control by having satisfactorily completed a course in corrective speech or by having passed a speech test given by the college.
4. Assurance of physical fitness by having passed a prescribed examination given by one of the college physicians.
5. If the student is to be a candidate for one of the special secondary credentials, he must furnish a recommendation from the chairman of that department stating that the student has ability and shows promise of teaching success in his field and that the department looks with favor upon his application.
6. The completion of the first two years or more of a given curriculum, or its equivalent, with a grade point average of 1.2 or better.

After the student has submitted evidence of having met the preliminary requirements in his application for admission to the teacher education curricula he will be interviewed by the members of a committee appointed by the faculty for this purpose. In the appraisal of applicants the committee gives careful consideration to the following factors established by the State Board of Education: intelligence, scholarship, professional aptitude, personality and character, speech and language usage, and many-sided interests.

**Transfer Students.** Students who have completed two or more semesters of work in another college, upon transferring to San Diego State College, should make application for admission to teacher education as soon as they enroll in the college. It will be advantageous for transfer students to present themselves for the necessary tests given during the orientation period preceding enrollment in the college.

**Advanced Standing in Teacher Education.** A maximum of 18 units in courses in education will be credited toward degree requirements in case such work was taken more than five years before entering upon the degree curriculum at this college (date of first work taken after an evaluation of record has been made, for students entering with advanced standing).

After an interval of five years, evaluations are subject to revision in the light of such new requirements as may have been put into effect and with respect to deduction in credit in education courses.

Students formerly in attendance will not be considered to be working in the degree curriculum until an evaluation and statement of credit has been secured from the Registrar's office. All courses taken either at this college or elsewhere must be approved by an official adviser or the Assistant Registrar (for those taken elsewhere) in order to be credited toward meeting degree requirements.

***Teaching Major Defined.*** A teaching major consists of a minimum of 24 units in a field other than education, at least 12 of which must be in the upper division. A *C* average in scholarship is required in all upper division courses in the field of the teaching major. A major for a special secondary credential varies from 24 to 40 units a specified in the requirements for the various curricula. Teaching majors may be established in the following fields: English, foreign languages, general sciences, mathematic and social sciences (anthropology, economics, geography, history, political science sociology) and in the special secondary credential fields of art, business education, music physical education, and speech arts.

*Teaching Major in English.* Candidates for the teaching major in the field of Englis are expected to show credit in English 1B or 1C and 9 elective units of lower divisio work and in 12 units of upper division work. This credit must include 3 units i American Literature (either lower or upper division) and 3 units in Shakespeare Recommended: English 2D and 112.

*Teaching Major in General Science.* Candidates for a teaching major in the field o general science are required to include a college year course in a biological science, a year course in high school or college physics and a concentration of 12 units, at leas 6 of which are upper division, in one major subject (botany, chemistry, physics zoology). *See definition of teaching majors.*

*Teaching Major in Social Science.* Candidates for a teaching major in the field of th social sciences are required to include in their programs a year course in moder American history and a concentration of 12 units, at least 6 of which are upper division in one major subject (anthropology, economics, geography, history, political science sociology). *See definition of teaching majors.* The following courses may not be applied to the teaching major in the field of the social sciences; Economics 14A-14B 18A-18B, 140, 160A-160B, 161, 162, 163, 164, 165; and all courses in merchandising.

*Teaching Minor Defined.* A teaching minor consists of 12 units in a given field, at least 6 of which must be in upper division courses. Teaching minors may be established in the following fields: art, business education, English, foreign language, general science, mathematics, music, social sciences (anthropology, economics, geography, history, political science, sociology), physical education, and speech arts.

*Teaching Minor in English.* Candidates for the teaching minor in English must show credit in English 1B and 3 elective units of lower division work; and in 6 elective units in upper division English. This credit must include 3 units in American literature, taken either in lower division or upper division. Credit in journalism and speech arts may not be used to fulfill the requirements for the English minor. Recommended: English 2D.

*Teaching Minor in Music.* Candidates for the teaching minor in music are required to take music aptitude tests at the time the minor is chosen and to enroll in at least one music activity each semester. In special cases this requirement may be waived by petition to the Music Department.

Applicants for music minors must maintain a grade average of *C* in all music courses. To Music L1A and L7A, required for the elementary credential, the following 12 units are added for the music minor. In the lower division, with the proper regard for course sequences, 6 units may be chosen from the following courses: Music 1B-1C-1D; L2A; L3A; 4A-4B; L6A, 8A-8B; L16; L17; L18; Aesthetics 1A-1B. In the upper division, not less than 6 units may be chosen from the following courses: Music 105A-105B; 106A; 107A; L116; L117; L118; 119A; 120A; 121A; Aesthetics 102A-102B.

*Teaching Minor in Physical Education.* Candidates for a teaching minor in physical education for women must show credit for Physical Education L1A, L1B, L1C, 51, L53, and 1 unit of sophomore activities and 6 units elected from Physical Education L157A, L157B, L161, and 170 in the upper division.

Candidates for a teaching minor in physical education for men must show credit for Physical Education L1A, L1B, L1C, L1D, L53, and L62A in the lower division; and 6 units elected from Physical Education L156A, L156B, L161, 170 or L190 in the upper division.

**Major and Minor Credential Requirements**

1. **Kindergarten-Primary Credential:** Two teaching minors are required.
2. **The general elementary school credential:** Two teaching minors are required.
3. **The general junior high school credential:** A teaching major and a teaching minor *in subjects taught in a high school are required.* The combination of a special secondary credential with the junior high school credential requires the completion of another teaching major than that required for a special secondary credential; the units required for this additional major may be included in the 12 additional units required for the second credential.
4. **A special secondary credential:** The completion of the major in the special subject field (*see detailed outlines of curricular patterns for credentials*) and a teaching minor are required.
5. **Credit limitations:** A maximum of 40 units of credit in one subject matter field may be applied toward the requirements for the A.B. degree.

**Preparation for Graduate Work.** Students who take the A.B. degree with a special credential and who contemplate doing graduate work for a master's degree in an academic field at another institution of higher learning, will find it advantageous to use their electives to lay a foundation for that work. A student who plans to do graduate work in the field of his major is advised to so arrange his electives as to complete the equivalent of the liberal arts major to avoid the necessity of making up an undergraduate deficiency.

**Political Science.** The course in Political Science 101 or its equivalent is required of all graduates of the college or those securing a teaching credential through the college. The following courses are accepted as equivalents: Political Science 113 or 175A-175B; History 171A-171B or 173A-173B.

**Upper Division Course Requirement.** At least 40 units in upper division courses must be completed, 30 of which must be earned after all lower division requirements have been satisfied.

**Teacher Education Curricula and Teaching Credentials.** The college offers curricula leading to the A.B. degree with authorization to recommend candidates for the following teaching credentials:

1. **Kindergarten-Primary Credential** authorizing the holder to teach in the kindergarten and in grades one, two and three of any elementary school in California.
2. **General Elementary School Credential** authorizing the holder to teach any or all subjects in all eight grades of any elementary school in California.
3. **General Junior High School Credential** authorizing the holder to teach any or all subjects in the seventh, eighth, and ninth grades of any elementary or secondary school in California. It will be advantageous to the student to secure this credential in combination with the elementary school credential, one of the special secondary credentials, or in combination with additional course requirements in the teaching major and in education as a preparation for graduate work for the general secondary credential. *Candidates for the latter type of combination should consult the Dean of Education regarding requirements.*
4. **Special Secondary Credential in Art** authorizing the holder to teach art subjects in any grade of the public schools of California.
5. **Special Secondary Credential in Business Education** authorizing the holder to teach commercial subjects in any grade of the public schools of California.
6. **Special Secondary Credential in Music** authorizing the holder to teach music in any grade of the public schools of California.
7. **Special Secondary Credential in Physical Education** authorizing the holder to teach physical education in any grade of the public schools of California.

8. **Special Secondary Credential in Speech Arts.** See page 35.

9. **Administration and Supervision Credentials:** Candidates desiring to qualify for administration and supervision credentials will meet the credential requirements as outlined in State Department of Education Bulletin, Volume XI, No. 2, June, 1942, *Regulations Governing Granting of Credentials for Public School Service in California.* At least one-half of the work required for this credential shall be done in San Diego State College if the college is to recommend the candidate for the credential. Further information will be furnished by the college upon request by the applicant.

**Combination of Credentials.** In the case of students seeking more than one teaching credential, the curriculum for each credential must be completed in full, with only such exceptions as are indicated in the requirements. For each credential in addition to one, at least 12 additional units of credit must be earned, this work to be in electives in nonprofessional fields only, after the basic curriculum requirements have been satisfied.

A combination of the elementary school credential with the junior high school credential may be secured by completing the requirements for the elementary school credential and the following additional requirements: (a) a teaching major; (b) Education 100B; (c) a minimum of 3 units of practice teaching in a junior high school or the equivalent; (d) a course in Education 115B, *Secondary Education;* (e) a total minimum of 132 units.

A candidate for either the general elementary credential or the kindergarten-primary credential may secure the other credential subsequently or concurrently by taking 12 additional units. Four of these units shall be in directed teaching (Education 116) at the new level, 4 in methods at that level, and 4 as prescribed by the Dean of Education.

**Limited Electives.** Credit for limited and vocational courses will be allowed in fulfillment of the requirements for the A.B. degree whenever they are required in any credential pattern completed by the student. A maximum of 6 units of credit in the following courses may be allowed to fulfill the requirements of any other credential pattern only after the student has received permission from the Dean of Education: Art L7, L14A; Economics L10A, L10B, L15A, L15B, L16A, L16B, L65A, L65B, L129, L163; Engineering L22, L23; English L1A, L1AA, L8; Health Education L151; Journalism L53A, L53B, L153A, L153B; Library Science L10; Mathematics LA, LB; Merchandising, all courses; Music L1A, L2A, L3A, L6A, L7A, L16A-B-C-D, L17A-B-C-D, L18A-B-C-D, L28A-L28B, L116A-B-C-D, L117A-B-C-D, L118A-B-C-D; Physical Education, all activity courses beyond the requirements specified in curricular patterns; Secretarial Training, all courses; and all courses numbered L40 or L45 if grade is below a B.

## Curricula Leading to Teaching Credentials

*All candidates in teacher education curricula should observe carefully the requirements for admission to teacher education and be prepared to meet them at the end of the sophomore year. Students in other colleges who contemplate transferring to San Diego State College should arrange their programs so as to meet the requirements of their particular curriculum as early as possible. See college calendar for dates when the fundamentals test will be given. See page 21 in this bulletin for requirements for admission to teacher training.*

### A.B. Degree with Kindergarten-Primary Credential

*Two teaching minors are required. See statement on page 22*

| FRESHMAN YEAR | Units | |
|---|---|---|
| **First Semester—** | | |
| Art 6A, Structure | 2 | |
| Biology 10A[1], General Biology | 3 | |
| English L1A[2], or L1AA[2], or 1B[2], Freshman English | 3 | |
| Physical Education, Freshman Activities [7] | ½ | |
| Health Education 1 or 2 | 2 | |
| Music L28A, Piano (or equivalent by examination) [8] | 1 | |
| Elective to meet requirements in Nat. Sci., Soc. Sci., and minors [3,4] | 5 | |
| **Second Semester—** | | |
| Biology 10B[1], General Biology | 3 | |
| English 1B, or 2 | 3 | |
| Music L1A, Musicianship—Fundamentals of Music | 3 | |
| Music L28B, Piano (or equivalent by examination) [8] | 1 | |
| Physical Education, Freshman Activities [7] | ½ | |
| Elective to meet requirements in Nat. Sci., Soc. Sci., and minors [3,4] | 5 | |
| | — | 32 |
| SOPHOMORE YEAR | | |

| Social Science 1A | 3 | |
| Elective to meet requirements in Nat. Sci., Soc. Sci., and minors [3,4,5] | 6 | |
| | — | 31 |

---

[1] Possible substitutions for the requirement in Biology 10A-10B:
- a. High school Biology (year course with laboratory work).
- b. Botany 2A-2B and Zoology 1A-1B—16 units.
- c. High school Botany and Zoology 1A-1B.
- d. High school Zoology and Botany 2A-2B.
- e. High school Botany and high school Zoology.
- f. Biology 1 and Physical Science 1A or 1B—6 units.

[2] Depending on result of Subject A test.

[3] See Subject Matter Requirements in the Lower Division for total requirements in English, Natural Sciences, Social Sciences and Mathematics. See page 17.

[4] Use these electives to meet requirements for minors if they are not English, General Science or Social Sciences.

[5] If 6 units in minor taken in freshman year, none needed in sophomore year.

[6] Candidates for an Elementary School Credential in combination with any other type of credential are required to do not less than 6 units of directed teaching in the elementary school.

[7] Folk Dancing and Rhythmic Skills are recommended for this credential.

[8] Piano may be taken at any time during the first three years. The requirement may be met by examination.

### JUNIOR YEAR

| | | Units | |
|---|---|---|---|
| **First Semester—** | | | |
| Education 102B, Child Growth and Development | | 3 | |
| Education L147B, Education Practicum—Primary Level | | 12 | |
| Teaching of Art | 1 | | |

**A.B. Degree With Special Secondary Credentials in Music.** Students intending to become applicants for this credential must show evidence of musical ability, before entering the course. They must be able to play artistically upon the piano, music of the grade of the simpler *Songs Without Words* of Mendelssohn or else possess a corresponding degree of proficiency in voice or an orchestral instrument. No credit is given to music majors for the basic courses of Music L1A and Music L7A, but if a deficiency exists in the field of general musicianship, the student will be required to take either or both of these courses without credit.

All music majors are required to enroll in two musical activities each semester. In special cases this requirement may be waived by petition to the Music Department. All students are required to pass examinations in applied music in order to receive credit. No credit is allowed to majors in voice or orchestral instruments for any work in piano which is below the level of artistic hymn playing.

Applicants for the Special Secondary Credential in Music must maintain a grade average of *C* or better in music courses.

All students majoring in music are required to pass a comprehensive examination in this field during the senior year.

This course leads to the A.B. degree with a Special Secondary Credential in Music which will authorize the holder to teach music in the elementary, junior and senior high schools of the State.

A maximum of 40 units in Music may be used toward the A.B. degree. Of these 40 units a maximum of 3 may come from the field of musical activities: band, choir, chorus, glee clubs and orchestra.

FRESHMAN YEAR

**First Semester—**

| | Units |
|---|---|
| English L1A,[1] 1B,[1] | 3 |
| Health Education 1 or 2, Health and Social Adjustment | 2 |
| History 4A or 8A | 3 |
| Aesthetics 1A, Survey of Music | 2 |
| Music 1B, Music Reading and Ear Training | 2 |
| Music L18, Individual Study of Piano or Organ | 1 |
| Physical Education | ½ |
| | 13½ |

**Second Semester—**

| | |
|---|---|
| [2]English | 3 |
| Geography 1, Elements (Natural Science) | 3 |
| Social Science 1A, Contemporary Pol., Soc. and Econ. Problems | 3 |
| Aesthetics 1B, Survey of Music | 2 |
| Music 1C, Advanced Music Reading and Ear Training | 2 |
| Music L3A, Woodwind Instrument Class | 1 |
| Music L18B, Individual Study of Piano or Organ | 1 |
| Physical Education | ½ |
| | 15½ |

---

[1] Depending on result of Subject A test.

## SOPHOMORE YEAR

**First Semester—**

| | Unit |
|---|---|
| Music 1D, Advanced Music Reading and Ear Training | 2 |
| Music L2A, String Instrument Class | 1 |
| Music 4A, Elementary Harmony | 3 |
| Music L18c, Individual Study of Piano or Organ | 1 |
| *Natural Sciences | 3 |
| Geography 2, Regions (Social Science) | 3 |
| Physical Education | ½ |
| Elective | 1 |
| | 14½ |

**Second Semester—**

| | |
|---|---|
| Music 4B, Elementary Harmony | 3 |
| Music L6A, Individual Study of an Orchestral Instrument | 1 |
| Music L17, Individual Study of Voice | 1 |
| Music L18, Individual Study of Piano or Organ | 1 |
| Psychology 1A, General | 3 |
| *Natural Sciences | 6 |
| Physical Education | ½ |
| | 15½ |

## JUNIOR YEAR

**First Semester—**

| | |
|---|---|
| Music 105A, Advanced Harmony and Composition | 3 |
| Education L117A, Music in Elementary School | 2 |
| Education L145, Organization and Administration of Music Education | 2 |
| Education 102A, Measurement in Education | 3 |
| Education L100A, Methods and Materials of Instruction | 3 |
| Upper Division Minor | 3 |
| | 16 |

**Second Semester—**

| | |
|---|---|
| Political Science 101, American Institutions (or substitute) | 2–3 |
| Music 105B, Advanced Harmony and Composition | 3 |
| Music L117A, Advanced Individual Study of Voice | 1 |
| Education L100B, Methods and Materials of Instruction | 3 |
| Education 102B, Child Growth and Development | 3 |
| Upper Division Minor | 3 |
| | 15–16 |

## SENIOR YEAR

**First Semester—**

| | |
|---|---|
| Music 107A, Form and Analysis | 2 |
| Music 119, Instrumental Conducting | 1 |
| Music L117B, Advanced Individual Study of Voice | 1 |
| Aesthetics 102A, History of Music | 2 |
| Education L116, Directed Teaching | 6 |
| **Music Activities | 2 |
| | 14 |

---

* See Subject Matter Requirement in the Lower Division on page 18.

** NOTE.—A maximum of 3 units is credited toward the Special Secondary Credential in Music for music activities carried on throughout the four year course. These activities: band, choir, glee clubs, chorus and orchestra are an integral part of the work of the course and each music major is expected to participate in at least two of these each semester unless excused by the Music Department.

| **Second Semester—** | Units |
|---|---|
| Music 106A, Counterpoint | 2 |
| Music L117C, Advanced Individual Study of Voice | 1 |
| Music 120A, Vocal Conducting | 1 |
| Music 121A, Instrumentation | 2 |
| Aesthetics 102B, History of Music | 2 |
| Education 115B, Secondary Education | 3 |
| Education L116, Directed Teaching | 3 |
| **Music Activities | 1 |
| | 15 |

---

[1] See lower division requirements, page 18.

# PROFESSIONAL AND PREPROFESSIONAL CURRICULA

*Professional and preprofessional courses, ranging in length from two years to three and four years of collegiate work, are offered. The following curricular outlines meet typical requirements for admission to professional schools of law, medicine, dentistry, nursing, pharmacy, optometry, social service, public service, journalism, agriculture, and engineering. The student should modify these suggested outlines of study whenever the peculiar requirements of the professional school of his choice makes it seem advisable for him to do so.*

*The degree curricula in liberal arts may be modified to include the course outlines which follow. For a complete statement of the requirements for the junior certificate and the degree see page 17 and following pages.*

## Prelegal Curriculum

**The entrance requirements of law colleges range from two years to three and four years of prelegal work. The lower division requirements of the liberal arts curricula should be met in full whether the curriculum extends over a period of two, three, or four years.**

The following curriculum meets the recommendations of standard American law colleges for a broad and liberal education in those fields of human knowledge commonly involved in human affairs and those which have cultural and disciplinary values. For the majority of prelegal students a general major with concentration in economics, as provided for in the following curriculum, furnishes the most effective preparation for later professional study in law and for later activities in the field of business. However, for some students a major, or at least strong minors, in English, history, or political science, may provide a suitable preparation.

The high school program should include the following subjects: elementary algebra, 1 unit (2 semester credits); plane geometry, 1 unit; intermediate algebra, 1 unit; foreign language, 3 units in one language or 2 units in each of two languages.
Following is a recommended arrangement of courses:

| FRESHMAN YEAR | Units | |
|---|---|---|
| Physical Education | ½ | ½ |
| Health Education 1 or 2 | -- | 2 |
| *Foreign Languages (if needed to complete requirement) | 0–5 | 0–5 |
| *Natural Science | 3–5 | 3–5 |
| *English | 3 | 3 |
| Economics 14A-14B | 3 | 3 |
| Psychology 1A | 3 | -- |
| Elective[1] | 0–3 | 0–4 |
| | 15½ | 15½ |

| SOPHOMORE YEAR | | |
|---|---|---|
| Physical Education | ½ | ½ |
| *Additional Natural Science (if needed to meet requirement) | 3 | -- |
| Economics 1A-1B | 3 | 3 |
| Philosophy 3A-3B, 5A-5B, or Mathematics 3A-3B | 3 | 3 |
| Political Science 1A-1B or 71A-71B | 3 | 3 |
| Elective[1] | 3 | 6 |
| | 15½ | 15½ |

---

* See lower division requirements, page 17.

[1] Recommended elective: History, 6 units, taken in the freshman or sophomore year.

| JUNIOR YEAR | Units | |
|---|---|---|
| Economics 121 | 3 | -- |
| Economics 133 | 3 | -- |
| Economics Elective[2] | -- | |
| History 151A-151B or 175A-175B | 3 | |
| Political Science 111 and 113 or 143A-143B | 3 | |
| Sociology 105, 106 | 3 | |
| Elective[3] | 3 | |
| | 15 | 1 |

| SENIOR YEAR | | |
|---|---|---|
| Economics 100A | 3 | -- |
| Economics Electives[2] | -- | |
| History 111A-111B or 121A-121B | 3 | |
| Political Science 175A-175B | 3 | |
| Elective[3] | 6 | |
| | 15 | 15 |

## Preoptometry Curriculum

The high school program should include the following subjects: elementary agebra (year) unit; plane geometry, 1 unit; algebraic theory, 1 unit; trigonometry, ½-unit physics, 1 unit; chemistry, 1 unit; foreign language, 3 units.

The following curriculum prepares for junior standing in university schools optometry:

| FRESHMAN YEAR | Units | |
|---|---|---|
| Physical Education | ½ | |
| Health Education 1 or 2 | 2 | -- |
| *Foreign Language (if needed to complete requirements) | 3 | 3 |
| Physics 2A-2B | 3 | 3 |
| Physics 3A-3B | 1 | 1 |
| Psychology 1A | 3 | -- |
| Speech Arts 1A-1B | 3 | 3 |
| Social Science 1A | -- | 3 |
| Elective | -- | 3 |
| | 15½ | 16 |

| SOPHOMORE YEAR | | |
|---|---|---|
| Physical Education | ½ | |
| Chemistry 1A-1B | 5 | 5 |
| Mathematics 3A-3B | 3 | 3 |
| *Social Science | 3 | 3 |
| Physiology 1A and 1C[1] | -- | 5 |
| Elective | 4 | -- |
| | 15½ | 16 |

## Premedical Curriculum

The entrance requirements of medical colleges ordinarily range from three to fou years of premedical work. The lower division requirements of the Liberal Arts cur ricula include the general requirements of standard medical colleges and shoul therefore be met in full whether the curriculum extends over a period of three or of fou years. However, a student who has definitely decided not to become a candidate fo a degree in San Diego State College may substitute the lower division requirements of the institution to which he expects to transfer in place of the following courses marked with an asterisk. All plans for premedical work should include an arrangement of courses to meet the requirements of the medical college which the student expects to enter.

A student who is pursuing a four-year premedical curriculum should major in chemistry or zoology in his junior and senior years, and must meet all upper division requirements for the A.B. degree in the Liberal Arts curricula.

---

[1] If not available, Zoology 20 may be substituted.
[2] To be chosen from the following list: Economics 100B, 111, 131, 135, 150.
[3] Recommended electives: English, philosophy, psychology, economics.
* See lower division requirements, page 17.

The high school program should include the following subjects: elementary algebra, 1 (year) unit; plane geometry, 1 unit; chemistry, 1 unit; physics, 1 unit; French or German, 3 units. Two units of Latin are recommended.

Following is a recommended arrangement of courses:

| FRESHMAN YEAR | Units | |
|---|---|---|
| Physical Education | ½ | ½ |
| Health Education | 2 | -- |
| Chemistry 1A-1B | 5 | 5 |
| *English Composition | -- | 3 |
| **French or German (if needed to meet requirement)[2] | 0–5 | 0–5 |
| Psychology 1A | 3 | -- |
| Social Science 1A | -- | 3 |
| **Elective | 0–5 | 0–5 |
| | 15½ | 16½ |

| SOPHOMORE YEAR | Units | |
|---|---|---|
| Physical Education | ½ | ½ |
| Zoology 1A-1B | 4 | 4 |
| Chemistry 7-8 | 3 | 3 |

| **Additional Year Course[3] | 3 | 3 |
| **Elective | -- | 3 |
| | 16½ | 16½ |

| JUNIOR YEAR | Units | |
|---|---|---|
| Political Science 101 | 2 | -- |
| Physics 2A-2B | 3 | 3 |
| Physics 3A-3B | 1 | 1 |
| Chemistry 105 | 3 | -- |
| Zoology 100 | -- | 3 |
| Zoology 100D | -- | 1 |
| Zoology 106 | 4 | -- |
| Electives | 2 | 5 |
| | 15 | 15 |

| SENIOR YEAR | Units | |
|---|---|---|
| Upper division requirements and electives for the major, the minors and the degree (see page 20) | 15 | 15 |
| | 15 | 15 |

## Prenursing Curriculum

A student who plans to complete a curriculum in nursing leading to a degree and a certificate in nursing in another collegiate institution should ascertain the lower division (junior certificate) requirements of that institution. The lower division requirements of the institution to which the student will transfer may be substituted for the following courses marked with an asterisk wherever the requirements differ.

The high school program should include the following subjects: elementary algebra, 1 (year unit); plane geometry, 1 unit; chemistry, 1 unit; physics, 1 unit; French or German, 3 units; domestic science (foods), 1 unit; 2 units of Latin are recommended. The following is a recommended arrangement of courses:

| FRESHMAN YEAR | Units | |
|---|---|---|
| Physical Education | ½ | ½ |
| Health Education | -- | 2 |
| Chemistry 2A-2B | 3 | 3 |
| Psychology 1A | 3 | -- |
| *English Composition | 3 | 3 |
| **French or German (if needed to complete requirement) | 0–5 | 0–5 |
| Social Science 1A | -- | 3 |
| **Elective | 0–6 | 0–5 |
| | 15½ | 16½ |

| SOPHOMORE YEAR | Units | |
|---|---|---|
| Physical Education | ½ | ½ |
| Psychology 1B | 3 | -- |
| Economics 1A-1B | 3 | 3 |
| Bacteriology 1 | 4 | -- |
| **Additional Year Course | 3 | 3 |
| Physiology 1A, 1C | -- | 5 |
| Zoology 8 | 3 | -- |
| Elective | -- | 4 |
| | 16½ | 15½ |

---

[1] If not available, Zoology 20 may be substituted.

[2] German if the major is Chemistry.

[3] Mathematics 3A-3B or satisfactory substitute if the major is Chemistry.

* Chosen from English 1B and 2A, 2B, 2C, 2D, 2E, 2F.

** See lower division requirements, page 17.

## Predental Curriculum

Candidates for a degree in dentistry should ascertain the entrance requirements of th dental college to which they expect to transfer and should make whatever changes in the following typical requirements that may seem desirable in satisfying the requirements of the dental college.

The high school program should include the following subjects: elementary algebra, 1 (year) unit; plane geometry, 1 unit; chemistry, 1 unit; physics, 1 unit; foreign language, 3 units in one language.

The following arrangement of courses is recommended:

| FRESHMAN YEAR | Units | |
|---|---|---|
| Physical Education | ½ | ½ |
| Health Education | -- | 2 |
| Chemistry 1A-1B | 5 | 5 |
| *English | 3 | 3 |
| Psychology 1A | 3 | -- |
| **Foreign language (if needed to complete requirement) | 0–5 | 0–5 |
| **Elective | 0–5 | 0–5 |
| | 16½ | 15½ |

| SOPHOMORE YEAR | Unit | |
|---|---|---|
| Physical Education | ½ | ½ |
| Chemistry 7-8 | 3 | 3 |
| Physics 2A-2B or Zoology 1A-1B | 3–4 | 3–4 |
| **Social Science Year Course | 3 | 3 |
| **Social Science 1A | 3 | -- |
| **Additional Year Course | 3 | 3 |
| Elective | -- | 3 |
| | 15½ | 16½ |

## Preagricultural Curricula

The high school program should include the following subjects: elementary algebra 1 (year) unit; plane geometry, 1 unit; algebraic theory, 1 unit; trigonometry, ½ unit; chemistry, 1 unit; physics, 1 unit; mechanical drawing 1 unit; foreign language, 3 units in one language.

Students should ascertain the lower division requirements of the agricultural college they expect to enter.

The following arrangement of courses is recommended:

### Curriculum in Plant Science

| FRESHMAN YEAR | Units | |
|---|---|---|
| Physical Education | ½ | ½ |
| Health Education | 2 | -- |
| Chemistry 1A-1B | 5 | 5 |

## Preengineering Curriculum

This curriculum is intended for students planning an intensive specialization in particular branches of engineering.

The high school program should include the following subjects: elementary algebra, 1 (year) unit; plane geometry, 1 unit; algebraic theory, 1 unit; solid geometry, ½ unit; trigonometry, ½ unit; chemistry, 1 unit; physics, 1 unit; mechanical drawing, 1 unit.

Students should ascertain the requirements of the engineering college they expect to enter.

---

[1] See prerequisites, page 62.
[2] Foreign language if not completed in high school.
* Chosen from English 2A, 2B, 2C, 2D, 2E, 2F or 2G.

## Curriculum in General Engineering

A four-year curriculum is available at San Diego State College leading to the A.B degree in General Engineering. The curriculum is designed to provide the studen with the fundamentals of an engineering and technical education without intensiv specialization. It is planned to provide considerable elective opportunities, which will enable the student to adapt the program to his particular needs, with emphasis on one branch of engineering training, science, or business.

All students with aptitude for professional engineering and the financial means are urged to complete the requirements for the degree in mechanical, electrical, or civil engineering in our state university or at some other institution having a standard engineering school. There is, however, an increasing need for college graduates in fields of engineering, engineering science, or business engineering, where an intensive specialized training is not necessary. Students with training in a general engineering curriculum may easily adapt their programs to provide preparation for work in various engineering fields, as the electrical, heating and ventilation, public utility, telephone, and aeronautical industries among many others. Preparation is also available for work in chemical engineering, engineering physics, and engineering economics. Students may also use this curriculum as an undergraduate preparation for additional work in certain graduate engineering colleges. Students who desire to prepare for teaching of engineering and allied subjects in the secondary schools and the junior col-

---

* Certain upper division engineering courses may be chosen to advantage by properly qualified students.

† Geology 1A is required in the civil engineering curriculum.

leges may use this curriculum, along with certain courses in education, to satisfy the undergraduate requirements for the general secondary credential.

The curriculum is not a specialized sequence of course work in specific engineering fields. If such specialized training is desired in the engineering fields, transfer to various colleges offering such work is recommended after completion of the lower division.

The high school program should include the following subjects: elementary algebra, 1 (year) unit; plane geometry, 1 unit; algebraic theory, 1 unit; solid geometry, ½ unit; trigonometry, ½ unit; chemistry, 1 unit; physics, 1 unit; mechanical drawing, 1 unit.

### LOWER DIVISION

All college requirements for the A.B. degree must be met except foreign language.

| FRESHMAN YEAR | Units |
|---|---|
| Chemistry 1A-1B | 10 |
| Physics 1A-1B | 6 |
| Mathematics 3A-3B | 6 |
| English Composition | 3 |
| Social Science 1A | 3 |
| Health Education | 2 |
| Physical Education | 1 |
| Psychology 1A | 3 |
| | 34 |

| ** SOPHOMORE YEAR | Units |
|---|---|
| English Composition | 3 |
| Physics 1C-1D | 6 |
| Mathematics 4A-4B | 6 |
| Electives chosen from the following | 9 |
| Engineering 1A-1B | |
| Engineering 21 | |
| Engineering 22 | |
| Geology 1A | |
| Chemistry 7-8 | |
| *Social Science | 6 |
| Physical Education | 1 |
| | 31 |

### UPPER DIVISION

During the first semester of his junior year the student must prepare and submit for approval of his advisors a tentative program for the remainder of his undergraduate work.

Complete lower division requirements. (See page 17.)
Political Science 101.

Complete the following major in General Engineering: a total of 36 upper division coordinated units in three departments chosen from the following list (not more than 15 units may be chosen from one department).

The organization of the program of each major student must follow a definite plan approved by the proper advisors. Additional courses will be added from time to time. Required of all students (20 units):

| | Units |
|---|---|
| Engineering 100A-100B, Electrical Engineering | 6 |
| Engineering 105, Hydraulics | 3 |
| Engineering 123, Materials of Engineering Construction | 2 |
| Engineering 128 Heat Power Engineering | 3 |
| Physics 105A-105B, Analytical Mechanics | 6 |

Electives: 16 units, of which at least 6 units must be chosen from one of the following departments: chemistry, geology, astronomy, mathematics, or economics.

| | |
|---|---|
| Chemistry 110A-110B, Physical | 6 |
| Chemistry 105A, Quantitative Analysis | 3 |
| Chemistry 112A-112B, Industrial Chemistry | 6 |
| Chemistry 144, Industrial Analysis | 3 |
| Physics 110A, Adv. Electricity | 3 |
| Physics 110B, Electromagnetism-electronics | 3 |
| Physics 107A-107B, Electrical Measurements | 2 |
| Physics 108, Modern Physics | 3 |

---

* Recommended Economics 1A-1B.
** See lower division requirements, page 17.

| | |
|---|---|
| Physics 112, Advanced Heat-Thermodynamics | 3 |
| Physics 112L, Heat-Pyrometry Lab. | 1 |
| Physics 114, Acoustics | 3 |
| Geology 100, Structural Geology | 3 |
| Geology 101, Problems in Geology | 4 |
| Astronomy 100, Navigation-Astronomy | 3 |
| Astronomy 107, Least Squares | 3 |
| Mathematics 118, Advanced Calculus | 3 |
| Mathematics 119, Differential Equations | 3 |
| Mathematics 124, Vector Analysis | 3 |
| Mathematics 140, Probability-Statistics | 3 |
| Economics 107, Credit and Credit Institutions | 3 |
| Economics 121, Business Administration | 3 |
| Economics 123, Principles of Marketing | 3 |
| Economics 131, Public Finance and Taxation | 3 |
| Economics 133, Corporation Finance | 3 |
| Economics 135, Money and Banking | 3 |
| Economics 140, Statistical Methods | 3 |
| Economics 150, Labor Problems and Industrial Relations | 4 |
| Economics 171, Transportation | 3 |
| Industrial Economics | 3 |
| (Economics 14A-14B recommended) | |

A student who desires to satisfy the undergraduate requirements for the general secondary teaching credential should include in his upper division work, in addition to the engineering major, certain courses in education which will partially satisfy the credential requirements. In order to conform to the usual university requirements this work should be chosen from Education 102A-102B and Education 115A-115B. Consultation with the Dean of Education or the Dean of Liberal Arts is recommended.

## Public Service Curricula—Public Administration

As the vocational demand for students of public administration is comparatively limited the student of public administration will do well to prepare himself also for a related field of work for which there is not only a cultural but also a vocational demand. The candidate for a public administrative position who is equipped for a career in a professional, scientific or technical field that is common to both public and private enterprise has a distinct advantage. The special courses in public administration listed in the following curriculum are supplementary courses designed for exploration and orientation. The curriculum as a whole provides for a major in economics, outlines a general preparation for the public service in social science fields and furnishes a basis for more highly specialized graduate courses in the field of public administration.

The high school program should include the following subjects: elementary algebra, 1 (year) unit; plane geometry, 1 unit; intermediate algebra, 1 unit; foreign language, 3 units in one language.

The following arrangement of courses is recommended:

| FRESHMAN YEAR | Units | |
|---|---|---|
| Physical Education | ½ | ½ |
| Health Education 1 or 2 | -- | 2 |
| *English | -- | 3 |
| *Foreign Language (if needed to complete requirements | 0–5 | 0–5 |
| Psychology 1A | 3 | -- |
| *Natural Science | 3–5 | 3–5 |
| Economics 14A-14B | 3 | 3 |
| Elective | 0–5 | 0–4 |
| | 16½ | 15½ |

| SOPHOMORE YEAR | Units | |

## Public Service Curricula—Clerical and Fiscal Service

The curriculum in Clerical and Fiscal Service leads to the A.B. degree with a major in commerce. It outlines a course of training for clerical and clerical-executive service in accounting and auditing, budgeting, statistical work and miscellaneous financial and fiscal work.

The high school program should include the following subjects: elementary algebra, 1 (year) unit; plane geometry, 1 unit; intermediate algebra, 1 unit; foreign language, 3 units in one language.

| FRESHMAN YEAR | Units | |
|---|---|---|
| Physical Education | ½ | ½ |
| Health Education 1 or 2 | 2 | -- |

## Public Service Curricula—Social Work

The professional curriculum in social service prepares for admission to graduate work in recognized American schools of social work. This curriculum should be pursued by those who plan careers in Federal, State and local welfare work; social work in public schools including preparation for a teaching credential; family and children's private case work agencies; social settlement work; county probation work; child welfare agencies; statistical and investigational work in private and public agencies; work in public institutions for the defective and delinquent; medical social service and psychiatric social work in hospitals and clinics; executive positions in social work; and social work in numerous other organizations.

The lower division requirements of the Liberal Arts curricula include the general requirements of recognized professional schools of social work and should therefore

---

* See lower division requirements, page 17.

[1] See minor requirements, page 20. Students who desire to prepare for a graduate major in political science should elect Political Science 111 and 113 and may satisfy requirements for a major in economics by substituting Political Science 143A-143B for elective courses in economics.

[2] Recommended electives: Economics 18A-18B and Secretarial Training 3A.

[3] See minor requirements, page 20.

ordinarily be met in full. However, a student who has definitely decided not t become a candidate for a degree in San Diego State College may substitute the lowe division requirements of the institution to which he expects to transfer whereve the requirements differ.

A student who pursues a four-year curriculum in San Diego State College shoul major in Social Science and minor in Psychology.

The following subjects should be completed in high school: elementary algebra, (year) unit; plane geometry, 1 unit; algebraic theory, 1 unit; foreign language, units in one language.

Following is a recommended arrangement of courses:

| FRESHMAN YEAR | Units | |
|---|---|---|
| Physical Education | ½ | ½ |
| Health Education 1 or 2 | -- | 2 |
| Biology 10A-10B | 3 | 3 |
| *Foreign Language (if needed to complete requirement) | 0–5 | 0–5 |
| Psychology 1A | 3 | -- |
| *Speech Arts 1A-1B or *English elective | 3 | 3 |
| Elective[1] | 1–6 | 2–7 |
| | 15½ | 15½ |

| SOPHOMORE YEAR | Unit | |
|---|---|---|
| Physical Education | ½ | |
| Economics 1A-1B | 3 | 3 |
| Political Science 1A-1B or 71A-71B | 3 | 3 |
| *Additional Year Course | 3 | 3 |
| *Additional Natural Science (if needed to meet requirement) | 3 | -- |
| Sociology 50A | 3 | -- |
| Sociology 50B | -- | 3 |
| Elective[1] | -- | 3 |
| | 15½ | 15 |

| Elective[2] | 3 | 9 |
| | 15 | 15 |

## Public Service Curricula—Inter-American Relations

The purpose of this curriculum is (1) to furnish a basis for a more intelligent and effective understanding of the opportunities and problems of international relations in the western hemisphere; (2) to provide facilities for a basic education and training for a business or professional career whch involves international relations.

Competition for opportunities of service in international affairs is severe. The student who plans a career in this field should therefore organize his electives to provide for a concentration in some area of work in which there are greater vocational opportunities. Preparation for employment as a foreign representative of an American business organization implies concentration in economics. The student who pursues this curriculum as a guide for training for the foreign service in consular, vice consular, secretarial, and other public offices should include additional courses in foreign language, history, political science, geography, and economics to furnish more effective preparation for the comprehensive competitive examinations required for appointment to the Service and for entrance to the Foreign Officers Training School at Washington, D. C.

---

* See lower division requirements, page 17.

[1] Recommended electives: Economics 14A-14B, 6 units; Psychology 4A, 3 units.

[2] Recommended electives: Anthropology 152, 3 units; Economics 131, 150, 3 units each; History 171A-171B, 6 units; Sociology 106, 108, 198, 3 units each.

See minor requirements and U. S. Constitution requirement, page 20.

he proper faculty adviser should be consulted for revisions and additions to this rriculum to meet individual needs and objectives.

he high school program should include the following subjects: algebra, 1 (year) nit; plane geometry, 1 unit; intermediate algebra, 1 unit; foreign language, 3 units one language.

he following arrangement of courses is recommended:

| FRESHMAN YEAR | Units | |

## ublic Service Curricula—Foreign Service

curriculum of training for the foreign service in consular, vice consular, and other ffices is available on request. This curriculum outlines preparation for competitive xaminations required for appointment to the Service and for entrance to the Foreign fficers' Training School at Washington, D. C.

## urriculum in Journalism

Courses in journalism have been discontinued until further notice.)

broad, cultural education, and specific information and understanding in fields with hich the journalist is largely concerned, are essential to an effective training for ournalism. Introductory training in the principles and practices of journalistic riting is offered only after a good foundation in correct speaking and writing of nglish has been laid.

ractical training in news reporting and editing for student publications and for the aily and weekly press is emphasized.

---

* See lower division requirements, page 17.

[1] (a) Restricted electives: The social science major or the general major recom- ended. The social science major requires 24 units of upper division work, including a oncentration of 12 units in one social science and 6 units in each of two others. See lso minors requirement, page 20. The general major requires 36 units of upper divi- ion work in any three fields, subject to departmental approval. Not more than 15 units any field will be counted as part of the major. Minors requirement may be included the general major.

(b) Free electives—Recommended: Aesthetics 51 (Survey of Latin-American rt), Anthropology 151B (Middle American Indian), English 104 (Survey of Latin- merican Literature).

The high school program should include the following subjects: elementary algebra, (year) unit; plane geometry, 1 unit; foreign language, 3 units in one language; En lish, 4 units; natural science, 1 or 2 units in the junior or senior year.

Following is a recommended arrangement of courses:

| FRESHMAN YEAR | Units | |
|---|---|---|
| Physical Education | ½ | ½ |
| Health Education | -- | 2 |
| *English | 3 | 3 |
| History 4A-4B or 8A-8B or Political Science 1A-1B or 71A-71B | 3 | 3 |

| Journalism[4] | 2 | 2 |
| Journalism 199 | -- | 2 |
| Political Science 101 (if not included in the major) | 2 | |
| Elective | 2 | 2 |
| | 15 | 15 |

---

* See lower division requirements for junior standing, page 17.

** Six units of Economics 1A-1B and 6 units of Political Science 1A-1B or 71A-71 may be substituted for Social Science 1A.

[1] Recommended electives: Aesthetics 1A-1B, 4 units; Aesthetics 5, 2 units; Anthropology 50A-50B, 6 units; Geography 2, 3 units; Sociology 50A- 50B, 6 units; Secretaria Training, L2A, or equivalent; Speech Arts 1A, 3 units.

[2] Recommended electives: Journalism 153A-153B, 2 or more units.

[3] The social science major or the general major recommended. The social scienc major requires 24 units of upper division work, including a concentration of 12 units i one social science and 6 units in each of two others. See also minors requirement, Bulletin page 20. The general major requires 36 units of upper division work in any thre fields, subject to departmental approval. Not more than 15 units in any field wil be counted as part of the major. Minors requirement may be included in the genera major. English and one or more social sciences are required for the general major i the curriculum in Journalism.

[4] Not more than 6 units of Journalism 153A-153B and L153A-L153B may b counted toward the A.B. degree and not more than 4 units of Journalism 153C-153I may be counted.

# TWO-YEAR COMPLETION CURRICULA

*These curricula are organized for students who have not yet qualified for enrollment in a four-year curriculum leading to the Bachelor of Arts degree. Regularly qualified students who prefer a shorter completion course will take only such two-year courses as may be required in the specialized curricula they are following. Upon satisfactory completion of the requirements in these two-year curricula the student is granted a diploma. By maintaining a high grade of scholarship the student may secure the opportunity of transfer to a four-year program. Such transfers are made by action of a faculty committee after the student has completed one or more semesters in a two-year curriculum. Upon transfer the credits earned in most courses in the two-year program in which grades of A and B have been received are allowed to count toward the Bachelor of Arts degree.*

*Courses numbered L40 and L45 are not open for credit to students in a four-year curriculum.*

*The following special courses are designed for students enrolled in a two-year completion curriculum: Astronomy L40; Biology L40; Economics L45A-L45B; English L40A, L40B, L45, L46; Geography L40A, L40B; Geology L40; Health Education L40; Mathematics L40A, L40B; Physical Science L40; Psychology L45; Social Science L40, L45; Sociology L40; Speech Arts L40.*

*Any other course designated by the prefix "L" (e.g. Art L7) is regularly open to students enrolled in a two-year completion curriculum. See Limited Electives, page 19. The following courses are also regularly open to two-year students: Aesthetics 1A, 1B, 2; Art 6A, 6B, 8A, 8B, 11A, 11B, L14A, 14B, 52A, 61B, 94A, B; Economics 15A-15B, 16A-16B, 65A-65B; Health Education 1, 2; Mathematics C, D, E, S; Merchandising (all courses); Music 1B, 11A, 11B, 11C, 11D, 12A, 12B, 12C, 12D, 13A, 13B, 13C, 13D, 15A, 15B, 15C, 15D, 20A, 20B, 20C, 20D, 26A, 26B, 26C, 26D, 27A, 27B; Secretarial Training (all courses).*

*A two-year student may elect any other college lower division subject under guidance where his high school scholarship record, or his scores in the aptitude and achievement tests, or his college record indicates probable success in that field. He must, of course, meet all prerequisites for the course under consideration.*

## Two-year Curriculum in Liberal Arts

| FIRST YEAR | Units Sem. I | Units Sem. II |
|---|---|---|
| English L40A or L40B or L40C | 3 | 3 |
| **Physical Science L40 or equivalent | -- | 3 |
| **Biology L40 or equivalent | 3 | -- |
| Social Science L40 | 3 | -- |
| Sociology L40 | -- | 3 |
| Health Education 1 or 2 | -- | 2 |
| Physical Education | ½ | ½ |
| Psychology L40 | 3 | -- |

** Students qualified for regular four-year standing should take the equivalent ourse provided for regular students.

# JUNIOR COLLEGE COMPLETION CURRICULA

In cooperation with the San Diego City Schools one specialized division of the Junior College program is maintained on this campus. This center endeavors serve young people who, because of ill health, indefinite objectives, inadequate stud habits or other reason, have achieved less in high school than they had hoped to d Students admitted to this center frequently have no clearly defined vocational an educational objectives or they have set up goals which are too difficult to attain.

The program in this center has the following characteristics:

a. Every course has been developed with the aim of meeting the needs of th type of student admitted. All courses are planned, therefore, to includ materials of immediate interest to the student. The content and the pr cedures used are designed to help the student get answers to his question about himself, about his plans, and about his understanding of and happ adjustment to the world about him.

b. The program gives vocational help, but does not provide vocational course While the primary purpose is not vocational training, much of the wor contributes toward this end. Both the guidance program and the courses study are planned to help the student make his vocational adjustment.

c. The program is concerned primarily with general education. The ter "general education" is here used to designate those understandings, attitude and skills common to all adults who are to live effectively in America democracy.

d. Guidance is the principal focus of the program. It attempts specifically t meet the needs of each student through a well coordinated system of grou and individual guidance and a curriculum planned to aid in the adjustmen of the individual to his world.

e. The course is two years in length and upon its successful completion th degree of Associate in Arts is awarded by the San Diego City Board o Education.

No A.B. degree credit is given for these Junior College courses, although a student ma qualify for admission to San Diego State College through a demonstration of stron scholarship.

# COURSES OF INSTRUCTION

*igures in parentheses indicate the unit value of the course.*

*ourses numbered from 1 to 99 are lower division (freshman or sophomore) courses;
hose numbered 100 and above are upper division (junior or senior) courses. The
refix "L" is used to denote courses which are classified as limited electives for students
nrolled in the liberal arts curricula. See page 19. Students may not ordinarily apply
ore than a total of twelve units of credit, earned in courses so designated, toward the
equirements for the bachelor of arts degree. The prefix "E" indicates courses which
re offered through the Extension service, and "S" denotes courses which are available
uring the Summer Session.*

*reshmen are not admitted into upper division courses.*

*sophomore may enroll in an upper division course for lower division credit provided he
as earned an average grade of not less than 1.5 in all college work undertaken, and
rovided he receives the instructor's permission to enroll in the course. A second
emester sophomore may enroll in an upper division course for upper division credit
ithout the foregoing grade limitations provided the units earned in the upper divi-
ion course or courses are in excess of the sixty units required in the lower division.*

*ne "unit" represents an hour recitation or lecture, together with the required prepa-
ation, or three hours laboratory work each week for a semester of 18 weeks.*

*he semester in which courses are offered is designated as follows: (1) Fall; (2) Spring;
3) Fall and Spring; (4) Year course, beginning either Fall or Spring; (5) Year course.
ourses designated as "Year course" begin in the Fall, but those given in the list below
ay be taken in the reverse order (i.e., the second semester of the course may be taken
efore the first semester) or the second semester may be taken alone. In the case of
ther year courses, students who have completed the equivalent of the first semester's
ork may seek permission from the instructor to take the second half of the course.*

## Year Courses Open to Registration in the Middle of the Year

Aesthetics 1A-1B
Aesthetics 102A-102B

*lthough the College fully expects to carry out the arrangements planned in the list
f courses, it reserves the right to make changes. Classes in which the enrollment does
ot come up to the minimum number set by the State Department of Education may not
e offered or may be postponed.*

## AESTHETICS

### LOWER DIVISION COURSES

**1A-1B Survey of Music** **Springsto**

Correlation of music and other arts. Designed to stimulate enjoyment of music b developing intelligent listening. The elements of music, its structure, folk music all countries, musical instruments, and the contributions of the best known composer with some biographical study of these men. Compositions are presented by orthophoni recording and by class members. Attendance at a number of local concerts is require No previous musical training or background is necessary. Music majors are require to complete additional assignments for full credit.

*Year course (2-2)*

**5 Fundamentals of Art** **Jackso**

An illustrated lecture course involving a study of aesthetic meaning and its relation t the structure of art products. Designed to increase both understanding and appeciatio of the visual world in general and of the fine arts in particular.

*Fall and Spring (2)*

**50 Appreciation and History of Art** **Jackso**

A survey of aesthetics development as revealed in the painting, sculpture, architectur and handicrafts from dawn of art to the Renaissance. Illustrated.

*Fall (2)*

**51 Survey of Mexican Art** **Jackso**

A study of Mexican and Middle American Art from earliest time to present.

*Fall (2)*

### UPPER DIVISION COURSES

**102A-102B History of Music** **D. F. Smit**

The various movements in the development of music as related to the other arts. Th chronological development of the art of music, with particular emphasis on the large works. Considerable attention is given to the works of modern composers. Man symphonic works are studied from the orchestral scores. Music majors are require to complete additional assignments for full credit. Prerequisite: Aesthetics 1A or 1B

*Year course (2-2)*

**150 Appreciation and History of Art** **Jackso**

The period from the Renaissance through the modern school, treated in the sam manner as in Aesthetics 50.

*Spring (2)*

## ANTHROPOLOGY

*Lower division preparation for the liberal arts major in social science with concen tration in anthropology: Anthropology 50A-50B, Sociology 50A, 50B, Geography 1, 2 Recommended: Geology 1A-1B, Economics 1A-1B. See requirements for the socia science major, page 107.*

### LOWER DIVISION COURSES

**1A-1B General Anthropology** **Rogers**

Origin and antiquity of man. Theories of human descent. Classification of races. Origin and early development of civilization.

*Year course (3-3)*

**54 Social Anthropology**

An anthropological study of social institutions in primitive and civilized societies. The evolution of family organization, religion, property right, and government traced in elementary and advanced civilization.

*Spring (3) (Not offered 1944-45)*

**55 Culture History** **Rogers**

The prehistoric and historic development of culture types contributing to Western European and American civilization of today. Egyptian, Semitic, Indo-European, and Oriental cultures examined in light of their bearing on contemporary civilization. Methods of culture spread examined and applied to specific traits. Spengler's theory of history and similar doctrines reviewed.

*Fall (3) (Not offered in 1944-45)*

**56 Backgrounds of World Religions** **Rogers**

An introductory study of Judaism, Christianity, Islam, Buddhism and Shinto from the viewpoint of their anthropological development and their role as cultural forces. Concepts of Gods and spirits, rituals, ethical systems, and symbolism.

*Spring (3)*

### UPPER DIVISION COURSES

**151A The North American Indian** **Rogers**

Pre-Columbian cultures of the North American Indian. The origin and migration of New World peoples. Industries, arts, crafts, social organization, religion and other phases of American Indian civilization.

*Fall (3) (Not offered in 1944-45)*

**151B Indian Civilizations of Middle America** **Rogers**

The development of civilization in Pre-Columbian Mexico and Central America: Aztec, Mayan, and related cultures.

*Spring (3)*

**152 Primitive Cultures (Ethnography)** **Rogers**

History and cultural development of primitive races of mankind. Consideration given to industries, arts, social organization, and religion of preliterate culture groups.

*Fall (3) (Offered in 1944-45 and alternate years)*

**153 Primitive Religion** **Rogers**

Beliefs and ritual of primitive man. Magic and religion. Forms of animism and polytheism. Primitive mentality and the supernatural.

*Spring (3) (Offered in 1944-45 and alternate years)*

**157 Primitive Myths and Rituals** **Rogers**

The folklore, mythology, and rituals of primitive cultures in the Eastern Mediterranean area. The early beliefs and classic myths of the Egyptians, Assyrians, Babylonians, and Greeks.

*(Not offered 1944-45)*

## ART

Many students, regardless of the field in which they may be majoring, recognize the need for an intelligent approach to the subject of art and art appreciation. However, due to the erroneous popular feeling that art is so specialized a subject as to require "talent," these students may refrain from enrolling in any art courses.

For students who desire a better understanding of art, but who do not hope to acquire any of the art skills, the following courses are recommended:

| | Units |
|---|---|
| Aesthetics 5, Fundamentals of Art | 2 |
| Aesthetics 50, History and Appreciation of Art | 2 |
| Aesthetics 51, Survey of Mexican Art | 2 |
| Art 8A-8B, Appreciation of Costume and Home-furnishing | 4 |

Other courses which involve certain skills but which are not out of reach of the ability of the average college student are:

| | |
|---|---|
| Art 61B, Crafts | 2 |
| Art 6A, Art Structure | 2 |
| Art A, Freehand drawing | 3 |
| Art 94v, Costume design | 2 |

For students who might wish to complete a minor in art after having met the lowe division requirements from the preceding page, the following courses are recommende as not requiring any fundamental training in drawing and design:

| | |
|---|---|
| Art 119, Ceramics | 2 |
| Art 152A, Stage Design | 2 |
| Aesthetics 150, History and Appreciation of Art | 2 |

*Candidates for a teaching credential in art should refer to the statement "Admission to Teacher Education" on page 21.*

*Lower division preparation for the liberal arts major in art: Aesthetics 5 or 51, and 50; Art A-B and 6A-6B, or the accepted equivalents, and four elective units in art.*

*Liberal arts major (upper division): Twenty-four upper division units. These shall include Art 112A, 115A-115B, 152A, 195, or the accepted equivalent; Aesthetics 150. It is recommended that the students in meeting degree requirements and in choosing free electives, select from the following courses: Anthropology 151A-151B; English 106A-106B, 107A-107B, 117; French A-B; History 4A-4B, 111A-111B.*

For courses in Appreciation and History of Art and Fundamentals of Art, see Aesthetics, page 54.

## LOWER DIVISION COURSES

**A-B Freehand Drawing** **Jackson**

Semester I: Problems involving perspective to develop ability to draw still life, furniture, exteriors, interiors, and the like.

Semester II: Outdoor sketching of landscape and figure, and studio work from still life and costume pose. Emphasis on composition and technique in the handling of various mediums, pencil, pen and ink, charcoal, pastel, and water color.

*Year course (3-3)*

**6A Structure** **Patterson**

Fundamentals of design and composition and theory of color. Basic course used as a prerequisite for all advanced work.

*Fall and Spring (2)*

**6B Stucture** (continued) **Patterson**

Original work in creative design and representation with special stress on modern tendencies. Prerequisite: Art 6A.

*Fall and Spring (2)*

**L7 Line, Color and Display** **Patterson**

The principles of line, color and arrangement applied to store and window display. Study and observation of windows, color and materials used in display. Building models and practical problems in arranging colors, textures, and forms in windows to fit different kinds of merchandise.

*Fall and Spring (2) (Not offered in 1944-45)*

**8A-8B Appreciation of Costume and Home Furnishing** **Hamann**

8A A survey of the periods of costume and home furnishing from primitive man to the present time.

*Fall (2)*

8B Lectures, discussions, and demonstrations on the underlying principles of dress and home furnishing. (a) A study of the design, color, texture, fabric, and fashion in modern dress with emphasis on suitability to the figure, the personality and the occasion. (b) Line, form, color, texture, fabric, and lighting in relation to the home; the selection and arrangement of furniture, rugs, fabrics, pictures, etc., for all rooms of the home.

*Spring (2)*

**11A Industrial Design** **Hamann**

Original design in its relationship to various fields—ceramics, furniture, textiles, jewelry, and books. A survey and study of materials and processes in machine and hand production. Prerequisite: Art 6A-6B.

*Fall (2)*

**11B Advanced Industrial Design** **Hamann**

Advanced problems with emphasis upon the related factors of material and production. Application of problems designed. Prerequisites: Art 6A-6B, 11A.

*Spring (2)*

**L14A Lettering** **Hamann**

Fundamental art principles applied to lettering. Practice for quick, accurate lettering; original problems using letters as design. Prerequisite: Art 6A.

*Fall (2)*

**14B Posters and Commercial Art** **Hamann**

The application of lettering to posters, newspaper and magazine advertising, and other forms of commercial art. The study of composition combined with lettering and special study of modern tendencies in publicity. Prerequisites: Art 6A, 14A.

*Spring (2)*

**15A-15B Life Drawing** **Jackson**

Drawing from the nude model. Prerequisite: Art A-B.

*Year course, beginning either Fall or Spring (2-2)*

**16A-16B Painting** **Jackson**

Semester I: Composition of still life and flower forms in water color and oil. Semester II: Landscape and more advanced composition in water color and oil. Prerequisite: Art A-B.

*Year course, beginning either Fall or Spring (3-3)*

**52A Stage Design** **Patterson**

Theory of line, color, and lighting in relation to the stage. Original sets and costumes developed on a miniature stage. Study of the development of the modern art of the theater. Upper division credit will be given in this course to students of junior standing upon the completion of extra theme work and additional original problems. Prerequisite: Art 6A.

*Fall (2)*

**52B Stage Costume (See 152B)** **Patterson**

*Fall (2)*

**Art 61A Fine and Industrial Arts** **Hamann**

A foundation course which develops unification of work of the elementary grades through activities and experiences. These experiences grow out of environmental activities. They include study and working of clay, lumber and tools, textiles, and cardboard construction. Prerequisite: Art 6A.

*Fall and Spring (2)*

**61B Elementary Crafts** **Hamann**

Problems involving the application of design principles to various fields—pottery, textiles, weaving, metal work, wood-carving, and book-binding. Prerequisite: Art 6A.

*Fall and Spring (2)*

**94 Costume Design** **Patterson**

Original designs of modern costumes suitable to the individual or to distinct types; the drawing of fashion figures; the rendering of fabrics and textures. Prerequisite: Art 6A.

*Spring (2)*

**95 Home Decoration** *(See Art 195)* **Patterson**

UPPER DIVISION COURSES

**106A-106B Printmaking** **Haman**

Study of print crafts which includes the making of linoleum blocks, wood engraving etchings and lithographs. Prerequisites: Art A, B, 6A.

*Year course (2-2)*

**106C Illustration** **Haman**

Same as 106A-B except that printmaking is applied to problems of book illustratio Prerequisites: Art A, B, 6A.

*Spring (2) (Offered in 1942-43 and alternate years)*

**112A-112B Organization** **Jackso**

Imaginative organization of space by means of color, dark and light, perspective, an textures of various materials. Prerequisites: Art A-B, 6A-6B, and if possible 15A-15 or 106A.

*Year course (3-3)*

**115A-115B Life Drawing and Painting** **Jackso**

Drawing and painting from nude and costume models.

*Year course, beginning either Fall or Spring (2-2)*

**115C-115D Advanced Life** **Jackson**

Painting from nude and costume models and advanced composition in oil. Portraiture Prerequisite: Art 115A-115B.

*Year course, beginning either Fall or Spring (2-2)*

**116A-116B Advanced Painting** **Jackson**

Painting in water color and oils from still life and landscape, stressing composition and technique. Prerequisite: Art 16A-16B.

*Year course, beginning either Fall or Spring (3-3)*

**152A Stage Design** **Patterson**

See Art 52A.

**152B Stage Costume** **Patterson**

Costume studied in relation to drama, opera and dance. Original designs for mood and character. Practical problems in designing costumes and accessories for college productions. Prerequisites: Art 6A, 52A or 152A.

*Fall (2)*

**194 Costume Design** *(See Art 94)* **Patterson**

*Spring (2)*

**195 Home Decoration** **Patterson**

Lectures and designing in class, trips to art galleries, stores, factories and homes, studying how to recognize and choose the best in furniture, rugs, wall coverings, textiles and pottery as to design, color and materials. Actual experience in designing and arranging furnishings in homes and offices. Working with local stores and architects. Arrangement of flowers and objects for different types of rooms and occasions. Prerequisites: Art A, 6A.

*Spring (2)*

## ASTRONOMY

*Lower division preparation in Astronomy desirable for advanced work: Astronomy 1, 2, 3, and 9; Mathematics 3A-3B, 4A-4B; Physics 1A-1B and 1C-1D; a reading knowledge of French and German desirable.*

LOWER DIVISION COURSES

**1 Descriptive Astronomy** **Watson**

A cultural course planned to develop an appreciation of astronomy with special emphasis on the solar system. Only calculations of an elementary nature are used. Especial attention given to the methods and instruments by means of which astronomical knowledge has been gained. A six-inch John Byrne refractor and an eight-inch reflecting telescope are available for observation. Prerequisites: Elementary algebra and plane geometry.

*Fall (3)*

### 2 Modern Astronomy

A study of sidereal astronomy and astrophysics in the light of modern research, especially photographic and spectrographic. Prerequisite: Astronomy 1 and a knowledge of physics or permission of the instructor.

*Spring (3) (Not offered in 1944-45)*

### 3 Surveyor's Course in Practical Astronomy

The principles of spherical astronomy adapted to the needs of engineering students. Computation and observation. Prerequisites: Surveying 1A or permission of the instructor. Astronomy 1 and 9 desirable.

*Spring (2) (Not offered in 1944-45)*

### 9 Practice in Observing

A laboratory course designed particularly to go along with and to supplement Astronomy 1. The course will include constellation study, use of astronomical coordinates, elementary methods of determining time and latitude, and descriptive observations of celestial objects with the six-inch telescope. Prerequisite: Astronomy 1 or registration in Astronomy 1 or permission of the instructor.

*(Not offered in 1944-45)*

### 12 Elementary Navigation

A study of compass corrections, drift problems, time, line of position, use of celestial coordinates, Bowditch Tables, etc. A few class hours at the close of the term are devoted to the use of tables such as Ageton, Dreisonstok and H. O. 214 for the solution of astronomical triangle. Offered if demand is sufficient. Prerequisite: Astronomy 1 or permission of instructor.

*Spring (2) (Not offered in 1944-45)*

## UPPER DIVISION COURSES

### 100 Special Problems

Admission by consent of instructor. Credit and hours to be arranged in each case. Open to students who have completed three units in astronomy.

*Fall and Spring (1 or 2) (Not offered in 1944-45)*

### 105 Historic Development of Astronomy

A study of the more important problems and astronomical concepts in the light of their historical development. Particular attention is given to the biography and contributions of the more important astronomers, such as, Galileo, Kepler, Newton, Herschel, and Bessel.

*Spring (3) (Not offered in 1944-45)*

### 107 Method of Least Squares and Computing Practices

Fundamental principles and processes and applications in the fields of astronomy, physics, and engineering.

*Spring (3) (Not offered in 1944-45)*

## TWO-YEAR COURSE

### L40 Elementary Astronomy

**Watson**

A survey course planned to acquaint the student with the more important facts pertaining to both the solar system and to the stars. The first part of the course is devoted to the study of the earth as an astronomical body and to the other planets. The latter part is devoted to a study of the sun and stars. *Open only to students enrolled in a two-year curriculum.*

*Spring (3)*

## BIOLOGICAL SCIENCES

*The courses offered in Biological Sciences are listed below. Anatomy, see Zoology, page 113; Physiology, page 103; and Zoology, page 113.*

## BACTERIOLOGY

### LOWER DIVISION COURSES

**1 General Bacteriology** **Harvey**

An introduction to bacteriology. Effects of physical and chemical agencies upon bacteria; biochemical activities of bacteria; microscopic examination and cultivation of bacteria; the bacteria of air, water, soil, milk and dairy products, other foods; industrial applications. Introduction to disease-producing bacteria. Required of prenursing students. Two hours of lecture and six hours of laboratory per week. Prerequisite: Chemistry 1A or 2A.

*Fall (4)*

**199 Special Problems** **Harvey**

Work other than is outlined in the regular courses. Admission only by consent of the instructor with whom the work is to be done. Credit and hours to be arranged in each case. Open to students who have completed at least fifteen units of work in the department (including courses in Bacteriology and Chemistry) with grades of A or B.

*Fall or Spring (1 or 2)*

## BIOLOGY

### LOWER DIVISION COURSES

**1 Survey of Biology** **Crouch**

A survey of life science, stressing the development of modern concepts in the fields of plant and animal science, bacteriology, genetics, and physiology. Emphasis is placed on the relationships of biology to modern life and the application of scientific analysis to every day problems. Three lectures and one hour of demonstration and discussion per week. Not open to students with credit for Biology 10A-10B, Zoology 1A-1B, or Botany 2A-2B.

*Fall (3)*

**10A-10B General Biology** **Johnson**

A year course in life science, more extensive than "Biology 1." Continues throughout the year and includes a three-hour laboratory period, and two hours of lectures per week. Designed for those who do not expect to specialize in zoology or botany; not open for credit to students who have taken Zoology 1A, Biology 1, or Botany 2A. Students who have taken 10A-10B may elect Zoology 1B or Botany 2A, 2B for credit.

*Year Course (3-3) Begins in Fall only*

**LA Mathematics of Solutions and Dosage** **Johnson**

Arithmetic review with computing of dosage, percentage of solutions, apothecaries weights and graph making. Two hours per week.

*Fall (1)*

### UPPER DIVISION COURSE

**123 Economic Biology** **Harwood**

Study of the uses of plants and animals to man and the ways in which they injure him and his possessions. Consideration is also given to general methods of control and conservation. Prerequisites: Zoology 1A, Biology 1, or Biology 10B.

*Fall (2)*

## TWO YEAR COURSE

**L40 Man and His Biological World** **Crouch**

A survey of the general field of biology with emphasis on the role of biological science in the welfare of man and his associates, consisting of three lectures and one demonstration period per week. Not open to students who have credit in high school biology, zoology, or botany. *Open only to students enrolled in a two year curriculum.*

*Spring (3)*

## BOTANY

*Lower division preparation for advanced work in botany: Botany 2A, 2B, 4, and Chemistry 1A, 1B, 8. Recommended: German, French, and elementary courses in other biological sciences.*

### LOWER DIVISION COURSES

**2A General Botany** **Harvey**

Fundamentals of structure and general behavior of seed plants. Two lectures or recitations and six hours of laboratory per week.

*Fall (4)*

**2B General Botany** **Harvey**

A continuation of 2A treating morphology and relationship of the lower plants and including an introduction to classification of seed plants. Lectures and laboratory as in 2A.

*Spring (4)*

**4 California Plants** **Harvey**

Classification and ecology of representative orders of wild flowers, trees, and chaparral of the San Diego region, including practice in the use of keys. One lecture and three hours laboratory per week. Occasional Saturday field trips.

*Spring (2)*

**5 Cultivated Trees and Shrubs** **Harvey**

Recognition of the common cultivated trees and shrubs of the San Diego region. Trips to local parks and private gardens. Three hours per week laboratory or field work.

*Fall (1) (Not offered in 1944-45)*

### UPPER DIVISION COURSES

**102 Plant Geography** **Harvey**

Lectures and field work on the principles of geographical distribution of plants. Prerequisite: Botany 2A-2B, or 4, or equivalent.

*Fall (2) (Offered in 1945-46 and alternate years)*

**104 Plant Taxonomy** **Harvey**

Identification, classification and distribution of representative orders of flowering plants. One hour of lecture and six hours per week of laboratory and field work. Prerequisites: Botany 2A-2B, or 4.

*Spring (3) (Offered in 1945-46 and alternate years)*

**199 Special Problems** **The Staff**

Work other than is outlined in the above courses. Admission by consent of the instructor with whom the work is to be done. Credit and hours to be arranged in each case. Open only to students who have completed at least fifteen units of Botany with a grade of A or B.

*Fall and Spring (1 or 2)*

## CHEMISTRY

*Lower division preparation for the liberal arts major in chemistry: Chemistry 1A-1B with an average grade of C or better, Chemistry 7-8, Physics 2A-2B and 3A-3B or their equivalent, Mathematics 3A-3B or the equivalent, and a reading knowledge of German. Students planning to do graduate work in chemistry or to transfer to certain other colleges and there work for a degree with a major in chemistry, are advised to take Physics 1A-1B-1C-1D and Mathematics 3A-3B-4A-4B in place of the courses listed above.*

*Liberal arts major (upper division): A minimum of twenty-four upper division units in chemistry including Chemistry 105A-105B, 110A-110B and111A-111B. The choice of related minors and the organization of the course of the major student must follow a definite plan approved by the department.*

*For requirements for liberal arts major in physical science, see page 100.*

LOWER DIVISION COURSES

**1A-1B General Chemistry** **Messner**

The general principles and laws of chemistry, and a description of the elements and their compounds. Two lectures, one quiz and two laboratory periods per week. The laboratory work in the second semester consists of work in qualitative analysis. Prerequisites: At least two years of high school mathematics. Recommended: High school chemistry and physics.

*Year course (5-5)*

**2A-2B General Chemistry** **Ross**

A general course for those not intending to take advanced courses in chemistry. The work in the first semester stresses inorganic chemistry and fundamental principles; that of the second semester covers an introduction to organic and biochemistry. Emphasis placed on applications of chemistry to everyday life. Two lectures and one laboratory period per week. Required of prenursing students and recommended for those desiring chemistry as part of a liberal education.

*Year course (3-3)*

**7-8 Organic Chemistry** **Ross**

A general consideration of the carbon compounds (both aliphatic and aromatic) and their derivatives; their synthesis, constitution, and properties, and the principles involved. Two lectures and one laboratory period per week first semester; one lecture and two laboratory periods per week second semester. Prerequisite: Chemistry 1A-1B.

*Year course (3-3)*

UPPER DIVISION COURSES

**105A Quantitative Analysis** **Messner**

The principles of gravimetric and volumetric analysis. Discussions of the theory of quantitative analysis and practice in the standardization of reagents and analysis of samples. One lecture and two laboratory periods per week. Prerequisite: Chemistry 1A-1B.

*Fall (3)*

**105B Advanced Quantitative Analysis** **Messner**

Advanced work in the theory and practice of volumetric, gravimetric and electroanalysis. One lecture and two laboratory periods per week. Prerequisite: Chemistry 105A.

*Spring (3) (Not offered in 1944-45)*

**110A-110B Physical Chemistry**

Lectures and problems on theoretical principles of chemistry. Prerequisites: Physics 1A-1B or 2A-2B, a knowledge of calculus and Chemistry 105A which may be taken concurrently. With the approval of the instructor, advanced courses in physics may be substituted for Chemistry 105A.

*Year course (3-3) (Not offered in 1944-45)*

**111A-111B Physical Chemistry—Laboratory**

Physico-chemical problems and measurements. Two laboratory periods per week. Prerequisites: Credit or registration in Chemistry 110A-110B.

*Year course (2-2) (Not offered in 1944-45)*

**112A-112B Industrial Analysis**

A laboratory course including the analysis of fuels, petroleum products, water, and gas. Prerequisite: Chemistry 105A which may be taken concurrently.

*(3-3) (Not offered in 1944-45)*

**114 Biochemistry** **Messner**

An introductory lecture course covering the carbohydrates, proteins, fats and the changes which they undergo in digestion and metabolism as well as a consideration of the vitamins and other accessory food factors and their importance to the body. A brief discussion of the chemistry of plant life. Prerequisites: Credit or registration in Chemistry 7, 8.

*Spring (3) (Offered in 1944-45 and alternate years)*

### 18 Colloid Chemistry

**Messner**

lecture course covering the theoretical principles of colloid chemistry and the prepa-ation, properties and practical applications of colloids. Prerequisite: Chemistry 7-8.

*all (2) (Not offered in 1944-45)*

### 23-124 Organic Preparations

laboratory course illustrating some of the more important synthetic methods of rganic chemistry. Laboratory and conferences. Prerequisite: Chemistry 7-8. A eading knowledge of German recommended.

*eginning either Fall or Spring (1 to 5—1 to 5) (Not offered in 1944-45)*

### 25 History of Chemistry

evelopment of the science of chemistry from the time of the alchemists to the present. onducted on the reading, report, and seminar basis. Prerequisite: Chemistry 7, 8.

*all (2) (Not offered in 1944-45)*

### 27 Advanced Inorganic Chemistry

**Ross**

detailed study of the Periodic Table. Discussion of complex inorganic compounds nd oxidation-reduction potentials. Prerequisite: Chemistry 1A-1B and upper division tanding.

*all (2) (Offered in 1944-45 and alternate years)*

### 44 Industrial Chemistry

ndustrial stoichiometry, flow sheets, flow of fluids and unit processes. Lectures, prob-ems, and reports. Prerequisites: Chemistry 1A-1B, Physics 1A-1B or 2A-2B.

*pring (3) (Not offered in 1944-45)*

### 99 Special Problems

**Instructors of the Department**

upervised individual work in specialized branches of chemistry. Admission only by he consent of the instructor. Hours and credit to be arranged in each case. Only pen to upper division students who have shown their ability to do A or B work in hemistry.

*Fall and Spring (1-3) (Not offered in 1944-45)*

## COMMERCE

(See Economics and Commerce, below)

## ECONOMICS AND COMMERCE

**The department provides an opportunity for the student to choose between a major in economics and a major in commerce in satisfying the requirements for the Bachelor of Arts degree.**

**Economics.** *Lower division preparation for the liberal arts major in economics and for the junior certificate: Economics 1A-1B, 14A-14B and at least one of the following: Political Science 1A-1B or 71A-71B; History 4A-4B, 8A-8B; Psychology 1A-1B; Sociology 50A-50B; Anthropology 1A-1B. Recommended: Economics 18A-18B, Geography 10A-10B.*

*Liberal arts major in economics, 24 upper division units required as follows: Economics 100A, 140, and 100B or 111, with 9 or more additional units selected from Economics 100B, 107, 111, 125, 131, 133, 135, 150, 171, and 195. Electives: Six or more additional upper division units in economics. Political Science 143A-143B may be substituted for elective units in economics.*

**Commerce.** *Candidates for a teaching credential in business education should refer to the statement "Admission to Teacher Education Curricula" on page 21 and to the curriculum for the A.B. degree with a special credential in Business Education on pages 30 to 31.*

*Lower division preparation for the liberal arts major in commerce and for the juni certificate: Economics 1A-1B, 14A-14B, 18A-18B; English 1B, 2; Geography 10 10B, Mathematics C, or equivalent, and Economics 2; History 4A-4B or 8A-8B Political Science 1A-1B or 71A-71B.*

*Liberal arts major in commerce, 24 upper division units required as follows: Economi 111, 121, 140, with 12 or more units additional chosen in one of the following group*
*A. Accounting: Economics 160A-160B, 161, 162.*

*B. Banking and Finance Economics 133, 135 and 6 units selected from Economics 10 131, 134, 137.*

*C. Business Administration: 6 units selected from Economics 123, 125, 137, 142, 15*
*Electives: 9 or more additional upper division units in economics.*

## LOWER DIVISION COURSES

**1A-1B Principles of Economics** **Camero**

The basic principles of economics: utility, wealth, value, price; economic productio distribution, and consumption; rent, interest, wages, and profit; competition, monopoly, and large scale production; property, economic waste, and luxury; money an banking, international trade and tariffs; transportation corporations, labor problems socialism, taxation, etc. Aims of the course: (1) to provide a foundation for furthe intensive study of economic problems; (2) to furnish to those who expect to follow business pursuits a broad foundation in economic principles; and (3) to introduc future citizens to political and economic problems of our time. Lectures, discussions quizzes, and collateral reading. Not open to entering freshmen except by specia arrangement.

*Year course (3-3)*

**2 Mathematics of Finance** **Wrigh**

Interest and annuities; amortization; sinking funds; valuation of bonds; depreciation mathematics of building and loan associations; mathematics of life insurance. Prerequisites: Two years of algebra in high school, or equivalents.

*Spring (3)*

**14A-14B Accounting** **Wrigh**

A knowledge of bookkeeping not required and not advantageous. The balance sheet; profit and loss statement; various types of books of original entry; the opening, conducting, and closing of books for different kinds of businesses; organizations, reorganizations, dissolutions, and consolidations, etc., keeping in view the best modern accounting practice. Five hours lecture and laboratory.

*Year course (3-3)*

**18A-18B Commercial Law**

The leading and fundamental principles of business law. Simple cases showing the actual application of the principles to commercial and business transactions, rather than the development of those principles. The subjects covered: contracts, sales, agency, partnerships, corporations, real property, negotiable instruments, insurance, and wills, with a brief study of evidence.

*Year course (3-3)*

## UPPER DIVISION COURSES

**100A Modern Economic Thought** **Cameron**

Review of schools of economic thought in the light of recent economic theory with special reference to value and distribution. Special attention is given to the marginal utility theory of value, to the contributions of the institutional economists, and to the work of statisticians in the development of economic theory. Prerequisite: Economics 1A-1B.

*Fall (3)*

**100B Modern Economic Thought**

A problem course. Subjects include price theory; distribution with particular emphasis on income; effects of various kinds and degrees of competition and regulation; war economy and government planning. Recommended: Economics 100A.

*Spring (3) (Not offered in 1944-45)*

**103 The Economics of War and Post-War Recovery and Reconstruction** **A. G. Peterson**

I, Backgrounds of the Present War; II, The Requirements of War Economy; III, International Recovery and Reconstruction; IV, National Recovery and Reconstruction.

*Spring (3)*

**107 Credit and Credit Institutions**

A study of the economics of credit, its cost, and the agencies supplying credit. Special attention is given to the growth of government credit agencies and their place in modern economic society. Prerequisite: Economics 1A-1B. Recommended: Economics 100.

*Spring (3) (Not offered in 1944-45)*

**111 Economic History of the United States** **Wright**

A comprehensive survey of American economic development and of national legislation in the field of industry.

*Spring (3)*

**121 Business Administration** **A. G. Peterson**

Problems of business administration as an interrelated whole and as an indication of lines of study which may lead to the solution of those problems. A discussion of the problems of the business administrator with particular reference to the character of the problems involved and to the control policies and devices of the manager. Questions, problems, and case studies. Prerequisite: Economics 1A-1B.

*Fall (3)*

**123 Principles of Marketing**

A survey of the fundamental principles and methods of marketing. Intended as a basic training for students interested in the economics of advertising, sales management, retailing, and foreign trade, as well as for those wishing a knowledge of the existing market structure. Subjects covered include price policies, distribution methods, finance, risk, market information, and governmental regulation. Prerequisite: Economics 1A-1B.

*Spring (3) (Offered 1945-46 and alternate years)*

**125 General Insurance—Principles and Practice**

Economic theory of risk, its extent and importance to both the individual and business; transfer of risk; distribution and prevention of loss; types of insurance carriers; problems of rate making; the insurance contract; coverages; special forms of life, fire, marine and casualty insurance; state supervision.

*Fall (3) (Not offered in 1944-45)*

**127 Life Insurance—Principles and Practice**

A study of social and individual values involved in the institution of life insurance. The student is then directed to the types of life insurance companies and associations, home office and agency organization, types of contracts, surrender value, policy loans and extended insurance, surplus and dividend policies, reserves, group, industrial and social insurance, and state supervision.

*Fall (3) (Not offered in 1944-45)*

**128 Land Economics**

Real estate in all its aspects: property rights, transfer of title, valuation, finance, selling, property management, taxation, insurance, city planning, and the like, with special emphasis upon problems as they exist in San Diego.

*Spring (3) (Not offered in 1944-45)*

**131 Public Finance and Taxation** **A. G. Peterso**

Principles and practice of taxation, public expenditures, and financial administratio Economic effects of public expenditure, indebtedness, and taxation. Prerequisite Economics 1A-1B.

*Spring (3) (Not offered in 1944-45)*

**133 Corporation Finance** **Camero**

The corporate form of organization, instruments of long-time finance, methods o raising capital, efficient financial management, the financing of reorganizations, an governmental control. Prerequisite: Economics 1A-1B.

*Fall (3)*

**134 Investments** **Camero**

Investment principles and practices with emphasis upon problems of the small inves tor, such as tests of a good investment, sources of information, types of stocks an bonds, mechanics of purchase and sale, investment trusts, real estate mortgages, an the like.

*Spring (3)*

**135 Money and Banking** **Camero**

The elements of monetary theory. History and principles of banking with specia reference to the banking system of the United States. Prerequisite: Economics 1A-1B

*Spring (3)*

**137 Credits and Collections** **Camero**

The credit man and his work, including the instruments with which he works, source of credit information, the technique of his department, collection methods, legislatio for the protection of debtor and creditor, and credit insurance.

*Fall (3) (Not offered in 1944-45)*

**140 Statistical Methods**

The nature and uses of statistical method in the social sciences. Practice in tabula and graphic presentation of data; analysis of frequency and time series; index numbe construction and study of correlation techniques. Prerequisite: Mathematics A an D, or equivalent.

*Fall (3)*

**142 Business Fluctuations and Business Forecasting**

Fundamental factors in business cycles are analyzed and cycle theories are examined. Study of current business conditions begins early in the course and develops into practical application of forecasting methods to both business and other data. Prerequisite: Economics 140.

*Spring (3) (Not offered in 1944-45)*

**150 Labor Problems and Industrial Relations** **A. G. Peterson**

A discussion of employment, hours, wages, working conditions, insurance, pensions, workmen's compensation, labor organizations and labor legislation. Organization of personnel functions; selective devices, training and safety programs, compensation plans, morale.

*Spring (4) (Offered in 1945-46 and alternate years)*

**160A-160B Advanced Accounting** **Wright**

An intensive study of the corporation, its accounting and financial problems; a thorough study of the balance sheet; depreciation; factory accounting, etc. Under practical accounting an endeavor is made to design, construct, and operate sets of books to meet the needs of different conditions and kinds of businesses. Six hours lecture and laboratory. Prerequisite: Economics 14A-14B.

*Year course (3-3) (Offered in 1944-45 and alternate years)*

**61 Cost Accounting** **Wright**

rinciples and methods of cost accounting in the mercantile establishment and in the ctory. A study of bookkeeping procedure, the forms used, and their application to ractical problems. Prerequisite: Economics 14A-14B.

*all (3) (Offered in 1945-46 and alternate years)*

**62 Accounting Systems** **Wright**

he accounting systems used in various types of business and financial concerns. Some ractice in devising and installing systems. Prerequisite: Economics 14A-14B.

*pring (3) (Offered in 1945-46 and alternate years)*

**64 Income Tax Procedure** **Wright**

consideration of the problems arising from the Federal income tax. The problems re approached from the point of view of the taxpayer who desires to determine the xact application of the law to the interests he represents as well as from the accountg point of view. No knowledge of accounting procedure is necessary.

*all (3) (Not offered in 1944-45)*

**65A-165B Auditing** **Wright**

he fundamental principles of accepted procedures of auditing and related types of ccounting engagements.

*ear course (3-3) (Not offered in 1944-45)*

**66 Honors Course** **The Staff**

ee page 15.

*all (3) or Spring (3)*

**67 Governmental Accounting** **Wright**

comparative study of accounting systems used by municipalities, counties, and the tate of California; detailed comparisons with commercial practice; procedures in andling budget accounts, appropriations, and encumbrances; subsidiary records; cost ecords; internal checks; auditing.

*pring (3) (Not offered in 1944-45)*

**71 Transportation** **Cameron**

he development of railway transportation; railroad financing; rates and rate making; overnmental regulation; government operation of railroads during the war; recent evelopment of motor and air transportation; current problems in public utilities. rerequisite: Economics 1A-1B.

*all (3) (Offered on demand)*

**95 International Economic Relations** **A. G. Peterson**

brief treatment of certain geographical, sociological, and legal phases of international elations followed by a study of the commercial and industrial basis of world economy ouching upon a number of special problems involved. An introductory study of mateials covering the processes, principles, and policies of international trade. The course oncerns itself primarily with the economic basis of international relations, but politial aspects are almost constantly taken into account in recognition of the fact that nternational relations are frequently political in form but economic in content.

*Offered in the summer session)*

**98 Investigation and Report** **A. G. Peterson**

esigned to stimulate independent study and investigation; to furnish guidance in the ollection, organization, and presentation of factual material; to improve the technique f term reports.

*all and Spring (1-3)*

## TWO-YEAR COURSES

**L15A-L15B Elementary Accounting** **Watenpaugh**

n introductory course in the fundamental principles of accounting; recording busiess transactions; opening and closing books of different kinds of business in accordnce with modern accounting practice; accounting theory combined with actual prac-

tice. Balance sheet; profit and loss statements; accounts; book of entry, etc. Planned for students entering accounting work who must confine their preparation to one or two years. Open only to students enrolled in a two-year curriculum.
*Year course (3-3)*

**L16A-L16B Secretarial Accounting** **Watenpaugh**
A course in secretarial accounting covering the fundamental principles of accounting and the application of these principles to the accounting work required by one employed in a secretarial capacity. Open only to students enrolled in a two-year curriculum.
*Year course (3-3)*

**L45A-L45B Business Economics** **Cameron**
A basic course in the general principles of business economics and the application of these principles to current problems of man's economic life. A coordinated description of economic conditions, circumstances and forces which are of general significance throughout the business world. The development of theory as an interpretation of and guide to practice. Emphasis placed on actual business and financial operations and matters of everyday business experience which may serve as guides for individual conduct and the development of social policy. Human wants and their satisfaction; organization and purpose of business; risks and insurance; how prices are determined; money, credit and banking; taxation; principles of consumption; government and business; wealth, value, capital, rent, interest profits; etc. Not open to freshmen. Open only to students enrolled in a two-year curriculum.
*Year course (3-3)*

**L65A-L65B Record Keeping** **Watenpaugh**
An advanced course in the application of accounting theory and principles to accounting practice; the technical arrangement of accounting forms, records and reports found in business; advanced theory. Opportunity afforded students through the use of practice sets, etc. to secure practice in applying principles to actual work done in business. Prerequisite: Accounting 15A-15B or 16A-16B or Economics 14A-14B. Open only to students enrolled in a two-year curriculum.
*Year course (3-3)*

## COMPARATIVE LITERATURE

Requirements for the minor in Comparative and General Literature: (1) a minimum of twelve units of work must be completed in courses offered by the department, at least six of which must be in upper division courses; (2) the work to be taken should be arranged in consultation with an instructor selected by the department.

### LOWER DIVISION COURSES

**52A-52B Types of World Literature** **Adams**
For a description of this course, see English 52A-52B.
*Year course (3-3)*

### UPPER DIVISION COURSES

**101A Modern Continental Fiction** **Dickhaut**
For description, see English 101A.
*Spring (3) (Offered in 1944-45 and alternate years)*

**104 Latin-American Literature in English** **Phillips**
A study of the principal writers of the Latin-American countries, with lectures in English and reading in English transactions. Class reports on collateral reading. Spanish credit will be given to those who wish to do the requisite reading in Spanish.
*Spring (3) (Offered in 1943-44 and alternate years)*

**115 The Bible as Literature** **Kennedy**
For description, see English 115.
*Fall (3) (Not offered in 1944-45)*

**0 Masterpieces of French Literature** **E. M. Brown**

cultural course designed to be given in introduction to the great French works from e Song of Roland through Cyrano de Bergerac, with emphasis on the 16th, 17th, th and 19th century authors. The contributions to world thinking of Rabelais, ontaigne, Moliere, Racine, Descartes, Pascal, Montesquieu, Voltaire, Rousseau, ugo, Balzac, Flaubert, Maupassant, Zola, will be studied through lectures and outside adings.

*ll (3) (Offered in 1945-46 and alternate years)*

**2 German Literature in English** **Walker**

asterpieces of German literature from the 18th and early 19th centuries. English anslations read. No knowledge of German required.

*ring (3) (Offered in 1944-45 and alternate years)*

**4 Spanish Literature in English**

study of the principal Spanish writers, emphasizing the 17th and 19th centuries d stressing the relationships between Spanish and other European literature. l lectures, collateral reading and reports in English.

*all (3) (Not offered in 1944-45)*

**2A Survey of Drama: Comedy**

or description, see English 152A.

*all (3) (Not offered in 1944-45)*

**2B Survey of Drama: Tragedy**

or description, see English 152B.

*pring (3) (Not offered in 1944-45 and alternate years)*

**7 Primitive Myths and Rituals** **Rogers**

or description, see Anthropology 157.

*pring (3) (Offered in 1945-46 and alternate years)*

## EDUCATION

### UPPER DIVISION COURSES

**100A Methods and Materials of Instruction** **Deputy**

course required of all candidates for the junior high and all special secondary edentials. It deals with general methods of instruction and the organization and nctions of the secondary school curriculum. Candidates for a combination of ther a junior high or a special secondary with an elementary credential may substitute the work of the elementary practicums for this course, but not vice versa. rerequisite: junior standing.

*all and Spring (3)*

**100B Methods and Materials of Instruction** **Tinsley and major subject instructors**

he course deals with specific methods and materials in the field of the teaching ajor or minor.

| ubject sections in L100B are as follows: | Semester offered |
|---|---|
| Ed. L100B-A, Methods in Art | Both |
| Ed. L100B-B, Methods in Bookkeeping | Fall |
| Ed. L100B-BE, Methods in Bus. Educ. | Spring |
| Ed. L100B-E, Methods in English | Spring |
| Ed. L100B-L, Romance Language Methods | Spring 1946 |
| Ed. L100B-MA, Mathematics | Fall |
| Ed. L100B-ME, Methods in Merchandising | Spring |
| Ed. L100B-MU, Methods in Music | Fall, 1945 |
| Ed. L100B-PE, Methods in Phys. Ed. (Men) | Both |
| Ed. L100B-PE, Methods in Phys. Ed. (Women) | Both |
| Ed. L100B-SC, Methods in Science | Spring |
| Ed. L100B-SA, Methods in Speech Arts | Fall |
| Ed. L100B-ST, Methods in Stenography | Fall |
| Ed. L100B-S.SC, Methods in Social Sci. | Both |
| Ed. L100B-T, Methods in Typing | Spring |

One unit of this course is to be taken with the college supervisor of directed teachi in the secondary schools and must be taken in conjunction with the first assignment directed teaching; two units are taken with an instructor in the major subject fie

*Fall and/or Spring, as indicated (3)*

**102A Measurement in Education** **Deputy, Tinsl**

A course required of all students preparing for a teaching credential. It deals wi the use of tests in the diagnosis and improvement of learning; construction of obj tive examinations; problems of evaluation in education; and the elements of stat tical techniques.

*Fall and Spring (3)*

**102B Child Growth and Development** **Depu**

The course deals with a study of the mental, emotional, social, and physical develo ment during childhood and adolescence.

Directed observation required. Students who have credit in Psychology 102A 102B will receive only half credit for this course.

*Fall and Spring (3)*

**LE109B Educational Administration and Supervision Field Work**

Individual field work as required for the administration credential. By arrangeme with the Dean of Education. *(3)*

**LS110 Educational Organization and Supervision**

Types of supervision and methods of evaluating and improving teaching. Prerequ sites: Graduation from college with a teaching credential or two or more years teaching experience.

*Summer (3)*

**LS111 English in the Junior High School** *(See Education 100B)*

Objectives of literature and language teaching in the junior high school; criteria f selection of material; technique of classroom procedure; observation in the ci schools. Prerequisite: The satisfaction of the lower division requirements in Engli for the teaching major in English.

*Summer (3)*

**LS114 Social Science in the Junior High School** *(See Education 100B)*

The teaching of some of the elementary facts and principles of a "general" soci science suited to the experience and development of the junior high school pup through the medium of such social studies in the junior high school curriculum history, geography, and civics. Methods of developing a genuine and continui interest in social and civic problems through observation and reading, discussed ar illustrated. Special stress on evaluating historical and geographical material f educative purposes on this level. Prerequisites: Six units of geography and six uni of history.

*Summer (3)*

**Education 115A History and Philosophy of Education** **Au**

Historical backgrounds and underlying philosophies upon which the modern publ school system has been established. Required of all candidates for the general el mentary and general junior high school credentials. Recommended for all oth credential candidates. Prerequisite: senior standing or the equivalent.

*Fall and Spring (3)*

**Education 115B Secondary Education** **Tinsle**

Prevailing types of secondary education; curricular organization; trends in organ zation and development; teacher and pupil personnel; underlying aims and pri ciples. Required of all candidates for the general junior high and special secondar school credentials. Prerequisite: senior standing or the equivalent.

*Fall and Spring (3)*

**L116 Directed Teaching** **Ault, Deputy, Madden, Tinsley**

Systematic observation, participation and teaching under supervision in the campus elementary school, the affiliated city elementary school, the Woodrow Wilson Junior High School, and the Herbert Hoover Senior High School. All students enrolled in directed teaching in the secondary schools are automatically enrolled in Education 100B which meets throughout the semester as announced in the time schedule.

The general plan is for elementary school credential candidates to take, in addition to the education practicums, a half-day of teaching daily in the campus elementary school or two and one-half hours daily in one of the affiliated city elementary schools throughout one semester. Junior high school and special secondary school credential candidates will be guided by their adviser relative to the distribution of their directed teaching. For those seeking a combination of credentials, the requirements for each teaching level must be satisfied. Further information regarding this requirement should be requested of the Dean of Education when the student first registers for directed teaching.

Thirty clock hours of directed teaching will usually carry one unit of credit in the course, but the final amount of credit allowed will depend upon the character and quality of the teaching done by the student. Directed teaching requirements may be reduced for those who furnish evidence of successful public school experience.

The maximum amount of credit allowed for this course is twelve units.

The universities usually reduce the amount of directed teaching credit they will allow to four units. Students planning to transfer to such institutions should be prepared to meet this reduction with an equal number of acceptable units in other courses. No grade below a *C* is acceptable for credit in this course.

Prerequisites: Completion of 75 units of college work; admission to teacher education; a *C* average in all college work and in the work of the preceding semester; three units of work in psychology; a minimum of one semester's work in this college. No credit will be given unless the student registers for this course in the office of the Dean of Education.

**L117A Music in the Elementary School** **Hunt**

Main objectives of music teaching in the public elementary schools. Study of the child voice. Organization of song material by grades. Procedure in presenting rote songs, ear training, elementary notation, music reading, and part singing. Conducting. Not open to students taking the elementary credential, nor to freshmen. Prerequisite: Music 1A, or the equivalent.

*Fall and Spring (2)*

**L117B Methods in Instrumental Music** **Hunt**

A study of the theory of problems or organizing and conducting school bands and orchestras, and the selection of materials. Provides practical experience in conducting a children's orchestra and teaching sectional groups. A study of systematic planning of courses of study for pupils of various ages and abilities will be made.

*Fall and Spring (2)*

**L119 Art in the Elementary School** **Patterson**

Discussion of the elements and principles of art and their place in the art expression and appreciation of the elementary school child. Lectures illustrated with examples of children's work and opportunity given for experience with mediums used in elementary school problems. Not open to students taking the elementary credential. Prerequisite: Art 6A.

*Fall and Spring (2)*

**L127 Secondary Music Education** *(See Education 100B)* **L. D. Smith**

Main objectives of music teaching in the public secondary schools. Organization of the chorus and glee clubs, voice testing, seating, a survey of song materials available. Organization of courses in applied music, harmony, history and appreciation.

*Fall (2) (Offered in 1945-46 and alternate years)*

### LS130 Educational Psychology

Man's equipment for learning and the learning process. Consideration given to huma behavior which is fundamental to learning. The study of learning includes such topic as laws of learning, improvements in learning, remembering and forgetting, fatigue i learning, and the transfer of training. Prerequisite: Psychology 1A.

*Summer (3)*

### L145 Organization and Administration of Music Education **L. D. Smit**

Theory of the general principles of music administration; correlation of music with th various subjects in the public schools; music tests; creative work.

*Fall (2) (Offered in 1944-45 and alternate years)*

### L147A Education Practicum (Kindergarten-Primary)

**I. Hammack, Hunt, Madden, Patterso**

The course is a continuation of L147B. It is a study of kindergarten education an must be accompanied by directed teaching in the kindergarten. The course include elementary art education (1), elementary music education (1), children's literatur (2), kindergarten-primary education (4), and educational psychology (2). Prerequisite, L147B.

*Fall and Spring (10)*

### L147B Education Practicum

**Bacon, E. Hammack, I. Hammack, Hunt, Madden, Redi**

This course is required of all students who expect to receive a credential which will qualify them to teach in the kindergarten or in the elementary school. Students should take the course during the next semester after admission to Teacher Training, which is usually the first semester of the junior year. Registration is strictly limited to small groups.

Education Practicum is a unified course which deals with the interpretation and intelligent application of theory and practice in elementary education. The child and accumulated knowledge are studied as one affects the other. The psychology of learning is interpreted while the college student is immediately associated with the experiencing of children. For two or three hours each day classes are held in which the psychology and philosophy of education are studied and analyzed as systems of knowledge and concurrently interpreted in reference to the actual teaching participation to which the student is assigned for one hour daily. The course includes elementary art education (1), elementary music education (1), speech education (1), mental hygiene (2), elementary school reading (2), elementary education methods (3), and directed teaching (2).

The course is taught by college instructors who are in direct contact with the Campus Elementary School.

*Fall and Spring (12)*

### L148 Education Practicum

**Brydegaard, Corbett, Hunt, Madden, Patterson, Schwob, B. Stone**

The course is a continuation of Ed. L147B and is required of all students who are candidates for the general elementary credential. An extended analysis is made of the psychology of education in various fields and application is made through directed teaching in grades 4 to 7. The course includes elementary art education (1), elementary music education (1), elementary health education (2), educational psychology (2), elementary education methods (4), and directed teaching (2). Prerequisite: L147B.

*Fall and Spring (12)*

### LE170 Administration of a Visual Instruction Program

The service program of a visual instruction center is studied as a collecting, selecting, organizing and distributing center for classroom illustrative materials; a teacher training and advisory bureau in the technique and correct use of visual aids; a photographic production laboratory for making current and local illustrative materials for the curriculum; a testing division for evaluating visual equipment, standardization and upkeep of same; a center for correlating and integrating the school program with opportunities offered by other community educational institutions and organizations;

n advisory department for supervising school film productions and for instructing eachers and students in the art of photography and appreciation of photoplays.

This course is given at the visual education center of the San Diego city schools and he enrollment is limited to students who have made previous arrangements with the ead of the Education Department and with the instructor.

*Fall and Spring (2)*

**LS175A Administration and Supervision of an Elementary School**

*Summer (3)*

**LS175B City School Administration**

*Summer (2-3)*

**L176 Speech Arts in the Secondary School** *(See Education L100B)* **Jones**

Organization and conduct of junior high and high school speech activities.

*Fall (2)*

**L199 Educational Problems** **Education Staff (Dean of Education in charge)**

A course for senior students in residence and enrolled in teacher training who have shown ability to work independently on educational problems. The problem can be chosen only after consultation with a staff member. Admission by consent of the staff. Credit and hours to be arranged.

*Summer (1-3)*

## ENGINEERING

*(For curriculum in engineering see pages 42-44.)*

### LOWER DIVISION

**1A-1B Plane Surveying** **Gleason**

Use and adjustment of surveying instruments, computations and map-making, together with a study of land, topographic, city, and mine surveying. Two instruction periods and one three-hour period for field work and mapping each week. Prerequisites: Trigonometry and Mechanical Drawing, or equivalent, and sophomore standing.

*Year course (3-3)*

**S3 Summer Class in Surveying**

Practical field problems in reconnaissance, triangulation, location and topographic surveys. Observations for meridian, time and latitude. Precise work in linear and angular measurements. Development of self-reliance, accuracy, and professional skill on the part of the student. Four weeks course held in the mountains near San Diego. For details regarding location of camp, date of registration, date of opening, and other arrangements, a special announcement of the surveying camp may be secured at the Registrar's Office. Offered if demand is sufficient. Prerequisite: Surveying 1A-1B.

*Summer (3)*

**21 Descriptive Geometry** **Walling**

Fundamental principles of descriptive geometry and their application to problems of engineering. Lectures and drafting. Prerequisites: One year of mechanical drawing, and sophomore standing.

*Fall (3)*

**22 Machine Drawing** **Walling**

Design and drawing of simple machine parts with emphasis upon the production of standard drawings. Lectures and drafting. Prerequisite: Engineering 21, Mathematics 3A-3B.

*Spring (3)*

**23 Materials of Construction** **Walling**

Manufacturing processes, structural properties and adaptability of the principle materials used in engineering. Lectures; Prerequisite: Sophomore standing.

*Spring (2)*

**100A-100B Elements of Electrical Engineering** **Wallin**

Theory and characteristics of electrical equipment with emphasis on industria applications.

100A Direct current circuits, generators and motors. Introduction to alternatin current circuits.

100B Alternating current circuits, transformers, alternators, induction on synchronous motors, conversion apparatus and transmission lines.
Lectures and problems. Prerequisites: Mathematics 4A, Physics 1C or permissio of the instructor.

*Year course (3-3) (Offered in 1944-45 if demand is sufficient)*

**105 Hydraulics** **Walling**

A general course in hydraulics including the fundamental principles of hydrostatic and hydrodynamics applied to the flow of water through orifices, over weirs, through pipes and canals. Lectures and problems. Prerequisites: Mathematics 4A, Physic 1C. Recommended: Physics 105A-105B.

*Spring (3) (Not offered 1944-45)*

**123 Materials of Construction** **Walling**

Essentially the same as Engineering 23 except that students will be expected to investigate more fully some particular material or process and prepare a written report upon it. Prerequisites: Chemistry 1B, Junior standing.
*Spring (2)*

**128 Elements of Heat Power Engineering** **Walling**

Fundamental consideration of fuels, combustion, steam, boilers, furnaces, chimneys, steam engines, steam turbines and auxiliaries, internal combustion engines. Lectures and Problems. Prerequisites: Mathematics 4A, Physics 1B. .
*Fall (3) (Not offered 1944-45)*

## ENGLISH

*Lower division preparation for the liberal arts major in English: at least 12 units of work, including 1B, 56A, 56B. Upper division requirements for the liberal arts major: (1)at least 24 units in upper division English courses, including 18 units from the following: 112, 116A, 116B, 117A, 117B, 118A, 118B, 119, 121, 126, 151, 160; (2) selection arrangement of courses under the supervision of an adviser appointed by the English department; (3) a reading knowledge of one of the languages taught in the College: French, German, Italian, Latin, Spanish. (By "reading knowledge" is meant two full years of lower division work, or the equivalent. Further work in one of these languages, in upper division courses, is highly recommended.)*

### LOWER DIVISION COURSES

**L1A Subject A: English Composition** **The Staff**

The elements of composition, including drill in grammar and usage; exercises in vocabulary building and careful reading; theme writing. Credit in this course is equivalent to passing the English A Examination, and admits to English 2 courses.
*Fall and Spring (3)*

**L1AA Reading Efficiency and Vocabulary Extension** **Trail**

Special drill in reading for comprehension; vocabulary building; practice in elementary composition. Systematic, progressive, and intensive training and practice in effective reading and methods of study. This course may be substituted for English L1A.

*Fall and Spring (3)*

**1B-2 First-Year Reading and Composition** **The Staff**

The first half year 1B, is composition, with exposition stressed. The second half year may be chosen from any section of English 2, which is a continuation of composition, but is primarily reading and the analysis of literature and is open to students who have completed either 1B or L1A. By completing 1B and a section of 2, the student earns six units of college composition.

Students may elect more than one section of English 2.

**1B Composition** **The Staff**

Exposition is stressed. Prerequisite: satisfactory Subject A test. *Not open to students who have taken English L1A or L1AA.*

*Fall and Spring (3)*

**2A Argumentation**

A study of the underlying principles of, and of the methods involved in, writing designed to secure agreement or favorable consideration, together with much practice in both shorter and longer forms of such writing.

*Spring (3) (Not offered in 1944-45)*

**2B Biography** **F. L. Johnson**

Composition, stressing personal narrative and informal essay. Reading from field or biography and memoirs.

*Fall and Spring (3)*

**2C Periodical Literature** **Dickhaut**

Composition stressing article writing of varied types. Reading from current periodical literature.

*Fall and Spring (3)*

**2D Foundations of the Language**

An elementary course in English linguistics designed to make more significant the native language through a study of the elements which have gone into the composition of its vocabulary.

*Fall and Spring (3) (Not offered in 1944-45)*

**2E Modern Drama** **F. L. Johnson**

Composition based upon the reading of recent plays and dramatic criticism.

*Spring (3)*

**2F Short Story Writing**

A practical course in writing, including a study of short story technique and markets, and the writing of complete short stories.

*Spring (3) (Not offered in 1944-45)*

**2G Freshman Literature** **Keeney**

An introduction to literature of various types in modern European and American culture, with composition.

*Fall and Spring (3)*

**L8 English in Business** **Amsden**

Theory and practice of business correspondence. Business letters as applied salesmanship; problems in writing credit and collection letters, applications for employment, adjustment letters, and sales letters. Prerequisite: English L1A or equivalent, as indicated by Subject A Examination, or record from college. This course is planned for students in Secretarial Training; units obtained in it cannot be used to meet English requirements in other fields.

*Fall and Spring (3)*

**10 Recreational Reading** **The Staff**

Development of personal tastes for leisure-time reading through lectures and oral or written reports. May be taken a second time with new material.

*Fall and Spring (1)*

**50A-50B Survey of American Literature** **Kennedy**

Semester I: A survey of American literature from its beginnings to 1860. Semester II: American literature from 1860 to the present. Lectures, discussions, and reports.

*Year Course (3-3)*

**52A-52B Types of World Literature** **Adams**

A chronological survey from Homer to modern times. The first semester stresses the classical epic and tragedy. The second semester, beginning with the Renaissance, stresses prose fiction, the drama, and the essay.

*Year course (3-3)*

**56A-56B Survey of English Literature** **Keeney**

The study of some important works of English literature from the Anglo-Saxon period through the Victorian age, with emphasis upon the literary history of each period.

*Year course (3-3)*

### UPPER DIVISION COURSES

**101A Modern Continental Fiction** **Dickhaut**

A survey of leading French, Russian, Scandinavian, Italian, and German novelists and short story writers, from Tolstoy and his associates to the present day.

*Spring (3) (Offered in 1944-45 and alternate years)*

**101B Modern British Fiction** **Dickhaut**

The novel and short story, especially of the last quarter of a century.

*Spring (3) (Offered in 1945-46 and alternate years)*

**104 Latin-American Literature in English** **Phillips**

A survey of the literature of the Latin-American countries, with lectures in English and reading in English translations. Class reports on collateral reading. Spanish credit will be given to those who wish to do the requisite reading in Spanish.

*Spring (3) (Offered in 1945-46 and alternate years)*

**106A, 106B Advanced Composition** **Dickhaut**

A laboratory course in modern prose writing. Semester I: Artistic narrative, with description. The short story. Semester II: The essay, the magazine article, criticism. Outside readings. Prerequisite: One year of college composition. Either semester may be taken first.

*Fall, Spring (3-3) (Offered in 1945-46 and alternate years)*

**107A, 107B Advanced Composition** **Adams**

These courses are designed for students who wish to do independent work in composition. The discussions will consider the problems of effective expression as exhibited in the work of the members of the class. Prerequisite: Same as for 106A, 106B. Either semester may be taken first.

*Fall, Spring (3-3) (Offered in 1944-45 and alternate years)*

**110 Recreational Reading** **Dickhaut**

An advanced course in the group reading of modern drama, poetry and fiction.

*Fall and Spring (1 or 2)*

**112 The English Language**

An inductive historical approach to basic aspects of the language. The course includes an analysis of English sounds, grammar, and syntax, beginning with Modern English and going back through Early Modern, Middle, and Old English.

*Fall (3) (Not offered in 1944-45)*

**113 American English**

The rise of American English; its peculiarities in pronunciation, grammar, and vocabulary; slang, regional and cultural differences.

*Spring (3) (Offered in 1945-46 and alternate years)*

**115 The English Bible as Literature** **Kennedy**

A study of the narrative, poetry, and prophecy of the King James version of the Bible. Readings, reports, lectures, and discussions.

*Fall (3) (Not offered in 1944-45)*

**116A The Age of Elizabeth**

Poetry and prose, exclusive of the drama.

*Spring (3) (Not offered in 1944-45)*

**116B The Elizabethan Drama** **F. L. Johnson**

Principal contemporaries of Shakespeare.

*Spring (3) (Offered in 1945-46 and alternate years)*

**117A-117B Shakespeare** **F. L. Johnson**

A chronological survey. The first semester gives special emphasis to the histories and comedies; the second, to tragedy and the dramatic romances.

*Year course (3-3)*

**118A The Age of Swift and Pope** **Keeney**

A study of the literature of the first half of the eighteenth century, with special emphasis on social satire of Swift, Pope, Addison, Steele, Gay and Prior.

*Spring (3) (Offered in 1945-46 and alternate years)*

**118B The Age of Johnson** **Keeney**

A study of Johnson and his circle as representative of their age, together with a study of Burns, Blake, and others as forerunners of the age of Romanticism.

*Spring (3) (Offered in 1944-45 and alternate years)*

**119 The Romantic Period: Poetry** **Trail**

A study of early nineteenth century poetry; the work of Wordsworth, Coleridge, Byron, Shelley, and Keats, in relation to the thought of the revolutionary period.

*Fall (3) (Offered in 1945-46 and alternate years)*

**121 The Victorian Period: Poetry** **Trail**

A study of Tennyson and Browning and their contemporaries and successors, relating English poetry to nineteenth century life and thought.

*Fall (3) (Offered in 1944-45 and alternate years)*

**126 Nineteenth Century British Prose** **Dickhaut**

Romantic and mid-Victorian prose writers, including Coleridge, Hazlitt, Lamb, DeQuincey, Carlyle, Landor, Macaulay, Mill and Thackeray.

*Fall (3) (Offered in 1944-45 and alternate years)*

**127 Modern British Prose** **Dickhaut**

Late nineteenth and early twentieth century essays of Arnold, Galsworthy, Huxley, Newman, Pater, Ruskin, Shaw, Stevenson, Wells, and others.

*Fall (3) (Offered in 1945-46 and alternate years)*

**130A American Literature: to 1900** **Adams**

A survey of literary movements in the United States to the late nineteenth century, with a study of the chief writers. Not open to students who have credit in English 50A.

*Fall (3)*

**132 The Frontier and American Literature** **Kennedy**

A survey of the influence of the frontier upon American literature from colonial days to the present. Studies in source materials, biographies, and representative writers such as Irving, Cooper, Harte, and Mark Twain.

*Fall (3) (Offered in 1944-45 and alternate years)*

**133 American Fiction** **Adams**

The outstanding writers of novels and short stories, from Cooper to Norris.

*Spring (3) (Offered in 1944-45 and alternate years)*

**134 American Literature: 1900 to the present** **Kennedy**
A survey of American literature since 1900 with emphasis upon contemporary poetry, fiction and drama. Not open to students with credit in English 50B.
*Spring (3)*

**143 The Novel** **Kennedy**
History of the English novel from the beginnings to Hardy. Extensive reading of novels with reports. Lectures and discussions.
*Fall (3) (Offered in 1945-46 and alternate years)*

**151 Chaucer** **Keeney**
The study of Chaucer's works, and a consideration of the social and literary backgrounds of the fourteenth century.
*Fall (3)*

**152A Survey of Drama: Comedy**
Studies in the field of comedy, based on selected readings from the works of Continental, English, and American dramatists. Lectures, discussions, and reports on reading.
*Fall (3) (Not offered in 1944-45)*

**152B Survey of Drama: Tragedy**
Procedure as in 152A, with selections taken from the field of tragedy.
*Spring (3) (Not offered in 1944-45)*

**160 The Age of Milton** **Adams**
Emphasis is put upon the work of Milton.
*Spring (3) (Offered in 1945-46 and alternate years)*

**166 Honors Course** **The Staff**
Special study. Open to members of the Honors Group in English (See page 21.)
*Fall and Spring (1 to 5-1 to 5)*

**167 Research: Advanced Honors Course** **The Staff**
Special study. Open to mature, specially qualified students, graduates, teachers of English literature, and others who have demonstrated marked aptitude for intensive research in the field of English literature.
*Fall and Spring (3-5)*

**Comparative Literature.** For other courses in literature, offered by members of the English Department and other departments, see Comparative Literature, page 68.

## TWO-YEAR COURSES

**L40A Beginning Composition** **The Two-Year Staff**
The elements of composition, including drill in grammar and usage; exercises in vocabulary building and careful reading; theme writing. Open only to Two-Year students.
*Fall and Spring (3)*

**L40B Freshman English** **The Two-Year Staff**
Composition stressing exposition. Reading from essays and articles. Prerequisites: Satisfactory Subject A test. Open only to Two-Year students.
*Fall and Spring (3)*

**L40C Freshman Literature** **The Two-Year Staff**
Literature, mainly contemporary, is read for its thoughts and ideas, especially in relation to human problems and their solution. Practice in writing is continued. Prerequisite: One semester of Freshman English. Required of all Two-Year students; open only to Two-Year students.
*Fall and Spring (3)*

**.45 Sophomore English: Biography** **The Two-Year Staff**

omposition stressing personal narrative and informal essay. Reading from field of iography and memoirs. Prerequisite: English L40A or L40B, and English L40C. pen only to Two-Year students.

*all (3)*

**.46 Sophomore English Contemporary Literature** **The Two-Year Staff**

tudy of contemporary literature, with emphasis on various forms, such as the ovel, poetry, drama, etc., as used by the principal writers of the twentieth century orld. The main objective of the course is to give students a background for the ajor portion of their reading beyond college. Open only to Two-Year students.

*pring (3)*

## FOREIGN LANGUAGES

*he courses offered in foreign languages are listed below. See pages listed after each ubject for a more complete description of the offerings under that designation. French, ee below; General Language, page 80; German, page 83; Italian, page 86; Latin, age 87; and Spanish, page 109.*

*s a background for advanced work in Romance languages, students are advised to nclude in their electives as many as possible of the following courses: Geography 118, istory 121A, 121B, 147, Aesthetics 50 or 150; English 52A, 52B, 56A, 56B, 101, 18A, 119, 143.*

## FRENCH

*ower division preparation for the liberal arts major in French: French A-B-C-D; ither German A-B or Spanish A-B; History 4A-4B.*

*iberal arts major in French : Twenty-four units of upper division work, of which t least eighteen must be in French, and of which a maximum of six may be in related ubjects, arranged in consultation with the chairman of the department. At least a C verage in upper division major courses.*

### LOWER DIVISION COURSES

**A-B Elementary** **L. P. Brown, Phillips**

ntensive study of French grammar and syntax; daily written work discussed in class; lass drill in conversational idiom and pronunciation; reading with oral discussion and ésumé; dictation; introduction to contemporary prose writers. Credit not given for French A unless followed by French B. Students who have had one year of French in high school should register for two units of work in French A. Those who have had two years of French in high school should register for four units of work in French B.

*Year course (5-5)*

**C-D Intermediate Reading** **E. M. Brown, Phillips**

Reading and composition; study of standard prose as a basis for class work, collateral reading with résumés and written reports in French; dictation. Individual conferences. Prerequisite: French B or three years of high school French, or its equivalent. Students with four years of high school French should register for French D.

*Year course (3-3)*

**SC Scientific Reading** **L. P. Brown**

Reading taken from the fields of chemistry, physics, medicine, zoology, biology, etc. Outside readings of books and periodicals. Oral and written reports. Prerequisite: French B or equivalent.

*Fall (2) (Offered in 1944-45 if demand is sufficient)*

### UPPER DIVISION COURSES

**101A-101B Conversation and Composition** **E. M. Brown**

Prerequisite: French D, or its equivalent, with grade of *C*.

*Year course (3-3)*

### 105A-105B Modern French Drama E. M. Brow

Plays of Musset, Scribe, Augier, Dumas fils, Pailleron, Brieux, Hervieux, Maeterlinc Rostand, and others read and discussed as to subject matter and technique. Outsid reading and reports. Prerequisite: French D, or its equivalent, with grade of *C*.

*Year course (3-3) (Offered in 1945-46)*

### 107A-107B Eighteenth Century Literature L. P. Brow

The works of Montesquieu, Voltaire, Rousseau, the Encyclopédistes, and others. Pre requisite: French D, or its equivalent, with a grade of *C*.

*Year course (3-3)*

### 110A-11B Modern French Novel E. M. Brow

The French novel from Victor Hugo to the present day, including such authors as Hugo, Dumas, Stendhal, Balzac, Flaubert, Loti, Anatole France, Bourget, Bordeaux Bazin, Barrè, Romain Rolland, A. Gide, Marcel Proust, and others. Class and outsid reading and reports. Prerequisite: French D, or its equivalent, with grade of *C*.

*Year course (3-3) (Offered in 1947-48)*

### 111A-111B Seventeenth Century Dramatic Literature E. M. Brow

Reading in class of plays of Molière, Corneille, and Racine. Outside readings an lectures on the background of the seventeenth century in France. Prerequisite: Frenc D or its equivalent, with a grade of *C*.

*Year course (3-3) (Offered in 1946-47)*

### 199 Comprehensive Reading and Survey Course The Staf

Designed to fill up the gaps in the reading done in courses. Class meeting once a wee for guidance, reports, and quizzes. Required of all seniors majoring in French.

*Spring (3)*

## GENERAL LANGUAGE

LOWER DIVISION COURSE

### A Latin and Greek Word Derivation L. P. Brown

A general and elementary course in philology. A study of Latin and Greek roots o most frequent ocurrence in English, and of the English words derived from them.

*Fall (2)*

## GEOGRAPHY

*Lower division preparation for the liberal arts major in geography: Geography 1, 2, 3, and Geology 1A-1B. Recommended: A reading knowledge of French or German.*

*Liberal arts major (major division): Twenty-four units of upper division work in geography or 18 units in geography and six units in related subjects arranged in consultation with the chairman of the department.*

LOWER DIVISION COURSES

### 1 Introduction to Geography: Physical Elements The Staff

The nature of maps, weather and climates of the world; natural vegetation; land forms and their associated soils, with reference to their climatic relationships; the seas and their coasts. One all-day field trip. Open to all students who have not taken Geography 10A-10B. *This course is classified as a natural science.*

*Fall and Spring (3)*

### 2 Introduction to Geography: Natural and Cultural Regions The Staff

The regional differentiation of the world by human activity; areal bases of economy and nationality. Prerequisite: Geography 1.

*Fall and Spring (3)*

### 3 Elementary Meteorology Blake

An elementary study of the earth's atmosphere and changes in it which produce our weather and influence human affairs. Special attention given to local conditions, instruments, and records. Aeronautical meteorology stressed in the fall semester. *This course is classified as a natural science.*

*Fall (3)*

**Map reading and Map Interpretation** **Post**

Representation of geographic data by means of maps. Interpretation of projections, cales, symbols, land forms, and culture from topographic maps; measurements of ultural data on maps. Prerequisite: Geography 1.

*Fall (2)*

**0A-10B Economic Geography** **Post**

Beginning course in economic geography limited to students in commerce and prospecive economics majors. Not open to students who have had Geography 1 and 2. *This course may serve as prerequisite to upper division geography courses.*

*Fall and Spring (3-3) (Not offered in 1944-45)*

## UPPER DIVISION COURSES

**112 Geography of California** **Storm**

The physiographic regions of California and the cultural landscapes developed by the successive cultural groups. Prerequisite: Geography 1.

*Spring (3) (Not offered in 1944-45)*

**116 Geography of Latin America** **Post**

The natural regions of Latin America; their occupational condition and historical evolution. Prerequisite: Geography 1.

*Spring (3)*

**117 Geography of Northern and Eastern Europe** **Post**

A study of the cultural development of the countries of northern and eastern Europe n relation to physical background and historical evolution. Prerequisite: Geography 1.

*Fall (3) (Not offered in 1944-45)*

**118 Geography of the Mediterranean Area** **Post**

A study of the cultural development of the countries of Southern Europe, Western Asia, and North Africa in relation to physical background and resources. Prerequisite: Geography 1.

*Spring (3)*

**121 Geography of North America** **Storm**

The natural regions of North America, their formation and economic and historical development. Prerequisite: Geography 1.

*Fall (3)*

**124 Geography of Asia** **Storm**

The cultural regions of Asia, their physical environment, and historial development. Prerequisite: Geography 1.

*Spring (3)*

**135 Geography of the San Diego Area** **Storm**

Directed individual urban and rural field work in the San Diego area; the mapping of a small area and making its geographic interpretations. Prerequisites: Geography 1 and 2.

*Fall (3) (Not offered in 1944-45)*

**141 Economic Geography** **Storm**

A survey of the raw materials of world trade; their production and distribution as related to major geographic regions of the world. Prerequisite: Geography 1.

*Fall (3)*

**166 Honors Course** **The Staff**

To be arranged after consultation with the chairman of the department. (See page 15.)

*Fall and Spring (Credit to be arranged)*

### Two-Year Course

**L40A-L40B Introduction to Geography** **The Sta**

An introductory descriptive course designed to acquaint students with the genera features of the various regions of the world. Presents the climatic regions of th world with a description of what man has done with the resources of each. Develop a background for the interpretation of world problems and world happenings. On all-day field trip in L40A. *Open only to students enrolled in a two-year curriculum.*

*Year course (3-3)*

## GEOLOGY

*Department requirement in Geology for liberal arts major in Physical Science include in addition to Geology 1A-1B, the completion of: Chemistry 1A-1B, Mathematics 3A Physics 1A-1B-1C-1D or 2A-2B; 3A-3B. Students preparing for advanced work i Geology may substitute Engineering 21 for Mathematics 3A. Geology 2A may be sul stituted for Geology 1A in department prerequisite requirements provided the add tional necessary unit of laboratory work is completed.*

*French or German, Engineering 1A-1B and Geology 21A-21B are recommended.*

### LOWER DIVISION COURSES

**1A Physical** **Brook**

The composition, origin, and distribution of earth materials, and their modificatio through mechanical and chemical processes of change. Three lectures and one three hour laboratory period weekly with related field study during the semester. (No open to students who have had Geology 2A except for one unit upon the completion o the laboratory section.)

*Fall (4)*

**1B Historical** **Brook**

Theories of earth origin, and the evolutionary history of the earth as traced throug rock and fossil records. Consideration of the Paleontologic Sequence. Three lecture and one three-hour laboratory period weekly, with arrangement for field study an conference during the semester. Prerequisite: Geology 1A or equivalent.

*Spring (4)*

**2A General** **Brook**

Similar to Geology 1A but *without* laboratory. Open to all students except physica science majors or those already presenting credit in Geology 1A. Two lectures an one demonstration and discussion hour weekly.

*Fall (3)*

**2B Physiography** **Brook**

A study of the land forms of the United States and their physiographic history a illustrative of universal geologic conditions. Two lectures and one discussion hou weekly. Prerequisite: Geology 1A or 2A.

*Spring (3)*

**21A-21B Mineralogy** **Brooks**

Study of the common minerals and rocks. Use of the blowpipe and simple chemical reagents but with emphasis upon sight determination. Prerequisite: Geology 1A and high school chemistry, or equivalents.

*Year course (3-3) (Offered in 1944-45 and alternate years if demand is sufficient)*

### UPPER DIVISION COURSES

**100 Structural Geology** **Brooks**

The evolution and description of the structural and topographical features of the earth. Faulting, folding, and orogenic forces with practical illustrations from the North American Continent and emphasis on California geologic conditions. Lectures, discussions, and occasional field trips. Prerequisite: Geology 1A-1B.

*Fall (3) (Offered in 1944-45 and alternate years if demand is sufficient)*

**01 Geologic Problems** **Brooks**

Reconnaissance of adjacent areas with elementary mapping; or directed reading and roup discussion of California Geology; or selection and preparation of materials for he museum collections. Prerequisite: Geology 1A-1B. Registration subject to pproval of instructor.

*Fall and Spring (1-4)*

## TWO-YEAR COURSE

**40 General Geology**

An elementary course dealing with those processes of nature by which the surface f the earth is built up, deformed and torn down. A study of the natural history and ccurrence of the common rocks and minerals.

*Open only to students enrolled in a two-year curriculum.*

*Fall and Spring (3)*

## GERMAN

### LOWER DIVISION COURSES

**A-B Elementary** **H. K. Walker**

Pronunciation, reading and grammar, with practice in simple conversation, narration and description, both oral and written. Credit not given for German A unless followed by German B. Students who have had one year of German in high school should register for two units of work in German A. Those who have had two years of German in high school should register for four units of work in German B.

*Year course (5-5)*

**C-D Intermediate Review and Reading** **H. K. Walker**

Reading and composition; study of standard prose as basis for class work; collateral reading with written reports; German conversation, with the texts read as a basis; dictation. Prerequisite: German B or two years of high school German, or its equivalent. Students with credit for three years high school German, or its equivalent, should enter German C.

*Year course (3-3)*

**SC-SD Scientific Reading** **Messner**

Fall semester. Readings in scientific reader on chemistry, physics, etc.: occasional written reports on scientific subjects read outside of class; sight reading. Spring semester. Readings in special scientific or technical works; weekly written reports required; sight reading. Prerequisite: German SC-German B with a grade of *C* or two years of high school German; German SD-German SC, German C, with a grade of *C*, or three years of high school German.

*Year course (3-3) (Not offered in 1944-45)*

## HEALTH AND PHYSICAL EDUCATION

*(See Physical Education)*

## HEALTH EDUCATION

### LOWER DIVISION

**1 Health and Social Adjustment** (Men) **C. E. Peterson**

An informational course in personal and community hygiene. A study of social hygiene and the hygienic principles of living. Speakers from the County Medical Association on subjects of vital interest enrich the offerings of this course. It is especially desirable that this course be taken in the freshman year.

*Fall and Spring (2)*

**2 Health and Social Adjustment** (Women) **B. I. Stone**

An informational course, reviewing the principles underlying the improvement of personal health, and the solution of practical problems of young women and prospective homemakers. Lectures by specialists in the various fields serve to enrich the course. Required of all freshmen who are candidates for junior standing or the degree.

*Fall and Spring (2)*

### 51 Safety Education

Prevention of accidents: practical application of first aid methods leading to Americ Red Cross First Aid Certificate. Formerly listed in bulletin as Physical Educati 51.

*Fall (1) (Not offered in 1944-45)*

### 61A Nutrition **Dust**

The purpose of this course is to consider health maintenance through food selecti from the modern scientific viewpoint. Consideration is given to the fundamentals an adequate diet from the basis of the known dietary essentials and of the disord which result from the deprivation of these factors. Diets for special needs are al planned. Recommended for premedical, predental, prenursing, and sociology majo Red Cross Nutrition Certificate is granted upon course completion.

*Spring (2)*

### 61B Nutrition—Laboratory **Dust**

A basic course in food preparation which includes the study of typical food selecti and preparation methods which best conserve the essential food flavors and nutrien Class meets once a week and is open only to students who have registered in Nutriti 61A.

*Spring (1)*

### 90 Physiology of Reproduction **Hu**

A course consisting of a series of lectures and discussion dealing with normal a abnormal physiology and anatomy of reproduction, facts and frauds in sex hygie and related topics. Prerequisite: Health Education 2.

*Fall and Spring (Women) (1)*

### UPPER DIVISION

### L151 Health Education (Education 147-148) **B. I. Sto**

A course for teacher-education students which includes the study of the disease common physical defects, and health indices of school children; the detection a control of communicable diseases which may appear in the school; and the elemen which underlie a health education program. Methods of presenting personal a group health to children of different ages. Hygiene of the schoolroom, such as seatin lighting, and ventilation.

*Fall and Spring (2)*

## TWO-YEAR COURSES

### L40A Nutrition **Dusti**

A course based on the study of how to make healthful food choices from the mode scientific viewpoint. Consideration is given to the meaning and indications of ad quate nutrition and to food in its relationship to the maintenance of well-being. R Cross Nutrition Certificate is granted upon course completion. Open only to studen enrolled in a two-year curriculum.

*Fall (2)*

### L40B Nutrition-Laboratory **Dusti**

A practical course in the selection and preparation of typical foods. Emphasis placed on the conservation of essential food flavors and nutrients. Class meets on a week and is open only to students who have registered in Nutrition L40A.

*Fall (1)*

## HISTORY

*Lower division preparation for the liberal arts major in history: History 4A-4B o 8A-8B, and either Political Science 1A-1B, 71A-71B or Economics 1A-1B. Both hi tory courses are recommended for students planning to major in history. No studen shall enroll in more than one lower division history course during a semester.*

*Upper division requirements for the liberal arts major: At least twenty-four units i upper division courses in history, to be arranged in consultation with the chairman o the department. A reading knowledge of at least one foreign language is expected o history majors.*

*The history minor: from twelve to eighteen units of work in history is recommended. At least half the work should be chosen from upper division courses.*

### LOWER DIVISION COURSES

**A-4B History of Modern Europe** **Nasatir**

Development of European society and institutions from about 1500 A.D.

*Year course (3-3)*

**A-8B History of the Americas** **Nasatir**

A general survey of the history of the western hemisphere from the discovery to the present time. Emphasis on the process of planting European civilization in the new world, the international contest for the continents, the wars for independence, the development of the American republics, and their relations with each other and with the rest of the world. Based on H. E. Bolton's "Syllabus of the History of the Americas."

*Year course (3-3)*

### UPPER DIVISION COURSES

**111A-111B Ancient History**

Semester I—Social, economic, political and cultural development of the Greek states, with emphasis upon the growth of democracy, attempts at federal union and imperialism, Hellenism.

Semester II—Roman history to the beginning of the medieval period; discussions of Roman imperialism and the main constitutional, economic, social and religious developments in the republic and empire.

*Year course (3-3) (Offered in 1945-46 and alternate years)*

**121A-121B Medieval History** **Nasatir**

General survey of European political and cultural development between 500 and 1500 A.D., with special attention to intellectual tendencies and the development of institutions which culminated in the emergence of modern Europe after 1500.

*Year course (3-3) (Offered in 1944-45 and alternate years)*

**143 The French Revolution and Napoleonic Era**

An intensive study of the revolutionary period in Europe from 1789 to 1815.

*Fall (3)*

**144 Europe Since the World War**

Developments in Europe from 1919 to the present.

*Spring (3)*

**146A-146B Diplomatic History of Europe Since 1648**

A course centering around the four major European treaties, their background, drafting and results. First semester, the Treaties of Westphalia, Utrecht and Vienna. Second semester, the Treaty of Versailles.

*Year course (3-3) (Not offered in 1944-45)*

**147 History of Modern France**

Intensive survey of the political and social development of France under the Third Republic, 1870 to the present. International and colonial problems of modern France will also be considered.

*Fall (3) (Not offered in 1944-45)*

**148 History of Modern Germany**

Political, social and economic development of Germany after 1870, the Empire and Republic. German post-war problems, imperialism, and the establishment of the Third Reich will receive special attention.

*Spring (3) (Not offered in 1944-45)*

**151A-151B England Since the Norman Conquest** **Nasa**

A survey of political and constitutional development in England since 1066, stressi the transition from medieval to modern England, Tudor despotism, the struggle f self-government under the Stuarts, the rise and development of present-day politi and social institutions.

*Year course (3-3)*

**156A-156B History of British Expansion** **Nasat**

A study of the growth, development, and break-up of the older overseas empire: t beginnings of the newer empire after 1783; the rise, federation, and imperial relatio of the British Commonwealth of Nations; the crown colony system; India und British rule; and British expansion in Africa and the Pacific; development of Briti mandates.

*Year course (3-3)*

**161 South America Since Independence** **Nasat**

The republics of South America. Attention directed to the development of nationali in South America, the struggles for political stability, the exploitation of resourc diplomatic and commercial relations with the United States, and other internation problems of South America. Survey of present-day conditions, political, economi and social.

*Spring (3)*

**163 Mexico and the Caribbean Countries** **Nasat**

Same plan in general as outlined in History 161. Special attention to the relations the United States with these countries, and to the recent developments in Mexico.

*Fall (3)*

**171A-171B The Rise of the American Nation** **Leonar**

Semester I. English colonization in North America and the development of coloni institutions and politics. Semester II. The revolutionary movement and the Rev lutionary War; the establishment of the government under the Constitution to t close of the War of 1812.

*Year course (3-3) (Offered in 1944-45 and alternate years)*

**173A-173B The Expansion of the United States** **Leonar**

The rise of Jacksonian Democracy; territorial expansion and the Mexican War; t slavery controversy; the Civil War, and reconstruction; the growth and progre of the United States to the World War.

*Year course (3-3) (Offered in 1945-46 and alternate years)*

**199 Special Courses for Advanced Students** **Leonar**

Required of all students with a history major in the liberal arts curriculum and to attended during the senior year. Other students may be admitted with the permissio of the instructor.

*Spring (2)*

## ITALIAN

**A-B Elementary** **Phillip**

Intensive study of Italian grammar and syntax, with daily written work; class dri in conversational idiom and pronunciation; reading of works by contemporary writer Credit not given for Italian A unless followed by Italian B. Students who have ha one year of Italian in high school should register for Italian A. Those having tw years in high school should register for Italian B.

*Year course (5-5) (Not offered in 1944-45)*

## JOURNALISM

**Courses in journalism will not be given during the school year 1944-45. Th courses listed represent the normal program of the college, and will be taugh when the demand again becomes normal.**

*For the curriculum in journalism see page 47.*

*For the profession of journalism introductory work in the fields of literature, history political science, economics, social economics, the arts, etc., is recommended.*

*The aim in the specialized courses in Journalism is to offer introductory training in the principles and practices of journalistic writing only after a good foundation in correct speaking and writing of English has been laid. Practical training in news reporting and editing for student publications and for the daily press is emphasized.*

LOWER DIVISION COURSES

**10A-10B Contemporary Press**

Development of the American newspaper; comparison of American and foreign newspaper practices; display and treatment of news; press associations. Prerequisite to Journalism 51A-51B; open to general enrollment.

*Fall and Spring (1-1)*

**51A-51B News Gathering and Reporting**

Study of news sources and types; practice in news and feature writing; newspaper organization; excursions and special lectures. Course planned for freshmen as a prerequisite to positions on all college publications.

*Year course (3-3)*

**L53A-L53B Applied Journalism**

Practice and projects in reporting news and feature stories and in other editorial work on *The Aztec, El Palenque, Del Sudoeste.* Students not enrolled in 51A-51B are required to take L53C-L53D.

*Fall and Spring (1 to 3; 1 to 3)*

**L53C-L53D Newswriting Problems**

Techniques in meeting problems of reporters and editors on publications with emphasis upon work of class members on *The Aztec, El Palenque, Del Sudoeste.*

UPPER DIVISION COURSES

**151A-151B Newspaper Editing**

Study and practice in the editorial, headline writing and editing of newspaper copy; management of publications. Projects in newspaper and magazine work. Required of all upper division students who take L153A-L153B for credit.

*Fall and Spring (1-1)*

**L153A-L153B Advanced Journalism Practice**

Editing of student publications and direction of personnel in editorial projects. Prerequisite: 51A-51B (may be waived by instructor). 151A-151B must be taken concurrently with this course.

*Fall and Spring (1 to 3; 1 to 3)*

NOTE.—Not more than six units in all will be given for Journalism practice on student publications.

**153C-153D Newspaper Practices**

Work on community publications, including county newspapers, under direction of the instructor.

*Fall and Spring (2)*

**199 Special Course for Advanced Students**

Open to seniors with sufficient journalistic background to satisfy the instructor.

*Spring (2)*

## LATIN

**L. P. Brown**

**C-D Intermediate**

Readings from Latin writers. First semester: Caesar. Second semester: Cicero and Ovid. Prerequisite: Two years of high school Latin or the equivalent.

*Year course (3-3) (Not offered in 1944-45)*

## LIBRARY SCIENCE

### L10 Use of the Library **J. P. Ston**

The chief object is to give a working knowledge of some of the resources of the librar which every teacher and student should understand—the decimal classification, th card catalog, periodical indexes, and the most important reference books, togethe with some instruction in the preparation of bibliographies. The course will be a requir ment of those students added to the library's staff of student assistants, although it wil not prepare the student to become a librarian.

*Fall and Spring (2)*

## MATHEMATICS

*Lower division preparation for the liberal arts major in mathematics: Mathematic 3A, 3B, 4A, and 8 with an average grade of C or better. Two or more of the followin are recommended: Astronomy 1, Economics 1A-1B, 2, Engineering 21, French A-B German A-B, Physics 1A-1B or 2A-2B, Surveying 1A.*

*Liberal arts major (upper division): Twenty-four units including at least eightee in upper division mathematics, the others being selected from Astronomy 107, Chem istry 111A-111B, 144, Physics 105A-105B, 112 and other approved courses. Th major should be arranged in consultation with the chairman of the department an completed with a grade of C or better.*

### LOWER DIVISION COURSES

### LA-LB Basic Mathematics **Livingsto**

This is a wartime emergency course, primarily for those who have not had the hig school course in plane geometry. It stresses arithmetic, informal geometry, simpl algebra and very elementary numerical trigonometry, with applications. For th present it meets the minimum lower division requirement in elementary algebra an geometry. There is no prerequisite beyond junior high school mathematics. The clas meets three times per week.

*Year Course (2-2)*

### C Intermediate Algebra **Gleason**

The course begins with an extensive review of elementary algebra. Topics covered include quadratic equations, simultaneous equations, ratio and proportion, variation, arithmetic and geometric progressions, binomial expansion and logarithms. It is equivalent to the second year-course in high school algebra. Students who have credit for high school algebra but without a recommending grade may earn two units of college credit if they carry the course with grade of *C* or better. Prerequisite: Elementary Algebra and Geometry or Mathematics LA-LB.

*Fall and Spring (4)*

### D Trigonometry

Roughly equivalent to the high school course in plane trigonometry but with more attention than is often given to those aspects needed in analytic geometry and calculus. Numerical trigonometry is stressed with application to science and industry. A brief introduction to the solution of right spherical trigonometry is included. Students who have credit for plane trigonometry in high school but without a recommending grade may earn two units of college credit if they carry the course with grade of C or better. Prerequisites: Intermediate algebra with recommending grade in at least one semester.

*Fall and Spring (3)*

### E Solid Geometry

A course in intuitive solid geometry with much attention to the calculation of surfaces and volumes for the simpler solids and for certain others used in industry. Prerequisite: Intermediate algebra, with recommended grade for at least one semester.

*Fall (2)*

### S Slide Rule

Theory and use of the slide rule. Practice in performing the fundamental operations of arithmetic. Some attention is given to more involved computations. Prerequisites: Intermediate algebra and either trigonometry or solid geometry. The class meets twice a week.

*Fall and Spring (1)*

**1 Introduction to Analysis** **Livingston**

A general course in calculus and related topics, primarily for students of social and biological sciences who do not have time for the longer courses in analytic geometry and calculus. Not available to students who have credit for Mathematics 3B. With Mathematics C taken in high school or college, this meets the "Additional Year Course" requirement for the lower division. Prerequisites: Elementary algebra and geometry, and intermediate algebra, with satisfactory grades.

*Fall and Spring (3)*

**3A-3B Analytic Geometry and Calculus** **Walling**

Analytic geometry, differential calculus, and an introduction to integral calculus. Credit is allowed for 3A taken alone if desired. Prerequisites: Elementary algebra and geometry, intermediate algebra, and trigonometry, with satisfactory grades. Students whose preparation is deficient either in quality or quantity should enroll in the appropriate remedial course.

*Year course (3-3)*

**4A-4B Solid Analytic Geometry and Calculus** **Livingston**

Integration, applications of integration, infinite series; solid analytic geometry, partial differentiation, and multiple integrals. Credit is allowed for 4A alone if desired. Prerequisites: Mathematics 3A-3B. Solid geometry is recommended; also college algebra, before 4B.

*Year course (3-3)*

**8 College Algebra** **Gleason**

Complex numbers, determinants, and other selected topics. Prerequisites: Trigonometry and either Mathematics 1 or 3A.

*Spring (3)*

**15 Spherical Trigonometry and Navigation** **Livingston**

Essentials of spherical trigonometry with applications to certain problems in navigation, particularly to those of middle latitude sailing, great circle sailing, and the determination of latitude and longitude. Prerequisites: Intermediate algebra, plane trigonometry, and some knowledge of the geometry of the sphere.

*Fall and Spring (3)*

## UPPER DIVISION COURSES

**102 Selected Topics in Algebra**

Topics supplementary to those considered in Mathematics 8 and 111. Prerequisites: Mathematics 3A-3B and 8.

*(Offered as needed)*

**104 History of Mathematics** **Gleason**

History of mathematics down to early modern times. Prerequisite: Mathematics 3A-3B, or 3A and 1.

*Fall (3) (Offered in 1945-46 and alternate years)*

**105 College Geometry** **Livingston**

An extension of the high school course in plane geometry, dealing largely with triangles and circles. Several new procedures, including inversion, are introduced. Prerequisite: Mathematics 3A-3B, or 3A and 1.

*Fall (3) (Offered in 1944-45 and alternate years)*

**106 Projective Geometry** **Livingston**

Concurrence of lines, collinearity of points and other properties of figures not altered by projections; construction and study of ellipses, hyperbolas and parabolas by means of projections. Prerequisites: Mathematics 3A-3B or 3A and 1.

*Fall (3) (Offered in 1945-46 and alternate years)*

**111 Higher Algebra** **Livingst**

Theory of algebraic equations, and other topics. Prerequisites: Mathematics 3A-3 and 8.

*Spring (3) (Offered in 1945-46 and alternate years)*

**112 Introduction to Higher Analytic Geometry** **Gleas**

Coordinates, transformations, properties of loci. Prerequisites: Mathematics 3A-3 4A, and 8.

*Spring (3) (Offered in 1945-46 and alternate years)*

**117 Intermediate Calculus** **Livingst**

Essentially the same as Mathematics 4B with additional special work for advanc students. Prerequisites: Mathematics 3A, 3B, and 4A. Credit not allowed for bo 4B and 117.

*Spring (3)*

**118 Advanced Calculus** **Livingst**

Selected topics in advanced calculus, exclusive of differential equations. Prerequisit Mathematics 4A-4B, or 4A with 4B taken concurrently.

*Spring (3) (Offered in 1944-45 and in alternate years)*

**119 Differential Equations** **Gleas**

Ordinary differential equations of first and second order, with applications. P requisite: Mathematics 4A-4B (4B concurrently if desired).

*Spring (2) (Offered in 1945-46 and alternate years)*

**124 Vector Analysis**

Addition, subtraction, multiplication, differentiation, and integration of vectors, w applications in geometry, mechanics, and mathematical physics. Some attention given to divergence, gradient, and curl. Prerequisites: Mathematics 4A (4A c currently if desired).

*Spring (3) (Offered occasionally)*

**140 Probability and Statistics** **Gleas**

Statistical theory and method from the mathematical standpoint; applications social and natural science. Prerequisites: Mathematics 4A and 8, or 4A-4B.

*Fall (3) (Offered in 1944-45 and alternate years)*

**199 Special Study** **The St**

Study of materials mainly supplementary to the courses listed above. Prerequisit Average grade of B or better in at least 12 units beginning with Mathematics 3A.

*Fall and Spring (1 or 2, each semester)*

## TWO-YEAR COURSE

**L40 Computational Mathematics** ——

Basic work in arithmetic, informal geometry, elementary algebra, and simple tri nometry. The chief emphasis is placed on computation. Not open for credit students who already have credit in elementary geometry, whether taken in high sch or in college. Open only to students enrolled in a two-year curriculum.

*Fall and Spring (3)*

## MERCHANDISING

**L20 Consumer Problems**

Growing importance of consumption as a field for study; consumer incomes in t United States; consumption and business cycles; bases of consumer choice-makir practical problems of buying food, clothing, shelter, transportation, insurance, et family budgeting; a survey of the methods by which products reach the consum market structure and functions seen from the consumer's point of view.

*Fall (3) (Not offered in 1944-45)*

**124 Principles of Merchandising**

A study of retail stores, emphasizing the problems of store managers and merchandising executives; store location, organization, personnel, sales promotion, buying and handling of merchandise, inventory, turnover, and control methods. Changing conditions in retailing, problems of profitable operation under present conditions.

*Spring (3) (Not offered in 1944-45)*

**125 Principles of Salesmanship**

Theoretical and psychological backgrounds of salesmanship, newer concepts of selling; the selling of ideas and services; steps in a sale; attention, interest, desire, closing; the development of clienteles and of good will; the personal factor in salesmanship.

*Fall (3) (Not offered in 1944-45)*

## MUSIC

*Candidates for a teaching credential in music should refer to the statement "Admission to Teacher Education Curricula" on page 21 and to the other degree requirements on that page and those following. The curriculum for the A.B. Degree with a Special Secondary Credential in Music is on page 31.*

*Lower division preparation for the liberal arts major in music: Music 1B-1C-1D; 4A-4B; 4 units of Applied Music (study of voice or orchestral instrument); Aesthetics 1A-1B.*

*Liberal arts major (upper division): twenty-four upper division units. These shall include Music 105A-105B; 106A; 107A; 119; 120; 121; 4 units of Applied Music; Aesthetics 102A-102B; and 4 units of music activity credit (Music 111, 112, 113, 115, or 130).*

*At least a C average in upper division music courses is necessary.*
*It is recommended that students in meeting degree requirements and in choosing free electives, select from the following courses: English 56A-56B; French A-B; German A-B; History 4A-4B; 146A-B; Physics 2A-2B.*

### LOWER DIVISION COURSES

**1A Musicianship—Fundamentals of Music** **L. D. Smith**

The elements of music; scale construction; elementary music theory; drill in music reading both with syllables and with words; ear training, elementary music dictation. Basic course for all general elementary credential students. Music majors receive no credit.

*Fall and Spring (3)*

**B Musicianship—Music Reading and Ear Training** **L. D. Smith**

Tonal and rhythmic dictation; rhythmic writing; sight singing. Basic course for majors and minors. Text—Smith and Krone: Fundamentals of Musicianship Book I. Prerequisite: Music 1A, or the equivalent. Students not able to pass the departmental entrance examination in the fundamentals of music will take 1A without credit in preparation for this course.

*Fall and Spring (2)*

**C-1D Musicianship—Advanced Music Reading and Ear Training** **L. D. Smith**

Tonal work in minor keys; modal scales; dissonant triads and seventh chords; interval feeling in all chords; rhythmic progression and elementary forms; rhythmic, melodic and harmonic dictation. Prerequisite: Music 1B.

*Year course (2-2)*

**12A String Instruments** **Leib**

Beginner's class in violin, viola, 'cello and string bass. Required of all music majors working for a Special Secondary credential unless this orchestral section is the major or minor field.

*Fall and Spring (1)*

**L3A Woodwind Instruments** **Leib**

Beginner's class in oboe, clarinet, flute and bassoon. Required of all music majors working for a Special Secondary credential unless this orchestral section is the major or minor field.

*Fall and Spring (1)*

**4A-4B Elementary Harmony** **Springston**

Scale construction, intervals, by-tones and diatonic harmonies. Transposition and original composition in the simpler forms. Text—Alchin: Applied Harmony Vol. I. Prerequisite: Music 1A-1B, or the equivalent, and at least one year of piano study.

*Year course (3-3)*

**L6A Brass Instruments** **Leib**

Beginner's class in trumpet, French horn, baritone, trombone and tuba. Required of all music majors working for a Special Secondary credential unless this orchestral section is the major or minor field.

*Fall and Spring (1)*

**L7A Music Materials for the Elementary School** **L. D. Smith**

Study of the song material in the state music texts and in the supplementary texts. Appreciation materials applicable to the elementary school. Required course for all general elementary credential students. Prerequisite: Music 1A.

*Fall and Spring (3)*

**11A-B-C-D Women's Glee Club—Treble Clef** **L. D. Smith**

Entrance upon examination.

*Fall and Spring (½-½)*

**12A-B-C-D Men's Glee Club** **Springston**

Entrance upon examination.

*Fall and Spring (½-½)*

**13A-B-C-D Orchestra** **Leib**

Permission of the conductor required for membership.

*Fall and Spring (1-1)*

**15A-B-C-D A Cappella Choir**

Entrance upon examination.

*Fall and Spring (½-½) (Not offered 1944-45)*

***L16A-L16B-L16C-L16D Individual Study of an Orchestral Instrument**

*Fall and Spring (1-1)*

***L17A-L17B-L17C-L17D Individual Study of Voice**

*Fall and Spring (1-1)*

***L18A-L18B-L18C-L18D Individual Study of Piano or Organ**

Prerequisite: The ability to play artistically hymns and folk songs of the type found in the Golden Book of Favorite Songs.

*Fall and Spring (1-1)*

**20A-B-C-D Chorus** **Leib**

Open to anyone interested in singing standard choral works. No examination required.

*Fall and Spring (½-½)*

**26A-B-C-D Band** **Leib**

Permission of the conductor required for membership.

*Fall and Spring (½-½) (Not offered 1944-45)*

---

* See page 94, conditions under which credit may be given for music study under private instructors.

**27A-27B Music for Enjoyment** **Springston**
A course designed for students with little or no musical background. Lectures and discussions as a basis for intelligent listening to concerts, radio programs, and class presentation of recorded music. Not open to music majors and minors.
*Year course (1-1) (Not offered 1944-45)*

**L28A-L28B Piano** **Springston**
Fundamental playing and reading technics for the pianoforte. Emphasis upon playing by ear, and the development of interpretative ability. For beginners only. No credit for music majors and minors.
*Year course (1-1)*

**29A-B Class Voice**
A class for beginners in the vocal field taking up the problems of breath control, tone placement, articulation and enunciation. Frequent performance before class required. Limited to 15.
*Year course (1-1) (Not offered 1944-45)*

**30A-B Chamber Music** **Leib**
String and woodwind ensembles. The consent of the instructor necessary for admission to class.
*Year course (1-1)*

## UPPER DIVISION COURSES

**102A-102B History of Music** **L. D. Smith**
The various movements in the development of music as related to the other arts. The chronological development of the art of music, with particular emphasis on the larger works. Considerable attention is given to the works of modern composers. Many symphonic works are studied from the orchestral scores. Music majors are required to complete additional assignments for full credit. Prerequisite: Aesthetics 1A or 1B.
*Year course (2-2)*

**105A-105B Advanced Harmony and Composition** **Springston**
Study of the possible types of modulation and chromatic harmonies: continuation of harmonic analysis and original composition. Text Alchin: Applied Harmony Vol. II. Prerequisite: Music 4A-4B.
*Year course (3-3)*

**106A Counterpoint** **Springston**
Study of the five species of counterpoint with much practice in writing in such forms. Application of contrapuntal style to modern composition. Prerequisite: Music 4A-4B.
*Fall (2)*

**107A Form and Analysis** **Springston**
Aural and visual analysis of music forms through a consideration of structure, harmonic content, and style. Prerequisite: Music 105A-105B.
*Spring (2)*

**111A-B-C-D Women's Glee Club—Treble Clef** **L. D. Smith**
Entrance upon examination.
*Fall and Spring (½-½) (A maximum of 2 units in glee club may be counted toward the A.B. degree)*

**112A-B-C-D Men's Glee Club** **Springston**
Entrance by examination.
*Fall and Spring (½-½) (A maximum of 2 units in glee club may be counted toward the A.B. degree)*

**113A-B-C-D Orchestra** **Leib**

Permission of the conductor required for membership.

*Fall and Spring (1-1) (A maximum of 4 units in orchestra may be counted toward the A.B. degree)*

**115A-B-C-D A Cappella Choir**

Entrance by examination.

*Fall and Spring (½-½) (A maximum of 2 units in A Cappella choir may be counted toward the A.B. degree) (Not offered 1944-45)*

***L116A-L116B-L116C-L116D Advanced Individual Study of an Orchestral Instrument**

*Fall and Spring (1-1)*

***L117A-L117B-L117C-L117D Advanced Individual Study of Voice**

*Fall and Spring (1-1)*

***L118A-L118B-L118C-L118D Advanced Individual Study of Piano or Organ**

*Fall and Spring (1-1)*

**119A Instrumental Conducting** **Leib**

Conducting and reading of orchestral scores.

*Fall and Spring (1)*

**120A Vocal Conducting** **Leib**

The theory of vocal conducting together with practical experience gained from directing the college chorus. Prerequisite: Music majors with senior standing.

*Fall and Spring (1)*

**121A Instrumentation** **Leib**

Arranging of music for full orchestra. Selected works of pupils to be performed by standard orchestras.

*Fall and Spring (2)*

**126A-B-C-D Band** **Leib**

Permission of the conductor required for membership.

*Fall and Spring (½-½) (A maximum of 4 units in band may be counted toward the A.B. degree) (Not offered 1944-45)*

**130A-130B Chamber Music** **Leib.**

String quintet and woodwind ensembles only. Permission of the instructor necessary for class membership.

*Year course (1-1)*

## CONDITIONS UNDER WHICH CREDIT MAY BE GIVEN FOR MUSIC STUDY UNDER PRIVATE INSTRUCTORS

Credit may be allowed for private instruction in music under the following conditions:

1. The applicant for such credit must be a regularly enrolled student in the music department of the college.

2. The instructor giving such private work must be approved by the Music Department. All private work and the names of all such teachers must be registered in the office of the music department chairman at the beginning of the semester.

3. In the case of first semester private study, a placement examination conducted by the music department faculty at the beginning of the semester will show the status of the student at the beginning of his work.

4. Evidence that the standards of the Music Department have been met will be shown by an examination conducted by the music department faculty at the end of the semester.

---

* See page 94, conditions under which credit may be given for music study under private instructors.

## PHILOSOPHY

### LOWER DIVISION COURSES

**Philosophy 3A, 3B The History of Thought** **Steinmetz**

A study of the basic ideas of Western Civilization in their historical development. The making of the modern mind as revealed in the development of philosophy and in the relations between philosophy and science, art and religion. The history of ideas against the social and political backgrounds from which they came. Prerequisite: Sophomore standing, or permission of instructor.

*Fall, Spring (3, 3)*

**5A Introduction to Philosophy** **Steinmetz**

The recurring problems of philosophy and the making of the modern mind. Prerequisite: Sophomore standing, or permission of instructor.

*Fall (3)*

**5B Knowledge and Society** **Steinmetz**

Scientific method and the persistent topics of philosophy in their bearing upon the social problems of the day. Prerequisite: Philosophy 5A, save under unusual circumstances.

*Spring (3)*

**3 Social Philosophies** **Steinmetz**

The story of man's speculation regarding his "right" organization, the assumptions, analogies, and economics determining his temporary conclusions: James I. Hobbes, Rousseau, Locke, Jefferson, Kropotkin, Mill, Marx, Mussolini, Dewey, Pius XI, Hoover, Roosevelt, etc.

*Spring (3) (1944-45 and alternate years)*

### UPPER DIVISION COURSES

**120 Reflective Thinking (Logic)** **Steinmetz**

Analysis of fallacies, and the logic of argument and proof; also examination of reflective procedures in various fields of knowledge, and review of some psychological descriptions of thought. Prerequisites: Psychology 1A and Philosophy 5A.

*Fall (3)*

**130 Conduct (Ethics)** **Steinmetz**

The meaning of morality; motives and sources of belief, aspiration, ideal; psychological and sociological factors; representative ethical systems; relation of ethics to other axiological studies.

*Spring (3)*

## PHYSICAL EDUCATION

### Men's Department

*Candidates for a teaching credential in physical education should refer to the statement "Admission to Teacher Education Curricula" on page 21. For the teacher education curriculum in physical education see page 33.*

### LOWER DIVISION COURSES

A two-hour activity course each semester is required for the two years of lower division. A medical examination is given each student when entering and the work is fitted to his needs. Individual Adapted Activity sections to fit the special needs of the individual student are included. The content of the required two years is planned to give each student an opportunity to participate in those sports which have carry-over value into after life in addition to body building exercises and endurance training. Opportunity is given all students to take part in the regular competitive sports program.

Intercollegiate sports may be taken in addition to required lower division courses. A maximum of one unit in sports in one semester may be counted toward the A.B. degree.

**1A-1B Freshman Activity**

Year course, beginning either Fall or Spring ($\frac{1}{2}$–$\frac{1}{2}$)

**1C-1D Sophomore Activity**
Year course, beginning either Fall or Spring (½–½)

Class sections are so arranged that the student may choose the activity he is mo desirous of learning. Fundamentals of the sports listed are taught during a porti of the class hour.

**Sports**

**L2A-L2B-L2C-L2D** **Golf** Spring (½)
**L3A-L3B-L3C-L3D** **Track** Spring (½)
**L4A-L4B-L4C-L4D** **Baseball** Spring (½)
**L5A-L5B-L5C-L5D** **Basketball** Spring (½)
**L6A-L6B-L6C-L6D** **Tennis** Spring (½)
**L7A-L7B-L7C-L7D** **Boxing** Spring (½)
**L8A-L8B-L8C-L8D** **Wrestling** Spring (½)
**L9A-L9B-L9C-L9D** **Cross Country** Fall (½)
**L10A-L10B-L10C-L10D** **Swimming** Spring (½)
**L11A-L11B-L11C-L11D** **Fencing** (½)
**L13A-L13B-L13C-L13D** **American football** Fall (½)
**L13X-L13Y-L13Z** **Spring football** Spring (½)
**L14A-L14B-L14C-L14D** **Gymnastics** (½)
**L15A-L15B-L15C-L15D** **Badminton** Spring (½)

Any of above sports will be offered only if demand is sufficient.

*The following courses fulfill degree requirements for physical education majors an meet State requirements for teaching credentials in physical education.*

**30 Emergencies**
The accepted procedure in meeting the emergencies which daily arise in schoolroo play or athletic field, beach, mountains, or any of the many places where the physica director is called on for first aid. Special attention given to the arrangement of th apparatus and the activities so that many of the most common accidents are prevente or minimized. Course content qualifies for Red Cross Certificate.
*Fall (2)*

**L53 Physical Education in the Elementary School** **Schwo**
The content of the State program in physical education forms the basis of the cours Two lectures, two one-hour laboratory periods per week. May be taken as a substitut for 1D.

Required of all candidates for the elementary school credential and the special crede tial in physical education.
*Fall and Spring (2½)*

**L62A Gymnastic Activities** **C. E. Peterso**
Theoretical and practical work in marching, free exercises, and light and heavy appa ratus. Emphasis on progression and method of presenting material. The simplest an most explanatory terminology.
*Fall (2) (Offered in 1945-46 and alternate years)*

**L62B Gymnastic Activities** **C. E. Peterso**
Acquisition of proficiency in the performance of a great group of gymnastic stunt always popular in the gymnasium and on the playground. Work of the recreationa or self-interesting type rather than the formal. Tumbling, stunts, and pyramid building given chief attention, although games of low organizations are also considered
*Spring (2) (Offered in 1945-46 and alternate years)*

**172 Principles of Physical Education**

Cultivation of a favorable attitude for a professional study of physical education. Ideals and aims of physical education and the relation of physical education to school and society stressed.

*Fall (2)*

UPPER DIVISION COURSES

**L154 Organization and Administration of Secondary Physical Education**

Study of general and specific problems that confront physical education departments in junior and senior high schools and in colleges. Prerequisite: Physical Education 172.

*Spring (3) (Offered in 1945-46)*

**L155 Applied Anatomy and Kinesiology**

A scientific analysis of the structure, function and relationship of the organs, bony cavities, bones and joints of the skeletal, muscular, nervous and circulatory systems. In addition, the student will apply the results of the analysis in the selection of activities in relation to mechanical strength and durability as influenced by anatomical factors. Prerequisite: Zoology 20, or 108.

*Spring (3) (Offered in 1945-46 and alternate years)*

**L156A Sports Methods**

Different theories and methods of teaching the more highly organized sports: basketball and baseball.

*Fall (2) (Offered in 1944-45 and alternate years)*

**L156B Sports Methods** **C. E. Peterson**

Methods of teaching those sports most adaptable to the intramural and recreational programs: golf, handball, soccer, speedball, volley ball, badminton, archery, tennis, swimming, track, etc.

*Spring (2) (Offered in 1944-45 and alternate years)*

**161 Folk Dancing** **Schwob**

Practice in folk and clog dancing. Methods of presentation, study of costumes and customs related to the dance. Notebooks required. Open to all upper division men and women.

*Spring (2) (Offered in 1945-46 and alternate years)*

**L169A Technique of Teaching Activities**

Directed leadership in activities. A course preliminary to practice teaching in which students are given opportunity to develop teaching techniques in an orderly, detailed, directed, and supervised experience. Requirements include the handling of classes, construction of tests, lesson plans and preparation of a syllabus. One hour of lecture, and two hours of laboratory per unit. Recommended that it be taken in the junior year. Prerequisite: Admission to teacher training.

*Fall (2)*

**L169B Technique of Teaching Activities**

Continuation of directed leadership in activities as in L169A. Individual study will include conferences with instructor regarding class program, compilation of working bibliography, planned reading, school visitation, and preparation for practice teaching. Conferences and two hours of laboratory required. Prerequisite: Physical Education L169A.

*Spring (1)*

**L170 Recreational Leadership** **Shafer**

Fundamentals of recreational leadership developed by instruction in club and camp activities, the study of school recreational needs and facilities, and of civic recreation. Open to all upper division men and women. Recommended to students interested in social service.

*Spring (2) (Offered in 1944-45 and alternate years)*

**L180 Theory of Coaching Football**

Methods of coaching football. Details of teaching individual fundamentals, offensiv and defensive team play, strategy, and conditioning of athletes. Two hours o lecture and three hours of laboratory.

*Spring (2) (Not offered in 1944-45)*

**L190 Individual Program Adaptation**

An introductory course dealing with the analysis and evaluation of aims, techniques and procedures in the preventive and corrective physical education program. Specia emphasis will be given to such problems as survey of the situation, recognition o divergencies, selecting and assigning of students, instructional programs, motivation follow-up, teacher limitations, and public relations. Prerequisite: P. E. 155, Zoolog 20, and senior standing.

*Fall (3) (Not offered in 1944-45)*

## WOMEN'S DEPARTMENT

*Candidates for a teaching credential in physical education should refer to the statement "Admission to Teacher Education Curricula" on page 21, and to the outline fo the A.B. Degree with Special Credential in Physical Education on pages 34 and 35.*

### LOWER DIVISION COURSES

Two hours of directed physical activity are required throughout the freshman an sophomore years. Freshman students may choose courses from the following, L1A L1B, L1C. Sophomore students may choose from all activity courses offered.

**1A Fundamental Skills** **Schwo**

Practice in efficient fundamental body movements.

*Fall and Spring (½)*

**1B Folk Dancing** **Schwo**

*Fall and Spring (½)*

**1C Team Sports** **Shafe**

(All three are required of all women candidates for the special credential in physica education.)

*Fall and Spring (½)*

**Sophomores may elect from the following:** **Physical Education Staf**

**L2A-L2B Folk Dancing**

*Fall and Spring (½)*

**L3A-L3B-L3C-L3D Modern Dance**

*(Not offered in 1944-45)*

**L4A-L4B Social Dancing—for men and women**

*(Not offered in 1944-45)*

**L5A-L5B Archery**

*Fall and Spring (½)*

**L6A-L6B Badminton**

*Fall and Spring (½)*

**L7A-L7B Golf**

*Fall and Spring (½)*

**L11A-L11B Tennis**

*Fall and Spring (½)*

**L12A-12B Advanced Modern Dance.** Laboratory experiments in advanced choregraphy and percussion accompaniment. For men and women. Prerequisites: 1C and 3A for women, 1C for men.

*Fall and Spring (1-1) (Not offered in 1944-45)*

***Any of the above activities may be taken for additional credit.***

**53 Physical Education in the Elementary School** **Schwob**

he content of the State program in physical education forms the basis of the course. wo lectures, two one-hour laboratory periods per week. Required of all candidates r the elementary school credential and the special credential in physical education the sophomore year. Junior college transferees only may take this course in their nior year.

*pring (2½)*

## Sports

The individual activities, tennis, golf, archery, badminton and dancing are offered rough the year. Candidates for the special credential in physical education select e as a major activity and two others as minors. Skills in the activities thus selected ust be maintained as prerequisite to the senior course, Physical Education L185. See page 100.)

The Women's Athletic Association sponsors the intramural sports program. Under s direction competition in dual and group games is promoted throughout the year. pen to all college women.

### UPPER DIVISION COURSES

pen to all Women. Required of women candidates for the special credential in ysical education.

**153 Principles and Administration of Secondary Physical Education** **Schwob**

study of the significant influences shaping the trend of physical education, past and esent. The philosophy and principles of physical education and its relation to neral education. Administrative problems applied to the secondary school situation.

*all (3) (Offered in 1944–45 and alternate years)*

**155 Applied Anatomy and Kinesiology**

scientific analysis of the structure, function and relationship of the organs, bony vities, bones and joints of the skeletal, muscular, nervous and circulatory systems. 1 addition the student will apply the results of the analysis in the selection of activi- es in relation to mechanical strength and durability as influenced by anatomical ctors. Prerequisite: Zoology 20 or 8.

*pring (3) (Offered in 1945–46 and alternate years)*

**157A-L157B Sports Methods** **Shafer**

ractice for skill, study of rules, and of coaching methods. Prerequisite: A season's perience in at least four of the following sports: volley ball, basketball, hockey, eedball, soccer, baseball.

*ear course (2-2)*

**160 Principles of Teaching Gymnastics** **Schwob**

ymnastic materials and methods followed by practice in teaching marching, gym- astics and use of apparatus.

*all (2) (Offered in 1944–45 and alternate years)*

**1 Folk Dancing** **Schwob**

ractice in folk and clog dancing. Methods of presentation, study of costumes and istoms related to the dance. Notebooks required. Open to all upper division men id women.

*pring (2) (Not offered in 1944–45) Open to men and women*

**164A-L164B Methods in Modern Dance**

Laboratory experiments in advanced choregraphy and percussion accompaniment. istorical survey and practical experience in production techniques and teaching ethods. Two activity periods and one lecture per week. For men and women. Pre- equisites same as for L12A.

*ear course (2-2) (Not offered in 1944–45)*

**L169 Technique of Teaching Activities** **Schv**

Observation, lesson planning and teaching in college classes.

*Fall and Spring (3)*

**170. Recreational Leadership** **Sha**

Fundamentals of recreational leadership developed by instruction in club and ca activities, the study of school recreational needs and facilities, and of civic recreati Open to all upper division men and women. Recommended to students interested the recreational aspects of social service.

*Spring (2) (Offered in 1944–45 and alternate years)*

**L177 Individual Program Adaptations** **Schw**

Adjustments of the physical education program to the physical needs and capacit of individuals: problems concerning protective and preventive measures which are highly specialized corrective phases.

*Spring (2) (Offered in 1944–45 and alternate years)*

**L185 Technique of Individual Sports** **Sha**

A course summarizing rules, teaching methods, and individual playing ability. required senior course. Can not be taken until all requirements regarding sports a games have been fulfilled. (See page 99.)

*Fall (1)*

## PHYSICAL SCIENCES

The courses offered in the Physical Sciences are listed below. See pages listed af each subject for a more complete description of the offering under that designati Astronomy, see page 58; Chemistry, page 61; Geology, page 82; Physical Scien page 100; and Physics, page 101.

## PHYSICAL SCIENCE

*Lower division preparation for the liberal arts major in physical science and for junior certificate: Fulfillment of the department requirements for upper divis work in at least two of the following sciences: Astronomy, chemistry, geology, a physics. Recommended: A reading knowledge of French and German.*

*Liberal arts major (upper division) in physical science, required: Twenty-four units upper division work in two or more of the physical sciences: Chemistry, geology, a physics, with a minimum of six units in each of two of these sciences.*

### LOWER DIVISION COURSE

**1A Introduction to Physical Science** **Wats**

A survey course dealing with the nature of man's physical universe. Empha will be upon materials chosen from topics in astronomy and physics to show nature and development of the scientific method and man's use of energy. Not open students who have had high school or college physics and astronomy. May be tak with or without plans to continue with 1B.

*Spring (3)*

**1B Introduction to Physical Science** **Wats**

A continuation of Physical Science 1A. Emphasis will be upon units chosen fr geology and chemistry to show the origins of natural materials and their use by m in the modern world. Not open to students who have had high school or college che istry and geology. May be taken with or without credit in Physical Science 1A.

*Spring (3) (Not offered in 1944-45)*

**10 Elementary Photography**

This course seeks to provide an elementary knowledge of dark room techniques a the theory of photography including printing, enlarging, and developing. Two lectu and one three-hour laboratory required each week.

*Fall and Spring (3) (Not offered in 1944-45)*

## TWO-YEAR COURSE

**10 Man and His Physical World** **Watson**

brief survey of the nature of the scientific method and of selected topics in physical ence. Materials will be chosen from physics, chemistry, astronomy, and geology in der to give some background for an understanding of the relations of physical science modern life. Not open to students who have had both high school or college physics d chemistry or either of these subjects together with either astronomy or geology.

*en only to students enrolled in a two-year curriculum.*

*ll (3)*

## PHYSICS

*wer division preparation for the liberal arts major in physics and for the junior rtificate: Physics 1A-1B-1C-1D; Chemistry 1A-1B; Mathematics 3A-3B and 4A-4B, their equivalents. Recommended: A reading knowledge of French and German. A ximum of 12 units of lower division physics may be applied toward the degree.*

*beral arts major (upper division) in physics, required: Twenty-four units of upper vision work in physics including Physics 105A-105B and 110A-110B. Six of the enty-four units may be elected in related subjects and deviations from these requireents may be made on consultation with the chairman of the department.*

### LOWER DIVISION COURSES

**A-1B Mechanics and Heat** **Ross**

echanics, properties of matter, and heat. A development of the fundamental ideas hich underlie the subject of physics, and the application of them in the discussion of actical problems. Lectures, text assignments, problem sets, and experimental boratory work. Two lectures, and one laboratory period each week. Prerequisites: igh school physics or chemistry, and trigonometry. Students deficient in any rt of this requirement may enroll only with the permission of the instructor.

*ear course (3-3)*

**C-1D Electricity, Magnetism, Sound, and Light** **Baird**

continuation of Physics 1A-1B for students in the sophomore year. Two lectures d one laboratory period each week.

*ear course (3-3)*

**A-2B General** **Baird**

roperties of matter, mechanics, heat, sound, light, electricity, and magnetism. A nengineering course. Lectures, demonstrations, and discussions. Prerequisite: wo years of high school mathematics.

*ear course (3-3)*

**A-3B Physical Measurements** **Baird**

aboratory work in mechanics, properties of matter, heat, sound, light, electricity, and agnetism. Usually taken in conjunction with Physics 2A-2B.

*ear course (1-1)*

### UPPER DIVISION COURSES

**105A-105B Analytical Mechanics**

reatment of fundamental principles of statics, kinematics and dynamics of particles d rigid bodies. Prerequisites: Physics 1A-1B or 2A-2B and a working knowledge of lculus.

*ear course (3-3) (Offered in 1944-45 and alternate years)*

**106 Optics** **Baird**

review of reflection, refraction and dispersion, with applications to optical instruents, followed by a survey of phenomena indicative of the physical nature of light: terference, diffraction, polarization, and spectral radiation. Prerequisite: Eight nits in physics.

*all (3) (Offered in 1944-45 and alternate years)*

**106L Optical Measurements** **Ba**

Laboratory work to accompany Physics 106.

*Fall (1) (Offered in 1944-45 and alternate years)*

**107A-107B Electrical Measurements** **Ba**

Laboratory work designed to accompany Physics 110A-110B. Emphasis placed the theory and use of electrical measuring instruments.

*Year course (1 or 2 units for the year) (Offered in 1945-46 and alternate years)*

***108 Modern Physics** **Ba**

An introduction to physical investigations of the last half-century. Atomic str ture and quantum theory in the light of high-vacuum phenomena, series in opti spectra, natural and induced radioactivity, and allied subjects. Prerequisite: Ei units in physics.

*Spring (3) (Offered in 1944-45 and alternate years)*

**108L Modern Physics Laboratory** **Ba**

Laboratory, to accompany Physics 108.

*Spring (1) (Offered in 1944-45 and alternate years)*

**110A Introduction to Electricity and Electromagnetism** **Ba**

Elements of the mathematical theory of electrostatics, of magnetostatics and m netism, and of steady and varying currents. Students are encouraged to accompa the course with 1 unit of laboratory work. Prerequisites: Eight units in physi and Mathematics 3A-3B.

*Fall (3) (Offered in 1945-46 and alternate years)*

**110B Principles of Electromagnetism and Electronics** **Bai**

A more complete study and an extension of the material surveyed in Physics 110 illustrated with practical applications. Prerequisites: Physics 110A and consent the instructor.

*Spring (3) (Offered in 1945-46 and alternate years)*

**112 Advanced Heat and Thermodynamics**

Thermal properties of matter. An introduction to the kinetic theory of gases and t laws of thermodynamics. Prerequisites: Eight units in physics and a worki knowledge of calculus.

*Spring (3) (Not offered in 1944-45)*

**112L Advanced Heat Laboratory**

Laboratory work in thermal expansion, specific heat, heat of combustion, radiati and other related topics in advanced heat. Designed to accompany Physics 112.

*Spring (1) (Not offered in 1944-45)*

**113L Pyrometry Laboratory**

Laboratory work in the calibration and use of various temperature measuring devic Prerequisite: Eight units in physics.

*Spring (1) (Not offered in 1944-45)*

**114 Sound Waves and Acoustics**

A study of wave motion and its applications to the production, transmission a reception of sound. Architectural acoustics, speech and hearing, acoustical a musical instruments. Prerequisite: Eight units in physics.

*Fall (3) (Not offered in 1944-45)*

**114L Advanced Sound Laboratory**

Laboratory work in the problems of wave motion, standing waves, velocity of sou in various media, diffraction and interference, of sound. Designed to accompa Physics 114.

*Fall (1) (Not offered in 1944-45)*

---

* Will be offered if there is sufficient demand.

**115L Applied Acoustical Measurements**

Laboratory work in various practical applications of acoustics. Directional and frequency characteristics of loudspeakers and microphones. Architectural acoustics. Prerequisite: Eight units in physics.

*Fall (1) (Not offered in 1944-45)*

**199 Special Study** **Baird**

Reading or work on special problems in physics. Admission by consent of the instructor. Credit and hours to be arranged in each case. Open to students who have completed at least eight units of work in the department with grade of *A* or *B*.

*Fall and Spring (1 or 2-1 or 2)*

## PHYSIOLOGY

### LOWER DIVISION COURSES

**1A Human Physiology** **Crouch**

A lecture course considering the functions of the human body. Prerequisites: Elementary chemistry and high school or college biology or zoology. Three hours of lecture per week. Credit reduced to 2 units, for students having credit for Zoology 20.

*Spring (3)*

**1C Human Physiology** **Crouch**

A study of the human functions through laboratory experiments and demonstrations. Prerequisites: Physiology 1A completed or in progress. Six hours of laboratory per week.

*Spring (2)*

## POLITICAL SCIENCE

*The minor in political science: from twelve to eighteen units of work is recommended. At least half the work should be chosen from upper division courses.*

*It is suggested that students who expect to major in political science plan their lower division work to include both Political Science 1A-1B and 71A-71B, and either Economics 1A-1B or History 4A-4B.*

### LOWER DIVISION COURSES

**1A-1B Comparative Government** **Leonard**

A comparative study of typical governments. Semester I: England, France, and Switzerland. Semester II: Italy, Germany, Russia, and Japan.

*Year course (3-3)*

**71A-71B American Government and Politics**

71A—Governmental organization in the United States; the federal system, organization, powers and functions of the legislative, executive and judicial branches of the national government, and the expansion of its activities.

71B—Development of the means of democratic control of government in the United States; the history, motivation, methods and control of political parties; party machines; election systems; influence of minority groups; the lobby; the press.

This course is not open to freshmen.

*Year course (3-3) (Not offered in 1944-45)*

### UPPER DIVISION COURSES

**101 American Institutions** **Leonard**

A study of the principles of the Constitution of the United States, and a survey of the political and social institutions which have developed under it.

*All candidates for the bachelor's degree are required by State law to secure credit in this course, unless they have completed one of the following courses: History 171A-171B, 173A-173B, Political Science 113, 175A-175B. This course is offered only in the fall semester.*

Enrollment is limited to students of junior or senior standing, except with the consent of the instructor.

*Fall (2)*

**111 Theory of the State** **Leonard**
The nature of the State, its organization and activities, and its relation to the individual and to other states. Special attention will be given to recent developments in the field of political thought.
*Fall (3)*

**113 American Political Ideals** **Leonard**
Underlying theories and principles of American governmental policy.
*Spring (3) (Offered in 1944-45 and alternate years)*

**133A-133B Principles of International Law**
This course is concerned with the function of law in the international community. The historical development of the theory and rules of international law, the application of international law in international relations and the application of international law in national courts will be studied.
*Year course (3-3) (Not offered in 1944-45)*

**136A-136B Problems of the Pacific Area**
Particular emphasis during the first semester on the development through the 19th Century of the governmental problems of the Far East, both internal and international. The second semester will be devoted to a consideration of the 20th Century aspects of these problems.
*Year course (3-3) (Not offered 1944-45)*

**141 Theories of International Relations**
The development of ideas concerning international relations from ancient through modern times. Theories of nationalism, imperialism, internationalism, and cosmopolitanism will be reviewed and their validity considered in the light of modern experience.
*Fall (3) (Not offered in 1944-45)*

**142 International Organization**
Prewar attempts at international organization, the effect of the World War on ideas of international relationships, postwar attempts at organization. Special attention will be given to the organization and development of the League of Nations, its machinery, accomplishments and failures, and to national attitudes toward cooperation since the war.
*Spring (3) (Not offered in 1944-45)*

**143A-143B Principles of Public Administration in the United States**
A study of the development of executive agencies in the American federal government and the relationship between these agencies and the changes in American concepts concerning the proper field of governmental activity.
*Year course (3-3) (Offered in 1945-46 and alternate years)*

**175A-175B—American Constitutional Development** **Leonard**
A study of the work of the Convention of 1787, and of significant phases of American constitutional law.
*Year course (3-3)*

## PSYCHOLOGY

*Lower division preparation in psychology for advanced work. Recommended: Psychology 1A-1B, Zoology 1A-1B or Biological Science 10A-10B, Philosophy 3A-3B or 5A-5B, Mathematics 8, a language and some physics, anthropology and sociology.*

### LOWER DIVISION COURSES

**1A General** **Staff**
An elementary survey of normal adult psychology, focused upon personality; the subjective and objective aspects of behavior. Furnishes basis for all other courses in psychology.
*Fall and Spring (3)*

### B General Applied **Steinmetz**

continuation of general psychology designed to familiarize the student with (1)
ementary statistical methods and (2) fields of applied psychology and possibly
3) some one topic (not included in upper division courses) in which he pursues an
ndependent experimental approach if judged advisable or for additional unit. Pre-
requisite: Psychology 1A. Required for advanced study.

*all and Spring (3)*

### A Applied

pplications of psychology to problems of the individual in learning, making social
djustments, choosing a vocation, developing desirable personal traits, and achieving
uccess and happiness. Surveys of psychology as applied in education, music, art,
peaking, writing, law and medicine. Prerequisite: Psychology 1A. Recommended:
sychology 1B.

*all (3) (Not offered in 1944-45)*

### B Psychology Applied in Business **Steinmetz**

pplications of psychology to a wide range of problems encountered by business.
otives, attitudes, habits, and traits in their relation to behavior of employer,
mployee, and executive. Advertising, salesmanship, and problems of selecting,
lacing and increasing the efficiency of employees. Business cycles and consumer
esearch. Prerequisite: Psychology 1AB or equivalent.

*pring (3) (Offered in 1945-46 and alternate years)*

### C Psychology in Industry

tudy of time, motion, lighting, fatigue; selection, placing, training, evaluating per-
onnel; industrial interviewing, counseling, adjusting for morale and efficiency; direct
bservation, visiting speakers, and chance for specialization allowed. Prerequisite:
A-1B or equivalent.

*pring (3) (Offered in 1944-45 and alternate years)*

UPPER DIVISION COURSES

### 02A Genetic: Child

his course represents the main effort of the psychology department to provide an
rientation toward parenthood. The course has been developed in recognition of the
eed for the establishment of parental-domestic adjustment through the study of child
rowth and development from the prenatal period to adolescence and through common
nowledge by parents of relevant material in genetics and child psychology; emphasis
s practical.

*all (3) (Not offered in 1944-45)*

### 02B Genetic: Adolescence

urvey of the wealth of knowledge in physiology, sociology, and psychology recently
nade available to parents and professional workers with youth just before, during, and
fter puberty.

*pring (3) (Not offered in 1944-45)*

### 18 Mental Hygiene

roblems, personality adjustment, emotional problems, attitudes, conflicts, neurotic
ehavior, conduct disorders of both child and adult.

he beginnings of undesirable attitudes and habits and methods of treating them are
tressed more than serious cases of maladjustment which are either incurable or
roblems for a psychiatrist. The methods of building wholesome personality are
mphasized more than the analysis of extreme disorders. Prerequisite: Psychology
A. Recommended: Psychology 1B, 102.

*pring (3) (Not offered in 1944-45)*

### 45 Social Psychology **Steinmetz**

ersonality as it develops in relation to social environment. Suggestion, imitation,
eadership, the crowd, public opinion, social control, prejudice, propaganda, sex differ-
nces, race differences, etc. Prerequisite: Psychology 1A. Recommended: Psy-
hology 4A.

*Fall (3) (1945-46)*

**150 Abnormal Psychology** **Steinme**

The relation of psychology to the psycho-neuroses and insanity; the appearance abnormal traits in incipient stages of mental disturbances. Methods of diagnosis ar early treatment.

*Fall (3) (Offered in 1944-45 and alternate years)*

**151 Clinical Psychology** **Steinmet**

A study of diagnostic individual tests, the interview, and especially personality test and of psychotherapeutic principles, for intensive study of personality and face-to-fac judgment. Specialization is determined by individual needs.

*Spring (3)*

**160 Experimental Psychology of Learning**

Introduction to instrumental and comparative psychology and to methods of researc in the development of behavior theory. Prerequisite: 5 units of other work in th department and consent of the instructor; required of those seeking a major.

*Fall (3) (Not offered in 1944-45)*

## TWO-YEAR COURSE

**L40 Psychology and Life** **Perr**

An elementary survey of normal adult psychology, focused upon psychological prin ciples in relation to life situations. Open only to students enrolled in a two-yea curriculum.

*Fall and Spring (3)*

## SECRETARIAL TRAINING

**LA Business Mathematics**

A practical course in the mathematics of business. A thorough study of interest compound interest, discount, amortization tables, insurance rates, etc.

*Fall and Spring (1) (No credit will be counted toward A.B. degree requirements except in the curricula leading to the Business Education Credential)*

**L1A-L1B Typewriting** **Amsder**

A rapid development of a thorough command of a keyboard by the touch method. Th acquisition of speed and the artistic arrangement of typewritten material with specia reference to commercial forms, tabulation and billing; specifications, legal forms, an preparation of manuscripts; transcription, mimeographing, etc. Eight hours lectur and laboratory practice.

*Year course (3–3) (No credit will be counted toward A.B. degree requirements excep in the curricula leading to the Business Education credential)*

**L2A Typewriting** **Amsden**

A short course designed for those not wishing to enter the business office but desiring a knowledge of the use of the typewriter. Five hours laboratory practice.

*Spring (2)*

**L3A Office Methods and Appliances** **Wright**

Practice and principles of office management, including organization, arrangement and operation. Study and use of modern office appliances such as the multigraph, mimeograph, filing devices, calculating and bookkeeping machines. Prerequisite: Secretarial Training 1A or its equivalent.

*Fall (3) (No credit will be counted toward A.B. degree requirements except in the curricula leading to the Business Education Credential)*

**L5A-L5B Stenography** **Amsden**

An intensive course designed for the practical preparation of office secretaries. A thorough study of the Gregg System. Development of the ability to read and write shorthand rapidly and correctly, both literary and commercial. The shorthand speed necessary to pass a civil service examination is attained by the end of the year.

*Year course (5-5)*

**L6A-L6B Advanced Stenography** **Amsden**

Development of speed in writing and transcription. Advanced dictation on letter forms, legal forms, speeches, and literary and technical material.

*Year course 3-3*

**English in Business** *(See English, page 75)*

## SOCIAL SCIENCES

*The courses offered in the Social Sciences are listed below. See pages listed after each subject for a more complete description of the offerings under that designation. Anthropology, see page 54; Economics and Commerce, page 63; Geography, page 80; History, page 84; Political Science, page 103; Social Science, page 107; and Sociology, page 108.*

## SOCIAL SCIENCE

*Lower division preparation for the liberal arts major in social science: Fulfillment of the departmental requirements for upper division work in at least three of the following sciences: Anthropology, economics, geography, history, political science, sociology. Liberal arts major (upper division) in social science, required: Twenty-four units of upper division work including a concentration of twelve upper division units in one of the following fields and six units in each of two others: Anthropology, economics, geography, history, political science, sociology.*

*This major is available only to students who are preparing for graduate work in anthropology, political science, or sociology, and to those enrolled in certain preprofessional and other curricula. Official approval for candidacy for a degree with a social science major must be obtained from the dean of liberal arts.*

### LOWER DIVISION COURSES

**1A Contemporary Political, Social and Economic Problems** **A. G. Peterson**

An analysis of major problems of the present day with reference to the conditions out of which they arise and with regard to their essential unity and interrelationships. Particular attention to implications of the war and post-war problems. An attempt to introduce the student to sound methods of approach in dealing with these problems.

*Fall and Spring (3)*

**1B American Trends Since 1918**

Main currents of American life since the World War. Stress on immediate background of modern institutions. Aims to familiarize students with the major events which have occurred during the lifetime of the present college generation.

*Fall and Spring (3) (Not offered in 1944-45)*

### TWO-YEAR COURSES

**L40 Contemporary Problems** **Barnhart**

A survey of the major political, social, and economic forces in modern American life. Chief problems are analyzed in relation to their setting, and students are given sound methods of approach in dealing with them. *Open only to students enrolled in a two-year curriculum.*

*Fall (3)*

**L45 American Democracy** **Barnhart**

The structure and function of government, as it relates to individual Americans. Special emphasis on popular participation through voting, political parties, pressure groups, and public opinion. Prerequisite: Sophomore Standing. *Open only to students enrolled in a two-year curriculum.*

*Spring (3)*

## SOCIOLOGY

*Lower division preparation for the liberal arts major in social science with concentration in sociology: Sociology 50A, 50B; Economics 1A-1B and one of the following year courses: Anthropology 50A-50B, Political Science 1A-1B, 71A-71B. See requirements for the social science major, page 107.*

### LOWER DIVISION COURSES

**50A Introduction to Sociology** **Barnhart**

A study of modern social problems recognizing the geographic, economic, psychological, and sociological factors involved. Emphasis is on a scientific method of approach. An evaluation of various causes and solutions of problems is made.

*Fall (3)*

**50B General Sociology** **Barnhart**

A course in general sociology for upper division students. The development and use of the concepts of sociological analysis, such as human nature, the effects of isolation and social contacts upon the development of personality; social interaction; social processes; social forces; social control; collective behavior; and social progress.

*Spring (3)*

**55 Marriage and Family Life** **Perry**

A psychological and sociological approach to the study of marriage and the family. Some of the topics considered are: relation of courtship to marriage; emotional maturity and marriage; eugenic aspects of marriage; college marriages; harmony in modern marriage; economic adjustment in marriage, parenthood. Prerequisite: Health Education 1 or 2; a biological science and Psychology 1A recommended. Not open to Freshmen.

*Fall (3)*

**105 Social Pathology** **Barnhart**

A study of the alleged abnormal phenomena in society; family disorganization and personal demoralization; pathology of individual and group relationships and of economic, social, and cultural relationships.

*Fall (3)*

**106 Criminology and Penology** **Barnhart**

The extent and characteristics of crime; consideration of physical, mental, economic, and sociological causes of crime; study of methods of penal discipline, prison labor, parole, and probation; programs of prevention.

*Spring (3) (Offered in 1944-45 and alternate years)*

**108 The Family** **Barnhart**

History of marriage and family as a social institution. Effects of various economic and social factors on the modern family; higher education and the birth rate; married women in industry and professions; causes of desertion and divorce and their sociological effects. Not open to students who have credit for Sociology 55.

*Spring (3) (Offered in 1945-46 and alternate years)*

**109 Fields of Social Work** **Barnhart**

A survey of the nature of social work and the various kinds of social work which are found in modern urban life. The student is familiarized with the various social agencies in the community, their problems and methods of work, by readings and field trips. Volunteer social work in some social agency recommended.

*Spring (3)*

**126 Social Reform Movements**

A study of organized efforts to change social institutions in the United States since 1865. Emphasis given to backgrounds, objectives, techniques, and relationship to democracy of each movement.

*Fall (3) (Not offered in 1944-45)*

**197 Urban Sociology** **Barnhart**

A study of the structure and function of the modern city; types of neighborhoods; forms of recreation; social forces in a metropolitan area; types of urban personalities and groups; rural-urban conflicts of culture. Practical field studies required.

*Fall (3)*

## TWO-YEAR COURSE

**L45 Marriage and the Family** **Perry**

The purpose of this course is to prepare young people for successful marriage and family life. The development of the personality through family relationships, the choice of a life partner, and the social and economic factors involved in the establishment of a home, are given special emphasis. The importance of the family as a unit in larger social groupings is stressed, and both psychological and material factors which affect the welfare of family members are brought to the student's attention. *Open only to students enrolled in a two-year curriculum.* Prerequisite: Sophomore standing.

*Spring (3)*

## SPANISH

*Lower division preparation for the liberal arts major in Spanish: Spanish A-B-C-D; French A-B; History 4A-4B.*

*Liberal arts major in Spanish: Twenty-four units of upper division work, of which at least eighteen must be in Spanish, and of which a maximum of six may be in related subjects, arranged in consultation with the chairman of the department. At least a C average in upper division major courses.*

### LOWER DIVISION COURSES

**A-B Elementary** **Phillips, L. P. Brown**

Intensive study of Spanish grammar and syntax, with daily written work; class drill in conversational idiom and pronunciation; reading with oral discussion and résumé; dictation; introduction to contemporary prose writers. Credit not given for Spanish A unless followed by Spanish B. Students who have had one year of Spanish in high school should register for two units of work in Spanish A. Those who have had two years of Spanish in high school should register for four units of work in Spanish B.

*Year course (5-5)*

**C-D Intermediate Spanish** **Phillips**

Reading and composition: study of standard prose as basis for class work; collateral reading in prose and drama, with written reports in Spanish; dictation. Class work conducted mainly in Spanish. Individual conferences. Prerequisite: Spanish B or three years of high school Spanish, or its equivalent. Students with credit for four years of high school Spanish, or its equivalent, should enter Spanish D.

*Year course (3-3)*

**1-2 Elementary**

*Year course (3-3) (Not offered in 1944-45)*

**50 Spanish Commercial Correspondence** **Phillips**

A one-semester intermediate course in Spanish composition, directed along the line of commercial correspondence. A practical course, with translation of real business letters, and supplementary reading in Spanish on commercial subjects. Prerequisite: three or four years of high school Spanish, or completion of Spanish C or D.

*Fall (3)*

### UPPER DIVISION COURSES

**101A-101B Conversation and Composition** **Phillips**

Prerequisite: Spanish D, or its equivalent, with grade of *C*.

*Year course (3-3) (Offered in 1945-46)*

**102A-102B Introduction to Spanish Classics** **L. P. Brown**

Reading from several types of classical literature. Lazarillo de Tormes and other novels of Roguery; selections from Don Quixote, and the Cien Mejores Poesias Castellanas; one drama each from the works of Lope de Vega, Calderon, Alarcon, and Moreto; collateral reading and reports. Prerequisite: A grade of *C* in Spanish D or permission from the instructor.

*Year course (3-3) (Offered in 1946-47)*

**104A-104B Spanish-American Literature** **Phillips**

Reading from representative Spanish-American authors during the colonial, revolutionary and modern periods. Lectures, class reading, collateral reading and reports. Prerequisite: A grade of *C* in Spanish D or permission from the instructor.

*Year course (3-3)*

*See also* **English 104, Latin-American Literature in English,** *which may be taken for Spanish credit.*

**105A-105B Modern Spanish Drama** **L. P. Brown**

The development of the drama of Spain from the beginning of the nineteenth century to the present time. Prerequisite: A grade of *C* in Spanish D or permission from the instructor.

*Year course (3-3) (Offered in 1947-48)*

**110A-110B Novel and Short Story in Spain** **L. P. Brown**

The development of the novel and short story in Spain from 1830 to the present time. Prerequisite: A grade of *C* in Spanish D or permission from the instructor.

*Year course (3-3) (Offered in 1945-46)*

**199 Comprehensive Reading and Survey Course** **The Staff**

Designed to fill up the gaps in the reading done in courses. Class meeting once a week for guidance, reports, and quizzes. Required of all seniors majoring in Spanish.

*Spring (3)*

## SPEECH ARTS

*Lower division preparation of the Liberal Arts major in Speech Arts: At least 18 units of lower division courses in Speech Arts, including 1A, 1B, and six units chosen from 55A, 55B, 55C, 55D. Recommended: Aesthetics 1A, 1B, 50; Art 52A, 94.*

*Upper division requirements for the Liberal Arts major in Speech Arts: At least 18 units in upper division courses in Speech Arts, including 150, 163A, and six units from 155A, 155B, 156A, 156B. Also required: six units from English 112, 113, 117A, 117B, 152A, 152B. Recommended: English 110, 116B; French 105A, 105B; Physical Education 164A, 164B; Spanish 105A.*

*Candidates for the teaching credentials in Speech Arts should refer to "Admision to Teacher Education Curricula" on page 21 or to the note regarding the Special Credential in Speech Arts on page 35.*

### LOWER DIVISION COURSES

**1A Fundamentals of Public Speaking** **F. L. Johnson**

Training in fundamental processes of oral expression; methods of obtaining and organizing material; outlining principles of attention and delivery; extemporaneous speaking and open forum debating; practice in construction and delivery of type forms of speech.

*Fall and Spring (3)*

**1B Extemporaneous Speaking (or Forum Speaking)**

Practice in extemporaneous speaking on subjects of current interest both national and local, with stress laid on the organization and delivery of content material. Forum discussion will provide speakers with the opportunity of assembling facts quickly to meet such questions as any audience situation might demand.

*Spring (3) (Not offered in 1944-45)*

### Oral Interpretation **Jones**

he oral interpretation of longer literary selections, both in poetry and prose; a funda-
entals course designed for the beginning students in drama as well as those majoring
English literature.

*all (3) (Not offered in 1944-45)*

### Advanced Interpretation **Jones**

mphasis placed on stage poise and grace with adequate attention given to variations
the presentation of literary selections. Much opportunity is provided for individual
id group creative work. No prerequisite. Class limited.

*pring (3)*

### Corrective Speech

orrective laboratory training prescribed on the basis of vocalization tests made on
lectro-Vox Recording Machine. Required of education majors who fail to meet
eech requirements test. Private clinical assistance given to stutterers and lispers.

*all and Spring (1) (9 weeks' course) (Not offered in 1944-45)*

### 5A-55B Dramatic Production **Jones**

course for first and second year students in which, through participation, they
quire an understanding of certain dramatic periods and types studied in English
terature. Individual and group expression coordinated and developed in production
scenes, acts, and plays—a fundamental drama course emphasizing modern trends.
o prerequisite.

*ear course (3-3) (Offered in 1945-46 and alternate years)*

### 5C-55D Dramatic Expression **Jones**

course to help students realize and develop their creative abilities for expressing
fe and character through acting and writing. History, technique and theory of
arious dramatic forms studied, created and presented through workshop methods.
fundamental course planned for students desiring specialized training in drama or
riting. Prerequisite: Consent of instructor.

*ear course (3-3) (Offered in 1944-45 and alternate years)*

### 0 Augmentation and Debate

btaining and organizing of evidence and the construction and use of the brief;
tudy and discussion of current issues; the presentation of formal and informal
ebates. Attention to intramural and intercollegiate debating.

*pring (3) (Not offered in 1944-45)*

### 1A-61B-61C-61D Intercollegiate Debate

*ear course, each year (1) (Not offered in 1944-45)*

### 3A-B-C-D Verse Choir **Jones**

articipation in verse speaking chorus to develop quality, range of tone, and ability
n dramatic visualization of poetry. Required for speech arts credential.

*all and Spring (1-1)*

### 02 Organized Discussion

onsideration of the symposium, the panel, the open forum, the business session,
nd varieties of conference speaking. Emphasis upon organization and presentation.
ttention to parliamentary procedure for informal groups.

*all (3) (Not offered in 1944-45)*

### 08 Art of Interpretation

nalysis of various types of literature. Material chosen will emphasize the finer
echniques of oral expression to develop the imagination, the emotional power, read-
ng skill and platform deportment in its varied phases. Prerequisite: One year of
ollege Speech or equivalent.

*pring (3) (Not offered in 1944-45)*

**110 Recreational Reading** **Dickha**
See English, page 76.

**112 History of the English Language**
See English, page 76.

**113 American English**
See English, page 76.

**116B The Elizabethan Drama** **F. L. Johnso**
See English, page 77.

**117A-117B Shakespeare** **F. L. Johnso**
See English, page 77.

**150 Phonetics**
Auditory and kinaesthetic analysis of the sounds of the English language. Valuabl as a corrective course in pronunciation and articulation. Required of speech major and those seeking Speech Correction Credential.
*Fall (2) (Not offered in 1944-45)*

**152A Survey of Drama: Comedy**
See English, page 78.

**152B Survey of Drama: Tragedy**
See English, page 78.

**155A-155B Advanced Dramatic Expression** **Jone**
For upper division students training for leadership in different fields as well a drama. More advanced forms of dramatic expression studied; creative abilities i interpretation, writing, acting, and stagecraft developed in relation to variou subjects and activities conducted through individual research projects, group discus sion and participation. Original work encouraged. Prerequisite: A fundamenta drama course.
*Year course (3-3) (Offered in 1945-46 and alternate years)*

**156A-156B Advanced Dramatic Production** **Jones**
The study of more difficult dramatic types and periods in the production of poeti and prose literature of different countries. Arrangement, organization, creation, direction and presentation of class room, recreational and other forms of performances. Practical participation and demonstration. A course designed for students majoring in other subjects as well as the theater arts.
*Year course (3-3) (Offered in 1944-45 and alternate years)*

**157A-157B Radio Production** **Jones**
Preparation and production of radio plays and various types of radio material.
*Fall and Spring (3-3)*

**163A Rhythm, Pantomime and Choric Verse** **Jones**
A course combining bodily movement with group speaking. Presents the fundamentals of rhythm and pantomime in different forms of dramatic expression.
*Spring (3) (Offered in 1945-46 and alternate years)*

**163B Advanced Rhythm, Pantomime and Choric Verse** **Jones**
Continuation of above.
*Spring (3) (Offered in 1944-45 and alternate years)*

**175 Major Speech Disorders**
Clinical survey of newest methods of speech correction with special emphasis given to stammering and cleft-palate speech. One of required courses for Special Corrective Credential.
*Spring (3) (Not offered in 1944-45)*

## TWO-YEAR COURSE

**L40 Fundamentals of Public Speaking**

Training in fundamental processes of oral expression; practice in organization and presentation of material; emphasis upon speech in daily situations, including public discussion, conversation, recitation, extemporaneous speaking, and short speeches for special occasions. *Open only to students enrolled in a two-year curriculum.*

*Fall and Spring (3) (Not offered in 1944-45)*

## ZOOLOGY

*Lower division preparation for the liberal arts major in zoology: Zoology 1A, 1B, and high school chemistry, Chemistry 1A-1B or 2A-2B. Recommended: German or French, Botany 2A, 2B, 4.*

*Liberal arts major in zoology: (1) At least a C average in upper division major courses. (2) Twenty-four units of upper division courses in zoology or eighteen in the major subject and six in related courses in botany, chemistry, physics, physiology or bacteriology.*

*Students preparing to teach science in the junior high school should try to include courses in zoology, botany, physiology, bacteriology, physics, chemistry (at least high school chemistry). Courses designed to help the student get acquainted with wild life of the region should be included. Recommended: Botany 4, 104, 102; Zoology 112, 113A, 113B, 113C, 121.*

### LOWER DIVISION COURSES

**1A General Zoology** **Harwood**

An introduction to animal biology dealing with structure, functions, and evolution of animal life. Laboratory work supplementing the lectures and based on the study and observation of living and preserved material (frogs and invertebrates). Valuable to the general student as well as to the biology specialist, acquainting him with the fundamental facts and theories of biology as they pertain to animal life. Two lectures or recitations and six hours of laboratory per week. Students who have credit for Biology 10A-10B receive no credit for Zoology 1A but receive credit for Zoology 1B.

*Fall (4)*

**1B General Zoology** **Harwood**

A continuation of 1A. The structure, relationships, and classification of the chordates. Two lectures and six hours of laboratory per week. Prerequisite: Zoology 1A or Biology 10B.

*Spring (4)*

**4 Microtechnique** **M. E. Johnson**

Introduction to methods of preparation of tissues for microscopic study. Six hours of laboratory per week. Prerequisite: elementary chemistry.

*Spring (2)*

**8 Human Anatomy** **Crouch**

A study of human structure through the use of models, prepared dissections and microscopic slides. Prerequisite: high school biology, Biology 10A, 1, or Zoology 1A. Two hours of lecture and three hours of laboratory per week. Required of prenursing students. Not open to premedical students. Credit reduced to 2 units if student has credit for Zoology 20.

*Fall (3)*

**20 Human Anatomy and Physiology** **Crouch**

An elementary course in human anatomy and physiology. Prerequisite: High school biology, or Biology 1 or 10A or Zoology 1A. Lectures three hours per week. Credit reduced to 2 units if student has credit for Zoology 8 or Physiology 1A.

*Fall and Spring (3)*

### UPPER DIVISION COURSES

**100 Embryology** **M. E. Johnson**

The development of vertebrates as illustrated by the frog, chick, and pig. Three hours of laboratory and three hours of lecture and quiz per week. Prerequisite: Zoology 1B or Biology 10B.

*Spring (4)*

**100D Microtechnique** **M. E. Johnson**

Introduction to methods of preparation of tissues for microscopic study. Three hours of laboratory per week. Prerequisite: elementary chemistry and embryology completed or in process.

*Spring (1)*

**106 Comparative Anatomy of the Vertebrates** **Crouch**

Dissection, study and comparison of organ systems of typical vertebrates. Two hours per week of lecture and six hours of laboratory. Prerequisite: Zoology 1B or Biology 10B.

*Fall (4)*

**108 Human Anatomy** **Crouch**

Lectures and laboratory work of Human Anatomy 8 with an additional hour of seminar each week. Open only to upper division students by special arrangement.

*Fall (3)*

**112 Marine Invertebrates** **M. E. Johnson**

Identification and study of behavior and life histories of invertebrates of the San Diego region. Frequent collecting trips to the beaches required. Prerequisite: Zoology 1A or Biology 10B. One hour of lecture and six hours of laboratory or field work per week.

*Fall (3) (Offered in 1945-46 and alternate years)*

**113A Taxonomy and Natural History of the Mammals** **Harwood**

Frequent field trips and the identification of museum material. Three hours of laboratory per week.

*Spring (1) (Offered in 1944-45 and alternate years)*

**113B Ornithology** **Crouch**

The study and identification of birds, especially those of the Pacific Coast and the San Diego region. One hour of lecture and six hours per week of laboratory, or field excursions. Prerequisite: Zoology 1B or Biology 10B.

*Spring (3) (Offered in 1944-45 and alternate years)*

**114A Genetics** **Harwood**

General introductory course designed to acquaint the student with the fundamental principles of heredity and variation. Special attention given to the Mendelian interpretations of the facts of inheritance. Two lectures per week.

*Fall (2)*

**114B Evolution** **M. E. Johnson**

The development of theories of evolution. Two lectures or discussion periods per week.

*Spring (2)*

**121 General Entomology** **Harwood**

The classification, life history, structure, and physiology of insects. Prerequisite: Zoology 1A or Biology 10B. Two hours of lecture and six hours of laboratory per week.

*Spring (3)*

**122 Systematic Entomology** **Harwood**

Classification of insects with especial emphasis on a group of insects of the student's choice. To be taken with or to follow 121. May be repeated for credit but with a total of not more than 2 units. Three to six hours of laboratory work each week.

*Spring (1 or 2)*

**Scientific Illustration** **Johnson**

struction and practice in various methods used to illustrate scientific publications. commended course in preparation for this one: Art A-B.

*ll (2)*

**5 Medical Entomology** **Harwood**

e role of insects and other arthropods in transmission and causation of human dises. Three hours of laboratory and one hour of lecture per week. Prerequisite: ology 1A or Biology 10B.

*ll (3) (Offered in 1945-46 and alternate years)*

**) Readings in Biology** **Harwood**

ading from a suggested bibliography with informal class discussion of topics. bjects discussed will include history of biology, biological principles, ecology, nomic zoology, zoogeography, breeding habits, animal behavior.

*ring(2) (Offered in 1945-46 and alternate years)*

**9 Special Study** **The Staff**

ork other than is outlined in the above courses. Admission only by consent of the structor with whom the work is to be done. Credit and hours to be arranged in ch case. Open to students who have completed at least fifteen units of Zoology with rade of A or B.

*ll and Spring (1 or 2)*

# DIRECTORY
## (1943-44)

HEPNER, WALTER R.------------------------------------------------Preside
A.B., 1913, M.A., 1916, Ed.D., 1937, University of Southern California.
San Diego State College since 1935.

ADAMS, JOHN R.----------------------------------------Professor of Engli
A.B., 1920, A.M., 1922, University of Michigan; Ph.D., 1940, University
Southern California. At San Diego State College since 1928.

†ALCORN, MARVIN DOUGLAS---------------Assistant Professor of Educatio
Director of Teacher Placeme
A.B., 1925, Southwestern College; A.M., 1931, Teachers College, Columbia Ur
versity; Ed.D., 1942, University of Southern California. At San Diego Sta
College since 1941.

*ALLEN, HAROLD BYRON----------------------Assistant Professor of Engli
A.B., 1924, Kalamazoo College; A.M., 1928, Ph.D., 1940, University of Mick
gan. At San Diego State College since 1940.

AMSDEN, GEORGIA C.-------------------------Associate Professor of Commer
Diploma, Gregg School, Chicago. At San Diego State College since 1925.

AULT, JESSE W.---------------------Dean of Education, Professor of Educati
B.S., B.Pd., 1910, Valparaiso University; M.A., 1925, University of Sou
Dakota. One year graduate study since 1925 at Claremont Colleges ar
University of Southern California. At San Diego State College since 1925.

BACON, GUINIVERE KOTTER (Mrs. George)--Supervisor of Student Teachin
Associate Professor of Educati
B.S., Utah Agricultural College; M.A., Stanford University. One year gradua
study since 1926 at Stanford University, Teachers College of Columbia Unive
sity, University of Southern California, and University of California at L
Angeles. At San Diego State College since 1928.

BAIRD, OSCAR--------------------------------------------Professor of Physi
B.A., 1910, University of Wisconsin; M.A., 1924, University of Californi
Three years graduate study since 1924 at University of Minnesota, Universi
of California, University of Southern California, University of Oregon.
San Diego State College since 1921.

*BAKER, CLIFFORD HENRY, Jr.-------------Instructor in Spanish and Fren
B.A., 1933, San Diego State College; M.A., 1935, University of California. Tv
years graduate study since 1935 at University of California. At San Dieg
State College since 1937.

BARNHART, KENNETH EDWIN--------------Associate Professor of Sociolo
A.B., 1915, Southwestern University; A.M., 1920; Southern Methodist Un
versity; Ph.D., 1924, University of Chicago. At San Diego State College sin
1939.

*BENNETT, MURIEL--------------------------Instructor in Physical Educati
B.A., Pomona College; M.A., Claremont Colleges. One-half year gradua
study since 1936 at Claremont Colleges and University of California at L
Angeles. At San Diego State College since 1936.

BLAKE, DEAN--------------------------------------Instructor in Meteorolo
Meteorologist, U. S. Weather Bureau. At San Diego State College since 192

†BROMLEY, J. PHILIP-------------------------Assistant Professor of Commer
B.S., 1934, M.S., 1936, University of Southern California. One year gradua
study since 1936 at University of Southern California, Columbia Universit
and Texas Agricultural and Mechanical College. At San Diego State Colle
since 1936.

---

† On military leave
* On leave

OOKS, BAYLOR………Assistant Professor of Geology

B.A., 1928, Stanford University. Two years graduate study since 1928 at University of Arizona and Stanford University. At San Diego State College since 1931.

OWN, ELIZABETH (Mrs. Leslie P.)………Associate Professor of French

Ph.B., M.A., Ph.D., University of Chicago. At San Diego State College since 1926.

OWN, LESLIE PARKER………Professor of Spanish and French

B.A., 1912, Yale College; M.A., 1913, Harvard University; Ph.D., 1935, University of Southern California. At San Diego State College since 1922.

ALLAND, LEO BLAKELY………Associate Professor of Physical Education

B.A., 1923, University of Southern California; M.S., 1931, University of Idaho. One year graduate study since 1931 at University of Southern California. At San Diego State College since 1935.

MERON, ROY ERNEST………Professor of Economics

A.B., 1922, Ph.D., 1929, University of California. At San Diego State College since 1929.

RBETT, KATHERINE E.………Supervisor of Student Teaching;
Associate Professor of Education

B.Pd., Michigan State College; B.S., M.A., Teachers' College, Columbia University. At San Diego State College since 1921.

OUCH, JAMES ENSIGN………Professor of Biology

B.S., 1930, M.S., 1931, Cornell University; Ph.D., 1939, University of Southern California. At San Diego State College since 1932.

ARSIE, MARVIN LLOYD, Jr.………Instructor in Biology

A.B., 1934, University of California at Los Angeles; Ph.D., 1939, Stanford University. At San Diego State College since 1939.

EPUTY, ERBY CHESTER………Professor of Education

B.A., 1922, University of Denver; M.A., 1926, Ph.D., 1929, Columbia University. At San Diego State College since 1931.

ICKHAUT, FLORENCE LILLIAN SMITH (Mrs. Charles A.)
Professor of English

B.A., Northwestern University; M.A., University of Chicago. At San Diego State College since 1917.

DUSTIN, GERTRUDE LORRAINE………Instructor in Psychology and
Home Economics

B.S., Teachers College, Columbia University; M.S., University of Southern California. At San Diego Junior College since 1941.

UBANK, JOHN F.………Assistant Professor of Physical Education

B.S., 1933, M.S., 1937, Ed.B., 1937, EdM., 1939, State College of Washington. At San Diego State College since 1942.

LEASON, JOHN MORTIMER………Assistant Professor of Mathematics

B.A., 1929, University of California at Los Angeles; M.A., 1930, University of California. One and a half years graduate study since 1930 at University of Southern California, University of California at Los Angeles and Claremont Colleges. At San Diego State College since 1930.

AMANN, ILSE HEDWIG………Assistant Professor of Art

B.E., University of California at Los Angeles. M.A., Columbia University. At San Diego State College since 1934.

AMMACK, EDITH CHASTAIN………Supervisor of Student Teaching
Associate Professor of Education

B.A., San Jose State College. At San Diego State College since 1911.

AMMACK, ISABELLA STEWARD………Supervisor of Student Teaching;
Assistant Professor of Education

B.A., M.A., University of California. One-half year graduate study since 1929 at University of California. At San Diego State College since 1936.

---

On military leave
Junior college

HARVEY, DOROTHY R. (Mrs. F. A.)-------------Assistant Professor of Bota

B.A., San Diego State College; M.A., University of Southern California. O
year graduate study since 1928 at University of Southern California and U
versity of Chicago. At San Diego State College since 1924.

HARWOOD, ROBERT DANIEL--------------------------Professor of Zoolo

A.B., 1920, Pomona College; Ph.D., 1928, Cornell University. At San Die
State College since 1928.

*HOUSER, LOWELL D.-----------------------------------Instructor in A

Diploma, 1924, Chicago Art Institute. Five years' special study since 19
in Mexico, Yucatan, Haiti, and New York City. At San Diego State Colle
since 1938.

HUFF, GEORGE D.------------------Associate Professor of Health and Hygie

M.D., 1924, University of Texas. At San Diego State College since 1939.

HUNT, MARGARET B. (Mrs. E. J.)----------Supervisor of Student Teachin
Instructor in Mu

B.S., M.A., Teachers College, Columbia University. One-half year gradua
study since 1935 at Teachers College, Columbia University, and Michigan Sta
College. At San Diego State College since 1940.

JACKSON, EVERETT GEE----------------------------------Professor of A

B.A., 1930, San Diego State College. Three years special study in Mexi
M.A., 1939, University of Southern California. At San Diego State Colle
since 1930.

JOHNSON, FRANK LOUIS----------------------Assistant Professor in Engli

B.A., 1928, M.A., 1929, University of Minnesota; Ph.D., 1934, University
Wisconsin. At San Diego State College since 1939.

JOHNSON, MYRTLE-----------------------------------Professor of Biolo

B.S., M.S., Ph.D., University of California. At San Diego State Colle
since 1921.

JONES, SYBIL ELIZA---------------------Assistant Professor of Speech A

B.L., M.L., University of California. Two years special study since 19
At San Diego State College since 1925.

†JORDAN, HARRY JOHN-----------------------------Professor of Commer

B.A., 1926, Washburn College; M.B.A., 1930, Harvard School of Busine
Administration; Ph.D., 1936, Northwestern University. At San Diego Sta
College since 1939.

KEENEY, JOSEPH SUMNER-------------------Associate Professor of Engli

B.A., 1921, Yale College; M.A., 1928, Ph.D., 1933, University of California.
San Diego State College since 1933.

KELLY, GENEVIEVE------------------------Assistant Professor of Sociolo

B.A., University of California; M. A., Columbia University. At San Die
State College since 1924.

KENNEDY, CHESTER BARRETT---------------Assistant Professor of Engli

B.A., 1927, Chico State College; M.A., 1939, Stanford University. Two a
one-half years graduate study since 1928 at Stanford University and the U
versity of California. At San Diego State College since 1937.

LEIB, JULIUS-----------------------------------Asisstant Professor of Mus

Three years special study at Leipzig Conservatory. At San Diego State C
lege since 1938.

LEONARD, CHARLES B.--------------------------------Professor of Histo

B.A., 1921, M.A., 1922, Ph.D., 1929, University of California. At San Die
State College since 1921.

*LESLEY, LEWIS B.-----------------------------------Professor of Histo

B.A., 1920, Stanford University; M.A., 1923, Ph.D., 1933, University
California. At San Diego State College since 1924.

† On military leave
* On leave

**LIVINGSTON, GEORGE ROBERT**--------------------Professor of Mathematics

B.S., 1910, M.A., 1922, University of California. One year graduate study since 1922 at University of California and University of California at Los Angeles. At San Diego State College since 1921.

†**LUCIO, WILLIAM HOWARD**-----------------Supervisor of Student Teaching; Assistant Professor of Education

A.B., 1934, M.A., 1937, University of California. Three years graduate study since 1934 at University of California. At San Diego State College since 1939.

**MADDEN, RICHARD**------------------Principal of Campus Elementary School; Professor of Education

B.A., 1926, Nebraska (Peru) State Teachers College; M.A., 1930, Ph.D., 1931, Columbia University. At San Diego State College since 1939.

*__MEAD, HUNTER__---------------Assistant Professor of Philosophy and Psychology

B.A., 1930, Pomona College; M.A., 1933, Claremont Colleges; Ph.D., 1936, University of Southern California. At San Diego State College since 1941.

**MENDENHALL, MARY**------Dean of Women; Professor of Educational Guidance

B.A., University of Colorado; M.A., University of Southern California; Ph.D., Yale University. At San Diego State College since 1939.

**MESSNER, ELMER ALLEN**--------------------Assistant Professor of Chemistry

B.A., 1927, M.A., 1928, Stanford University. Two years graduate study since 1928 at Technische Hochschule, Breslau, Germany. At San Diego State College since 1931.

†**MOE, CHESNEY R.**--------------------------------Associate Professor of Physics

B.A., 1929, M.A., 1931, Stanford University; Ph.D., 1941, University of Southern California. At San Diego State College since 1931.

**NASATIR, ABRAHAM PHINEAS**-------------------------Professor of History

B.A., 1921, M.A., 1922, Ph.D., 1926, University of California. At San Diego State College since 1928.

*__NICHOLS, AMBROSE R., Jr.__---------------------------Instructor in Chemistry

B.S., 1935, University of California; Ph.D., 1939, University of Wisconsin. At San Diego State College since 1939.

**NORDAHL, MARGUERITE ANNA**--------------Supervisor of Student Teaching; Assistant Professor of Education

B.A., San Diego State College; M.A., Claremont Colleges. At San Diego State College since 1936.

†**OSBORN, CLARENCE G.**-----Associate Professor of History and Political Science

B.A., 1926, M.A., 1927, Ph.D., 1935, Stanford University. At San Diego State College since 1937.

**PATTERSON, LENA E.**-----------------------------------------Professor of Art

A.B., B.S., Ohio University. M.A., Columbia University. One year graduate study since 1918 in Berlin, Vienna, Paris, London. At San Diego State College since 1933.

†**PEASE, ESTHER ELIZABETH**--------Assistant Professor of Physical Education

B.A., University of California at Los Angeles. One year graduate study at University of California at Los Angeles, University of Southern California, and Mills College and one year European study in the dance since 1931. At San Diego State College since 1939.

†**PEIFFER, HERBERT C., Jr.**-----------Instructor in Psychology and Speech Arts

A.B., 1928, University of California at Los Angeles; M.A., 1931, Ph.D., 1939, Stanford University. Appointed Junior College 1937. At San Diego State College since 1941.

**PERRY, FAY V. (Mrs. J. M.)**--------Director of Guidance for Two-Year Students; Assistant Professor of Sociology

B.A., San Diego State College; M.A., University of Southern California. Two years graduate study since 1931 at University of Southern California and Stanford University. Appointed Junior College 1936. At San Diego State College since 1940.

* On leave

PETERSON, ARTHUR G.____________Dean of Liberal Arts; Professor of Economics

B.A., 1912, College of the Pacific; M.A., 1926, Stanford University. Two years graduate study since 1926 at Stanford University, University of Washington, and University of Southern California. At San Diego State College since 1921.

PETERSON, CHARLES E.__________Dean of Men; Professor of Physical Education

A.B., 1928, San Diego State College; M.A., 1937, Claremont Colleges. At San Diego State College since 1921.

†PFAFF, PAUL LEWIS_____________________Associate Professor of Speech Arts

B.A., 1929, Stanford University; M.A., 1937, University of Southern California. Two years study since 1937 at University of Southern California. At San Diego State College since 1931.

PHILLIPS, WALTER THOMAS_______Associate Professor of Spanish and French

B.A., 1925, University of Washington; M.A., 1926, Stanford University. Graduate study at Institute of French Education, National University of Mexico; Ph.D., 1943, University of Southern California. At San Diego State College since 1927.

POST, LAUREN CHESTER___________________Associate Professor of Geography

A.B., 1924, M.A., 1931, Ph.D., 1937, University of California. At San Diego State College since 1937.

REDIT, EDITH ESTHER______________________Supervisor of Student Teaching; Assistant Professor of Education

B.A., M.A., University of California. At San Diego State College since 1938.

*RICHARDSON, ROBERT WILLIAM_________Assistant Professor of Geography

B.A., 1930, University of California. Three years graduate study since 1930 at University of California. At San Diego State College since 1939.

†ROBINSON, DUDLEY HUGH_________________________Professor of Chemistry

B.A., 1927, Louisiana State University; M.S., 1932, University of Iowa; Ph.D., 1942, University of Southern California. At San Diego State College since 1928.

ROGERS, SPENCER LEE_______________________Director of Extension Service; Associate Professor of Anthropology

B.A., 1927, San Diego State College; M.A., 1930, Claremont Colleges; Ph.D., 1937, University of Southern California. At San Diego State College since 1930.

ROSS, MELVYN K.__________________________Instructor in Physics and Chemistry

A.B., 1939, San Diego State College; M.S., 1942, University of Southern California. At San Diego State College since 1942 (Laboratory Assistant 1939-1942).

SCHWOB, MARION LYON (Mrs. W. E.)_________________Associate Professor of Physical Education

B.A., University of Iowa; M.S., University of Southern California. At San Diego State College since 1934.

SHAFER, FLORENCE I._______________Assistant Professor of Physical Education

B.A., University of California; M.S., University of Southern California. At San Diego State College since 1933.

†SMITH, CHARLES ROBERTS_________Assistant Professor of Physical Education

B.A., 1931, San Diego State College. One year graduate study since 1931 at University of Southern California. At San Diego State College since 1933.

†SMITH, CLIFFORD EDWARD______________Associate Professor of Astronomy

B.A., 1923, Carleton College; M.A., 1926, Swarthmore College; Ph.D., 1936, University of California. At San Diego State College since 1937.

*SMITH, DEANE FRANKLIN____________________Assistant Professor of Music

B.Mus., 1931, M.Mus., 1939, Northwestern University. At San Diego State College since 1939.

SMITH, LEILA DEBORAH___________________________________Professor of Music

A.B., Oberlin College; M.Mus., Oberlin Conservatory; M.A., Columbia University. One-half year study since 1926 at Stanford University and Northwestern University. At San Diego State College since 1922.

| une 13 | Annual commencement. |

## SUMMER SESSION, 1947

Term I, June 23-August 1
Term II, August 4-22

# FUNCTIONS OF THE STATE COLLEGES OF CALIFORNIA

The State colleges have three major functions, namely: (1) To help the individual student to develop a well-rounded and adjusted personality; (2) to promote civic intelligence and competence; and (3) to create supplies of trained men and women, some to serve as teachers in the elementary and secondary schools, some to fill intermediate places of leadership, and some to transfer to graduate institutions to equip themselves to extend the frontiers of knowledge and to occupy the higher positions of leadership. In terms of publicly supported higher education, the State colleges and the university together make provision for the realization of all the essential objectives of higher education in our State.

To achieve their unique purposes the State colleges have developed and are improving offerings as follows:

1. Teacher education curricula for those students who plan to teach in the elementary school, the junior high school, and in secondary schools.
2. Preprofessional curricula.
3. Curricula of varying lengths in such fields as business, industry, governmental services, homemaking, and social service.
4. General education for students who take work which leads toward the bachelor of arts degree or to the higher professions through graduate work.
5. Guidance services to assist the individual student to plan his educational program and to make his college and life adjustments.
6. Extension courses in appropriate fields.

The State colleges accept the principle that higher education should be available to all capable high school graduates. The preservation and improvement of democracy depends upon the full and uphampered development of all potential citizenship and leadership resources. In keeping with this principle the State colleges maintain flexible entrance requirements. Each applicant is treated individually in terms of his potential capacity and his potential contribution and not in terms of past academic pattern or accomplishment alone.

The State colleges purposely maintain not only flexible entrance requirements, but also, adjustive curricula, and adequate and effective guidance and counseling services to promote the personal and educational development of worthy students. The State colleges modify traditional academic restrictions and provide new curricula and services whenever such modifications and additions seem to serve the legitimate desirable needs of individuals and society.

The promotion of civic intelligence and competence is the underlying aim of all activities on State college campuses. Special emphasis centers on warm personal relationships between instructors and students, on friendly counsel in time of need, and on the day-to-day routine of living in a friendly atmosphere. Because the majority of State college students live at home, it is possible to link together the college, the home, and the community in realistic democratic relationships.

The democratic controls exercised over the State colleges make them readily and effectively responsive to individual and community needs and encourage them continuously to make significant improvements in both curriculum and personal services. The State colleges are thus laboratories in which the facts and theories developed in research, in community living, and in daily association with students are reflected in the instructional program.

The State colleges plan their program of higher education so as to provide educational services inherent in the principle of equality of opportunity.

# THE COLLEGE

## LOCATION AND ENVIRONMENT

Renowned as a winter resort with a mild but invigorating climate, San Diego as become equally famous for its cool summers. High cultural standards in art, usic, literature, and science create a stimulating environment for a college. Many f these advantages are to be found in the heritage resulting from the expositions of 915-16 and 1935-36, including the buildings themselves, which portray the best types f Spanish colonial art and architecture. Housed in these buildings are the Fine Arts allery, exhibits in anthropology, natural history, and American archaeology, which re in many respects unsurpassed. The outdoor organ, the Ford Bowl, and the hortiultural gardens make Balboa Park, in which all these facilities are located, world enowned. The Scripps Institute of Oceanography, operated by the University of alifornia at La Jolla, gives opportunity for important cooperation in the biological iences.

## BUILDINGS AND EQUIPMENT

On February 1, 1931, the college was moved to the new campus, located one mile orth of the city's principal east-west boulevard, El Cajon Boulevard. The buildings re of Spanish-Moorish architecture which is well suited to the landscape and climate f this region. They include the Academic Building (which houses lecture halls, lassrooms and administrative offices); the Science Building; the Library; the Little heater; the Music Building; the Campus Elementary School; Scripps Cottage a social clubhouse for women students); the Cafe and Book Store; and the Physical ducation Building (a structure with adequate facilities for both men and women). he gymnasium contains a very fine basketball floor with stands that will accomodate 1,500 spectators. A fine concrete stadium, constructed in a natural site, has seating capacity that is adequate for present needs. The open air theater, seating ,200 persons, serves as a meeting place for large groups.

## FACILITIES FOR THE EDUCATION OF TEACHERS

The college maintains a modern elementary school on the campus where it has eveloped an extensive program for the education of elementary school teachers. he classroom-laboratory plan which calls for the use of work-rooms, the library, nd shops, affords unusual opportunities for the induction of students into teaching. y arrangement with the San Diego City Schools, directed teaching is provided in he Euclid Elementary School for one-half day throughout a semester. A similar rrangement exists at the Woodrow Wilson Junior High School for students who re preparing to teach junior high and special secondary school subjects. Students reparing to teach special and general secondary school subjects may be assigned to ne of the senior high schools.

## THE FACULTY

The professional education of the faculty places the college in the 97 percentile osition among teacher education institutions of the Country. For listing and urther details see the Directory on page 118.

## THE LIBRARY

The library facilities of this college are noteworthy for an institution of its size. he library consists of well over 95,000 volumes selected to meet the requirements f a modern educational institution. Six professionally trained librarians are available to render assistance to students in their reading and reference work.

For the duration of the war the library service has been further augmented by the oan of a librarian and three special libraries, namely, a collection of 3,000 volumes n anthropology and ethnology from the San Diego Museum of Man, the U. S. rant Memorial Library of 1,375 volumes, and the 25,000 volume Scientific Library f the San Diego Society of Natural History.

The Campus Elementary School Library, representing a collection of 11,000 olumes, possesses equipment and building facilities that are unique.

## LIVING ACCOMMODATIONS

Living arrangements for students whose homes are not in San Diego or withi commuting distance are made through the offices of the Dean of Women or the Dean o Men. All women students are urged to live in the residence hall adjoining the campu Careful consideration is given to study conditions, healthful living, and adequate socia opportunities. Room and board may be secured for approximately $200 per semeste payable in four installments. Opportunities to reduce this figure by working a fe hours each week are occasionally available. Reservations should be made in advanc through the Manager of Quetzal Hall, 5192 College Avenue, San Diego 5, California Where students find other accommodations more desirable, written permission fro parents must be secured and filed with the Dean of Women or Dean of Men.

## VETERANS' EDUCATION AND HOUSING

The college has been approved by various accrediting agencies to offer courses fo veterans leading toward the A.B. Degree in some 19 major fields. A veterans' office i maintained on the campus to facilitate registration, aid in the establishment of benefits and serve as an information center. Through a faculty committee on veterans' affairs special counseling services are available.

The Federal Housing Authority has made available housing for 600 single mal veterans at Riverlawn, located midway between Old Town and Loma Portal. Fo further details write to the Veterans' Secretary at the college.

## STUDENT LIFE

A rich field of extra-curricular activities is available to the student throughout hi college life. The student is urged to select these activities carefully in order that h may profit by these extra-class experiences without lowering his standards of scholarship. The *Student Handbook*, available at the time of registration, gives informatio concerning activities which include organizations in every department of the college and opportunities for individual and group experience in the social, athletic, fraternal religious and governmental life of the campus.

## STUDENT HEALTH SERVICE

The Health Department is maintained for the protection and care of studen health. A complete physical examination is required of each student upon admission t college. Careful attention is given to cases undergoing remedial treatment or to case in which a modification of study load or in the amount of participation in physica activities seem advisable.

A representative of the Health Department is available each day for consultatio and emergency treatment. Students who have been absent because of illness shoul receive clearance from the Health Department before returning to classes.

A group plan for accident insurance is in operation for students who desire t participate.

## PLACEMENT SERVICE

A Placement Office is maintained by the college, which serves as a clearing hous for part-time and full-time jobs. Employers notify this office of available openings in their organizations, and also turn to the office for information concerning graduates o nongraduates whom they are considering for employment.

Included in the service of the office are the listing of part-time jobs of all types available, including opportunities to work for board and room, teacher placement, and full-time jobs in commerce and industry.

This service is free to students, who are invited to arrange for interviews with members of the placement staff if in need of assistance in finding work. Students who know of jobs in which they are not themselves interested are encouraged to notify the office of such vacancies.

The Placement Secretary should be seen or called regarding vacancies or work applications.

## VOCATIONAL REHABILITATION SERVICE

The Bureau of Vocational Rehabilitation, California State Department of Education, offers its service to students who have an employment handicap resulting from physical disability of any kind. Included are vocational counseling, the payment of tuition and fee, and the providing of textbooks without charge to the trainee. Details of the service may be obtained from the Registrar's Office.

# ADMISSION AND REGISTRATION

## GENERAL ADMISSION REQUIREMENTS

High school graduates and other applicants possessing equivalent preparation may be admitted to this college upon evidence of fitness to profit by college instruction, such fitness to be shown by previous scholastic records, by evidence of good moral character and personal qualifications, and by satisfactory scores on tests which the college may require. Due to crowded conditions the college probably will have to refuse all qualified applicants who do not file application blanks and official transcripts prior to the dates indicated in the Calendar on page 5.

## ADMISSION OF HIGH SCHOOL GRADUATES

(1) A high school transcript must be presented showing satisfactory scholarship, and (2) applicants must demonstrate readiness for college instruction by making satisfactory scores on such tests as the college may designate.

**Regular status** will be granted if the student has earned A or B grades in not less than 16 semester courses in English, Social Sciences, Foreign Language, Mathematics, Natural Sciences, and related fields, during the tenth, eleventh, and twelfth grades.

**Regular-provisional status** will be granted if the student has earned A or B grades in not less than 12 semester courses in the above subjects. The student will attain full regular status at the end of the first semester in college if a scholarship average of C or better is maintained in at least 12 units of work. Failure to secure a .75 average will disqualify the student for further attendance.

**Provisional status** will be granted students who do not qualify for regular-provisional status if they have earned A or B grades in at least 12 semester courses of any type during the tenth, eleventh, and twelfth grades. These students will be enrolled in two-year curricula. Individuals who fall slightly below the above standard may be admitted to the two-year curricula if qualifying examination scores indicate probable success in these courses.

**Adult special status** may be granted an applicant who is over 21 years of age or is a war veteran provided that he demonstrates through qualifying examinations satisfactory ability to do college work. Such students may be transferred to regular status after completion of one year of satisfactory work and receive full credit for all work completed.

## ADMISSION BY EXAMINATION

Certificates of successful examination before the College Entrance Examination Board will be accepted when candidates cannot meet the above scholarship requirements.

## ADMISSION OF NON-HIGH SCHOOL GRADUATES

A high school diploma is not required for admission as an adult special student but if a non-high school graduate is so admitted he may be required to complete, in addition to the usual requirements for the A.B. Degree, three semester units of college work for each two semester courses which he lacked for high school graduation.

## ADMISSION OF VETERANS

Applicants who are veterans may be enrolled in any of the above classifications. Lack of a high school diploma will not prevent admission of a veteran provided he can demonstrate through the examinations of the college or of the United States Armed Forces Institute that he is capable of doing satisfactory college work. The college cooperates with the local high schools by helping plan correspondence study for a veteran which can lead to the issuance of a diploma by the high school.

## SPECIAL STUDENTS

Persons over 21 years of age may be admitted on the basis of maturity, provided they present satisfactory evidence of good character and intelligence. Full matriculation will be granted only upon removal of all entrance deficiencies, and the completion of a full semester of satisfactory college work.

### Auditors

Properly qualified persons may apply for admission to attend classes as auditor Such students pay the same fees as those who take equivalent work for credit.

### Admission With Advanced Standing

Credit earned in recognized institutions of collegiate grade will be evaluated an advanced standing allowed accordingly toward the graduation requirements of th institution. Applicants must show an average grade of C or better for all colleg work, for the last college attended, and for the last semester of attendance in order t qualify for regular status. A student who enters with advanced standing is one wh has completed at least 15 units of passing work in another collegiate institution. However, no applicant may disregard his collegiate record and apply for admission onl on the basis of his high school work. Not more than 64 semester hours of junior colleg work may be allowed for credit.

Students seeking admission with advanced standing must furnish complete transcripts for all work attempted beyond the eighth grade. A $2 evaluation deposit mus accompany the application for admission provided the student has completed 30 unit or more work. This deposit will be refunded if the student enrolls at the next regula registration period.

## REGISTRATION

Registration date for new students for the fall semester of 1946-47 is Septembe 16th and for the spring semester it is February 4th. An application blank should b secured from the Registrar and filed, with complete transcripts of record, at least tw weeks prior to registration date.

The college year is divided into fall and spring semesters of 18 weeks each, followed by a summer session consisting of two terms of six weeks and three weeks respectively. Students may enter at the beginning of either semester or either term of the summer session.

The summer session meets the needs of students who wish to secure supplemental credit or to shorten the time for completion of their college course, and of teachers in service.

## TESTS REQUIRED AT REGISTRATION TIME AND LATER

1. A physical examination is required of all students upon entering the college. Appointments for this examination are made during the orientation program.

2. All entering students are required to take a College Aptitude Test. Exceptions may be made for graduate students and for those who register for five units or less.

3. All college transfer students who present less than a minimum of 15 units of college credit must take a high school achievement examination, and a standard English examination in addition to the College Aptitude Test. Students whose tests indicate that they are not qualified for the regular English 1B must take English 1A or 1AA. Exceptions may be made for students transferring English credit from other colleges.

4. Passing the Fundamentals Test in reading, spelling, arithmetic and handwriting, and a Speech Test, are prerequisites for admission to upper division courses in teacher education curricula. These tests should be taken at the beginning of the second semester of the freshman year, in order that deficiencies, if any, may be made up before applying for admission to the upper division of teacher education curricula. Exceptions may be made for graduates of California State teacher education institutions who have been teachers in service.

## LATE REGISTRATION

Students who register after the first week of the semester are subject to a limitation of program and must secure the approval of instructors for late admission to classes. After registration day a fee of $1 is charged for late registration.

## CHANGES IN REGISTRATION

Petitions for changes in program may be secured at the Registrar's office. A small fee is charged for changes in program after registration books are filed.

## LOANS AND SCHOLARSHIPS

Scholarships for both men and women have been made available through the efforts of alumni, patrons of the college, and civic organizations. Superiority in scholarship and worthiness from the point of view of need are the standards upon which selection is based. Scholarship aid is therefore restricted for the most part to students who have completed the lower division of the college.

Both long and short term loans are available to students who have been in attendance for at least one year and who have given evidence of ability to do satisfactory college work. Application for loans is made to the Committee on Loans and Scholarships through the office of the Dean of Men or Dean of Women.

# FEES AND EXPENSES

## PROBABLE EXPENSES FOR ONE SEMESTER

An estimate of the expense of attendance for one semester is given below. estimate is made as to the cost of clothing, or other personal items, since these figur vary with the demands of the individual. Laboratory fees are additional.

### A Partial Estimate of Expenses

One Semester

| | *Minimum* | *Maximu* |
|---|---|---|
| Fees and Deposits | $20.00 | $27.50 |
| Books | 12.00 | 25.00 |
| Board and Room | 200.00 | ---- |
| Transportation, Lunches, Incidentals | 15.00 | 50.00 |
| Miscellaneous | | 5.00 |

Before enrolling in college, the student should possess sufficient resources to me the minimum expenses for one semester. A limited amount of clerical work in offic and in the library may be offered from time to time, but ordinarily it is not sufficientl remunerative to reduce expenses materially.

## LIST OF FEES AND DEPOSITS (SUBJECT TO REVISION)

### Enrollment Fees and Deposits

(Payable at Time of Registration)

| | |
|---|---|
| By all students: | |
| Tuition (auditors pay same fees as other students): | |
| Regular students (carrying over 5 units) | $6.5 |
| Limited students (carrying 5 units or less) per unit | 2.5 |
| Materials and service: | |
| Regular students | 4.0 |
| Limited students per unit | .5 |
| General service deposit (unexpended portion is refunded) | 3.0 |
| Personnel examination (new students only)<br>(Limited students and graduate students exempted) | 2.0 |
| Student activity fees (not required by the State): | |
| Regular students | 6.0 |
| Limited students | 2.0 |

### Miscellaneous Fees and Deposits

(Fees Payable When Service Is Rendered)

| | |
|---|---|
| Change of program | $ .5 |
| College Bulletin (free to prospective students) | .3 |
| Duplicate library card | .2 |
| Duplicate registration book | .5 |
| Evaluation of transfer records for advanced standing | 2.0 |
| Fundamentals test | .5 |
| Late filing of registration book | 1.0 |
| Late registration | 1.0 |
| Transcript of record (1st copy free) | 1.0 |

### Graduation Fees

| | |
|---|---|
| State Teaching Credentials (each credential) | $3.00 |
| Diploma | 1.00 |

The credential fee is collected through the college by cashier's check or post office money order made payable to the State Department of Education.

# GENERAL REGULATIONS

## INFORMATION

All inquiries relative to the college should be directed to the Registrar's office.

## CLASSIFICATION

*Full-time students* are those who are registered in more than five units of work. They are expected to carry a minimum of 12 units unless excused.

*Limited students* are those who, for acceptable reasons, have been permitted to register for five or fewer units of work.

*Class.* Students who have completed 0 to 29 units of work are classified as freshmen; 30 to 59 units as sophomores; 60 to 89 units as juniors; and 90 or more as seniors.

## SCHOLARSHIP, GRADES, AND GRADE POINTS

The following grades are used in reporting the standing of students at the end of each semester: A, excellent; B, good; C, fair; D, passed; E, conditioned; F, failed; I, incomplete, and W, withdrawn.

The grade E is recorded for work which is of low order but which may be made passable. If the work is raised to passing level by the close of the next semester, the grade is changed to D; otherwise it is changed automatically to F.

The grade I is recorded for work of high order but which is incomplete for an acceptable reason. To change an I to another grade, the work must be completed within the next semester; otherwise it is changed to F.

Grade points are assigned as follows: Grade A, 3 points per unit; B, 2 points per unit; C, 1 point per unit; D, no points; E, minus 1 point per unit; F, minus 1 point per unit. The number of grade points a student has earned in a subject is determined by multiplying the number of points he has received by the number of units allowed. The grade point average is determined by dividing the grade points earned by the number of units attempted. Courses in which the student received an I or Cr. or W are disregarded in computing grade point averages. A student must earn at least a C average in all work undertaken at the college to qualify for a diploma or a transcript of record with recommendation to another collegiate institution. If a course is repeated only the second grade earned is considered in the student's average.

## UNITS OF WORK, AND STUDY LISTS LIMITS

A unit of credit represents one hour of lecture or recitation combined with two hours of preparation per week through one semester, or three hours of laboratory or field work in the case of laboratory credit.

Students are not ordinarily permitted to enroll for more than 16 units * for credit toward graduation. This constitutes a normal semester's program.

Certain exceptions to this rule exist. If during the preceding semester the student has carried at least 12 units *: (1) If a grade point average of at least 1.5 was earned, 17 units * may be carried for credit toward graduation; and (2) if a grade point average of 2.0 (B) was earned, 18 units * may be carried.

Any course in which a passing grade is earned may be used in satisfying pattern requirements, even though credit for the course is in excess of the units which may be credited for graduation.

Exceptions to the above regulations may be secured only through a petition to the Scholarship Committee.

No student may register for less than 12 units without the approval of the Dean of General Education or the Dean of Professional Education.

---

* In addition to required physical education courses.

## PROBATION AND DISQUALIFICATION

### Probation

Any student whose scholarship record shows a cumulative deficit of 12 more grade points below a C average for all work undertaken in the college will placed on probation. A limited student will be placed on probation if his cumulati deficit below a C average equals or exceeds the average number of units carried p semester. Probationary status may be continued provided that the student does n add further toward his grade point deficiency.

### Disqualification

Any probational student whose scholarship falls below an average grade of in any single semester is disqualified for further attendance at the college. A schola ship record below a D average for any single semester also disqualifies a student.

A disqualified student may be reinstated after an interval of one semester f reasons satisfactory to the Executive Committee of the Faculty. All applications f reinstatement must be in writing.

## WITHDRAWALS FROM CLASS

Forms for withdrawal from class may be obtained at the Registrar's office. If student withdraws from class during the first seven weeks of a semester, a grade W will be recorded upon his permanent record for each class which he has droppe If he withdraws during the remainder of the semester, either an I or an F will b recorded unless a grade of W is approved by the instructor and the proper dean. grade of I automatically becomes an F unless the work is completed by the end the next semester of attendance.

## TRANSCRIPTS OF RECORD

Students may secure one transcript of record without fee. Thereafter, eac request for transcript should be accompanied by the fee of $1. Once a student ha matriculated in this college, transcripts from other schools will not be returned, o copies of them made. No fees are charged for transcripts required for militar purposes.

Transcripts in the possession of students are to be regarded as unofficial records

## ELIGIBILITY FOR DIRECTED TEACHING

No student shall be eligible for directed teaching (Education 116) who has no completed 75 units, been admitted to Teacher Education, and whose entire record as well as his record for the preceding semester, does not average at least a 1.2 grade

## THE HONORS GROUP

All students who at the end of the sophomore year have attained a grade-poin average of 2.5, and such others as have attained a high average in the department i which their major is selected, and who have received the recommendation of tha department and the consent of the Committee on Honors, may if they so elect, con stitute an honors group, for special treatment in their major subject.

Such students, so far as the facilities of the department and the best interests o the students under its charge allow, shall be treated as befits their individual need and as their individual capacities warrant. They shall be eligible to enroll i honors or special study courses, although credit in such courses shall be limited to units a semester. They shall not be held to regular attendance in the establishe courses of their departments if, in the opinion of the instructor, the course requirements can be met through special assignments and examinations or by satisfactory performance in the regular examinations in the course. With the consent of the major department, requirements concerning minors and specific courses or sequences in the major may be set aside. Each honor student shall be assigned to a member of his major department for advice and direction.

Students in the honors group who fail to take advantage of the opportunities there offered may at the end of any semester be transferred by the department to the general course. Students in the general course who show unusual capacity, upon recommendation of the department and the Committee on Honors, may at the end of any semester, be transferred to the honors group if such transfer appears practicable.

Students who wish to apply for entrance in the Honors Group may do so by filling out cards to be obtained from their major departments. The applications should be filed with the chairman of the major department not later than a week after registration opens. Units earned by students doing individual study under this plan will be recorded under the symbol 166 and will be subject to the formulated rules dealing with limitations of student load.

## THE DEGREE WITH HONORS AND WITH DISTINCTION

Upon recommendation of the Committee on Honors, graduation with honors shall be granted to the upper 10 per cent of the graduating class. Each department shall determine which students it will recommend for distinction in the major field at graduation, and report its recommendation to the Committee on Honors for transmission to the faculty.

## EXAMINATIONS

No final examinations shall be given to individual students before the regular time. Any student who finds it impossible to take a final examination on the date scheduled must make arrangements with the instructor to have an incomplete grade reported and must take the deferred final examination not later than the end of the first semester following that in which the incomplete was given. No exception shall be made to this rule without the approval of an academic dean and the instructor concerned.

All final examinations shall be written in official examination books or other forms which shall be furnished by the college and distributed by the instructor at the beginning of the examination period. No books or papers of any kind shall be brought into the examination room, except by special order of the instructor.

## EXTENSION COURSES

The amount of credit for extension and correspondence courses acceptable in fulfillment of the requirements for the Bachelor of Arts Degree will depend upon the nature of the courses, the quality of the work done, and the student's preparation for work in the field of the course. The college reserves the right to limit credit to such courses as have been approved, and the total of such acceptable credit to 12 units.

# THE BACHELOR OF ARTS DEGREE

## GENERAL REQUIREMENTS FOR THE BACHELOR OF ARTS DEGREE I TEACHER EDUCATION AND IN LIBERAL ARTS

San Diego State College offers the following types of curricula leading to t A.B. Degree:

(1) the curricula leading to the California teaching credentials,
(2) the Liberal Arts curricula.

With slight variations in definition, many of the basic requirements are the same.

A minimum of 120 units of college work, representing a four-year course, required for the Bachelor of Arts Degree. At least 30 units must be earned in th college, and not less than 24 of these residence units must ordinarily be taken with t rank of senior. Not fewer than 12 units of this work must be completed during a sing semester; or in lieu of this at least 16 units must be completed in not less than tv consecutive summer sessions. At least a C average in scholarship must be maintain in the major and in all work applied toward the degree.

## CREDIT GRANTED FOR MILITARY SERVICE

Six units of lower division elective credit will be granted to students who ha served in the armed forces of this country upon the completion of the prescribed bas training program. Documentary evidence bearing the signature of the proper co manding officer must be filed before credit will be accorded to the student.

Additional units of credit will be granted to students who can document the fa that they have completed officer's or other specialized training, and have been assign to active military duty.

## SUBJECT MATTER REQUIREMENTS IN THE LOWER DIVISION

| | *Uni* |
|---|---|
| Physical Education | 2 |
| Health Education 1 or 2 | 2 |
| English | 6 |
| Psychology | 3 |
| Foreign Language (not required in the teacher education or general engineering curricula) | 10 |
| Mathematics A and B, 4 units, or high school algebra and geometry | 0–4 |
| Social Sciences | 12 |
| Natural Sciences | 12 |
| Electives to make total of 60 units, including lower division preparation for the major and minor. | |

### Explanation of Lower Division Requirements

### English

This requirement may be satisfied either in the freshman year or in the sophomor year. Courses are to be chosen from the following: English 1A, 1AA or 1B and 11, 1 13, 14, 15, 16, 50A, 50B, 52A, 52B, 56A, 56B.

### Psychology

Psychology 1A may be completed at any time in the lower division.

### Foreign Languages

At least 10 units in one foreign language are required in the lower division excep that no language is required in teacher education and engineering. No degree credi is given for only the beginning college semester of a foreign language.

High school work completed with grade of C or better may meet the foreig language requirement in whole or in part. Each year course is counted in satisfactio of 3 units of this requirement. Three years of foreign language in high school wil satisfy the college requirement in foreign language. If two or more years have elapse since the completion of a high school course in any foreign language the final year o the course may be repeated for college degree credit but not for additional credit in meeting the language requirement.

### Social Sciences

Twelve lower division units chosen from two or more departments in the Social Science Division are required.

High school semester courses not to exceed two such courses in the fields of history, political science, sociology, and economics taken with grades of B or better may be used in satisfying 3 units of the social science requirement provided they are taken in the senior year.

### Natural Sciences

Twelve lower division units chosen from courses representing each of the following groups are required:

(a) Biology 1 or a year course in high school or college biology, botany, physiology or zoology.
(b) Physical Science 1A or 1B or a year course in high school or college physics or chemistry.
(c) Lower division courses to meet the natural science requirement must be taken from the following lists and must include one of the college or high school laboratory courses marked with an asterisk: Astronomy 1, 2, 9; Bacteriology 1*; Biology 1, 10A-10B*; Botany 2A,* 2B,* 4; Chemistry 1A,* 1B,* 2A-2B,* 7-8*; Geography 1 or 3 (only one course may be counted toward requirement); Geology 1A, 1B,* 2A, 2B; Physical Science 1A, 1B, 10; Physics 1A-1B,* 2A-2B, 3A-3B,* 1C-1D,* 54; Physiology 1A, 1C*; Zoology 1A,* 1B,* 8,* 20.

A high school course in botany, chemistry,* physics,* physiology, zoology, or advanced biology taken in the senior year with grades not lower than B may be used in satisfying 3 units of the 12 unit natural science requirement. These courses may be counted as meeting local laboratory requirement (asterisk) if completed in junior or senior year with grade of C or better.

### Mathematics

High school elementary algebra with grade of at least C is required or completion of Mathematics A. High school plane geometry with grade of C or better is required or completion of Mathematics B.

### Lower Division Preparation for the Major

See description of requirements for teaching majors in page 20. Specific requirements for the majors in the liberal arts curricula are listed in connection with the descriptive list of courses in each major field (see pages 49-117).

### Lower Division Preparation for the Minor

See description of requirements for liberal arts minors on page 18 and for teaching minors on page 21.

### Numbering of Courses

Courses numbered 1 through 99 are in the lower division, those numbered 100 through 199 are in the upper division, and those numbered 200 or over are on the graduate level.

## SPECIFIC UPPER DIVISION REQUIREMENTS FOR THE A.B. DEGREE IN LIBERAL ARTS

The liberal arts curricula lead to the Bachelor of Arts Degree with majors in art, chemistry, commerce, economics, English, French, general engineering, geography, history, mathematics, music, physical science, physics, social science, Spanish, speech arts, and zoology and qualify for graduate work in these fields in recognized American colleges and universities. Completion of the requirements of these curricula also enables the graduate to satisfy undergraduate requirements for the general secondary credential which, with graduate work, will enable the holder to teach in a senior high school or junior college.

### Subject Matter Requirements in the Upper Division

| | |
|---|---|
| Political Science 101 | 2 unit |
| Minor (minimum in upper division courses) | 9 unit |
| Major (upper division courses) | 24 unit |

At least 40 units in upper division courses must be completed, 30 of which mus be earned after all lower division requirements have been satisfied. If a student i approaching upper division standing, he may carry sufficient lower division units t complete the required minimum of 60 and carry upper division units for the remainde of his study load. Upper division credit will be allowed for such courses.

## Explanation of Requirements

### Examination Requirements in the United States Constitution and American History, Institutions, and Ideals

Each student of a State college to qualify for graduation shall demonstrat competence in the United States Constitution and American history, institutions an ideals, by passing satisfactorily a comprehensive examination on these fields prepare and administered by the college. Students transferring from other institutions o collegiate grade who have already met this requirement may have this examinatio waived.

This examination ordinarily will be held during the second semester of the junio year. The following courses are recommended to assist in the preparation for th examination: History 17A-17B, Political Science 101 or its substitute courses, an an upper or lower division course in American literature.

### Political Science 101

History 171A-171B or 172A-172B will be accepted as substitutes for thi requirement.

### Minor

Minors must be established in one of the following fields: anthropology, art, botany, chemistry, economics, education, English, foreign language, geography, geology, history, journalism, mathematics, music, philosophy, physics, political science, psychology, sociology, speech arts, and zoology.

A minor consists of at least 15 units of work completed in one of the above fields of study. At least nine of these units must be earned in upper division courses during junior or senior years. The entire requirement for a minor may be met with upper division courses provided these courses have no lower division prerequisites. Prerequisites for each course are listed among the course descriptions on pages 49 to 117.

### Minor in Education

A student who desires to satisfy the undergraduate requirements for the general secondary teaching credential will minor in education. He should include in his program a major in a subject or field of subjects usually taught in high school and a minor in the field of education. In order to conform to the usual university requirements, this minor should include Education 102A-102B (or Education 130, and Psychology 102), and Education 115A-115B. Consultation with the Dean of Education is recommended.

### Majors

The specific requirements for each major are listed at the beginning of each departmental division among the description of courses. (See pages 49 to 117.) The student is advised to choose his major as early in his college course as practicable so that he may be able to plan his work according to the major requirements. Failure to meet the lower division requirements of the major department before the junior year may make it impossible to satisfy the upper division requirements within the normal period of two years.

### Professional and Preprofessional Courses

See pages 23 to 47.

### The General Major

The general major of 36 upper division units must be chosen from three departments with not more than 15 units from any one department allowed. A minimum of a year course in each department must be completed in the lower division as foundation for upper division work in the general major. This comprehensive major may be arranged to include minor requirements.

The general major is planned for students who are preparing for law, journalism, library work, social work, or for any other vocation requiring a background of general training. It is available also to certain students who want a general education and who can present satisfactory reasons for not specializing in any field. When the general major is not a part of a four-year curriculum published in the college bulletin the tentative program of the student should be planned in consultation with the Dean of the Upper Division and approved, revised, or rejected by the chairmen of the departments represented in the major.

## BACHELOR OF ARTS DEGREE IN TEACHER EDUCATION

San Diego State College is authorized by the State of California to recommend students for the teaching credentials listed below. To be recommended, students must complete, or have completed, the A.B. Degree in one of the curricula offered for teachers.

| *The credential* | *Subjects and grades for which it is valid* |
|---|---|
| General Elementary | All grades through the eighth. |
| Kindergarten-Primary | Kindergarten through third. |
| General Junior High | All subjects in grades seven, eight and nine in all elementary or secondary schools. |
| Special Secondary in Art | Art in all grades of the public schools. |
| Special Secondary in Business Education | Business education subjects in all grades of the public schools. |
| Special Secondary in Music | Music in all grades of the public schools. |
| Special Secondary in Physical Education | Physical education in all grades of the public schools. |
| Special Secondary in Speech Arts | Speech in all grades of the public schools. |
| Administration in Elementary Education | Authorizes for certificate to administer and supervise elementary schools as superintendent, deputy superintendent, assistant superintendent, principal, supervisor, or curriculum coordinator in a county. |
| Supervision in Elementary Education | Authorizes for certificate to supervise or coordinate instruction in elementary schools in a county. |

For special bulletin in regard to the following two credentials, write to the Registrar.

| | |
|---|---|
| General Secondary | All subjects in the public schools in grade 7 and above. |
| Special Credential in Correction of Speech Defects | Correction of speech defects in the public schools. |

### Combination of Credentials

Students who seek more than one teaching credential must complete in full the curriculum for each, with only such exceptions as are indicated in the statement of requirements. For each credential in addition to one, at least 12 additional units must be earned. These 12 units may be taken in non-professional courses if all basic curriculum requirements have been satified.

A combination of the elementary school credential and the junior high school credential may be secured by completing the requirements for the elementary school credential and the following additional requirements:

(a) A teaching major
(b) Education 100B
(c) Three units of directed teaching, or equivalent, in a junior high school
(d) Education 115B
(e) A minimum total of 132 units

A candidate for either the general elementary credential or the kindergarten-primary credential may secure the other credential subsequently or concurrently by taking 12 additional units. Four of these units shall be in directed teaching (Education 116 at the new level and the remainder as prescribed by the Director of Elementary Education.

## Lower Division Requirements

Students in teacher education curricula shall complete the lower division requirements for the A.B. Degree as indicated on page 16. Additional pattern requirement are outlined under each specific curriculum on following pages.

High school work and examination equivalents will excuse a student from pattern requirements but will not give college credit for foreign language, science social science and piano.

## Upper Division Requirements

### Minimum Units

A minimum of 40 units in upper division courses must be completed; 30 of these shall be earned after all lower division requirements have been met.

### Credit Limitations

A maximum of 40 units of credit in any one subject matter field or in education courses may be applied toward the requirements of the A.B. Degree.

### Examination Requirement in the United States Constitution and American History, Institutions, and Ideals

Each student of a State college to qualify for graduation shall demonstrate competence in the United States Constitution and American history, institutions and ideals, by passing satisfactorily a comprehensive examination in these fields prepared and administered by the college. Students transferring from other institutions of collegiate grade who have already met this requirement may have this examination waived, except for students who are to receive a teaching credential. These students must have demonstrated competence by having successfully completed a course in the United States Constitution in a California institution of collegiate grade or by having passed in California an authorized examination in this field.

This examination ordinarily will be held during the second semester of the junior year. The following courses are recommended to assist in the preparation for the examination: History 17A-17B, Political Science 101 or its substitute courses, and an upper or lower division course in American literature.

### Preparation for Graduate Work

Students who take the A.B. Degree with a special credential and who contemplate doing graduate work for a master's degree in an academic field or for the general secondary credential, will find it advantageous to use their electives to provide a foundation for that work.

## Majors and Minors

All teaching curricula require one major and one minor.

Education shall be the major for the kindergarten-primary and general elementary school credentials. Its requirements are outlined under those curricula. It is recommended that the minor for these credentials be chosen from the academic fields of English, foreign language, mathematics, science or social science. A second minor, though not required, may be chosen from one of these fields or from art, music, physical education or speech arts. Students taking an elementary credential in combination with a special secondary credential may use the special major for their minor in elementary education.

## Teaching Major for Junior High School and Special Secondary School Credentials Defined

A teaching major for the junior high school credential consists of a minimum of 24 units of which a minimum of 18 units must be in the upper division. An average of C in scholarship is required in all upper division courses in the field of the teaching major. Teaching majors may be established in the following fields: English, foreign languages, general sciences, mathematics and social sciences (anthropology, economics, geography, history, political science, sociology). A teaching major in the special secondary credential curricula of art, business education, music, physical education, and speech arts ranges from 24 to 40 units, depending upon the curriculum.

*A Teaching Major in English* shall include English 1B and 9 elective units of ower division work and 18 units of upper division work. This credit must include units in American Literature (either lower or upper division) and 3 units in hakespeare. Recommended: English 13 and 192.

*A Teaching Major in General Science for the Junior High School Credential* hall include a minimum of 24 units, not less than 18 of which are upper division, ncluding a college year course in a biological science, a year course in high school or ollege physics and a concentration of 12 units, at least 6 of which are upper division, one major subject (botany, chemistry, physics, zoology). See definition of teaching ajors.

*A Teaching Major in Social Science* shall include a minimum of 24 units not ess than 18 of which are upper division, including a year course in modern American istory and a concentration of 12 units, at least 6 of which are upper division, in one ajor subject (anthropology, economics, geography, history, political science, sociology). See definition of teaching majors.

### Teaching Minor Defined

A teaching minor consists of 15 units in a given field, of which 9 or more must e in upper division courses. Teaching minors may be established in the following elds: art, business education, English, foreign language, general science, mathematics, usic, social sciences (anthropology, economics, geography, history, political science, ociology), physical education, and speech arts. (See requirement above for elementary school credentials).

### Teaching Minor in English

Candidates for the teaching minor in English must show credit in English 1B nd 3 elective units of lower division work; and in 9 elective units in upper division nglish. This credit must include 3 units in American literature, taken either in ower division or upper division. Credit in journalism and speech arts may not be sed to fulfill the requirements for the English minor. Recommended: English 13.

### Teaching Minor in Music

Candidates for the teaching minor in music are required to take music aptitude ests at the time the minor is chosen and to enroll in at least one music activity each emester. In special cases this requirement may be waived by permission of the aculty of the Music Department.

Applicants for music minors must maintain a grade average of C in all music ourses. All students must show credit for Music 1A or clear this requirement by xamination. Music 7A is required of all candidates for the elementary credential. n the lower division, with the proper regard for course sequences, 6 units may be hosen from the following courses: Music, 1A-1B-1C-1D, 2A, 3A, 4A-4B, 6A, 8A-8B, 6, 17, 18, Aesthetics 1A-1B. Nine units of upper division music are required, not nore than two of which may be selected for credit from the activity courses (Treble lef, orchestra, etc.).

### Teaching Minor in Physical Education

Women—Candidates for a teaching minor in physical education must show credit or 9 units in the lower division including the following courses: Physical Education A, 1B, 1C, 1D, 53, and 4½ units of electives. In the upper division not less than units must be chosen from Physical Education 153, 156A-156B, 161, 164 and 170. Students wishing to minor in Physical Education should have the advice of the Physical Education Department in selecting electives.

Men—Candidates for a teaching minor in physical education must show credit n the lower division for Physical Education 1A, 1B, 1C, 1D, 53, 72, and 2 units in ports and athletics. In the upper division, Physical Education 154, 156A-156B, 170, t least 1 unit in sports and athletics, as well as 2 units in Education 100B-PE are equired.

### Admission to Teacher Education

Students who expect to become teachers should apply for admission to teacher education during the first semester of the sophomore year. Students entering the ollege at the end of the sophomore year will apply at the beginning of the junior year. No courses in education may be taken until admission is granted; any exception to his rule must have the approval of the Dean of Education. *Admission to the college* does not guarantee that the student will be admitted to teacher education. The following requirements must be met for admission to teacher education curricula:

1. A satisfactory score in a college aptitude test taken at the college. (Se college calendar for dates of test.)
2. Evidence of satisfactory ability in arithmetic, handwriting, reading an spelling indicated by having passed the fundamentals test. (See colleg calendar for dates of test.)
3. Assurance of correct speech habits and voice control by having satisfactoril completed a course in corrective speech or by having passed a speech tes given by the college.
4. Assurance of physical fitness by having passed a prescribed examination give by one of the college physicians.
5. If the student is to be a candidate for one of the special secondary credentials he must furnish a recommendation from the chairman of that departmen stating that the student has ability and shows promise of teaching success i his field and that the department looks with favor upon his application.
6. The completion of the first two years or more of a given curriculum, or it equivalent, and of subsequent work with a grade point average of 1.2 o better. (See special bulletin for general secondary.)
7. The student needs also to be approved by an interviewing committee of th college faculty. In its evaluation the committee will consider the following factors established by the State Board of Education: intelligence, scholarship, professional aptitude, personality and character, speech and language usage, and many-sided interests.

## Transfer Students

Students who have completed two or more semesters of work in another college, upon transferring to San Diego State College, should make application for admission to teacher education as soon as they enroll in the college. It will be advantageous for transfer students to present themselves for the necessary tests given during the orientation period preceding enrollment in the college.

## Advanced Standing in Teacher Education

A minimum of 6 units in education in required at this college. The college requires an opportunity to pass upon the effectiveness of a candidate's teaching ability either through a course in directed teaching or by observation of teaching in the field.

After an interval of 5 years, courses in education are reevaluated and subject to deduction in credit, in light of such new requirements as may have been put into effect and changes in educational procedures. Students formerly in attendance will not be considered to be working in the curriculum until an evaluation and statement of credit has been secured from the Registrar's office. All courses taken either at this college or elsewhere must be approved by an official adviser in order to be credited toward meeting degree requirements.

# PROFESSIONAL AND PREPROFESSIONAL CURRICULA

Professional and preprofessional courses, ranging in length from two years to hree and four years of collegiate work, are offered. The following curricular outines meet typical requirements for admission to professional schools of law, medicine, entistry, nursing, pharmacy, optometry, social work, public service, agriculture, and ngineering. The student should modify these suggested outlines of study whenever he peculiar requirements of the professional school of his choice makes it seem dvisable for him to do so.

The degree curricula in liberal arts may be modified to include the course outlines vhich follow. For a complete statement of the requirements for the junior certificate nd the degree see page 18 and following pages.

## CURRICULA LEADING TO TEACHING CREDENTIALS

All candidates in teacher education curricula should observe carefully the requirenents for admission to teacher education and be prepared to meet them at the end of he sophomore year. Students in other colleges who contemplate transferring to San Diego State College should arrange their programs so as to meet the requirements of heir particular curriculum as early as possible. See college calendar for dates when he fundamentals test will be given. See page 21 in this bulletin for requirements for dmission to teacher education.

### A.B. Degree with General Elementary or Kindergarten-Primary Credential

One teaching minor is required. See page 20 for statement

| **Freshman Year** | *Units for General Elem.* | *Units for Kdg.-Primary* |
|---|---|---|
| *First Semester* | | |
| Art 6A, Design | 2 | 2 |
| Physical Science 1A, Introduction (if H. S. physics, substitute other science) | 3 | 3 |
| English 1A, 1AA, or 1B, Freshman English | 3 | 3 |
| Health Education 1 or 2 | 2 | 2 |
| Physical Education, Freshman Activities | ½ | ½ |
| Elective (advisable to start social science; see page 16 for requirement and also for natural science and minor) | 6 | 6 |
| *Second Semester* | | |
| Art 6B, Design | 2 | 2 |
| English 11, 12, 13, 14, 15 or 16 | 3 | 3 |
| Physical Science 1B (if H. S. chemistry, substitute) | 3 | 3 |
| Psychology 1A (or in Semester I) | 3 | 3 |
| Physical Education | ½ | ½ |
| Elective (social science or minor) | 3–5 | 3–5 |
| | 31—33 | |

| **Sophomore Year** | | |
|---|---|---|
| *First Semester* | | |
| Geography 1, Elements (natural science credit) | 3 | 3 |
| Music 1A, Musicianship—Fundamentals of Music | 3 | 3 |
| Art 61A, Crafts in Elementary Schools | 2 | 2 |
| Music 28A, Piano (or the equivalent by examination, but without credit. May be taken in junior year.) | - | 1 |
| Physical Education, Sophomore Activities | ½ | ½ |
| Biology 1, Survey of Biology (If no high school laboratory, take Biol. 10A-10B or Botany 2A) (Not required if H. S. biology in junior or senior year) | 3 | 3 |
| Electives (for social science, natural science or minor) | 3 | 3 |

(Prepare for examination in American history, institutions and ideals. History 17A-B and American Literature are recommended in freshman or sophomore year.)

*Second Semester*

| | Units for General Elem. | Units fo Kdg.-Primary |
|---|---|---|
| Geography 2, Regions (social science credit) | 3 | 3 |
| Music 7A, Music Materials for the Elementary School | 3 | 3 |
| P.E. 53, Physical Education in the Elementary School | 2½ | 2½ |
| Music 28B, Piano (or the equivalent by examination) | – | 1 |
| Speech Arts 1A, Fundamentals | – | 3 |
| Electives (complete social science, natural science or minor) | 6–9 | 4 |
| | 29—32 | |

**Junior Year**

Students transferring from another curriculum in lower division or from anothe college or junior college may interchange this semester with semester II of the senio year. (Forty units of upper division work are needed.) The Education Departmen will probably find it necessary to ask some students who have met all requirements t defer entering practicum until the second semester of the junior year in order to equat class size. Those who defer entering the practicum should use this semester to

1. Complete lower division requirements in art, music, Physical Education 53 natural science, social science and others as needed.
2. Complete minor requirements.
3. Meet requirement for American History and U. S. Constitution.
4. Elect Education 102A or B if needed.

*First Semester Practicum*

| | | | |
|---|---|---|---|
| Education 102A, Measurement in Education or Education 102B, Child Growth and Development | | 3 | 3 |
| Education 147, Education Practicum-Primary Level | | 12 | 12 |
| Health Education 151 | 2 | | |
| Methods in Primary Reading | 2 | | |
| Elementary School Methods, including Children's Literature | 2 | | |
| Elementary Music Education | 1 | | |
| Elementary Art Education | 1 | | |
| Mental Hygiene and Speech | 2 | | |
| Directed Teaching | 2 | | |

*Second Semester Practicum*

| | | | |
|---|---|---|---|
| Education 102A or 102B | | 3 | 3 |
| Education 148 | | 12 | 8 |
| Elementary Arithmetic Education | 2 | | |
| Elementary Social Studies and Science Ed., including materials of audio-visual instruction | 2 | | |
| Elementary Art Education | 1 | | |
| Elementary Music Education | 1 | | |
| Educational Psychology (learning process, including theory of audio-visual education) | 2 | | |
| Additional 4 units for General Elementary, but not Kindergarten-Primary | | | |
| Language Arts | 2 | | |
| Directed Teaching | 2 | | |
| Education 116, Directed Teaching, primary grades | | – | 3 |

**Senior Year**

*First Semester*

| | | |

| Electives (including minor) | 28 | 23 |
| Total | 120 | 120 |

### A.B. Degree With General Junior High School Credential

(See statements on page 20 about teaching majors and minors.) Students who expect to secure the Master of Arts Degree, or the general secondary credential, should complete 24 upper division units in the departmental major instead of the 18 upper division units required for this credential. See statement on page 19 regarding combinations of this with other credentials.

**Freshman Year**

| *First Semester* | *Units* |
|---|---|
| Biology 1 (see p. 17) | 3 |
| English 1A, or 1AA, or 1B | 3 |
| Geography 1, Elements (Natural Science) | 3 |
| Physical Education, Freshman Activities | ½ |
| Health Education 1 or 2, Health and Social Adjustment | 2 |
| Electives to meet Lower Division requirements | 3 |
| *Second Semester* | |
| Physical Science 1A or 1B (see p. 17) | 3 |
| English 13 | 3 |
| Geography 2, Regions (Social Science) | 3 |
| Physical Education, Freshman Activities | ½ |
| Electives to meet Lower Division requirements | 6 |
| | 30 |

**Sophomore Year**

| *First Semester* | |
|---|---|
| Physical Education, Sophomore Activities | ½ |
| Psychology 1A, General | 3 |
| *Second Semester* | |
| Physical Education, Sophomore Activities | ½ |
| *Either Semester* | |
| Social Sciences (see p. 17) | 3 |
| Laboratory Science (see p. 17) | 3–4 |
| Electives to meet Lower Division requirements | 22–23 |
| | 30 |

### Junior Year

## A.B. Degree With Special Secondary Credential in Art

This course leads to the A.B. Degree and to the Special Secondary Credential in Art which entitles the holder to teach art in senior high, junior high, and elementary schools.

### Lower Division

| | |
|---|---|
| Aesthetics 50, History and Appreciation of Art | 2 |
| Art A, Freehand Drawing and Perspective (or equivalent) | 2 |
| Art 6A-6B, Design | 4 |
| Art 14A, Lettering | 2 |
| Art 61A, 61B, Fine and Industrial Arts, Elementary Crafts | 4 |
| English (see p. 16) | 6 |
| Health Education 1 or 2, Health and Social Adjustment | 2 |
| Natural Sciences (see p. 17) | 9–12 |
| Physical Education, Freshman and Sophomore Activities | 2 |
| Psychology 1A, General | 3 |
| Social Sciences (see p. 17) | 9–12 |
| Electives, including additional art for major and courses for teaching minor | 9–15 |
| | 60 |

**Upper Division**

| | *Units* |
|---|---|
| Aesthetics 150, Appreciation and History of Art | 2 |
| Art 106A-106B, Printmaking | 4 |
| Art 112A-112B, Design and Composition | 4 |
| Art 116A, Advanced Painting | 2 |
| Art 152A (unless 52A was taken in lower division), Stage Design | 0–2 |
| Art 195, Home Decoration | 2 |
| Electives in U. D. Art | 3–5 |
| Education 115A, History and Philosophy of Education | 2 |
| Education 115B, Secondary Education | 3 |
| Education 102C, Psychology of Adolescence | 3 |
| Education 102D, Measurement in Secondary Education | 2 |
| Education 130, Educational Psychology | 2 |
| Education 100B-A, Methods in Art | 2 |
| Education 116, Directed Teaching (4 units in special field) | 6 |
| Education 119, Art in the Elementary School | 2 |
| Health Education 151 | 2 |
| Political Science 101, American Institutions (or substitute) | 2 |
| Electives, including additional art and teaching minor | 13–17 |
| | 60 |

**Summary**

| | |
|---|---|
| Aesthetics 50 and 150 | 4 |
| Art major | 40 |
| Education | 19 |
| English | 6 |
| Health Education 1 or 2 and 151 | 4 |
| Natural Sciences | 12 |
| Physical Education | 2 |
| Political Science 101 | 2 |
| Psychology 1A | 3 |
| Social Sciences | 12 |

| Education 163 | 2 |
| Education 165, Methods in Merchandising | 2 |
| Political Science 101, American Institutions (or substitute) | 2 |
| Minor | 9 |
| Examination in American History, U. S. Constitution, etc. (see p. 18). | |
| | 60 |

## A.B. Degree With Special Secondary Credential in Music

Students intending to become applicants for this credential must show evidence of musical ability, before entering the course. They must be able to play artistically upon the piano, music of the grade of the simpler *Songs Without Words* of Mendelssohn or else possess a corresponding degree of proficiency in voice or an orchestral instrument. No credit is given to music majors for the basic courses of Music 1A and Music 7A, but if a deficiency exists in the field of general musicianship, the student will be required to take either or both of these courses without credit.

All music majors are required to enroll in two musical activities each semester. In special cases this requirement may be waived by petition to the Music Department. All students are required to pass examinations in applied music in order to receive credit. No credit is allowed to majors in voice or orchestral instruments for any work in piano which is below the level of artistic hymn playing.

Applicants for the Special Secondary Credential in Music must maintain a grade average of C or better in music courses.

All students majoring in music are required to pass a comprehensive examination in this field during the senior year.

This course leads to the A.B. Degree with a Special Secondary Credential in Music which will authorize the holder to teach music in the elementary, junior and senior high schools of the State.

A maximum of 40 units in Music may be used toward the A.B. Degree. Of these 40 units a maximum of 3 may come from the field of musical activities: band, choir, chorus, glee clubs and orchestra.

### Freshman Year

| *First Semester* | |
|---|---|
| English 1A or 1B | 3 |
| Health Education 1 or 2, Health and Social Adjustment | 2 |
| Social Sciences (see p. 17) | 3 |

## Special Secondary Credential in Correction of Speech Defects

This credential is granted only to students who can verify two years of successful eaching experience and who hold a valid California teacher's certificate, credential or fe diploma of elementary or secondary school grade.

### .ower Division Requirements

| | |
|---|---|
| Psychology 1A, General Psychology | 3 |
| Speech Arts 1A, Fundamentals of Public Speaking | 3 |
| Speech Arts 1C, Oral Interpretation | 3 |
| Elective in lower division Speech Arts | 6 |

### Jpper Division Requirements

| | |
|---|---|
| Speech Arts 150, Phonetics | 3 |
| Psychology 118, Mental Hygiene | 3 |
| Education 179A-B, Nervous Speech Disorders | 6 |
| Speech Arts 212, Articulatory Disorders | 3 |
| Education 316, Directed Teaching | 4 |

## PRE-AGRICULTURAL CURRICULA

The high school program should include the following subjects: elementa algebra 1 unit; plane geometry, 1 unit; algebraic theory, 1 unit; trigonometry, ½ un chemistry, 1 unit; physics, 1 unit; mechanical drawing, 1 unit; foreign langua 3 units in one language.

Students should ascertain the lower division requirements of the agricultu college they expect to enter.

The following arrangement of courses is recommended:

### Curriculum in Plant Science

**Freshman Year**

| | *Units* |
|---|---|
| Physical Education | ½ |
| Health Education 1 or 2 | 2 |
| Chemistry 1A-1B | 5 |
| Botany 2A-2B | 4 |
| Physics 2A-2B | 3 |
| Elective (Foreign language if not completed in high school) | 2 |
| | 16½ |

**Sophomore Year**

| | |
|---|---|
| Physical Education | ½ |
| Economics 1A-1B | 3 |
| Chemistry 7-8 | 3 |
| Geology 1A or 2A | 3 |
| Bacteriology 1 | -- |
| Zoology 1A | 4 |
| Elective (Foreign language if not completed in high school) | 3 |
| | 16½ |

### Curriculum in Animal Science

**Freshman Year**

| | |
|---|---|
| Physical Education | ½ |
| Health Education 1 or 2 | 2 |
| Chemistry 1A-1B | 5 |
| Zoology 1A-1B | 4 |
| Physics 2A-2B | 3 |
| Geology 2B | -- |
| Elective | 2 |
| | 16½ |

**Sophomore Year**

| | |
|---|---|
| Physical Education | ½ |
| Economics 1A-1B | 3 |
| Chemistry 7-8 | 3 |
| Bacteriology 1 | 4 |
| Botany 2A | 4 |
| Zoology 100 | -- |
| Zoology 20 or 8 | -- |
| Elective | 2 |
| | 16½ |

## PRE-DENTAL CURRICULUM

Candidates for a degree in dentistry should ascertain the entrance requirements of the dental college to which they expect to transfer and should make whatever changes in the following typical requirements that may seem desirable in satisfying the requirements of the dental college.

The high school program should include the following subjects: elementary algebra, 1 unit; plane geometry, 1 unit; chemistry, 1 unit; physics, 1 unit; foreign language, 3 units in one language.

The following arrangement of courses is recommended:

| **Freshman Year** | *Units* | |
|---|---|---|
| Physical Education | ½ | ½ |
| Health Education 1 or 2 | -- | 2 |
| Chemistry 1A-1B | 5 | 5 |
| Physics 2A-2B | 3 | 3 |
| English | 3 | 3 |
| Psychology 1A | 3 | -- |
| Foreign language (if needed to complete requirement) | 0–5 | 0–5 |
| Elective | 0–2 | 0–2 |
| | 16½ | 15½ |

| **Sophomore Year** | | |
|---|---|---|
| Physical Education | ½ | ½ |
| Chemistry 7-8 | 3 | 3 |
| Zoology 1A-1B | 4 | 4 |
| Social Science Year Course | 3 | 3 |
| Elective | 5 | 6 |
| | 15½ | 16½ |

## PRE-ENGINEERING CURRICULUM

This curriculum is intended for students planning an intensive specialization i particular branches of engineering.

The high school program should include the following subjects: elementar algebra, 1 unit; plane geometry, 1 unit; algebraic theory, 1 unit; solid geometry, ½ unit trigonometry, ½ unit; chemistry, 1 unit; physics, 1 unit; mechanical drawing, 1 unit

Students should ascertain the requirements of the engineering college they expec to enter.

### Mechanical, Electrical, Civil and Mining Engineering

**Freshman Year**

| | *Units* | |
|---|---|---|
| Mathematics 3A-3B | 3 | 3 |
| Chemistry 1A-1B | 5 | 5 |
| Physics 1A-1B | 3 | 3 |
| Physical Education | ½ | |
| Health Education 1 or 2 | -- | 2 |
| *Geology 1A or elective | 4 | -- |
| Elective | -- | 3 |
| | 15½ | 16 |

### Mechanical and Electrical Engineering

**Sophomore Year**

| | | |
|---|---|---|
| Engineering 1A | 3 | -- |
| Engineering 21 | 3 | -- |
| Engineering 22 | -- | 3 |
| Engineering 23 | -- | 2 |
| Mathematics 4A-4B | 3 | 3 |
| Mathematics 118 or 119 | -- | 3 |
| Physics 1C-1D | 3 | 3 |
| Physical Education | ½ | |
| Elective | 3 | 2 |
| | 15½ | 16 |

### Civil Engineering

**Sophomore Year**

| | | |
|---|---|---|
| Astronomy 3 | -- | 2 |
| Engineering 1A-1B | 3 | 3 |
| Engineering 21 | 3 | -- |
| Engineering 23 | -- | 2 |
| Mathematics 4A-4B | 3 | 3 |
| Physics 1C-1D | 3 | 3 |
| Physical Education | ½ | ½ |
| Elective | 3 | 3 |

---

* Geology 1A is required in the civil engineering curriculum.

## CURRICULUM IN GENERAL ENGINEERING

A four-year curriculum is available at San Diego State College leading to the A.B. Degree in General Engineering. The curriculum is designed to provide the student with the fundamentals of an engineering and technical education without intensive specialization. It is planned to provide considerable elective opportunities, which will enable the student to adapt the program to his particular needs, with emphasis on one branch of engineering training, science, or business.

All students with aptitude for professional engineering and the financial means are urged to complete the requirements for the degree in mechanical, electrical, or civil engineering in our State university or at some other institution having a standard engineering school. There is, however, an increasing need for college graduates in fields of engineering, engineering science, or business engineering, where an intensive specialized training is not necessary. Students with training in a general engineering curriculum may easily adapt their programs to provide preparation for work in various engineering fields, as the electrical, heating and ventilation, public utility, telephone, and aeronautical industries among many others. Preparation is also available for work in chemical engineering, engineering physics, and engineering economics. Students may also use this curriculum as an undergraduate preparation for additional work in certain graduate engineering colleges. Students who desire to prepare for teaching of engineering and allied subjects in the secondary schools and the junior colleges may use this curriculum, along with certain courses in education, to satisfy the undergraduate requirements for the general secondary credential.

The curriculum is not a specialized sequence of course work in specific engineering fields. If such specialized training is desired in the engineering fields, transfer to various colleges offering such work is recommended after completion of the lower division.

The high school program should include the following subjects: elementary algebra, 1 unit; plane geometry, 1 unit; algebraic theory, 1 unit; solid geometry, ½ unit; trigonometry, ½ unit; chemistry, 1 unit; physics, 1 unit; mechanical drawing, 1 unit.

### Lower Division

All college requirements for the A.B. Degree must be met except foreign language. (See p. 16.)

| **Freshman Year** | *Units* |
|---|---|
| Chemistry 1A-1B | 10 |
| Physics 1A-1B | 6 |
| Mathematics 3A-3B | 6 |
| English Composition | 3 |
| Health Education 1 or 2 | 2 |
| Physical Education | 1 |
| Psychology 1A | 3 |
| Biology 1 (or equivalent) | 3 |
| | 34 |

| **Sophomore Year** | |
|---|---|
| English | 3 |
| Physics 1C-1D | 6 |
| Mathematics 4A-4B | 6 |
| Electives chosen from the following | 9 |
| Engineering 1A-1B | |
| Engineering 21 | |
| Engineering 22 | |
| Geology 1A | |
| Chemistry 7-8 | |
| Social Science | 6 |
| Physical Education | 1 |
| | 31 |

### Upper Division

During the first semester of his junior year the student must prepare and subm for approval of his advisors a tentative program for the remainder of his undergraduat work.

Political Science 101 (or equivalent).

Examination in American History, U. S. Constitution, etc. (see p. 18).

Complete the following major in general engineering: a total of 36 upper divisio coordinated units in three departments chosen from the following list (not more tha 15 units may be chosen from one department).

The organization of the program of each major student must follow a definit plan approved by the proper advisors. Additional courses will be added from time t time. Required of all students (20 units):

| | *Unit* |
|---|---|
| Engineering 100A-100B, Electrical Engineering | 6 |
| Engineering 105, Hydraulics | 3 |
| Engineering 123, Materials of Engineering Construction | 2 |
| Engineering 128, Heat Power Engineering | 3 |
| Physics 105A-105B, Analytical Mechanics | 6 |
| Electives: 16 units, of which at least 6 units must be chosen from one of the following departments: chemistry, geology, astronomy, mathematics, or economics. | |
| Chemistry 110A-110B, Physical | 6 |
| Chemistry 105A, Quantitative Analysis | 3 |
| Chemistry 112A-112B, Industrial Chemistry | 6 |
| Chemistry 144, Industrial Analysis | 3 |
| Physics 110A, Advanced Electricity | 3 |
| Physics 110B, Electromagnetism-electronics | 3 |
| Physics 107A-107B, Electrical Measurements | 2 |
| Physics 108, Modern Physics | 3 |
| Physics 112, Advanced Heat-Thermodynamics | 3 |
| Physics 112L, Heat-Pyrometry Lab. | 1 |
| Physics 114, Acoustics | 3 |
| Geology 100, Structural Geology | 3 |
| Geology 101, Problems in Geology | 4 |
| Astronomy 100, Navigation-Astronomy | 3 |
| Astronomy 107, Least Squares | 3 |
| Mathematics 118, Advanced Calculus | 3 |
| Mathematics 119, Differential Equations | 3 |
| Mathematics 124, Vector Analysis | 3 |
| Mathematics 140, Probability-Statistics | 3 |
| Economics 107, Credit and Credit Institutions | 3 |
| Economics 121, Business Administration | 3 |
| Economics 123, Principles of Marketing | 3 |
| Economics 131, Public Finance and Taxation | 3 |
| Economics 133, Corporation Finance | 3 |
| Economics 135, Money and Banking | 3 |
| Economics 140, Statistical Methods | 3 |
| Economics 150, Labor Problems and Industrial Relations | 4 |
| Economics 171, Transportation | 3 |
| Industrial Economics | 3 |
| (Economics 14A-14B recommended) | |

A student who desires to satisfy the undergraduate requirements for the general secondary teaching credential should include in his upper division work, in addition to the engineering major, certain courses in education which will partially satisfy the credential requirements. In order to conform to the usual university requirements this work should be chosen from Education 102C-102D and Education 115A-115B. Consultation with the Dean of Education is recommended.

## PRE-FORESTRY CURRICULUM

### Freshman Year

| | *Units* | |
|---|---|---|
| ysical Education | ½ | ½ |
| emistry 1A-1B | 5 | 5 |
| tany 2A-2B | 4 | 4 |
| glish 1B and 11or 12, 13, 14, 15, 16 | 3 | 3 |
| thematics 3A-3B | 3 | 3 |
| | 15½ | 15½ |

### Sophomore Year

| | | |
|---|---|---|
| ysical Education | ½ | ½ |
| ysics 2A-2B, 3A-3B | 4 | 4 |
| gineering 1A-1B | 3 | 3 |
| onomics 1A-1B | 3 | 3 |
| ology 2A | 3 | -- |
| alth Education 1 or 2 | -- | 2 |
| emistry 7 | 3 | -- |
| ective | -- | 4 |
| | 16½ | 16½ |

## PRE LEGAL CURRICULUM

*The entrance requirements of law colleges range from two years to three and fo years of pre-legal work. The lower division requirements of the liberal arts curricu should be met in full whether the curriculum extends over a period of two, three, four years.*

The following curriculum meets the recommendations of standard American la colleges for a broad and liberal education in those fields of human knowledge common involved in human affairs and those which have cultural and disciplinary values. F the majority of pre-legal students a general major with concentration in economic as provided for in the following curriculum, furnishes the most effective preparati for later professional study in law and for later activities in the field of busines However, for some students a major, or at least strong minors, in English, history, political science, may provide a suitable preparation.

The high school program should include the following subjects: elementa algebra, 1 unit; plane geometry, 1 unit; intermediate algebra, 1 unit; foreign languag 3 units in one language or 2 units in each of two languages.

Following is a recommended arrangement of courses:

### Freshman Year

| | Units | |
|---|---|---|
| Physical Education | ½ | |
| Health Education 1 or 2 | -- | |
| Foreign Languages (if needed to complete requirement) | 0–5 | 0– |
| Natural Science (see lower division requirements) | 3–5 | 3– |
| English | 3 | |
| Economics 14A-14B | 3 | |
| Psychology 1A | 3 | |
| Elective | 0–3 | 0– |
| | 15½ | 1 |

### Sophomore Year

| | | |
|---|---|---|
| Physical Education | ½ | |
| Additional Natural Science (if needed to meet requirement) | 3 | |
| Economics 1A-1B | 3 | |
| Philosophy 3A-3B, 5A-5B, or Mathematics 3A-3B | 3 | |
| Political Science 1A-1B or 71A-71B | 3 | |
| Elective | 3 | |
| | 15½ | 1 |

### Junior Year

| | | |
|---|---|---|
| Economics 121 | 3 | |
| Economics 133 | 3 | |
| Economics Elective | -- | |
| History 151A-151B or 175A-175B | 3 | |
| Political Science 111 and 113 or 143A-143B | 3 | |
| Sociology 105, 106 | 3 | |
| Elective (see upper division requirements) | 3 | |
| Examination in American History, U. S. Constitution, etc. (see p. 18) | | |
| | 15 | 1 |

### Senior Year

| | | |
|---|---|---|
| Economics 100A | 3 | |
| Economics Electives | -- | |
| History 111A-111B or 121A-121B | 3 | |
| Political Science 175A-175B | 3 | |
| Elective | 6 | |
| | 15 | 1 |

## PRE-MEDICAL CURRICULUM

The entrance requirements of medical colleges ordinarily range from three to four years of pre-medical work. The lower division requirements of the liberal arts curricula include the general requirements of standard medical colleges and should therefore be met in full whether the curriculum extends over a period of three or of four years. All plans for pre-medical work should include an arrangement of courses to meet the requirements of the medical college which the student expects to enter.

A student who is pursuing a four-year pre-medical curriculum should major in chemistry or zoology in his junior and senior years, and must meet all upper division requirements for the A.B. Degree in the liberal arts curricula.

The high school program should include the following subjects: elementary algebra, 1 unit; plane geometry, 1 unit; chemistry, 1 unit; physics, 1 unit; French or German, 3 units. Two units of Latin are recommended.

Following is a recommended arrangement of courses:

### Freshman Year

| | *Units* | |
|---|---|---|
| Physical Education | ½ | ½ |
| Health Education 1 or 2 | 2 | -- |
| Chemistry 1A-1B | 5 | 5 |
| English 1A or 1B, and 11, 12, 13, 14, 15, or 16 | 3 | 3 |
| French or German (if needed to meet requirement) | 0–5 | 0–5 |
| Elective | 0–5 | 0–8 |
| | 15½ | 16½ |

### Sophomore Year

| | | |
|---|---|---|
| Physical Education | ½ | ½ |
| Zoology 1A-1B | 4 | 4 |
| Psychology 1A | 3 | -- |
| Chemistry 7-8 | 3 | 3 |
| Social Science | 3 | 3 |
| Elective | 3 | 6 |
| | 16½ | 16½ |

### Junior Year

| | | |
|---|---|---|
| Political Science 101 | 2 | -- |
| Physics 2A-2B | 3 | 3 |
| Physics 3A-3B | 1 | 1 |
| Chemistry 105 | 3 | -- |
| Zoology 100 | -- | 4 |
| Zoology 100D | -- | 1 |
| Zoology 106 | 4 | -- |
| Electives | 2 | 6 |
| Examination in American History, U. S. Constitution, etc. (see p. 18) | | |
| | 15 | 15 |

### Senior Year

| | | |
|---|---|---|
| Upper division requirements and electives for the major, the minors and the degree (see page 18) | 15 | 15 |
| | 15 | 15 |

## PRE-NURSING CURRICULUM

A student who plans to complete a curriculum in nursing leading to a degree and a certificate in nursing in another collegiate institution should ascertain the lower division (junior certificate) requirements of that institution.

The high school program should include the following subjects: elementary algebra, 1 unit; plane geometry, 1 unit; chemistry, 1 unit; physics, 1 unit; French or German, 3 units; domestic science (foods), 1 unit; 2 units of Latin are recommended. The following is a recommended arrangement of courses:

### Freshman Year

| | *Units* | |
|---|---|---|
| Physical Education | ½ | ½ |
| Health Education | -- | 2 |
| Biology A | -- | 1 |
| Chemistry 2A-2B | 3 | 3 |
| Psychology 1A | 3 | -- |
| English 1A or 1B and 11, 12, 13, 14, 15, or 16 | 3 | 3 |
| French or German (if needed to complete requirement | 0–5 | 0–5 |
| Elective | 0–6 | 0–7 |
| | 15½ | 16½ |

### Sophomore Year

| | | |
|---|---|---|
| Physical Education | ½ | ½ |
| Psychology 1B | 3 | -- |
| Economics 1A-1B | 3 | 3 |
| Bacteriology 1 | 4 | -- |
| Physiology 1A, 1C | -- | 5 |
| Zoology 8 | 3 | -- |
| Elective | 3 | 7 |
| | 16½ | 15½ |

## PRE-OPTOMETRY

The high school program should include the following subjects: elementary algebra, 1 unit; plane geometry, 1 unit; algebraic theory, 1 unit; trigonometry, ½-unit; physics, 1 unit; chemistry, 1 unit; foreign language, 3 units.

The following curriculum prepares for junior standing in university schools of optometry:[1]

### Freshman Year

| | Units | |
|---|---|---|
| Physical Education | ½ | ½ |
| Health Education 1 or 2 | 2 | -- |
| Foreign Language (if needed to complete requirements) | 3 | 3 |
| Physics 2A-2B | 3 | 3 |
| Physics 3A-3B | 1 | 1 |
| Psychology 1A | 3 | -- |
| Speech Arts 1A-1B | 3 | 3 |
| Elective | -- | 6 |
| | 15½ | 16½ |

### Sophomore Year

| | | |
|---|---|---|
| Physical Education | ½ | ½ |
| Chemistry 1A-1B | 5 | 5 |
| Mathematics 3A | 3 | -- |
| Social Science | 3 | 3 |
| Physiology 1A and 1C | -- | 5 |
| Elective | 4 | 3 |
| | 15½ | 16½ |

---

[1] Student should consult catalogue of school he plans to attend.

## SOCIAL WORK

The professional curriculum in social service prepares for admission to graduate work in recognized American schools of social work. This curriculum should be pursued by those who plan careers in Federal, State and local welfare work; social work in public schools including preparation for a teaching credential; family and children's private case work agencies; social settlement work; county probation work; child welfare agencies; statistical and investigational work in private and public agencies; work in public institutions for the defective and delinquent; medical social service and psychiatric social work in hospitals and clinics; executive positions in social work; and social work in numerous other organizations.

The lower division requirements of the liberal arts curricula include the general requirements of recognized professional schools of social work and should therefore ordinarily be met in full. However, a student who has definitely decided not to become a candidate for a degree in San Diego State College may substitute the lower division requirements of the institution to which he expects to transfer wherever the requirements differ.

A student who pursues a four-year curriculum in San Diego State College should major in social science and minor in psychology.

The following subjects should be completed in high school: elementary algebra, 1 unit; plane geometry, 1 unit; algebraic theory, 1 unit; foreign language, 3 units in one language.

Following is the required arrangement of courses:

| Freshman Year | *Units* | |
|---|---|---|
| Physical Education | ½ | ½ |
| Health Education 1 or 2 | -- | 2 |
| Biology 10A-10B | 3 | 3 |
| Foreign Language (if needed to complete requirement) | 0–5 | 0–5 |
| Psychology 1A | 3 | -- |
| Speech Arts 1A-1B or English elective | 3 | 3 |
| Elective | 1–6 | 2–7 |
| | 15½ | 15½ |

| Sophomore Year | | |
|---|---|---|
| Physical Education | ½ | ½ |
| Economics 1A-1B | 3 | 3 |
| Political Science 1A-1B or 71A-71B | 3 | 3 |
| Additional Natural Science (if needed to meet requirement) | 3 | -- |
| Sociology 50A | 3 | -- |
| Sociology 50B | -- | 3 |
| Elective | 3 | 6 |
| | 15½ | 15½ |

| Junior Year | | |
|---|---|---|
| Economics 100B or 131 or 150 | -- | 3 |
| Sociology 105 | 3 | -- |
| Sociology 109 | -- | 3 |
| Psychology 150 | 3 | -- |
| Psychology 151 | -- | 3 |
| Zoology 114A | 2 | -- |
| Political Science 101 | 2 | -- |
| Elective | 5 | 6 |
| Examination in American History, U. S. Constitution, etc. (see p. 18) | | |
| | 15 | 15 |

| Senior Year | | |
|---|---|---|
| Economics 140 | 3 | -- |
| Sociology 197 | 3 | -- |
| Sociology Elective | -- | 3 |
| Psychology 145 | 3 | -- |
| Political Science 143A-143B or restricted elective | 3 | 3 |
| Elective | 3 | 9 |
| | 15 | 15 |

## PRE-VETERINARY CURRICULUM

Most colleges of veterinary medicine require but one year (32 units) of pre-veterinary college work. There are a few colleges which require two years and it is best to consult the bulletin of the college to which admission is desired for special requirements. The year of pre-veterinary work should include:

| | *Units* | |
|---|---|---|
| Physical Education | ½ | ½ |
| Chemistry 1A-1B | 5 | 5 |
| Zoology 1A-1B | 4 | 4 |

Recommended: Botany 2A-2B, a year course of some social science, Psychology 1A.

## PUBLIC ADMINISTRATION

As the vocational demand for students of public administration is comparativel limited, the student of public administration will do well to prepare himself also fo a related field of work for which there is not only a cultural but also a vocationa demand. The candidate for a public administrative position who is equipped for career in a professional, scientific or technical field that is common to both public an private enterprise has a distinct advantage. The special courses in public administration listed in the following curriculum are supplementary courses designed for exploration and orientation. The curriculum as a whole provides for a major in economics outlines a general preparation for the public service in social science fields and furnishe a basis for more highly specialized graduate courses in the field of public administration

The high school program should include the following subjects: elementary algebra, 1 unit; plane geometry, 1 unit; intermediate algebra, 1 unit; foreign language 3 units in one language.

The following arrangement of courses is recommended:

### Freshman Year

| | *Units* | |
|---|---|---|
| Physical Education | ½ | |
| Health Education 1 or 2 | -- | 2 |
| English | -- | 3 |
| Foreign Language (if needed to complete requirements) | 0–5 | 0–5 |
| Psychology 1A | 3 | -- |
| Natural Science | 3–5 | 3–5 |
| Economics 14A-14B | 3 | 3 |
| Elective | 0–5 | 0–4 |
| | 16½ | 15 |

### Sophomore Year

| | | |
|---|---|---|
| English | 3 | -- |
| Physical Education | ½ | |
| Additional Natural Science (if needed to meet requirements) | -- | 3 |
| Economics 1A-1B | 3 | 3 |
| Political Science 1A-1B or 71A-71B | 3 | 3 |
| Elective | 7 | 6 |
| | 16½ | 15 |

### Junior Year

| | | |
|---|---|---|
| Economics 100A | 3 | -- |
| Economics 140 | 3 | -- |
| Economics 100B | -- | 3 |
| Economics 131 | -- | 3 |
| Political Science 175A-175B | 3 | 3 |
| Elective | 6 | 6 |
| Examination in American History, U. S. Constitution, etc. (see p. 18) | | |
| | 15 | 15 |

### Senior Year

| | | |
|---|---|---|
| Economics 150 | -- | 3 |
| Economics 107, 133, 135, 171 | 3 | -- |
| Economics electives | 3 | 3 |
| Political Science 143A-143B | 3 | 3 |
| Elective | 6 | 6 |
| | 15 | 15 |

## INTER-AMERICAN RELATIONS

The purpose of this curriculum is (1) to furnish a basis for a more intelligent and effective understanding of the opportunities and problems of international relations in the western hemisphere; (2) to provide facilities for a basic education and training for a business or professional career which involves international relations.

Competition for opportunities of service in international affairs is severe. The student who plans a career in this field should therefore organize his electives to provide for a concentration in some area of work in which there are greater vocational opportunities. Preparation for employment as a foreign representative of an American business organization implies concentration in economics. The student who pursues this curriculum as a guide for training for the foreign service in consular, vice consular, secretarial, and other public offices should include additional courses in foreign language, history, political science, geography, and economics to furnish more effective preparation for the comprehensive competitive examinations required for appointment to the Service and for entrance to the Foreign Officers Training School at Washington, D. C.

The proper faculty adviser should be consulted for revisions and additions to this curriculum to meet individual needs and objectives.

The high school program should include the following subjects: algebra, 1 unit; plane geometry, 1 unit; intermediate algebra, 1 unit; foreign language, 3 units in one language.

The following arrangement of courses is recommended:

### Freshman Year

| | *Units* | |
|---|---|---|
| Physical Education | ½ | ½ |
| Health Education 1 or 2 | 2 | -- |
| English | 3 | 3 |
| Spanish | 0–5 | 0–5 |
| Natural Science | 3–5 | 3–5 |
| History 8A-8B | 3 | 3 |
| Psychology 1A | -- | 3 |
| Elective | 4–8 | 0–3 |
| | 15½ | 15½ |

### Sophomore Year

| | | |
|---|---|---|
| Physical Education | ½ | ½ |
| Additional Natural Science (if needed to meet requirements) | 0–3 | -- |
| Economics 1A-1B | 3 | 3 |
| Political Science 1A-1B or 71A-71B | 3 | 3 |
| Geography 1 | 3 | -- |

# COURSES OF INSTRUCTION

Figures in parentheses indicate the unit value of the course.

Courses numbered from 1 to 99 are lower division (freshman or sophomore) courses; those numbered 100 and above are upper division (junior or senior) courses.

Freshmen are not admitted into upper division courses.

A sophomore may enroll in an upper division course for lower division credit provided he has earned an average grade of not less than 1.5 in all college work undertaken, and provided he receives the instructor's permission to enroll in the course. A second semester sophomore may enroll in an upper division course for upper division credit without the foregoing grade limitations provided the units earned in the upper division course or courses are in excess of the 60 units required in the lower division.

One "unit" represents an hour recitation or lecture, together with the required preparation, or three hours laboratory work each week for a semester of 18 weeks.

The semester in which courses are offered is designated as follows: (1) Fall; (2) Spring; (3) Fall and Spring; (4) Year course, beginning either Fall or Spring; (5) Year course. Courses designated as "Year course" begin in the Fall, but those given in the list below may be taken in the reverse order (i.e., the second semester of the course may be taken before the first semester) or the second semester may be taken alone. In the case of other year courses, students who have completed the equivalent of the first semester's work may seek permission from the instructor to take the second half of the course.

Speech Arts 156A-156B

Although the college fully expects to carry out the arrangements planned in the list of courses, it reserves the right to make changes. Classes in which the enrollment does not come up to the minimum number set by the State Department of Education may not be offered or may be postponed.

# DIVISION OF EDUCATION

## EDUCATION

### Upper Division Courses

### 100B Methods and Materials of Instruction

A series of professional methods courses in major and minor teaching fields. Each course carries two units of credit and must be taken prior to, or concurrently with directed teaching.

Subject sections in 100B are as follows:

| | *Semester offered* |
|---|---|
| Ed. 100B-A, Methods in Art | Both |
| Ed. 100B-B, Methods of Accounting | Fall |
| Ed. 100B-BE, Objectives and Curricula in Business Education | Spring |
| Ed. 100B-E, Methods in English | Spring |
| Ed. 100B-L, Romance Language Methods | Spring |
| Ed. 100B-MA, Mathematics | Fall |
| Ed. 100B-MU, Methods in Music | Fall |
| Ed. 100B-PE, Methods in Phys. Ed. (Men) | Both |
| Ed. 100B-PE, Methods in Phys. Ed. (Women) | Both |
| Ed. 100B-SC, Methods in Science | Spring |
| Ed. 100B-SA, Methods in Speech Arts | Fall |
| Ed. 100B-S.SC, Methods in Social Sci. | Fall |

### 102A. Measurement and Evaluation in Elementary Education

A course required of all students preparing for an elementary teaching credential. It deals with the use of tests in the diagnosis and improvement of learning; construction of objective examinations; problems of evaluation in education; and the elements of statistical techniques. Fall and Spring (3)

### 102B. Child Growth and Development

The course deals with a study of the mental, emotional, social, and physical development during childhood and early adolescence.

Directed observation required. Students who have credit in Psychology 102A or 102B will receive only half credit for this course. Fall and Spring (3)

### 102C. Psychology of Adolescence

Experience and instruction organized around a study of the adolescent in today's society. The course deals with the adolescent's physiological, psychological, social, and emotional development as important determinants of the educational program. To be taken during the junior year. (3)

### 102D. Measurement and Evaluation in Secondary Education

The course deals with the use of educational and psychological tests in the diagnosis of difficulties and improvement in learning; problems of evaluation in education; construction of objective examinations; and the elements of statistical techniques. (2)

### 103. Federal, State, and County School Organization, and Administration

A study of support, control, and agencies representative of each of these governmental units, with particular attention to the functions of the State and county in the educational program of California. Designed to meet the requirement as prescribed for the elementary school administration credential. (3)

### 109B. Educational Administration and Supervision Field Work

Individual field work as required for the administration credential. By arrangement with the Dean of Education. (3)

### 110. Educational Organization and Supervision

Types of supervision and methods of evaluating and improving teaching. Prerequisites: Graduation from college with a teaching credential or two or more years of teaching experience. (3)

### 115A. History and Philosophy of Education

Historical backgrounds and underlying philosophies upon which the moder public school system has been established. The content covers such problems as th meaning of education, educational aims and values, and democracy and education Prerequisite: Senior standing or the equivalent. Fall and Spring (2)

### 115B. Secondary Education

The role of the teacher in secondary education; methods, materials, and directe observation of classroom teaching and management; trends in the organization an development of the secondary school curriculum. To be taken during the junio year. Fall and Spring (2)

### 116. Directed Teaching

Systematic observation, participation and teaching under supervision in th campus elementary school, the affiliated elementary, junior high and senior hig schools. During the first semester of directed teaching in the secondary schools a weekly conference period is required as indicated in the time schedule.

The general plan is for elementary school credential candidates to take, i addition to the education practicums, a half-day of teaching daily in the campus elementary school or two and one-half hours daily in one of the affiliated elementar schools throughout one semester. Junior high school and special secondary schoo credential candidates will be guided by their adviser relative to the distribution of thei directed teaching. For those seeking a combination of credentials, the requirement for each teaching level must be satisfied. Further information regarding this requirement should be requested of the Dean of Education when the student first register for directed teaching.

Thirty clock hours of directed teaching will usually carry one unit of credit in th course, but the final amount of credit allowed will depend upon the character an quality of the teaching done by the student. Directed teaching requirements may b reduced for those who furnish evidence of successful public school experience.

The maximum amount of credit allowed for directed teaching is twelve units.

The universities usually reduce the amount of directed teaching credit they wil allow to four units. Students planning to transfer to such institutions should b prepared to meet this reduction with an equal number of acceptable units in othe courses.

No grade below a C is acceptable for credit in directed teaching.

Prerequisites: Completion of 75 units of college work; admission to teache education; a C average in all college work and in the work of the preceding semester three units of work in psychology; a minimum of one semester's work in this college No credit will be given unless the student registers in advance for this course in th office of the Dean of Education.

### 117A. Elementary Music Education

Main objectives of music teaching in the public elementary schools. Study o the child voice. Organization of song material by grades. Procedure in presentin rote songs, ear training, elementary notation, music reading, and part singing. Conducting. Not open to students taking the elementary credential, nor to freshmen Prerequisite: Music 1A, or the equivalent. Fall and Spring (2)

### 117B. Methods in Instrumental Music

A study of the theory of problems or organizing and conducting school band and orchestras, and the selection of materials. Provides practical experience in conducting a children's orchestra and teaching sectional groups. A study of systemati planning of courses of study for pupils of various ages and abilities will be made. (2)

### 119. Art in the Elementary School

Discussion of the elements and principles of art and their place in the art expression and appreciation of the elementary school child. Lectures illustrated wit examples of children's work and opportunity given for experience with mediums use in elementary school problems. Not open to students taking the elementary credential. Prerequisite: Art 6A. Fall and Spring (2)

### 122. Social Studies in the Elementary School

A study of the nature and purpose, scope, organization and instructional procedures in the social studies in the elementary school. Opportunity will be given fo the construction of curriculum units and the analysis of teaching materials. (2)

**127. Secondary Music Education (See Education 100B)**

Main objectives of music teaching in the public secondary schools. Organization of the chorus and glee clubs, voice testing, seating, a survey of song materials available. Organization of courses in applied music, harmony, history and appreciation. (2)

**129. Arithmetic in Elementary Education**

A course for teachers of arithmetic in the elementary and junior high school. Emphasis is placed upon the understanding of the systems of notation and language techniques. Assistance given to constructing instructional materials and procedures. (2)

**130. Educational Psychology**

A study of the science of human behavior as it relates to learning. Emphasis is given to the principles of learning and maturation of the organism. Special aspects treated are the growth of meanings, thinking, memory and habit formation, motivation, transfer of learning, organic and environmental conditions affecting learning, and individual differences. Prerequisite: Psychology 1A. (2)

**136. Reading in the Primary Grades**

A study of procedures in guiding children's learning to read through the first three grades. This will include practical suggestions for teachers in developing reading readiness, beginning reading, independence in word recognition and reading as a thinking process throughout this period. Analysis will be made of individual and group problems; selection, preparation and use of materials will be studied. (2)

**144. Diagnosis and Remedial Treatment of Difficulties in Reading**

Lectures and demonstrations relative to the causes of reading difficulties and the procedures for diagnosis and remedial treatment. Students will be expected to do practical work with children who have reading difficulty. The work is designed primarily for principals, supervisors and teachers-in-service. Prerequisite: Education 102B or Education 102A, or one year of successful teaching experience. (3)

**145. Organization and Administration of Music Education**

Theory of the general principles of music administration; correlation of music with the various subjects in the public schools; music tests; creative work. (2)

**146. Education Practicum** (Kindergarten-Primary)

This course is a continuation of Education 148 and should accompany Education 116 in the kindergarten. It is a study of the theory of early childhood education. Provides experience with children of nursery school and kindergarten ages. Prerequisite: Education 147, 148. (4)

**147. Education Practicum**

This course is required of all students who expect to receive a credential which will qualify them to teach in the kindergarten or in the elementary school. Students should take the course during the next semester after admission to Teacher Education, which is usually the first semester of the junior year. Registration is strictly limited to those who have been approved by the Committee on Admission to Teacher Education.

Education Practicum is a unified course which deals with the interpretation and intelligent application of theory and practice in elementary education. The child and accumulated knowledge are studied as one affects the other. The psychology of learning is interpreted while the college student is immediately associated with children in the process of learning. For two or three hours each day classes are held in which the psychology and philosophy of education are studied and anaylzed as systems of knowledge and concurrently interpreted in reference to the actual teaching participation to which the student is assigned for one hour daily. The course includes Health Education 151 (2); Methods in Primary Reading (2); Elementary School Methods, including Children's Literature (2); Elementary Music Education (1); Elementary Art Education (1); Mental Hygiene and Speech (2); Directed Teaching (2).

The course is taught by college teachers who supervise in the Campus Elementary School, and other faculty members (12).

### 148. Education Practicum

The course is a continuation of Education 147 and is required of all students who are candidates for the general elementary credential or the kindergarten-primary credential. An extended analysis is made of the psychology of education in various fields and application is made through directed teaching in grades 4 to 6. The course includes Elementary Arithmetic Education (2); Elementary Social Studies and Science Education (2); Elementary Art Education (1); Elementary Music Education (1); Educational Psychology (learning process) (2). Additional 4 units for General Elementary only: Language Arts (2); Directed Teaching (2). Prerequisite: Education 147. (12)

### 149A. Laboratory in Elementary Education

A general course in observation and theory covering all teaching done in the summer demonstration school, including arithmetic, reading, language, music, science, social studies, art, spelling. Students in this course will observe in the summer demonstration school and discuss with the staff the teaching procedures. (3)

### 149B. Workshop in Elementary Education

Students in this course will select a problem related to their professional assignment for the coming year and work upon it in the summer session under the guidance of the staff. Groups of teachers may work together upon common curriculum problems or toward other objectives in personal or professional improvement. Special interests, community study, field trips, subject matter areas, and many other types of experience which will provide educational source background may be selected. Students should correspond with the Director of Elementary Education in advance to secure most effective planning of the course.

This course can be very profitably combined with 149A. Arrangements may be made to secure 6 units of credit. (3)

### 149C. Laboratory in Rural Education

Observation in a one-room multigraded summer demonstration school. Students will observe demonstrations, discuss procedures with the staff, and prepare material for their own schools. (6)

### 155. Principles of Guidance

An analysis of the problems of pupil personnel, guidance and parent-teacher relationships in the public schools. A study of the source materials useful in guidance and a survey of the literature pertaining to the principles and practices of guidance. (3)

### 163. Methods in Secretarial Subjects

### 165. Methods in Merchandising

### 174. Audio-Visual Aids in Instruction

A study of audio-visual aids as they affect learning. Analysis and development of materials of instruction and their presentation; operation of equipment. (2)

### 175. The Organization and Administration of Elementary Schools, Including School Law

A course designed to fit the needs of teachers in service who are preparing for elementary school principalships. This course is a prerequisite for Education 109B, Educational Administration and Supervision, Field Work, and is designed for teachers who hold an elementary school credential. Attention will be directed to problems associated with the personnel, finance, curriculum, plant, community relations, and legal aspects involved in the administration of elementary schools. (3)

### 176. Problems of Speech Correction and Articulation

Analysis and discussion of the major articulatory problems as encountered in public school work, particularly in California. Required of all students for the speech correction credential. (3)

### 177. The Teaching of Lip Reading

History, theory and methods of lip reading. Aids for the classroom teacher; program and materials of instruction for the specialized teacher. Opportunities for practice teaching are offered. (2)

### 178. Problems of the Hard of Hearing

The adjustment of the hard of hearing group with emphasis on the public school child. State and county hearing programs; technique of audiometry; use of hearing aids; educational, classroom, and social problems. (2)

### 179. Speech Disorders

Classification of speech defects and disorders. Nervous speech disorders; stammering, stuttering, hesitation, cluttering. Teacher training in corrective technique for use in public schools; clinic observation. Required of candidates for the Special Secondary Credential in Speech Correction. (3)

### 199. Educational Problems

A course for senior students in residence and enrolled in teacher education who have shown ability to work independently on educational problems. The problem can be chosen only after consultation with a staff member. Admission by consent of the staff. Credit and hours to be arranged.

### 201. Curricular Problems in Secondary Education

Appraisal of outstanding studies in the content and organization of the secondary school curriculum, followed by the student's own investigation of problems in either his major or minor field. Topics for study will be determined jointly by students and instructor. To be taken in the graduate year. (2)

### 202. Guidance Problems in Secondary Education

A study of good guidance procedures. An analysis of the psychological and educational factors involved in assisting high school students to adjust themselves to the high school situation, and problems of guiding youth in the selection and preparation of a life career. To be taken in the graduate year. (2)

### 316. Directed Teaching

Systematic observation, participation, and teaching under supervision in an affiliated high school. Thirty clock hours of directed teaching will usually earn one unit of credit, but the credit finally allowed will depend upon the nature and quality of the teaching done. Any work below a C grade is unacceptable for credit in this course. (6)

No student can enroll in this course until he has completed at least 5 units of work in education.

During the semester in which the student takes his first assignment in directed teaching, he must meet with the college supervisor one hour each week for conference and discussion of problems encountered in his teaching.

Students who have had directed teaching in preparation for the junior high school or special secondary credentials should confer with their departmental and educational advisers concerning partial fulfillment of this requirement as the result of having completed the directed teaching required for the credentials mentioned above.

# DIVISION OF FINE ARTS

## AESTHETICS

### Lower Division Courses

**1A-1B. Survey of Music**

Correlation of music and other arts. Designed to stimulate enjoyment of music by developing intelligent listening. The elements of music, its structure, folk music of all countries, musical instruments, and the contributions of the best known composers, with some biographical study of these men. Compositions are presented by orthophonic recording and by class members. Attendance at a number of local concerts is required. No previous musical training or background is necessary. Music majors are required to complete additional assignments for full credit.

Year course (2-2)

**5. Art Orientation**

An illustrated lecture course involving a study of aesthetic meaning and its relation to the structure of art products. Designed to increase both understanding and appreciation of the visual world in general and of the fine arts in particular.

Fall and Spring (2)

**50. Appreciation and History of Art**

A survey of aesthetics development as revealed in the painting, sculpture, architecture, and handicrafts from dawn of art to the Renaissance. Illustrated.

Fall (2)

**51. Survey of Mexican Art**

A study of Mexican and Middle American Art from earliest time to present.

Fall (2)

### Upper Division Courses

**102A-102B. Music History**

The various movements in the development of music as related to the other arts. The chronological development of the art of music, with particular emphasis on the larger works. Considerable attention is given to the works of modern composers. Many symphonic works are studied from the orchestral scores. Music majors are required to complete additional assignments for full credit. Prerequisite: Aesthetics 1A or 1B.

Year course (2-2)

**150. Appreciation and History of Art**

The period from the Renaissance through the modern school, treated in the same manner as in Aesthetics 50.

Spring (2)

## ART

Many students, regardless of the field in which they may be majoring, recognize the need for an intelligent approach to the subject of art and art appreciation. However, due to the erroneous popular feeling that art is so specialized a subject as to require "talent," these students may refrain from enrolling in any art courses.

For students who desire a better understanding of art, but who do not hope to acquire any of the art skills, the following courses are recommended:

| | *Units* |
|---|---|
| Aesthetics 5, Fundamentals of Art | 2 |
| Aesthetics 50, History and Appreciation of Art | 2 |
| Aesthetics 51, Survey of Mexican Art | 2 |
| Art 8, Costume and Home-furnishing | 2 |

Other courses which require certain skills but which are not beyond the ability of the average college student are:

| | |
|---|---|
| Art 61B, Crafts | 2 |
| Art 6A, Design | 2 |
| Art A, Freehand drawing | 3 |
| Art 94, Costume design | 2 |

For students who might wish to complete a minor in art after having met the lower division requirements from the preceding page, the following courses are recommended as not requiring special training in drawing and design:

| | |
|---|---|
| Art 119, Ceramics | 2 |
| Art 152A, Stage Design | 2 |
| Aesthetics 150, History and Appreciation of Art | 2 |

Candidates for a teaching credential in art should refer to the statement "Admission to Teacher Education" on page 21.

Lower division preparation for the liberal arts major in art: Aesthetics 5 or 51, and 50; Art A-B and 6A-6B, or the accepted equivalents, and six elective units in art.

Liberal arts major (upper division): Twenty-four upper division units. These shall include Art 112A, 115A-115B, 116A, 152A, 195, or the accepted equivalent; Aesthetics 150. It is recommended that the students in meeting degree requirements and in choosing free electives, select from the following courses: Anthropology 151A-151B; English 106A-106B, 107A-107B, 117; French A-B; History 4A-4B, 111A-111B.

For courses in Appreciation and History of Art and Fundamentals of Art, see Aesthetics, page 54.

## Lower Division Courses

### A-B. Drawing and Composition

Semester I: Problems involving perspective to develop ability to draw still life, furniture, exteriors, interiors, and the like.

Semester II: Outdoor sketching of landscape and figure, and studio work from still life and costume pose. Emphasis on composition and technique in the handling of various mediums, pencil, pen and ink, charcoal, pastel, and water color.

Year course (2-2)

### 6A. Design

Fundamentals of design and composition and theory of color. Basic course used as a prerequisite for all advanced work.

Fall and Spring (2)

### 6B. Design (continued)

Original work in creative design and representation with special stress on modern tendencies. Prerequisite: Art 6A.

Fall and Spring (2)

### 7. Line, Color and Display

The principles of line, color and arrangement applied to store and window display. Study and observation of windows, color and materials used in display. Building models and practical problems in arranging colors, textures, and forms in windows to fit different kinds of merchandise.

Fall and Spring (2) (Not offered in 1945-46)

### 8. Costume and House Furnishings

An appreciative study of modern architecture and modern house furnishings, with emphasis on the spirit of gracious living and an appreciative study of the modern dress with emphasis on suitability to the figure, the personality and the occasion.

Fall and Spring (2)

### 11A. Industrial Design

Design of objects for manufacture with reference to their use, materials, and in accordance with factory practices and machine techniques. Prerequisite: Art 6A-6B, A.

Fall (2)

### 11B. Advanced Industrial Design

Advanced problems with particular attention to the techniques of presentation—working drawings, renderings in perspective and scale models. Prerequisite: Art 6A-6B, A, 11A.

Spring (2)

### 14A. Lettering

Fundamental art principles applied to lettering. Practice for quick, accurat lettering; original problems using letters as design. Prerequisite: Art 6A.

Fall (2)

### 14B. Posters and Commercial Art

The application of lettering to posters, newspaper and magazine advertising, an other forms of commercial art. The study of composition combined with lettering an special study of modern tendencies in publicity. Prerequisites: Art 6A, 14A.

Spring (2)

### 15A-15B. Life Drawing

Drawing from the nude model. Prerequisite: Art A-B.

Year course, beginning either Fall or Spring (2-2)

### 16A-16B. Painting

Semester I: Composition of still life and flower forms in water color and oi Semester II: Landscape and more advanced composition in water color and oil. Pr requisite: Art A-B.

Year course, beginning either Fall or Spring (2-2)

### 52A. Stage Design

Theory of line, color, and lighting in relation to the stage. Original sets an costumes developed on a miniature stage. Study of the development of the modern ar of the theater. Upper division credit will be given in this course to students of junio standing upon the completion of extra theme work and additional original problems Prerequisite: Art 6A.

Fall (2)

### 52B. Stage Costume (See 152B)

Fall (2)

### Art 61A. Crafts in the Elementary Schools

A foundation course which develops unification of work of the elementary grade through activities and experiences. These experiences grow out of environmenta activities. They include study and working of clay, lumber and tools, textiles, an cardboard construction. Prerequisite: Art 6A.

Fall and Spring (2)

### 61B. Crafts

Problems involving the application of design principles to various fields—pottery textiles, weaving, metal work, wood-carving, and book-binding. Prerequisite: Art 6A

Fall and Spring (2)

### 94. Costume Design

Original designs of modern costumes suitable to the individual or to distinct types the drawing of fashion figures; the rendering of fabrics and textures. Prerequisite Art 6A.

Spring (2)

### 95. Interior Decoration (See Art 195)

## Upper Division Courses

### 106A-106B. Printmaking

Study of print crafts which includes the making of linoleum blocks, wood engravings, etchings and lithographs. Prerequisites: Art A, B, 6A.

Year course (2-2)

### 106C. Illustration

Same as 106A-B except that printmaking is applied to problems of book illustration. Prerequisites: Art A, B, 6A.

Spring (2)

**112A-112B. Design and Composition**

Imaginative organization of space by means of color, dark and light, perspective, and textures of various materials. Prerequisites: Art A-B, 6A-6B, and if possible 15A-15B or 106A.

Year course (2-2)

**115A-115B. Life Drawing and Painting**

Drawing and painting from nude and costume models.

Year course, beginning either Fall or Spring (2-2)

**115C-115D. Advanced Life**

Painting from nude and costume models and advanced composition in oil. Portraiture. Prerequisite: Art 115A-115B.

Year course, beginning either Fall or Spring (2-2)

**116A-116B. Advanced Painting**

Painting in water color and oils from still life and landscape, stressing composition and technique. Prerequisite: Art 16A-16B.

Year course, beginning either Fall or Spring (2-2)

**119A. Ceramics**

Building of pottery on the basic techniques of coil, slab, mold making, and slip casting. Ceramic sculpture, glazing and kiln operations.

Fall (2)

**119B. Ceramics**

Study of glazes and elementary clay technology. Mold making, slip casting with application to individual creative problems.

Spring (2)

**152A. Stage Design**

See Art 52A.

**152B. Stage Costume**

Costume studied in relation to drama, opera and dance. Original designs for mood and character. Practical problems in designing costumes and accessories for college productions. Prerequisites: Art 6A, 52A or 152A.

Fall (2)

**194. Costume Design** (See Art 94)

Spring (2)

**195. Interior Decoration**

Lectures and designing in class, trips to art galleries, stores, factories and homes, studying how to recognize and choose the best in furniture, rugs, wall coverings, textiles and pottery as to design, color and materials. Actual experience in designing and arranging furnishings in homes and offices. Working with local stores and architects. Arrangement of flowers and objects for different types of rooms and occasions. Prerequisites: Art A, 6A.

Spring (2)

## MUSIC

Candidates for a teaching credential in music should refer to the statement "Admission to Teacher Education Curricula" on page 21 and to the other degree requirements on that page and those following. The curriculum for the A.B. Degree with a Special Secondary Credential in Music is on page 28.

Lower division preparation for the liberal arts major in music: Music 1B-1C-1D; 4A-4B; 4 units of Applied Music (study of piano, voice or orchestral instrument); Aesthetics 1A-1B.

Liberal arts major (upper division): twenty-four upper division units. These shall include Music 105A-105B; 106A; 107A; 119A, 120A, 121A; 4 units of Applied

Music; Aesthetics 102A-102B; and 4 units of music activity credit (Music 111, 112, 113, 115, or 130).

At least a C average in upper division music courses is necessary.

It is recommended that students in meeting degree requirements and in choosing free electives, select from the following courses: English 56A-56B; French A-B; German A-B; History 4A-4B; 146A-B; Physics 2A-2B.

## Lower Division Courses

### 1A. Musicianship—Fundamentals of Music

The elements of music; scale construction; elementary music theory; drill in music reading both with syllables and with words; ear training, elementary music dictation. Basic course for all general elementary credential students. Music majors receive no credit.

Fall and Spring (3)

### 1B. Musicianship—Music Reading and Ear Training

Tonal and rhythmic dictation; rhythmic writing; sight singing. Basic course for majors and minors. Text—Smith and Krone: Fundamentals of Musicianship Book I. Prerequisite: Music 1A, or the equivalent. Music majors not able to pass the departmental entrance examination in the fundamentals of music will take 1A without credit in preparation for this course.

Fall and Spring (2)

### 1C-1D. Musicianship—Advanced Music Reading and Ear Training

Tonal work in minor keys; modal scales; dissonant triads and seventh chords; interval feeling in all chords; rhythmic progression and elementary forms; rhythmic, melodic and harmonic dictation. Prerequisite: Music 1B.

Year course (2-2)

### 2A. String Instruments

Beginner's class in violin, viola, 'cello and string bass. Required of all music majors working for a Special Secondary credential unless this orchestral section is the major or minor field.

Fall and Spring (1)

### 3A. Woodwind Instruments

Beginner's class in oboe, clarinet, flute and bassoon. Required of all music majors working for a Special Secondary credential unless this orchestral section is the major or minor field.

Fall and Spring (1)

### 4A-4B. Elementary Harmony

Scale construction, intervals, by-tones and diatonic harmonies. Transposition and original composition in the simpler forms. Text—Alchin: Applied Harmony Vol. I. Prerequisite: Music 1A-1B, or the equivalent, and at least one year of piano study.

Year course (3-3)

### 6A. Brass Instruments

Beginner's class in trumpet, French horn, baritone, trombone and tuba. Required of all music majors working for a Special Secondary credential unless this orchestral section is the major or minor field.

Fall and Spring (1)

### 7A. Music Materials for the Elementary School

Study of the song material in the state music texts and in the supplementary texts. Appreciation materials applicable to the elementary school. Required course for all general elementary credential students. Prerequisite: Music 1A.

Fall and Spring (3)

**11A-B-C-D. Women's Glee Club—Treble Clef**

Entrance upon examination.

Fall and Spring (½-½)

**12A-B-C-D. Men's Glee Club**

Entrance upon examination.

Fall and Spring (½-½)

**13A-B-C-D. Orchestra**

Permission of the conductor required for membership.

Fall and Spring (1-1)

**15A-B-C-D. Choral Club**

Entrance upon examination.

Fall and Spring (½-½)

***16A-16B-16C-16D. Individual Study of an Orchestral Instrument**

Fall and Spring (1-1)

***17A-17B-17C-17D. Individual Study of Voice**

Fall and Spring (1-1)

***18A-18B-18C-18D. Individual Study of Piano or Organ**

Prerequisite: The ability to play artistically hymns and folk songs of the type found in the Golden Book of Favorite Songs.

Fall and Spring (1-1)

**20A-B-C-D. Chorus**

Open to anyone interested in singing standard choral works. No examination required.

Fall and Spring (½-½)

**26A-B-C-D. Band**

Permission of the conductor required for membership.

Fall and Spring (½-½)

**28A-28B. Piano**

Fundamental playing and reading technics for the pianoforte. Emphasis upon playing by ear, and the development of interpretative ability. For beginners only. No credit for music majors and minors.

Year course (1-1)

**29A-B. Class Voice**

A class for beginners in the vocal field taking up the problems of breath control, tone placement, articulation and enunciation. Frequent performance before class required. Limited to 15.

Year course (1-1)

**30A-B. Chamber Music**

String and woodwind ensembles. The consent of the instructor necessary for admission to class.

Year course (1-1)

---

* See page 61, conditions under which credit may be given for music study under private instructors.

## Upper Division Courses

**102A-102B. Music History**

The various movements in the development of music as related to the other art The chronological development of the art of music, with particular emphasis on th larger works. Considerable attention is given to the works of modern composer Many symphonic works are studied from the orchestral scores. Music majors ar required to complete additional assignments for full credit. Prerequisite: Aestheti 1A or 1B.

Year course (2-2)

**105A-105B. Advanced Harmony and Composition**

Study of the possible types of modulation and chromatic harmonies: continuatio of harmonic analysis and original composition. Text—Alchin: Applied Harmon Vol. II. Prerequisite: Music 4A-4B.

Year course (3-3)

**106A. Counterpoint**

Study of the five species of counterpoint with much practice in writing in suc forms. Application of contrapuntal style to modern composition. Prerequisite Music 4A-4B.

Fall (2)

**107A. Form and Analysis**

Aural and visual analysis of music forms through a consideration of structur harmonic content, and style. Prerequisite: Music 105A-105B.

Spring (2)

**111A-B-C-D. Women's Glee Club—Treble Clef**

Entrance upon examination.

Fall and Spring (½-½) (A maximum of 2 units in glee club may be counte toward the A.B. Degree)

**112A-B-C-D. Men's Glee Club**

Entrance by examination.

Fall and Spring (½-½) (A maximum of 2 units in glee club may be counte toward the A.B. Degree)

**113A-B-C-D. Orchestra**

Permission of the conductor required for membership.

Fall and Spring (1-1) (A maximum of 4 units in orchestra may be counte toward the A.B. Degree)

**115A-B-C-D. Choral Club**

Entrance by examination.

Fall and Spring (½-½) (A maximum of 2 units in Choral Club may be counte toward the A.B. Degree)

***116A-116B-116C-116D. Advanced Individual Study of an Orchestral Instrumer**

Fall and Spring (1-1)

***117A-117B-117C-117D. Advanced Individual Study of Voice**

Fall and Spring (1-1)

***118A-118B-118C-118D. Advanced Individual Study of Piano or Organ**

Fall and Spring (1-1)

**119A. Instrumental Conducting**

Conducting and reading of orchestral scores.

Fall and Spring (1)

---

* See page 61, conditions under which credit may be given for music study unde private instructors.

**120A. Vocal Conducting**

The theory of vocal conducting together with practical experience gained from directing the college chorus. Prerequisite: Music majors with senior standing.

Fall and Spring (1)

**121A. Instrumentation**

Arranging of music for full orchestra. Selected works of pupils to be performed by standard orchestras.

Fall and Spring (2)

**126A-B-C-D. Band**

Permission of the conductor required for membership.

Fall and Spring (½-½) (A maximum of 4 units in band may be counted toward the A.B. Degree)

**130A-130B. Chamber Music**

String quintet and woodwind ensembles only. Permission of the instructor necessary for class membership.

Year course (1-1)

## CONDITIONS UNDER WHICH CREDIT MAY BE GIVEN FOR MUSIC STUDY UNDER PRIVATE INSTRUCTORS

Credit may be allowed for private instruction in music under the following conditions:

1. The applicant for such credit must be a regularly enrolled student in the music department of the college.
2. The instructor giving such private work must be approved by the Music Department. All private work and the names of all such teachers must be registered in the office of the music department chairman at the beginning of the semester.
3. In the case of first semester private study, a placement examination conducted by the music department faculty at the beginning of the semester will show the status of the student at the beginning of his work.
4. Evidence that the standards of the Music Department have been met will be shown by an examination conducted by the music department faculty at the end of the semester.

# DIVISION OF HEALTH, PHYSICAL EDUCATION, AND RECREATION

## HEALTH EDUCATION

### Lower Division

**1. Health and Social Adjustment** (Men)

An informational course in personal and community hygiene. A study of soci hygiene and the hygienic principles of living. Speakers from the County Medic Association on subjects of vital interest enrich the offerings of this course. It especially desirable that this course be taken in the freshman year.

Fall and Spring (2)

**2. Health and Social Adjustment** (Women)

An informational course, reviewing the principles underlying the improveme of personal health, and the solution of practical problems of young women and pro pective homemakers. Lectures by specialists in the various fields serve to enrich t course. Required of all freshmen who are candidates for junior standing or the degre

Fall and Spring (2)

**61A. Nutrition**

The purpose of this course is to consider health maintenance through fo selection from the modern scientific viewpoint. Consideration is given to the fund mentals of an adequate diet from the basis of the known dietary essentials and of t disorders which result from the deprivation of these factors. Diets for special nee are also planned. Recommended for pre-medical, pre-dental, pre-nursing, and so ology majors. Red Cross Nutrition Certificate is granted upon course completion.

Spring (2)

**61B. Nutrition—Laboratory**

A basic course in food preparation which includes the study of typical fo selection and preparation methods which best conserve the essential food flavors a nutrients. Class meets once a week and is open only to students who have register in Nutrition 61A.

Spring (1)

**90. Physiology of Reproduction** (Women)

A course consisting of a series of lectures and discussion dealing with norm and abnormal physiology and anatomy of reproduction, facts and frauds in s hygiene, and related topics. Prerequisite: Health Education 2.

Fall and Spring (1)

### Upper Division

**151. Health Education** (Education 147-148)

A course for teacher-education students which includes the study of the diseas common physical defects, and health indices of school children; the detection a control of communicable diseases which may appear in the school; and the eleme which underlie a health education program. Methods of presenting personal a group health to children of different ages. Hygiene of the schoolroom, such as seati lighting, and ventilation.

Fall and Spring (2)

## PHYSICAL EDUCATION

### Men's Department

Candidates for a teaching credential in physical education should refer to t statement "Admission to Teacher Education Curricula" on page 21. For the teach education curriculum in physical education see page 30.

### Lower Division Courses

A two-hour activity course each semester is required for the two years of lower division. A medical examination is given each student when entering and the work is fitted to his needs. Individual Adapted Activity sections to fit the special needs of the individual student are included. The content of the required two years is planned to give each student an opportunity to participate in those sports which have carry-over value into after life in addition to body building exercises and endurance training. Opportunity is given all students to take part in the regular competitive sports program.

Intercollegiate sports may be taken in addition to required lower division courses. A maximum of one unit in sports in one semester may be counted toward the A.B. Degree.

**1A-1B. Freshman Activity.**

Year course, beginning either Fall or Spring (½-½)

**1C-1D. Sophomore Activity**

Year course, beginning either Fall or Spring (½-½)

Demonstrated ability to pass standard tests in body agility and game skills will permit student to substitute sports participation for required courses.

**Sports and Athletics**

2A-2B-2C-2D, Boxing (½)
3A-3B-3C-3D, Track (1)
4A-4B-4C-4D, Baseball (1)
5A-5B-5C-5D, Basketball (1) (½ Fall, ½ Spring)
6A-6B-6C-6D, Badminton (½)
7A-7B-7C-7D, Golf (½)
8A-8B-8C-8D, Wrestling (½)
9A-9B-9C-9D, Cross Country (½)
10A-10B-10C-10D, Swimming (½)
11A-11B-11C-11D, Tennis (½)
13A-13B-13C-13D, American Football (1)
13X-13Y-13Z, Spring Football (½)
14A-14B-14C-14D, Gymnastics (½)
15A-15B-15C-15D, Fencing (½)
16A-16B-16C-16D, Archery (½)

Any of above sports will be offered only if demand is sufficient.

**30. Physical Conditioning and Training**

Methods and procedure of securing the mental and physical condition necessary for maximum performance in athletics. Diet, massage, and training procedure given special attention. (2)

**51. First Aid and Safety Education**

The accepted procedure in meeting the emergencies which arise daily in schoolroom, play or athletic field, beach, mountains, or any of the many places where the physical director is called on for first aid. Special attention given to the arrangement of the apparatus and the activities so that many of the most common accidents are prevented or minimized. Course content qualifies for Red Cross Certificate. (2)

**53. Physical Education in the Elementary School**

The content of the State program in physical education forms the basis of the course. Two lectures, two one-hour laboratory periods per week. (2½)

**72. Introduction to Physical Education**

An orientation course in the history, philosophy, and objectives of physical education. (2)

### Upper Division Courses

**154. Principles and Administration of Physical Education in Secondary Schools**

The philosophy and principles of physical education and its relation to general education. Analysis of present-day programs and methods in terms of objectives. The study of selection and adaptation of activities, examination and grouping of pupils, testing the results of teaching, evaluation of the teacher, provision of equipment, and departmental organization. (3)

### 155. Applied Anatomy and Kinesiology

Principles of body mechanics; analysis of joint mechanism and muscular actio in fundamental movements, everyday activities, sports, dancing, and gymnastic exercises. Prerequisite: Zoology 8. (3)

### 156A. Sports Methods

Different theories and methods of teaching the more highly organized tean sports: Football, basketball, and baseball. (2)

### 156B. Sports Methods

Methods of teaching those sports most adaptable to the intramural and recreational programs: Golf, handball, soccer, speedball, volley ball, badminton, archery tennis, swimming, track, etc. (2)

### 162A. Gymnastic Procedure and Techniques

Theoretical and practical work in marching, free exercises, and light and heav apparatus. Emphasis on progression and method of presenting material. Th simplest and most explanatory terminology. (2)

### 162B. Gymnastic Procedure and Techniques

Acquisition of proficiency in the performance of a great group of gymnasti stunts always popular in the gymnasium and on the playground. Work of th recreational or self-interesting type rather than the formal. Tumbling, stunts, an pyramid-building given chief attention, although games of low organization are als considered. (2)

### 170. Recreational Leadership

Fundamentals of recreational leadership developed by instruction in club an camp activities, the study of school recreational needs and facilities, and of civi recreation. Open to all upper division men and women. Recommended to student interested in the recreational aspects of social service. (2)

### 177. Individual Program Adaptation

Adjustments of the physical education program to the physical needs an capacities of individuals; problems concerning protective and preventive measure which are not highly specialized corrective phases. (2)

### 200. Tests and Measurements in Physical Education

Study and evaluation of tests and measurements in the field of physical education. Practice in the use of tests and interpretation of results. Prerequisite: Graduat standing. (2)

### 201. Corrective Physical Education

Study of postural abnormalities and their correction through exercise. Practice in giving examinations, planning exercise programs, and teaching correctiv exercises. Prerequisite: Graduate standing. (3)

### 202. Problems in Physical Education and Recreation

Survey of the literature, discussion of trends and current problems in physica education and recreation. Observation of school and community activities. Analysi and evaluation of a problem situation. Written reports required. Prerequisite Graduate standing. (3)

## Women's Department

Candidates for a teaching credential in physical education should refer to th statement "Admission to Teacher Education Curricula" on page 21, and to the outlin for the A.B. Degree with Special Credential in Physical Education on page 31.

## Lower Division Courses

Two hours per week of directed physical activity are required through out th freshman and sophomore years. Freshman students may choose courses from th following, 1A, 1B, 1C. Sophomore students may choose from all activity course offered.

**1A. Fundamental Skills**

Practice in efficient fundamental body movements.
Fall and Spring (½)

**1B. Folk Dancing**

Fall and Spring (½)

**1C. Rhythmic Skills**

Fall and Spring (½)

**1D. Team Sports**

(All four are required of all women candidates for the special credential in physical education.)
Fall and Spring (½)

**Sophomores may elect from the following**

**2A-2B. Folk Dancing**

Fall and Spring (½)

**3A-3B-3C-3D. Modern Dance**

Fall and Spring (½)

**4A-4B. Social Dancing—for men and women**

Fall and Spring (½)

**5A-5B. Archery**

Fall and Spring (½)

**6A-6B. Badminton**

Fall and Spring (½)

**7A-7B. Golf**

Fall and Spring (½)

**11A-11B. Tennis**

Fall and Spring (½)

**12A-12B. Advanced Modern Dance**

Laboratory experiments in advanced choregraphy and percussion accompaniment. For men and women. Prerequisites: 1C and 3A for women, 1C for men.
Fall and Spring (1-1)

*Any of the above activities may be taken for additional credit*

**51. First Aid and Safety Education**

Standard American Red Cross First Aid course; accident prevention; materials and methods in safety education.
Fall (1)

**53. Physical Education in the Elementary School**

The content of the State program in physical education forms the basis of the course. Two lectures, two one-hour laboratory periods per week.
Spring (2½)

**72. Introduction to Physical Education**

An orientation course in the history, philosophy, and objectives of physical education. (2)

**Sports**

1. The individual activities, tennis, golf, archery, badminton and dancing are offered through the year. Candidates for the special credential in physical education select *one* as a major activity and two others as minors. Skills in the activities thus

selected must be maintained as prerequisite to the senior course, Physical Educatio 185. (See page 66.)

2. The Women's Recreation Association sponsors the intramural sports program. Under its direction competition in dual and group games is promoted throughout the year. Open to all college women.

### Upper Division Courses

Open to all women. Required of women candidates for the special credentia in physical education.

**153. Principles and Administration of Secondary Physical Education**

The philosophy and principles of physical education and its relation to genera education. Analysis of present-day programs and methods in terms of objectives. The study of selection and adaptation of activities, examination and grouping o pupils, testing the results of teaching, evaluation of the teacher, provision of equipment, and departmental organization. Selection and use of audio-visual aids. Open to both men and women.

Fall (3)

**155. Applied Anatomy and Kinesiology**

Principles of body mechanics; analysis of joint mechanism and muscular action in fundamental movements, everyday activities, sports, dancing, and gymnastic exercises. Prerequisite: Zoology 8.

Spring (3)

**156A-156B. Sports Methods**

Analysis of skills in basketball, hockey, soccer, speedball, volleyball, and softball; methods of presenting sports to large groups; study of rules and officiating. (2-2)

**160. Teaching of Body Mechanics**

A study of efficient use of the body in daily living; evaluation and classification of exercises, methods and practice in planning and presenting material.

Fall (2)

**161. Folk Dancing Materials and Advanced Techniques**

A study of folk customs, festivals, and costumes. Selection of dance materials for various age groups. Practice in advanced techniques.

Spring (2)

**164A-164B. Methods in Modern Dance**

Laboratory experiments in advanced choreography and percussion accompaniment. Historical survey and practical experience in production techniques and teaching methods. Two activity periods and one lecture per week. Open to both men and women.

Year course (2-2)

**170. Recreational Leadership**

Fundamentals of recreational leadership developed by instruction in club and camp activities, the study of school recreational needs and facilities, and of civic recreation. Open to all upper division men and women. Recommended to students interested in the recreational aspects of social service.

Spring (2)

**177. Individual Program Adaptations**

Adjustments of the physical education program to the physical needs and capacities of individuals; problems concerning protective and preventive measures which are not highly specialized corrective phases.

Spring (2)

**185. Techniques of Individual Sports**

A course summarizing rules and teaching methods, and testing individual playing ability.

Fall (1)

**200. Tests and Measurements in Physical Education**

Study and evaluation of tests and measurements in the field of physical education. Practice in the use of tests and interpretation of results. Prerequisite: Graduate standing. (2)

**201. Corrective Physical Education**

Study of postural abnormalities and their correction through exercise. Practice in giving examinations, planning exercise programs, and teaching corrective exercises. Prerequisite: Graduate standing. (3)

**202. Problems in Physical Education and Recreation**

Survey of the literature, discussion of trends and current problems in physical education and recreation. Observation of school and community activities. Analysis and evaluation of a problem situation. Written reports required. Prerequisite: Graduate standing. (3)

# DIVISION OF LANGUAGES AND LITERATURE

## COMPARATIVE LITERATURE

Requirements for the minor in Comparative and General Literature: (1) a minimum of 15 units of work must be completed in courses offered by the department, at least 9 of which must be in upper division courses; (2) the work to be taken should be arranged in consultation with an instructor selected by the department.

### Lower Division Courses

**52A-52B. Types of World Literature**

For a description of this course, see English 52A-52B.

Year course (3-3)

### Upper Division Courses

**101A. Modern Continental Fiction**

For description, see English 101A.

Spring (3) (Offered in 1946-47 and alternate years)

**104A-104B. Spanish American Literature**

For a description of this course, see Spanish 104A-104B, which may be taken for credit in Comparative Literature by doing the required reading in English translation.

Year course (3-3) (Offered in 1946-47 and alternate years)

**115. The Bible as Literature**

For description, see English 115.

Spring (3) (Offered in 1946-47 and alternate years)

**140A-140B. Masterpieces of French Literature**

A cultural course designed to be given in introduction to the great French works from the Song of Roland through Cyrano de Bergerac, with emphasis on the 16th, 17th, 18th and 19th century authors. The contributions to world thinking of Rabelais, Montaigne, Moliere, Racine, Descartes, Pascal, Montesquieu, Voltaire, Rousseau, Hugo, Balzac, Flaubert, Maupassant, Zola, will be studied through lectures and outside readings.

Year course (3-3) (Offered in 1946-47 and alternate years)

**152A. Survey of Drama: Comedy**

For description, see English 152A.

Fall (3)

**152B. Survey of Drama: Tragedy**

For description, see English 152B.

Spring (3)

**157. Primitive Myths and Rituals**

For description, see Anthropology 157.

Spring (3) (Offered in 1947-48 and alternate years)

## ENGLISH

Lower division preparation for the liberal arts major in English: At least 12 units of work, including 1B, 56A, 56B. Upper division requirements for the liberal arts major: (1) at least 24 units in upper division English courses, including 18 units from the following: 116A, 116B, 117A, 117B, 118A, 118B, 119, 121, 126, 192, 193, 194; (2) selection arrangement of courses under the supervision of an adviser appointed by the English department; (3) a reading knowledge of one of the languages taught in the college: French, German, Italian, Latin, Spanish. (By "reading knowledge" is meant two full years of lower division work, or the equivalent. Further work in one of these languages, in upper division courses, is highly recommended.)

## Lower Division Courses

### 1A. Subject A: English Composition

The elements of composition, including drill in grammar and usage; exercises n vocabulary building and careful reading; theme writing. Credit in this course s equivalent to passing the English A Examination, and admits to English courses numbered from 11 to 16.

Fall and Spring (3)

### 1AA. Reading Efficiency and Vocabulary Extension

Special drill in reading for comprehension; vocabulary building; practice in elementary composition. Systematic, progressive, and intensive training and practice in effective reading and methods of study. This course may be substituted for English 1A.

Fall and Spring (3)

### 1B. Composition

Exposition is stressed. Prerequisite: satisfactory Subject A test. Not open to students who have taken English 1A or 1AA.

Fall and Spring (3)

### 3. English in Business

Theory and practice of business correspondence. Business letters as applied salesmanship; problems in writing credit and collection letters, applications for employment, adjustment letters, and sales letters. Prerequisite: English 1A or equivalent, as indicated by Subject A Examination, or record from college. This course is planned for students in Secretarial Training; units obtained in it can not be used to meet English requirements in other fields.

Fall and Spring (3)

### 10. Recreational Reading

Development of personal tastes for leisure-time reading through lectures and oral or written reports. May be taken a second time with new material.

Fall and Spring (1)

### 11. Freshman Literature—Argumentation

Principles of argument; readings in contemporary deliberation and persuasion; written and oral practice.

Spring (3)

### 12. Freshman Literature—Biography

Composition, stressing personal narrative and informal essay. Reading from field of biography and memoirs.

Fall and Spring (3)

### 13. Freshman Literature—Foundations of the Language

A course designed to make more significant the native language through a study of the elements which have gone into the composition of its vocabulary. Readings from the various periods to illustrate the changes.

Spring (3)

### 14. Freshman Literature—Periodical Literature

Composition stressing article writing of varied types. Reading from current periodical literature.

Fall and Spring (3)

### 15. Freshman Literature—Modern Drama

Composition based upon the reading of recent plays and dramatic criticism. Not a course in dramatics.

Spring (3)

### 16. Freshman Literature—Modern Literature

An introduction to literature of various types in modern European and American culture, with composition.

Fall and Spring (3)

### 50A-50B. Survey of American Literature

Semester I: A survey of American literature from its beginnings to 1860 Semester II: American literature from 1860 to the present. Lectures, discussions and reports.

Year course (3-3)

### 52A-52B. Types of World Literature

A chronological survey from Homer to modern times. The first semester stresses the classical epic and tragedy. The second semester, beginning with the Renaissance, stresses prose fiction, the drama, and the essay.

Year course (3-3)

### 56A-56B. Survey of English Literature

The study of some important works of English literature from the Anglo-Saxon period through the Victorian age, with emphasis upon the literary history of each period.

Year course (3-3)

## Upper Division Courses

### 101A. Modern Continental Fiction

A survey of leading French, Russian, Scandinavian, Italian, and German novelists and short story writers, from Tolstoy and his associates to the present day.

Spring (3) (Offered in 1946-47 and alternate years)

### 101B. Modern British Fiction

The novel and short story, especially of the last quarter of a century.

Spring (3) (Offered in 1947-48 and alternate years)

### 106A-106B. Advanced Composition

A laboratory course in modern prose writing. Semester I: Artistic narrative, with description. The short story. Semester II: The essay, the magazine article, criticism. Outside readings. Prerequisite: One year of college composition. Either semester may be taken first.

Fall, Spring (3-3)

### 110. Recreational Reading

An advanced course in the group reading of modern drama, poetry and fiction.

Fall and Spring (1)

### 115. The English Bible as Literature

A study of the narrative, poetry and prophecy of the King James version of the Bible. Readings, reports, lectures, and discussions.

Spring (3) (Offered in 1946-47 and alternate years)

### 116A. The Age of Elizabeth

Poetry and prose, exclusive of the drama.

Fall (3) (Offered in 1947-48 and alternate years)

### 116B. The Elizabethan Drama

Principal contemporaries of Shakespeare.

Spring (3) (Offered in 1947-48 and alternate years)

### 117A-117B. Shakespeare

A chronological survey. The first semester gives special emphasis to the histories and comedies; the second, to tragedy and the dramatic romances.

Year course (3-3)

**118A. The Age of Swift and Pope**

A study of the literature of the first half of the eighteenth century, with special emphasis on social satire of Swift, Pope, Addison, Steele, Gay and Prior.

Spring (3) (Offered in 1947-48 and alternate years)

**118B. The Age of Johnson**

A study of Johnson and his circle as representative of their age, together with a study of Burns, Blake, and other forerunners of the age of Romanticism.

Spring (3) (Offered in 1946-47 and alternate years)

**119. The Romantic Period: Poetry**

A study of early nineteenth century poetry; the work of Wordsworth, Coleridge, Byron, Shelley, and Keats, in relation to the thought of the revolutionary period.

Fall (3) (Offered in 1947-48 and alternate years)

**121. The Victorian Period: Poetry**

A study of Tennyson and Browning and their contemporaries and successors, relating English poetry to nineteenth century life and thought.

Fall (3) (Offered in 1946-47 and alternate years)

**126. Nineteenth Century British Prose**

Romantic and mid-Victorian prose writers, including Coleridge, Hazlitt, Lamb, DeQuincey, Carlyle, Landor, Macaulay, Mill and Thackeray.

Fall (3) (Offered in 1946-47 and alternate years)

**127. Modern British Prose**

Late nineteenth and early twentieth century essays of Arnold, Galsworthy, Huxley, Newman, Pater, Ruskin, Shaw, Stevenson, Wells and others.

Fall (3) (Offered in 1947-48 and alternate years)

**131. American Literature: 1820-1860**

The study of the important romantic writers, with emphasis on the New England group.

Fall (3)

**132. The Frontier and American Literature**

A survey of the influence of the frontier upon American literature from colonial days to the present. Studies in source materials, biographies, and representative writers such as Cooper, Harte, Mark Twain and Rolvaag.

Fall (3) (Offered in 1946-47 and alternate years)

**133. American Fiction**

The outstanding writers of novels and short stories, from Cooper to Norris.

Spring (3) (Offered in 1946-47 and alternate years)

**134. American Literature: 1900 to the Present**

A survey of American literature since 1900 with emphasis upon contemporary poetry, fiction and drama.

Spring (3)

**143. The English Novel**

History of the English novel from the beginnings to Hardy. Extensive reading of novels with reports, lectures and discussions.

Fall (3) (Offered in 1947-48 and alternate years)

**152A. Survey of Drama: Comedy**

Studies in the field of comedy, based on selected readings from the works of Continental, English and American dramatists. Lectures, discussions, and reports on reading.

Fall (3)

**152B. Survey of Drama: Tragedy**

Procedure as in 152A with selections taken from the field of tragedy.

Spring (3)

**166. Honors Course**

Special study. Open to members of the Honors Group in English (see page 14)

Fall and Spring (1 to 5-1 to 5)

**191. Advanced Composition**

A course in modern prose writing. Emphasis on the narrative and the essay particularly on the problems of effective expression as exhibited in the work of members of the class and as encountered in the work of high school students. Prerequisite one or more college courses in composition. Open only to senior and graduate students.

Spring (3)

**192. The English Language**

An inductive approach to basic aspects of the language. The course includes an analysis of English sounds, grammar and syntax. Modern, Middle and Old English. Open only to senior and graduate students.

Fall (3)

**193. Chaucer**

A study of Chaucer's works, and a consideration of the social and literary backgrounds of the fourteenth century. Open only to senior and graduate students.

Fall (3)

**194. The Age of Milton**

A study of the literary developments of the middle and later seventeenth century, with emphasis on the work of Milton. Open only to senior and graduate students.

Spring (3) (Offered in 1947-48 and alternate years)

**195. Literary Criticism**

A historical survey of the principles and practices of literary criticism from Greek times to the nineteenth century. Readings in the works of Aristotle, Horace, Longinus, Sidney, Boileau, Dryden, Lessing, Sainte-Beuve, Coleridge and Arnold. Open only to senior and graduate students.

Fall (3)

**196. The Forms of Poetry**

Foundation materials for the appreciation of poetry, including critical concepts of the nature of the art; metrical theory; history of the leading poetic types; and the relation of poetic forms to thought, mood and environment. Open only to senior and graduate students.

Spring (3)

**199. Research: Advanced Honors Course**

Special study. Open to mature, specially qualified students, graduates, teachers of English literature, and others who have demonstrated marked aptitude for intensive research in the field of English literature.

Fall and Spring (3-5)

**Comparative Literature**

For other courses in literature, offered by members of the English Department and other departments, see Comparative Literature, page 68.

**201. Shakespeare**

A seminar on the graduate level: bibliography, critical study, special problems, criticism. Prerequisite: graduate standing. Recommended: at least one undergraduate course in Shakespeare.

Spring (3)

**221. Regionalism in American Literature**

A seminar on the graduate level: bibliography, special problems, with concentration on selected regions. Prerequisite: graduate standing. Recommended: at least one undergraduate course in American literature.

Fall (3)

## FOREIGN LANGUAGES

The courses offered in foreign languages are listed below. See pages listed after each subject for a more complete description of the offerings under that designation. French, see below; General Language, page 74; German, page 74; Italian, page 75; Latin, page 75; and Spanish, page 75.

As a background for advanced work in Romance languages, students are advised to include in their electives as many as possible of the following courses: Geography 118; History 121A, 121B, 143, 147; Aesthetics 50 or 150; English 52A, 52B, 56A, 56B, 101, 112, 116, 118A, 119, 126, 143, 152.

## FRENCH

Lower division preparation for the liberal arts major in French: French A-B-C-D; either German A-B or Spanish A-B; History 4A-4B.

Liberal arts major in French: Twenty-four units of upper division work, of which at least eighteen must be in French, and of which a maximum of six may be in related subjects, arranged in consultation with the chairman of the department. At least a C average in upper division major courses.

### Lower Division Courses

**A-B. Elementary**

Intensive study of French grammar and syntax; daily written work discussed in class; class drill in conversational idiom and pronunciation; reading with oral discussion and résumés; dictation; introduction to contemporary prose writers. Credit not given for French A unless followed by French B. Students who have had one year of French in high school should register for two units of work in French A. Those who have had two years of French in high school should register for four units of work in French B.

Year course (5-5)

**C-D. Intermediate Reading**

Reading and composition; study of standard prose as a basis for class work, collateral reading with résumés and written reports in French; dictation. Individual conferences. Prerequisite: French B or three years of high school French, or its equivalent. Students with four years of high school French should register for French D.

Year course (3-3)

**SC. Scientific Reading**

Reading taken from the fields of chemistry, physics, medicine, zoology, biology, etc. Outside readings of books and periodicals. Oral and written reports. Prerequisite: French B or equivalent.

Fall (2) (Offered in 1946-47 if demand is sufficient)

### Upper Division Courses

**101A-101B. Conversation and Composition**

Prerequisite: French D, or its equivalent, with grade of C.

Year course (3-3)

**105A-105B. Modern French Drama**

Plays of Mussett, Scribe, Augier, Dumas fils, Pailleron, Brieux, Hervieux, Maeterlinck, Rostand, and others read and discussed as to subject matter and technique. Outside reading and reports. Prerequisite: French D, or its equivalent, with grade of C.

Year course (3-3) (Offered in 1949-50)

### 107A-107B. Eighteenth Century Literature

The works of Montesquieu, Voltaire, Rousseau, the Encyclopédistes, and others. Prerequisite: French D, or its equivalent, with a grade of C.

Year course (3-3) (Offered in 1948-49)

### 110A-110B. Modern French Novel

The French novel from Victor Hugo to the present day, including such authors as: Hugo, Dumas, Stendhal, Balzac, Flaubert, Loti, Anatole France, Bourget, Bordeaux, Bazin, Barrès, Romain Rolland, A. Gide, Marcel Proust, and others. Class and outside reading and reports. Prerequisite: French D, or its equivalent, with Grade of C.

Year course (3-3) (Offered in 1947-48)

### 111A-111B. Seventeenth Century Dramatic Literature

Reading in class of plays of Molière, Corneille, and Racine. Outside readings and lectures on the background of the seventeenth century in France. Prerequisite: French D or its equivalent, with a grade of C.

Year course (3-3)

### 199. Comprehensive Reading and Survey Course

Designed to fill up the gaps in the reading done in courses. Class meeting once a week for guidance, reports, and quizzes. Required of all seniors majoring in French.

Spring (3)

## GENERAL LANGUAGE

### Lower Division Course

### A. Latin and Greek Word Derivation

A general and elementary course in philology. A study of Latin and Greek roots of most frequent occurrence in English, and of the English words derived from them.

Fall (2)

## GERMAN

### Lower Division Courses

### A-B. Elementary

Pronunciation, reading and grammar, with practice in simple conversation, narration and description, both oral and written. Credit not given for German A unless followed by German B. Students who have had one year of German in high school should register for two units of work in German A. Those who have had two years of German in high school should register for four units of work in German B.

Year course (5-5)

### C-D. Intermediate Review and Reading

Reading and composition; study of standard prose as basis for class work; collateral reading with written reports; German conversation, with the texts read as a basis; dictation. Prerequisite: German B or two years of high school German, or its equivalent. Students with credit for three years high school German, or its equivalent, should enter German C.

Year course (3-3)

### SC-SD. Scientific Reading

Fall semester. Readings in scientific reader on chemistry, physics, etc.; occasional written reports on scientific subjects read outside of class; sight reading. Spring semester. Readings in special scientific or technical works; weekly written reports required; sight reading. Prerequisite: German SC-German B with a grade of C or two years of high school German; German SD-German SC, German C, with a grade of C, or three years of high school German.

Year course (3-3) (Not offered in 1946-47)

## ITALIAN

**A-B. Elementary**

Intensive study of Italian grammar and syntax, with daily written work; class drill in conversational idiom and pronunciation; reading of works by contemporary writers. Credit not given for Italian A unless followed by Italian B. Students who have had one year of Italian in high school should register for Italian A. Those having two years in high school should register for Italian B.

Year course (5-5)

## LATIN

**C-D. Intermediate**

Readings from Latin writers. First semester: Caesar. Second semester: Cicero and Ovid. Prerequisite: Two years of high school Latin or the equivalent.

Year course (3-3) (Not offered in 1946-47)

## SPANISH

Lower division preparation for the liberal arts major in Spanish: Spanish A-B-C-D; French A-B; History 4A-4B or 8A-8B.

Liberal arts major in Spanish: Twenty-four units of upper division work, of which at least eighteen must be in Spanish, and of which a maximum of six may be in related subjects, arranged in consultation with the chairman of the department. At least a C average in upper division major courses.

### Lower Division Courses

**A-B. Elementary**

Intensive study of Spanish grammar and syntax, with daily written work; class drill in conversational idiom and pronunciation; reading with oral discussion and résumés; dictation; introduction to contemporary prose writers. Credit not given for Spanish A unless followed by Spanish B. Students who have had one year of Spanish in high school should register for two units of work in Spanish A. Those who have had two years of Spanish in high school should register for four units of work in Spanish B.

Year course (5-5)

**C-D. Intermediate Spanish**

Reading and composition: study of standard prose as basis for class work; collateral reading in prose and drama, with written reports in Spanish; dictation. Class work conducted mainly in Spanish. Individual conferences. Prerequisite: Spanish B or three years of high school Spanish, or its equivalent. Students with credit for four years of high school Spanish, or its equivalent, should enter Spanish D.

Year course (3-3)

**50. Spanish Commercial Correspondence**

A one-semester intermediate course in Spanish composition, directed along the line of commercial correspondence. A practical course, with translation of real business letters, and supplementary reading in Spanish on commercial subjects. Prerequisite: three years of high school Spanish, or completion of Spanish B. This course may substitute for Spanish C in the C-D sequence.

Fall (3)

### Upper Division Courses

**101A-101B. Conversation and Composition**

Prerequisite: Spanish D, or its equivalent, with grade of C.
Year course (3-3) (Offered 1947-48)

**102A-102B. Introduction to Spanish Classics**

Reading from several types of classical literature. Lazarillo de Tormes and other novels of Roguery; selections from Don Quixote, and the Cien Mejores Poesias Castellanas; one drama each from the works of Lope de Vega, Calderon, Alarcon, and Moreto; collateral reading and reports. Prerequisite: A grade of C in Spanish D or permission from the instructor.

Year course (3-3)

**104A-104B. Spanish-American Literature**

Reading from representative Spanish-American authors during the colonial, revolutionary and modern periods. Lectures, class reading, collateral reading and reports. Prerequisite: A grade of C in Spanish D or permission from the instructor. Students who do not read Spanish may take this course for credit in comparative literature, doing the required reading in English translation.

Year course (3-3) (Offered in 1946-47)

**105A-105B. Modern Spanish Drama**

The development of the drama of Spain from the beginning of the nineteenth century to the present time. Prerequisite: A grade of C in Spanish D or permission from the instructor.

Year course (3-3) (Offered in 1947-48)

**110A-110B. Novel and Short Story in Spain**

The development of the novel and short story in Spain from 1830 to the present time. Prerequisite: A grade of C in Spanish D or permission from the instructor.

Year course (3-3) (Offered in 1949-50)

**199. Comprehensive Reading and Survey Course**

Designed to fill up the gaps in the reading done in courses. Class meeting once a week for guidance, reports, and quizzes. Required of all seniors majoring in Spanish.

Spring (3)

## JOURNALISM

### Lower Division Courses

**51A-51B News Gathering and Reporting**

Study of news sources and types; practice in news and feature writing; newspaper organization; excursions and special lectures. Course planned for freshmen as a prerequisite to positions on all college publications.

Year course (3-3)

**53A-53B Applied Journalism**

Practice and projects in reporting news and feature stories and in other editorial work on *The Aztec, El Palenque, Del Sudoeste.*

Fall and Spring (1 to 3; 1 to 3)

## SPEECH ARTS

Lower division preparation of the Liberal Arts major in Speech Arts: At least 18 units of lower division courses in Speech Arts, including 1A, 1B, and six units chosen from 55A, 55B, 55C, 55D. Recommended: Aesthetics 1A, 1B, 50; Art 52A, 94.

Upper division requirements for the Liberal Arts major in Speech Arts: At least 18 units in upper division courses in Speech Arts, including 150, 163A, and six units from 155, 156A, 156B, 193. Also required: six units from English 117A, 117B, 152A, 152B, 192. Recommended: English 110, 116B; French 105A, 105B; Physical Education 164A, 164B; Spanish 105A.

Candidates for the teaching credentials in Speech Arts should refer to "Admission to Teacher Education Curricula" on page 21 or to the note regarding the Special Credential in Speech Arts on page 32.

### Lower Division Courses

**1A. Fundamentals of Public Speaking**

Training in fundamental processes of oral expression; method of obtaining and organizing material; outlining principles of attention and delivery; extemporaneous speaking and open forum debating; practice in construction and delivery of type forms of speech.

Fall and Spring (3)

**1B. Extemporaneous Speaking (or Forum Speaking)**

Practice in extemporaneous speaking on subjects of current interest both national and local, with stress laid on the organization and delivery of content material. Forum discussion will provide speakers with the opportunity of assembling facts quickly to meet such questions as any audience situation might demand.

Fall and Spring (3)

**1C. Oral Interpretation**

The oral interpretation of longer literary selections, both in poetry and prose; a fundamentals course designed for the beginning students in drama as well as those majoring in English literature.

Fall and Spring (3)

**1D. Advanced Interpretation**

Emphasis placed on stage poise and grace with adequate attention given to variations in the presentation of literary selections. Much opportunity is provided for individual and group creative work. No prerequisite. Class limited.

Spring (3)

**20. Corrective Speech**

Corrective laboratory training prescribed on the basis of vocalization tests made on Electro-Vox Recording Machine. Required of education majors who fail to meet speech requirements test. Private clinical assistance given to stutterers and lispers.

Fall and Spring (1) (9 weeks' course)

**55A-55B. Dramatic Production**

A course for first and second year students in which, through participation, they acquire an understanding of certain dramatic periods and types studied in English literature. Individual and group expression coordinated and developed in production of scenes, acts, and plays—a fundamental drama course emphasizing modern trends. No prerequisite.

Year course (3-3) (Offered in 1947-48 and alternate years)

**55C-55D. Dramatic Expression**

A course to help students realize and develop their creative abilities for expressing life and character through acting and writing. History, technique and theory of various dramatic forms studied, created and presented through workshop methods. A fundamental course planned for students desiring specialized training in drama or writing. Prerequisite: Consent of instructor.

Year course (3-3) (Offered in 1946-47 and alternate years)

**57A-57B. Radio Production**

Designed to present the background, theory and fundamentals of broadcasting. A basic course for radio speaking and writing.

Year course (2-2)

**60. Argumentation and Debate**

Obtaining and organizing of evidence and the construction and use of the brief; study and discussion of current issues; the presentation of formal and informal debates. Attention to intramural and intercollegiate debating.

Spring (3)

**61A-61B-61C-61D. Intercollegiate Debate**

Year course, each year (1)

**63A-63B-63C-63D. Verse Choir**

Participation in verse speaking chorus to develop quality, range of tone, and ability in dramatic visualization of poetry. Required for speech arts credential.

Fall and Spring (1-1)

## Upper Division Courses

### 108. Art of Interpretation

Analysis of various types of literature. Material chosen will emphasize the finer techniques of oral expression to develop the imagination, the emotional power reading skill and platform deportment in its varied phases. Prerequisite: one yea of college speech or equivalent.

Spring (3)

### 110. Recreational Reading

For description, see English 110.

Fall and Spring (1)

### 116B. The Elizabethan Drama

For description, see English 116B.

Spring (3) (Offered in 1947-48 and alternate years)

### 117A-117B. Shakespeare

For description, see English 117A-117B.

Year course (3-3)

### 150. Phonetics

Auditory and kinaesthetic analysis of the sounds of the English language Valuable as a corrective course in pronunciation and articulation. Required o speech majors and those seeking the Speech Correction Credential.

Fall (3)

### 152A. Survey of Drama: Comedy

For description, see English 152A.

Fall (3)

### 152B. Survey of Drama: Tragedy

For description, see English 152B.

Spring (3)

### 155. Advanced Dramatic Expression

For upper division students training for leadership in different fields as well as drama. More advanced forms of dramatic expression studied; creative abilities in interpretation, writing, acting, and stagecraft developed in relation to various subjects and activities conducted through individual research projects, group discussion and participation. Original work encouraged. Prerequisite: A fundamental drama course.

Spring (3) (Offered in 1947-48 and alternate years)

### 156A-156B. Advanced Dramatic Production

The study of more difficult dramatic types and periods in the production o poetic and prose literature of different countries. Arrangement, organization, creation, direction and presentation of classroom, recreational and other forms of performances. Practical participation and demonstration. A course designed for students majoring in other subjects as well as the theater arts.

Year course (3-3) (Offered in 1946-47 and alternate years)

### 157A-157B. Advanced Radio Production

Preparation and production of radio plays and various types of radio material

Year course (3-3) (Offered in 1946-47 and alternate years)

### 158. Advanced Radio Techniques

Designed to enable experienced students to specialize in different fields of the radio. Special attention given to original preparation and production of various types of radio material including plays, transcriptions, etc. Permission of instructor necessary for registration.

Fall (3) (Offered in 1947-48 and alternate years)

**163. Rhythm, Pantomime and Choric Verse**

A course combining bodily movement with group speaking. Presents the fundamentals of rhythm and pantomime in different forms of dramatic expression.

Spring (3) (Offered in 1947-48 and alternate years)

**175. Major Speech Disorders**

Clinical survey of newest methods of speech correction with special emphasis given to stammering and cleft-palate speech. One of required courses for Special Corrective Credential.

Spring (3)

**191. Organized Discussion**

Consideration of the symposium, the panel, the open forum, the business session, and varieties of conference speaking. Emphasis upon organization and presentation. Attention to parliamentary procedure for informal groups. Open only to senior and graduate students.

Fall (3)

**192. The English Language**

For description, see English 192.

Fall (3)

**193. Advanced Dramatic Interpretation**

A more advanced treatment of the types of work included in Speech Arts 155. Prerequisite: A fundamental course in drama. Open only to senior and graduate students.

Fall (3)

**194. Advanced Radio Techniques**

Preparation and production of radio drama and different types of continuity. Experience at professional studios. Emphasis upon radio in education. Broadcasting. Open only to senior and graduate students.

Spring (3)

**201. Advanced Rhythm, Pantomime and Choric Verse**

History and appreciation of their use in drama, modern applications including motion picture, radio and television. Demonstrations. Prerequisite: graduate standing.

Spring (3)

**221. Articulatory Problems of Speech**

Analysis and discussion of articulatory problems as encountered in public school work, particularly in California. Required of all students for the speech correction credential. Prerequisite: graduate standing and Speech Arts 150.

Fall (3)

# DIVISION OF LIFE SCIENCES

## BIOLOGICAL SCIENCES

The courses offered in Biological Sciences are listed below. Anatomy, see Zoology, page 81; Physiology, page 81; and Zoology, page 81.

## BACTERIOLOGY

### Lower Division Courses

**1. General Bacteriology**

An introduction to bacteriology. Effects of physical and chemical agencies upon bacteria; biochemical activities of bacteria; microscopic examination and cultivation of bacteria; the bacteria of air, water, soil, milk and dairy products, other foods; industrial applications. Introduction to disease-producing bacteria. Required of pre-nursing students. Two hours of lecture and six hours of laboratory per week. Prerequisite: Chemistry 1A or 2A.

Fall (4)

**199. Special Problems**

Work other than is outlined in the regular courses. Admission only by consent of the instructor with whom the work is to be done. Credit and hours to be arranged in each case. Open to students who have completed at least fifteen units of work in the department (including courses in Bacteriology and Chemistry) with grades of A or B.

Fall or Spring (1 or 2)

## BIOLOGY

### Lower Division Courses

**1. Survey of Biology**

A survey of life science, stressing the development of modern concepts in the fields of plant and animal science, bacteriology, genetics, and physiology. Emphasis is placed on the relationships of biology to modern life and the application of scientific analysis to every day problems. Three lectures and one hour of demonstration and discussion per week. Not open to students with credit for Biology 10A-10B, Zoology 1A-1B, or Botany 2A-2B.

Fall (3)

**10A-10B. General Biology**

A year course in life science, more extensive than "Biology 1." Continues throughout the year and includes a three-hour laboratory period, and two hours of lectures per week. Designed for those who do not expect to specialize in zoology or botany; not open for credit to students who have taken Zoology 1A, Biology 1, or Botany 2A. Students who have taken 10A-10B may elect Zoology 1B or Botany 2A, 2B for credit.

Year course (3-3) Begins in Fall only

**A. Mathematics of Solutions and Dosage**

Arithmetic review with computing of dosage, percentage of solutions, apothecaries weights and graph making. Two hours per week.

Fall (2)

## BOTANY

Lower division preparation for advanced work in botany: Botany 2A, 2B, 4, and Chemistry 1A, 1B, 8. Recommended: German, French, and elementary courses in other biological sciences.

### Lower Division Courses

**2A. General Botany**

Fundamentals of structure and general behavior of seed plants. Two lectures or recitations and six hours of laboratory per week.

Fall (4)

**2B. General Botany**

A continuation of 2A treating morphology and relationship of the lower plants nd including an introduction to classification of seed plants. Lectures and laboratory s in 2A.

Spring (4)

**4. California Plants**

Classification and ecology of representative orders of wild flowers, trees, and chaparral of the San Diego region, including practice in the use of keys. One lecture nd three hours laboratory per week. Occasional Saturday field trips.

Spring (2)

**5. Cultivated Trees and Shrubs**

Recognition of the common cultivated trees and shrubs of the San Diego region. Trips to local parks and private gardens. Three hours per week laboratory or field work.

Fall (1) (Not offered in 1946-47)

### Upper Division Courses

**102. Plant Geography**

Lectures and field work on the principles of geographical distribution of plants. Prerequisite: Botany 2A-2B, or 4, or equivalent.

Fall (2) (Offered in 1945-46 and alternate years)

**104. Plant Taxonomy**

Identification, classification and distribution of representative orders of flowering plants. One hour of lecture and six hours per week of laboratory and field work. Prerequisites: Botany 2A-2B, or 4.

Spring (3) (Offered in 1945-46 and alternate years)

**199. Special Problems**

Work other than is outlined in the above courses. Admission by consent of the instructor with whom the work is to be done. Credit and hours to be arranged in each case. Open only to students who have completed at least fifteen units of Botany with a grade of A or B.

Fall and Spring (1 or 2)

## PHYSIOLOGY

### Lower Division Courses

**1A. Human Physiology**

A lecture course considering the functions of the human body. Prerequisites: Elementary chemistry and high school or college biology or zoology. Three hours of lecture per week. Credit reduced to 2 units, for students having credit for Zoology 20.

Spring (3)

**1C. Human Physiology**

A study of the human functions through laboratory experiments and demonstrations. Prerequisites: Physiology 1A completed or in progress. Six hours of laboratory per week.

Spring (2)

## ZOOLOGY

Lower division preparation for the liberal arts major in zoology: Zoology 1A, 1B, and high school chemistry, Chemistry 1A-1B or 2A-2B. Recommended: German or French, Botany 2A, 2B, 4.

Liberal arts major in zoology: (1) At least a C average in upper division major courses. (2) Twenty-four units of upper division courses in zoology or eighteen in the major subject and six in related courses in botany, chemistry, physics, physiology or bacteriology.

Students preparing to teach science in the junior high school should try to include courses in zoology, botany, physiology, bacteriology, physics, chemistry (at least high school chemistry). Courses designed to help the student get acquainted with wild life of the region should be included. Recommended: Botany 4, 104, 102; Zoology 112, 113A, 113B, 121.

## Lower Division Courses

### 1A. General Zoology

An introduction to animal biology dealing with structure, functions, and evolution of animal life. Laboratory work supplementing the lectures and based on the study and observation of living and preserved material. Valuable to the general student as well as to the biology specialist, acquainting him with the fundamental facts and theories of biology as they pertain to animal life. Two lectures and six hours of laboratory per week. Students who have credit for Biology 10A-10B receive no credit for Zoology 1A but receive credit for Zoology 1B.

Fall (4)

### 1B. General Zoology

A continuation of 1A. The structure, relationships, and classification of the chordates. Two lectures and six hours of laboratory per week. Prerequisite: Zoology 1A or Biology 10B.

Spring (4)

### 4. Microtechnique

Introduction to methods of preparation of tissues for microscopic study. Six hours of laboratory per week and one hour of lecture. Prerequisite: elementary chemistry and biology.

Spring (3)

### 8. Human Anatomy

A study of human structure through the use of models, prepared dissections and microscope slides. Prerequisite: high school biology, Biology 10A, 1, or Zoology 1A. Two hours of lecture and three hours of laboratory per week. Required of prenursing students. Credit reduced to 2 units if student has credit for Zoology 20.

Fall (3)

### 20. Human Anatomy and Physiology

An elementary course in human anatomy and physiology. Prerequisite: High school biology, or Biology 1 or 10A or Zoology 1A. Lectures three hours per week. Credit reduced to 2 units if student has credit for Zoology 8 or Physiology 1A.

Fall and Spring (3)

## Upper Division Courses

### 100. Embryology

The development of vertebrates as illustrated by the frog, chick, and pig. Three hours of laboratory and three hours of lecture and quiz per week. Prerequisite: Zoology 1B or Biology 10B.

Spring (4)

### 104. Microtechnique

Introduction to methods of preparation of tissues for microscopic study. Six hours of laboratory and one hour of lecture per week. Prerequisite: elementary chemistry and biology.

Spring (1)

### 106. Comparative Anatomy of the Vertebrates

Dissection, study and comparison of organ systems of typical vertebrates. Two hours per week of lecture and six hours of laboratory. Prerequisite: Zoology 1B or Biology 10B.

Fall (4)

**08. Human Anatomy**

Lectures and laboratory work of Human Anatomy 8 with an additional hour of eminar each week. Open only to upper division students by special arrangement.

Fall (3)

**12. Marine Invertebrates**

Identification and study of behavior and life histories of invertebrates of the San Diego region. Frequent collecting trips to the beaches required. Prerequisite: Zoology 1A or Biology 10B. One hour of lecture and six hours of laboratory or field work per week.

Fall (3)

**113A. Taxonomy and Natural History of the Mammals**

Frequent field trips and the identification of museum material. Three hours of aboratory per week.

Spring (1)

**113B. Ornithology**

The study and identification of birds, especially those of the Pacific Coast and the San Diego region. One hour of lecture and six hours per week of laboratory, or field excursions. Prerequisite: Zoology 1B or Biology 10B.

Spring (3)

**114A. Genetics**

General introductory course designed to acquaint the student with the fundamental principles of heredity and variation. Special attention given to the Mendelian interpretations of the facts of inheritance. Two lectures per week.

Fall (2)

**114B. Evolution**

The development of theories of evolution. Two lectures or discussion periods per week.

Spring (2)

**121. General Entomology**

The classification, life history, structure, and physiology of insects. Prerequisite: Zoology 1A or Biology 10B. Two hours of lecture and six hours of laboratory per week.

Spring (3)

**122. Systematic Entomology**

Classification of insects with especial emphasis on a group of insects of the student's choice. •To be taken with or to follow 121. May be repeated for credit but with a total of not more than 3 units. Three to six hours of laboratory work each week.

Spring (1 or 2)

**123. Economic Biology**

Study of the uses of plants and animals to man and the ways in which they injure him and his possessions. Consideration is also given to general methods of control and conservation. Prerequisite: Zoology 1A, Biology 1, or Biology 10B.

Fall (2)

**124. Scientific Illustration**

Instruction and practice in various methods used to illustrate scientific publications. Recommended course in preparation for this one: Art A-B.

Fall (2)

### 126. Medical Entomology

The role of insects and other arthropods in transmission and causation of huma diseases. Three hours of laboratory and two hours of lecture per week. Prerequisite Zoology 1A or Biology 10B.

Fall (3)

### 130. Readings in Biology

Reading from a suggested bibliography with informal class discussion of topics Subjects discussed will include history of biology, biological principles, ecology economic zoology, zoogeography, breeding habits, animal behavior.

Spring (2)

### 199. Special Study

Work other than is outlined in the above courses. Admission only by consent o the instructor with whom the work is to be done. Credit and hours to be arranged i each case. Open to students who have completed at least fifteen units of Zoolog with a grade of A or B.

Fall and Spring (1 or 2)

# DIVISION OF PHYSICAL SCIENCES

## ASTRONOMY

Lower division preparation in Astronomy desirable for advanced work: stronomy 1, 2, 3, and 9; Mathematics 3A-3B, 4A-4B; Physics 1A-1B and 1C-1D; a eading knowledge of French and German desirable.

### Lower Division Courses

**. Descriptive Astronomy**

A cultural course planned to develop an appreciation of astronomy with special mphasis on the solar system. Only calculations of an elementary nature are used. Especial attention given to the methods and instruments by means of which astronomi-al knowledge has been gained. A six-inch John Byrne refractor and an eight-inch eflecting telescope are available for observation. Prerequisites: Elementary algebra and plane geometry.

Fall and Spring (3)

**. Modern Astronomy**

A study of sidereal astronomy and astrophysics in the light of modern research, specially photographic and spectrographic. Prerequisite: Astronomy 1 and a knowl-dge of physics or permission of the instructor.

Spring (3)

**. Surveyor's Course in Practical Astronomy**

The principles of spherical astronomy adapted to the needs of engineering tudents. Computation and observation. Prerequisite: Surveying 1A or permission of the instructor. Astronomy 1 and 9 desirable.

Spring (2)

**. Practice in Observing**

A laboratory course designed particularly to go along with and to supplement Astronomy 1. The course will include constellation study, use of astronomical coordinates, elementary methods of determining time and latitude, and descriptive observations of celestial objects with the six-inch telescope. Prerequisite: Astronomy 1 or registration in Astronomy 1 or permission of the instructor.

Fall or Spring (1)

**12. Elementary Navigation**

A study of compass corrections, drift problems, time, line of position, use of celestial coordinates, Bowditch Tables, etc. A few class hours at the close of the term are devoted to the use of tables such as Ageton, Dreisonstok and H. O. 214 for the solution of astronomical triangle. Offered if demand is sufficient. Prerequisite: Astronomy 1 or permission of instructor.

Fall (2)

### Upper Division Courses

**100. Special Problems**

Admission by consent of instructor. Credit and hours to be arranged in each case. Open to students who have completed three units in astronomy.

Fall and Spring (1 or 2)

**105. Historic Development of Astronomy**

A study of the more important problems and astronomical concepts in the light of their historical development. Particular attention is given to the biography and contributions of the more important astronomers, such as, Galileo, Kepler, Newton, Herschel, and Bessel.

Spring (3)

**107. Method of Least Squares and Computing Practices**

Fundamental principles and processes and applications in the fields of astronomy, physics, and engineering.

Spring (3) (Not offered in 1946-47)

## CHEMISTRY

Lower division preparation for the liberal arts major in chemistry: Chemist 1A-1B with an average grade of C or better, Chemistry 7-8, Physics 2A-2B and 3A-3 or their equivalent, Mathematics 3A-3B or the equivalent, and a reading knowledge German. Students planning to do graduate work in chemistry or to transfer to certai other colleges and there work for a degree with a major in chemistry, are advised to ta Physics 1A-1B-1C-1D and Mathematics 3A-3B-4A-4B in place of the courses list above.

Liberal arts major (upper division): A minimum of twenty-four upper divisio units in chemistry including Chemistry 105A-105B, 110A-110B and 111A-111B. T choice of related minors and the organization of the course of the major student mu follow a definite plan approved by the department.

For requirements for liberal arts major in physical science, see page 92.

### Lower Division Courses

**1A-1B. General Chemistry**

The general principles and laws of chemistry, and a description of the elemen and their compounds. Two lectures, one quiz and two laboratory periods per wee The laboratory work in the second semester consists of work in qualitative analysi Prerequisites: At least two years of high school mathematics. Recommended: Hig school chemistry and physics.

Year course (5-5)

**2A-2B. General Chemistry**

A general course for those not intending to take advanced courses in chemistr The work in the first semester stresses inorganic chemistry and fundamental pri ciples; that of the second semester covers an introduction to organic and biochemistr Emphasis placed on applications of chemistry to everyday life. Two lectures and o laboratory period per week. Required of pre-nursing students and recommended f those desiring chemistry as part of a liberal education.

Year course (3-3)

**7-8. Organic Chemistry**

A general consideration of the carbon compounds (both aliphatic and aromati and their derivatives; their synthesis constitution, and properties, and the principl involved. Two lectures and one laboratory period per week first semester; one lectu and two laboratory periods per week second semester. Prerequisite: Chemistry 1A-1

Year course (3-3)

### Upper Division Courses

**105A. Quantitative Analysis**

The principles of gravimetric and volumetric analysis. Discussions of the theo of quantitative analysis and practice in the standardization of reagents and analys of samples. One lecture and two laboratory periods per week. Prerequisite: Che istry 1A-1B.

Fall (3)

**105B. Advanced Quantitative Analysis**

Advanced work in the theory and practice of volumetric, gravimetric a electroanalysis. One lecture and two laboratory periods per week. Prerequisit Chemistry 105A.

Spring (3)

**110A-110B. Physical Chemistry**

Lectures and problems on theoretical principles of chemistry. Prerequisite Physics 1A-1B or 2A-2B, a knowledge of calculus and Chemistry 105A which m be taken concurrently. With the approval of the instructor, advanced courses physics may be substituted for Chemistry 105A.

Year course (3-3)

**1A-111B. Physical Chemistry—Laboratory**

Physico-chemical problems and measurements. Two laboratory periods per ek. Prerequisites: Credit or registration in Chemistry 110A-110B.

Year course (2-2)

**2A-112B. Industrial Analysis**

A laboratory course including the analysis of fuels, petroleum products, water, d gas. Prerequisite: Chemistry 105A which may be taken concurrently. (3-3)

**4. Biochemistry**

An introductory lecture course covering the carbohydrates, proteins, fats and e changes which they undergo in digestion and metabolism as well as a consideration the vitamins and other accessory food factors and their importance to the body. brief discussion of the chemistry of plant life. Prerequisites: Credit or registration Chemistry 7, 8.

Spring (3) (Offered in 1947-48 and alternate years)

**8. Colloid Chemistry**

A lecture course covering the theoretical principles of colloid chemistry and the eparation, properties and practical applications of colloids. Prerequisite: Chemtry 7-8.

Fall (2) (Offered in 1946-47 and alternate years)

**23-124. Organic Preparations**

A laboratory course illustrating some of the more important synthetic methods organic chemistry. Laboratory and conferences. Prerequisite: Chemistry 7-8. reading knowledge of German recommended.

Beginning either Fall or Spring (1 to 5—1 to 5)

**25. History of Chemistry**

Development of the science of chemistry from the time of the alchemists to the resent. Conducted on the reading, report, and seminar basis. Prerequisite: Chemtry 7, 8.

Fall (2) (Not offered in 1946-47)

**27. Advanced Inorganic Chemistry**

A detailed study of the Periodic Table. Discussion of complex inorganic comounds and oxidation-reduction potentials. Prerequisite: Chemistry 1A-1B and upper ivision standing.

Fall (2) (Offered in 1946-47 and alternate years)

**44. Industrial Chemistry**

Industrial stoichiometry, flow sheets, flow of fluids and unit processes. Lecures, problems, and reports. Prerequisites: Chemistry 1A-1B, Physics 1A-1B or A-2B.

Spring (3)

**99. Special Problems**

Supervised individual work in specialized branches of chemistry. Admission nly by the consent of the instructor. Hours and credit to be arranged in each case. nly open to upper division students who have shown their ability to do A or B ork in Chemistry.

Fall and Spring (1-3)

## ENGINEERING

(For curriculum in engineering see pages 36-37)

### Lower Division Courses

**1A-1B. Plane Surveying**

Use and adjustment of surveying instruments, computations and map-making, together with a study of land, topographic, city, and mine surveying. Two instruction periods and one three-hour period for field work and mapping each week. Prerequisites: Trigonometry and Mechanical Drawing, or equivalent, and sophomore standing.

Year course (3-3)

### S3. Summer Class in Surveying

Practical field problems in reconnaissance, triangulation, location and topographic surveys. Observations for meridian, time and latitude. Precise work in linear and angular measurements. Development of self-reliance, accuracy, and professional skill on the part of the student. Four weeks course held in the mountains near San Diego. For details regarding location of camp, date of registration, date of opening, and other arrangements, a special announcement of the surveying camp may be secured at the Registrar's Office. Offered if demand is sufficient. Prerequisite: Surveying 1A-1B.

Summer (3)

### 21. Descriptive Geometry

Fundamental principles of descriptive geometry and their application to problems of engineering. Lectures and drafting. Prerequisites: One year of mechanical drawing, and sophomore standing.

Fall (3)

### 22. Machine Drawing

Design and drawing of simple machine parts with emphasis upon the production of standard drawings. Lectures and drafting. Prerequisite: Engineering 21, Mathematics 3A-3B.

Spring (3)

### 23. Materials of Construction

Manufacturing processes, structural properties and adaptability of the principal materials used in engineering. Lectures; Prerequisite: Sophomore standing.

Spring (2)

## Upper Division Courses

### 100A-100B. Elements of Electrical Engineering

Theory and characteristics of electrical equipment with emphasis on industrial applications.

**100A. Direct current circuits, generators and motors.** Introduction to alternating current circuits.

**100B. Alternating current circuits, transformers, alternators, induction on synchronous motors, conversion apparatus and transmission lines.**

Lectures and problems. Prerequisites: Mathematics 4A, Physics 1C or permission of the instructor.

Year course (3-3) (Offered in 1947-48 and alternate years)

### 105. Hydraulics

A general course in hydraulics including the fundamental principles of hydrostatics and hydrodynamics applied to the flow of water through orifices, over weirs, through pipes and canals. Lectures and problems. Prerequisites: Mathematics 4A, Physics 1C. Recommended: Physics 105A-105B.

Spring (3) (Offered 1946-47 and alternate years)

### 123. Materials of Construction

Essentially the same as Engineering 23 except that students will be expected to investigate more fully some particular material or process and prepare a written report upon it. Prerequisites: Chemistry 1B, Junior standing.

Spring (2)

### 128. Elements of Heat Power Engineering

Fundamental consideration of fuels, combustion, steam, boilers, furnaces, chimneys, steam engines, steam turbines and auxiliaries, internal combustion engines. Lectures and Problems. Prerequisites: Mathematics 4A, Physics 1B.

Fall (3) (Offered 1946-47 and alternate years)

## GEOLOGY

Department requirement in Geology for liberal arts major in Physical Science includes in addition to Geology 1A-1B, the completion of: Chemistry 1A-1B, Physics 1A-1B-1C-1D or 2A-2B; 3A-3B. Students preparing for advanced work in Geology may add Engineering 21 and Geology 21A. Geology 2A may be substituted for Geology 1A in department prerequisite requirements provided the additional necessary unit of laboratory work is completed.

French or German, Engineering 1A-1B and Geology 21A-21B are recommended.

### Lower Division Courses

**1A. Physical**

The composition, origin, and distribution of earth materials, and their modification through mechanical and chemical process of change. Three lectures and one three-hour laboratory period weekly with related field study during the semester. (Not open to students who have had Geology 2A except for one unit upon the completion of the laboratory section.)

Fall (4)

**1B. Historical**

Theories of earth origin, and the evolutionary history of the earth as traced through rock and fossil records. Consideration of the Paleontologic Sequence. Three lectures and one three-hour laboratory period weekly, with arrangement for field study and conference during the semester. Prerequisite: Geology 1A or equivalent.

Spring (4)

**2A. General**

Similar to Geology 1A but without laboratory. Emphasis upon origin and development of earth's surface features. Open to all students except physical science majors or those already presenting credit in Geology 1A. Two lectures and one demonstration and discussion hour weekly.

Fall (3)

**2B. Physiography of United States**

A study of the land forms of the United States and their physiographic history as illustrative of universal geologic conditions. Two lectures and one discussion hour weekly. Prerequisite: Geology 1A or 2A.

Spring (3)

**21A-21B. Mineralogy**

Study of the common minerals and rocks. Use of the blowpipe and simple chemical reagents but with emphasis upon sight determination. Prerequisite: Geology 1A and high school chemistry, or equivalents.

Year course (3-3) (Offered in 1946-47 and alternate years)

### Upper Division Courses

**100. Structural Geology**

The evolution and description of the structural and topographical features of the earth. Faulting, folding, and orogenic forces with practical illustrations from the North American Continent and emphasis on California geologic conditions. Lectures, discussions, and occasional field trips. Prerequisite: Geology 1A-1B or 2A-2B.

Fall (3) (Offered in 1947-48 and alternate years)

**101. Geologic Problems**

Reconnaissance of adjacent areas with elementary mapping; or directed reading and group discussion of California Geology; or selection and preparation of materials for the museum collections. Prerequisite: Geology 1A-1B. Registration subject to approval of instructor.

Fall and Spring (1-4)

## MATHEMATICS

Lower division preparation for the liberal arts major in mathematics: Mathematics 3A, 3B, 4A, with an average grade of C or better. Two or more of the following are recommended: Astronomy 1, Economics 1A-1B, 2, Engineering 21, French A-B, German A-B, Physics 1A-1B or 2A-2B, Surveying 1A.

Liberal arts major (upper division): Twenty-four units including at least eighteen in upper division mathematics, the others being selected from Astronomy 107, Chemistry 111A-111B, 144, Physics 105A-105B, 112 and other approved courses. The major should be arranged in consultation with the chairman of the department and completed with a grade of C or better.

### Recommended Minor

### Lower Division

The student in the lower division is introduced to analytic geometry, which in turn shows the varied relations existing between algebra, geometry, and trigonometry, all of these merging in the calculus. Constant use of arithmetic is found in the applied courses.

The courses taken in the lower division will vary according to the student's accomplishment in high school and to his aptitude in the subject. He will be guided by the counsel of the departmental representative regarding preparatory courses. All students will take the core course, Mathematics 3A-3B, or its equivalent. Many will be able to take 4B as well. One of the following applied courses in Mathematics should be included in the fifteen semester units of lower division or in the upper division: Economics 2, Mathematics of Finance; Engineering 1A, Plane Surveying; Engineering 21, Descriptive Geometry; Astronomy 1, Descriptive Astronomy; Physics 1A or 2A, Mechanics; Economics 140, Statistics.

### Upper Division

Not less than nine semester units to be selected under the guidance of the departmental representative from the following: Mathematics 101, 104, 106, 111, 117, 119.

### Description of Courses

Refer to the College Bulletin, page 87, for description of courses in Engineering; page 85 for Astronomy; page 92 for Physics; page 99 for Economics.

### Lower Division

**A-B. Basic Mathematics**

A year course roughly equivalent to the two year sequence in algebra and geometry as given in the high school. More time is given to arithmetic and numerical trigonometry and less to demonstrative geometry.

Year course (3-3)

**C. Intermediate Algebra**

The course begins with an extensive review of elementary algebra. Topics covered include quadratic equations, simultaneous equations, ratio and proportion, variation, arithmetic and geometric progressions, binominal expansion and logarithms. It is equivalent to the second year-course in high school algebra. Prerequisite: Elementary Algebra and Geometry or Mathematics A-B.

Fall and Spring (4)

**D. Trigonometry**

Roughly equivalent to the high school course in plane trigonometry but with more attention than is often given to those aspects needed in analytic geometry and calculus. Prerequisites: Intermediate algebra.

Fall and Spring (3)

**E. Solid Geometry**

A course in intuitive solid geometry with much attention to the calculation of surfaces and volumes for the simpler solids and for certain others used in industry. Prerequisite: Intermediate algebra.

Fall (2)

**S. Slide Rule**

Theory and use of the slide rule. Practice in performing the fundamental operations of arithmetic. Some attention is given to more involved computations. Prerequisites: Intermediate algebra and either trigonometry or solid geometry. The class meets twice a week.

Fall and Spring (1)

**1. College Algebra**

Review of algebra and trigonometry. New material includes identities, graphs, solution of algebraic and trigonometric equations, determinants, and mathematical proofs. Prerequisites: Two years of algebra, and trigonometry.

Fall and Spring (3)

**3A. Plane Analytic Geometry**

Equations and loci, conic sections, coordinate transformations, cartesian and polar coordinates, and parametric representation. Prerequisites: Algebra, plane geometry, intermediate algebra, and plane trigonometry, with a high degree of proficiency, or a satisfactory grade in Mathematics 1, College Algebra. In order to determine the degree of proficiency, examinations in intermediate algebra and plane trigonometry will be given during the first week of the semester. Students falling below the required standard will be assigned to Mathematics 1.

Fall and Spring (3)

**3B. First Course in Calculus**

Introduction to differential and integral calculus, with applications to problems involving variable rates and summations. Prerequisites: Mathematics 3A.

Spring (3)

**4A. Second Course in Calculus**

Differentiation, integration, infinite series, and a brief treatment of solid analytic geometry. Prerequisite: Mathematics 3B. Solid geometry is recommended.

Fall (3)

**4B. Third Course in Calculus**

Partial differentiation, successive integration, and applications. Prerequisites: Mathematics 4A.

Spring (3)

### Upper Division Courses

**101. Elementary Geometry for Advanced Students**

Non-Euclidean Geometry, transformations, constructions with ruler and compasses, and famous problems. Prerequisites: Mathematics 4A.

Fall (3) (Offered 1946-47 and alternate years)

**104. History of Mathematics**

History of mathematics down to early modern times. Prerequisite: Mathematics 3A-3B.

Fall (3) (Offered in 1947-48 and alternate years)

**106. Projective Geometry**

Concurrence of lines, collinearity of points and other properties of figures not altered by projections; construction and study of ellipses, hyperbolas and parabolas by means of projections. Prerequisites: Mathematics 3A-3B.

Fall (3) (Offered in 1947-48 and alternate years)

**111. Theory of Algebraic Equations**

Determinants, complex numbers, and theory of algebraic equations. Prerequisite: Mathematics 3A and 3B.

Spring (3) (Offered in 1946-47 and in alternate years)

### 117. Intermediate Calculus

Essentially the same as Mathematics 4B with additional special work for advanced students. Prerequisites: Mathematics 3A, 3B, and 4A. Credit not allowed for both 4B and 117.

Spring (3)

### 119. Differential Equations

Ordinary differential equations of first and second order, with applications. Prerequisite: Mathematics 4A-4B (4B concurrently if desired).

Spring (2) (Offered in 1947-48 and alternate years)

### 140. Probability and Statistics

Statistical theory and method from the mathematical standpoint; applications in social and natural science. Prerequisite: Mathematics 4A.

Fall (3) (Offered in 1946-47 and alternate years)

### 199. Special Study

Study of materials mainly supplementary to the courses listed above. Prerequisites: Average grade of B or better in at least 12 units beginning with Mathematics 3A.

Fall and Spring (1 or 2, each semester)

## PHYSICAL SCIENCE

Lower division preparation for the liberal arts major in physical science and for the junior certificate: Fulfillment of the respective departmental lower division requirements for upper division work in at least two of the following sciences: Astronomy, chemistry, geology, and physics. Recommended: A reading knowledge of French and German.

Liberal arts major (upper division) in physical science, required: Twenty-four units of upper division work in two or more of the physical sciences: Chemistry, geology, and physics, with a minimum of six units in each of two of these sciences.

### Lower Division Courses

### 1A. Introduction to Physical Science

A survey course dealing with the nature of man's physical universe. Emphasis will be upon materials chosen from topics in astronomy and physics to show the nature and development of the scientific method and man's use of energy. Not open to students who have had a high school or college course in either physics or astronomy. May be taken with or without plans to continue with 1B.

Fall and Summer (3)

### 1B. Introduction to Physical Science

A continuation of Physical Science 1A. Emphasis will be upon units chosen from geology and chemistry to show the origins of natural materials and their use by man in the modern world. Not open to students who have had a high school or college course in either chemistry or geology. May be taken with or without credit in Physical Science 1A.

Spring (3)

### 10. Elementary Photography

This course seeks to provide an elementary knowledge of dark room techniques and the theory of photography including printing, enlarging, and developing. Two lectures and one three-hour laboratory required each week.

Fall and Spring (3)

## PHYSICS

Lower division preparation for the liberal arts major in physics and for the junior certificate: Physics 1A-1B-1C-1D; Chemistry 1A-1B; Mathematics 3A-3B and 4A-4B, or their equivalents. Recommended: A reading knowledge of French and German. A maximum of 12 units of lower division physics may be applied toward the degree.

Liberal arts major (upper division) in physics, required: Twenty-four units of upper division work in physics including Physics 105A-105B and 110A-110B.

Six of the twenty-four units may be elected in related subjects and deviations from these requirements may be made on consultation with the chairman of the department.

## Lower Division Courses

### 1A. Mechanics of Solids

A development of the fundamental ideas which underlie the subject of physics and the application of them in the discussion of practical problems. Lectures, text-assignments, problem sets, and experimental laboratory work. Two lectures, and one laboratory period each week. Prerequisites: High school physics or chemistry, and trigonometry. Students deficient in any part of this requirement may enroll with permission of the instructor.

Fall (3)

### 1B. Mechanics of Fluids and Heat

A continuation of Physics 1A. Two lectures and one laboratory period each week.

Spring (3)

### 1C. Electricity and Magnetism

A continuation of Physics 1A and Physics 1B in the sophomore year. Two lectures and one laboratory period each week.

Fall (3)

### 1D. Sound and Light

A continuation of Physics 1A, Physics 1B, and Physics 1C. Two lectures and one laboratory period each week.

Spring (3)

### 2A. General Physics

Properties of matter, mechanics, and heat. A nonengineering course. Lectures, demonstrations, and discussions. Prerequisite: Two years of high school mathematics.

Fall (3)

### 2B. General Physics

A continuation of Physics 2A. Sound, light, electricity, and magnetism.

Spring (3)

### 3A. Physical Measurements

Laboratory work in mechanics and heat. Usually taken in conjunction with Physics 2A.

Fall (1)

### 3B. Physical Measurements

Laboratory work in sound, light, and electricity. A continuation of Physics 3B. Usually taken in conjunction with Physics 2B.

Spring (1)

## Upper Division Courses

### *105A-105B. Analytical Mechanics

Treatment of fundamental principles of statics, kinematics and dynamics of particles and rigid bodies. Prerequisites: Physics 1A-1B or 2A-2B and a working knowledge of calculus.

Year course (3-3)

### *106. Optics

A review of reflection, refraction and dispersion, with applications to optical instruments, followed by a survey of phenomena indicative of the physical nature of light: interference, diffraction, polarization, and spectral radiation. Prerequisite: Eight units in physics.

Fall (3)

---

* Will be offered if there is sufficient demand.

***106L. Optical Measurements**

Laboratory work to accompany Physics 106.

Fall (1)

***107A-107B. Electrical Measurements**

Laboratory work designed to accompany Physics 110A-110B. Emphasis placed on the theory and use of electrical measuring instruments.

Year course (1 or 2 units for the year) (Offered in 1947-48 and alternate years)

***108. Modern Physics**

An introduction to physical investigations of the last half-century. Atomic structure and quantum theory in the light of high-vacuum phenomena, series in optical spectra, natural and induced radioactivity, and allied subjects. Prerequisite: Eight units in physics.

Spring (3)

***108L. Modern Physics Laboratory**

Laboratory, to accompany Physics 108.

Spring (1)

***110A. Introduction to Electricity and Electromagnetism**

Elements of the mathematical theory of electrostatics, of magnetostatics and magnetism, and of steady and varying currents. Students are encouraged to accompany the course with 1 unit of laboratory work. Prerequisites: Eight units in physics, and Mathematics 3A-3B.

Fall (3) (Offered in 1947-48 and alternate years)

***110B. Principles of Electromagnetism and Electronics**

A more complete study and an extension of the material surveyed in Physics 110A, illustrated with practical applications. Prerequisites: Physics 110A and consent of the instructor.

Spring (3) (Offered in 1947-48 and alternate years)

***112. Advanced Heat and Thermodynamics**

Thermal properties of matter. An introduction to the kinetic theory of gases and the laws of thermodynamics. Prerequisites: Eight units in physics and a working knowledge of calculus.

Spring (3) (Not offered in 1946-47)

***112L. Advanced Heat Laboratory**

Laboratory work in thermal expansion, specific heat, heat of combustion, radiation and other related topics in advanced heat. Designed to accompany Physics 112.

Spring (1) (Not offered in 1946-47)

***113L. Pyrometry Laboratory**

Laboratory work in the calibration and use of various temperature measuring devices. Prerequisite: Eight units in physics.

Spring (1) (Offered in 1947-48)

***114. Sound Waves and Acoustics**

A study of wave motion and its applications to the production, transmission and reception of sound. Architectural acoustics, speech and hearing, acoustical and musical instruments. Prerequisite: Eight units in physics.

Fall (3) (Offered in 1947-48)

***114L. Advanced Sound Laboratory**

Laboratory work in the problems of wave motion, standing waves, velocity of sound in various media, diffraction and interference, of sound. Designed to accompany Physics 114.

Fall (1) (Offered in 1947-48)

---

* Will be offered if there is sufficient demand.

### 115L. Applied Acoustical Measurements

Laboratory work in various practical applications of acoustics. Directional and frequency characteristics of loudspeakers and microphones. Architectural acoustics. Prerequisite: Eight units in physics.

Fall (1) (Not offered in 1946-47)

### 199. Special Study

Reading or work on special problems in physics. Admission by consent of the instructor. Credit and hours to be arranged in each case. Open to students who have completed at least eight units of work in the department with grade of A or B.

Fall and Spring (1 or 2-1 or 2)

# DIVISION OF SOCIAL SCIENCES

## ANTHROPOLOGY

Lower division preparation for the liberal arts general major with concentration in anthropology: Anthropology 1A-1B, Sociology 50A, 50B, Geography 1, 2. Recommended: Geology 1A-1B, Spanish, German or French. See requirements for the general major, page 18.

### Lower Division Courses

**1A-1B. General Anthropology**

Origin and antiquity of man. Theories of human descent. Classification of races. Origin and early development of civilization.

Year course (3-3)

**54. Social Anthropology**

An anthropological study of social institutions in primitive and civilized societies. The evolution of family organization, religion, property right, and government traced in elementary and advanced civilization.

Spring (3) (Not offered in 1946-47)

### Upper Division Courses

**151A. The North American Indian**

Pre-Columbian cultures of the North American Indian. The origin and migration of New World peoples. Industries, arts, crafts, social organization, religion and other phases of American Indian civilization.

Fall (3)

**151B. Indian Civilizations of Middle America**

The development of civilization in Pre-Columbian Mexico and Central America: Aztec, Mayan, and related cultures.

Spring (3)

**152. Primitive Cultures (Ethnography)**

History and cultural development of primitive races of mankind. Consideration given to industries, arts, social organization, and religion of preliterate culture groups.

Fall (3) (Not offered in 1946-47)

**153. Primitive Religion**

Beliefs and ritual of primitive man. Magic and religion. Forms of animism and polytheism. Primitive mentality and the supernatural.

Spring (3) (Not offered in 1946-47)

**157. Primitive Myths and Rituals**

The folklore, mythology, and rituals of primitive cultures in the Eastern Mediterranean area. The early beliefs and classic myths of the Egyptians, Assyrians, Babylonians, and Greeks.

(Not offered 1946-47)

**165. Ethnology and Race Psychology**

The biological basis of race, somatic, serologic and constitutional typology, racial mentality, tests and their ethnopsychological significance, abnormality in ethnic groups. Race and culture; the development of ethnological theories, ethnological theories applied in anthropological field techniques.

Fall (3) (Not offered 1946-47)

## COMMERCE

Candidates for a teaching credential in business education should refer to the tatement "Admission to Teacher Education Curricula" on page 21, and to the cur-iculum for the A.B. Degree with a special credential in Business Education on age 27.

Lower division preparation for the liberal arts major in commerce and for the unior certificate: Economics 1A-1B, 14A-14B, 18A-18B; English 1B and 11 or 12, 3, 14, 15. 16; Geography 10A-10B, Mathematics C, or equivalent, and Economics 2; History 4A-4B or 8A-8B or Political Science 1A-1B or 71A-71B.

Liberal arts major in commerce, 24 upper division units required as follows: Economics 111, 121, 140, with 12 or more units additional chosen in one of the following roups:

A. Accounting: Economics 160A-160B, 161, 162.

B. Banking and Finance Economics 133, 135 and 6 units selected from Eco-nomics 107, 131, 134, 137.

C. Business Administration: 6 units selected from Economics 123, 125, 137, 142, 50.

Electives: 9 or more additional upper division units in economics.

### Lower Division Courses

#### 2. Mathematics of Finance

Interest and annuities; amortization; sinking funds; valuation of bonds; depre-iation; mathematics of building and loan associations; mathematics of life insurance. Prerequisites: Two years of algebra in high school, or equivalents.

Spring (3)

#### 14A-14B. Principles of Accounting

A knowledge of bookkeeping not required and not advantageous. The balance sheet; profit and loss statement; various types of books of original entry; the opening, conducting, and closing of books for different kinds of businesses; organizations, reorganizations, dissolutions, and consolidations, etc., keeping in view the best modern accounting practice. Five hours lecture and laboratory.

Year course (3-3)

#### 18A-18B. Commercial Law

The leading and fundamental principles of business law. Simple cases showing the actual application of the principles to commercial and business transactions, rather than the development of those principles. The subjects covered: contracts, sales, agency, partnerships, corporations, real property, negotiable instruments, insurance, and wills, with a brief study of evidence.

Year course (3-3)

### Upper Division Courses

#### 121. Business Administration

Problems of business administration as an interrelated whole and as an indication of lines of study which may lead to the solution of those problems. A discussion of the problems of the business administrator with particular reference to the character of the problems involved and to the control policies and devices of the manager. Questions, problems, and case studies. Prerequisite: Economics 1A-1B.

Fall (3)

#### 123. Marketing

A survey of the fundamental principles and methods of marketing. Intended as a basic training for students interested in the economics of advertising, sales management, retailing, and foreign trade, as well as for those wishing a knowledge of the existing market structure. Subjects covered include price policies, distribution methods, finance, risk, market information, and governmental regulation. Prerequisite: Economics 1A-1B.

Spring (3)

### 125. General Insurance

Economic theory of risk, its extent and importance to both the individual ar business; transfer of risk; distribution and prevention of loss; types of insuran carriers; problems of rate making; the insurance contract; coverages; special forms life, fire, marine and casualty insurance; state supervision.

Fall (3)

### 127. Life Insurance—Principles and Practice

A study of social and individual values involved in the institution of life insuranc The student is then directed to the types of life insurance companies and associatio home office and agency organization, types of contracts, surrender value, policy loa and extended insurance, surplus and dividend policies, reserves, group, industrial an social insurance, and state supervision.

Fall (3)

### 133. Corporation Finance

The corporate form of organization, instruments of long-time finance, methods raising capital, efficient financial management, the financing of reorganizations, an governmental control. Prerequisite: Economics 1A-1B.

Fall (3)

### 134. Investments

Investment principles and practices with emphasis upon problems of the sma investor, such as tests of a good investment, sources of information, types of stocks an bonds, mechanics of purchase and sale, investment trusts, real estate mortgages, an the like.

Spring (3)

### 137. Credits and Collections

The credit man and his work, including the instruments with which he work sources of credit information, the technique of his department, collection method legislation for the protection of debtor and creditor, and credit insurance.

Fall (3)

### 150. Labor Problems

A discussion of employment, hours, wages, working conditions, insurance, pe sions, workmen's compensation, labor organizations, and labor legislation. Organiz tion of personnel functions; selective devices, training and safety programs, compe sation plans, morale.

Spring (4)

### 160A-160B. Advanced Accounting

An intensive study of the corporation, its accounting and financial problems; thorough study of the balance sheet; depreciation; factory accounting, etc. Und practical accounting an endeavor is made to design, construct, and operate sets of boo to meet the needs of different conditions and kinds of businesses. Six hours lecture an laboratory. Prerequisite: Economics 14A-14B.

Year course (3-3) (Offered in 1946-47 and alternate years)

### 161A-161B. Cost Accounting

Principles and methods of cost accounting in the mercantile establishment an in the factory. A study of bookkeeping procedure, the forms used, and their appl cation to practical problems. Prerequisite: Economics 14A-14B.

Year course (3-3) (Offered in 1947-48 and alternate years)

### 162. Accounting Systems

The accounting systems used in various types of business and financial concern Some practice in devising and installing systems. Prerequisite: Economics 14A-14

Spring (3) (Offered in 1947-48 and alternate years)

### 164. Income Tax Procedure

A consideration of the problems arising from the Federal income tax. The problems are approached from the point of view of the taxpayer who desires to determine the exact application of the law to the interests he represents as well as from the accounting point of view. No knowledge of accounting procedure is necessary.

Fall (3) (Offered in 1947-48 and alternate years)

### 165A-165B. Auditing

The fundamental principles of accepted procedures of auditing and related types of accounting engagements.

Year course (3-3)

### 167. Governmental Accounting

A comparative study of accounting systems used by municipalities, counties, and the state of California; detailed comparisons with commercial practice; procedures in handling budget accounts, appropriations, and encumbrances; subsidiary records; cost records; internal checks; auditing.

Spring (3)

## ECONOMICS

Lower division preparation for the liberal arts major in economics and for the junior certificate: Economics 1A-1B, Commerce 14A-14B and at least one of the following: Political Science 1A-1B or 71A-71B, History 4A-4B, 8A-8B, Psychology 1A-1B, Sociology 50A-50B, Anthropology 50A-50B. Recommended: Commerce 18A-18B, Geography 10A-10B.

Liberal arts major in economics, 24 upper division units required as follows: Economics 100A, 140, and 100B or 111, with 9 or more additional units selected from Economics 100B, 107, 111, 131, 135, 150, 171, 195, Commerce 125 and 133. Electives: Six or more additional upper division units in economics or commerce. Political Science 143A-143B may be substituted for elective units in economics.

### Lower Division Courses

### 1A-1B. Principles of Economics

The basic principles of economics: utility, wealth, value, price; economic production, distribution, and consumption; rent, interest, wages, and profit; competition, monopoly, and large scale production; property, economic waste, and luxury; money and banking, international trade and tariffs; transportation corporations, labor problems, socialism, taxation, etc. Aims of the course: (1) to provide a foundation for further intensive study of economic problems; (2) to furnish to those who expect to follow business pursuits a broad foundation in economic principles; and (3) to introduce future citizens to political and economic problems of our time. Lectures, discussions, quizzes, and collateral reading. Not open to entering freshmen except by special arrangement.

Year course (3-3)

### Upper Division Courses

### 100A. Modern Economic Thought

Review of schools of economic thought in the light of recent economic theory with special reference to value and distribution. Special attention is given to the marginal utility theory of value, to the contributions of the institutional economists, and to the work of statisticians in the development of economic theory. Prerequisite: Economics 1A-1B.

Fall (3)

### 100B. Modern Economic Thought

A problem course. Subjects include price theory; distribution with particular emphasis on income; effects of various kinds and degrees of competition and regulation; war economy and government planning. Recommended: Economics 100A.

Spring (3)

**103. The Economics of War and Post-War Recovery and Reconstruction**

I, Backgrounds of the Present War; II, The Requirements of War Economy; III, International Recovery and Reconstruction; IV, National Recovery and Reconstruction.

Spring (3)

**107. Credit and Credit Institutions**

A study of the economics of credit, its cost, and the agencies supplying credit. Special attention is given to the growth of government credit agencies and their place in modern economic society. Prerequisite: Economics 1A-1B. Recommended: Economics 100.

Spring (3) (Not offered in 1946-47)

**111. Economic History of the United States**

A comprehensive survey of American economic development and of national legislation in the field of industry.

Spring (3)

**128. Land Economics**

Real estate in all its aspects: property rights, transfer of title, valuation, finance, selling, property management, taxation, insurance, city planning, and the like, with special emphasis upon problems as they exist in San Diego.

Fall (3)

**131. Public Finance**

Principles and practice of taxation, public expenditures, and financial administration. Economic effects of public expenditure, indebtedness, and taxation. Prerequisite: Economics 1A-1B.

Spring (3)

**135. Money and Banking**

The elements of monetary theory. History and principles of banking with special reference to the banking system of the United States. Prerequisite: Economics 1A-1B.

Spring (3)

**140. Statistical Methods**

The nature and uses of statistical method in the social sciences. Practice in tabular and graphic presentation of data; analysis of frequency and time series; index number construction and study of correlation techniques. Prerequisite: Mathematics A-B, and C or equivalent.

Fall (3)

**142. Business Cycles**

Fundamental factors in business cycles are analyzed and cycle theories are examined. Study of current business conditions begins early in the course and develops into practical application of forecasting methods to both business and other data. Prerequisite: Economics 140.

Spring (3)

**150. Labor Problems**

A study of labor organizations and their policies, wages, strikes, unemployment, social insurance, child labor, labor legislation, plans for industrial peace, and other labor problems.

Fall (3)

**171. Transportation**

The development of railway transportation; railroad financing; rates and rate making; governmental regulation; government operation of railroads during the war; recent development of motor and air transportation; current problems in public utilities. Prerequisite: Economics 1A-1B.

Fall (3) (Offered on demand)

**195. International Economic Relations**

A brief treatment of certain geographical, sociological, and legal phases of international relations followed by a study of the commercial and industrial basis of world economy touching upon a number of special problems involved. An introductory study of materials covering the processes, principles, and policies of international trade. The course concerns itself primarily with the economic basis of international relations, but political aspects are almost constantly taken into account in recognition of the fact that international relations are frequently political in form but economic in content.

Spring (3)

**198. Investigation and Report**

Designed to stimulate independent study and investigation; to furnish guidance in the collection, organization, and presentation of factual material; to improve the technique of term reports.

Fall and Spring (3-3)

**199A-199B. Special Study**

Designed exclusively for seniors with a major in economics.

Fall (1), Spring (1 or 2)

## GEOGRAPHY

Lower division preparation for the liberal arts major in geography: Geography 1, 2, 3, and Geology 1A-1B. Recommended: A reading knowledge of French or German.

Liberal arts major (major division): Twenty-four units of upper division work in geography or 18 units in geography and six units in related subjects arranged in consultation with the chairman of the department.

### Lower Division Courses

**1. Introduction to Geography: Physical Elements**

The nature of maps, weather and climates of the world; natural vegetation; land forms and their associated soils, with reference to their climatic relationships; the seas and their coasts. One all-day field trip. Open to all students who have not taken Geography 10A-10B. This course is classified as a natural science.

Fall and Spring (3)

**2. Introduction to Geography: Natural and Cultural Regions**

The regional differentiation of the world by human activity; areal bases of economy and nationality. Prerequisite: Geography 1.

Fall and Spring (3)

**3. Elementary Meteorology**

An elementary study of the earth's atmosphere and changes in it which produce our weather and influence human affairs. Special attention given to local conditions, instruments, and records. Aeronautical meteorology stressed in the fall semester. This course is classified as a natural science.

Fall (3)

**4. Map Reading and Map Interpretation**

Representation of geographic data by means of maps. Interpretation of projections, scales, symbols, land forms, and culture from topographic maps; measurements of cultural data on maps. Prerequisite: Geography 1.

Fall (2)

**10A-10B. Economic Geography**

Beginning course in economic geography limited to students in commerce and prospective economics majors. Not open to students who have had Geography 1 and 2. This course may serve as prerequisite to upper division geography courses.

Fall and Spring (3-3)

### Upper Division Courses

**112. Geography of California**

The physiographic regions of California and the cultural landscapes developed by the successive cultural groups. Prerequisite: Geography 1.

Spring (3)

**116. Geography of Latin America**

The natural regions of Latin America; their occupational condition and historical evolution. Prerequisite: Geography 1.

Spring (3)

**117. Geography of Northern and Eastern Europe**

A study of the cultural development of the countries of northern and eastern Europe in relation to physical background and historical evolution. Prerequisite: Geography 1.

Fall (3)

**118. Geography of the Mediterranean Area**

A study of the cultural development of the countries of Southern Europe, Western Asia, and North Africa in relation to physical background and resources. Prerequisite: Geography 1.

Spring (3)

**121. Geography of North America**

The natural regions of North America, their formation and economic and historical development. Prerequisite: Geography 1.

Fall (3)

**124. Geography of Asia**

The cultural regions of Asia, their physical environment, and historical development. Prerequisite: Geography 1.

Spring (3)

**135. Geography of the San Diego Area**

Directed individual urban and rural field work in the San Diego area; the mapping of a small area and making its geographic interpretations. Prerequisites: Geography 1 and 2.

Fall (3)

**141. Economic Geography**

A survey of the raw materials of world trade; their production and distribution as related to major geographic regions of the world. Prerequisite: Geography 1.

Fall (3)

**166. Honors Course**

To be arranged after consultation with the chairman of the department. (See page 14.)

Fall and Spring (Credit to be arranged)

## HISTORY

Lower division preparation for the liberal arts major in history: History 3A-3B or 4A-4B or 8A-8B or 17A-17B and either Political Science 1A-1B, 71A-71B or Economics 1A-1B. Two lower division history courses are recommended for students planning to major in history. No student shall enroll in more than one lower division history course during a semester.

Upper division history requirements for the liberal arts major: At least twenty-four units in upper division courses in history, to be arranged in consultation with the chairman of the department. A reading knowledge of at least one foreign language is expected of history majors.

The history minor: From 15 to 18 units of work in history is recommended. At least nine units of the work must be chosen from upper division courses.

## Lower Division Courses

**A-3B. Survey of Ancient Civilizations**

Introduction to pre-history and Mediterranean civilizations.

Year course (3-3)

**A-4B. History of Modern Europe**

Development of European society and institutions from about 1500 A.D.

Year course (3-3)

**A-8B. History of the Americas**

Survey of the history of the western hemisphere from the discovery to the present time. Based on H. E. Bolton's "Syllabus of the History of the Americas."

Year course (3-3)

**7A-17B. History of the United States**

Survey of the political and social development of the United States, with emphasis upon the rise of American civilization and ideals.

Year course (3-3)

## Upper Division Courses

**111A-111B. Ancient History**

(A) Greek history to the Roman conquest. (B) Roman history to the fourth century A.D.

Year course (3-3)

**121A-121B. Medieval History**

Survey of European political and cultural development between 500 and 1300 A.D.

Year course (3-3)

**131A-131B. Renaissance, Reformation and Counter-Reformation**

A history of personalities and events connected with the social, cultural, economic and religious change between 1300 and 1600.

Year course (3-3)

**143. The French Revolution and Napoleonic Era**

Study of conditions in France prior to 1789, the Revolution from 1789 to 1799, the organization of France under Napoleon, the character of his Empire and the reorganization of Europe at the Congress of Vienna, 1815.

Fall (3)

**144. Europe Since World War I**

Developments in Europe from 1919 to the present. Special emphasis upon the background of World War II.

Spring (3)

**151A-151B. History of England**

A survey of political and constitutional development in England since 1066, stressing the transition from medieval to modern England, Tudor despotism, the struggle for self-government under the Stuarts and the rise and development of present-day political and social institutions.

Year course (3-3)

**161. Mexico and the Caribbean Countries**

Special attention to the relations of the United States with these countries and to recent developments in Mexico.

Fall (3)

### 162. South America Since Independence

The republics of South America. Attention directed to the development nationality in South America, struggles for political stability, exploitation of resource diplomatic and commercial relations with the United States, and other internation problems of South America. Survey of present-day conditions, political, economi and social.

Spring (3)

### 171A-171B. The Rise of the American Nation

Semester I: Lectures and readings on English colonization in North Americ the development of colonial institutions and political customs, and areas of inte national conflict during the 18th century. Semester II: The revolutionary movemen and the establishment of the government under the Constitution of 1787 to the close the War of 1812.

Year course (3-3)

### 172A-172B. Constitutional History of the United States

A study of the work of the convention of 1787, the problems involved in settin up the new government under the Constitution, the nature of the Federal system as becomes defined in governmental practices and court decisions, the nature of th system of individual rights.

Year course (3-3)

### 173A-173B. The Expansion of the United States

Lectures and readings on Jacksonian Democracy, territorial expansion and th Mexican War, the slavery controversy, Civil War and Reconstruction, and attentio to the growth and progress of the United States to the close of the 19th century.

Year course (3-3)

### 175. The United States in the Twentieth Century

The rise of the United States to be a world power; social and economic prob lems posed by the machine age; political action and adjustment, actual and propose intended as solutions for these problems.

Spring (3)

### 176A-176B. History of American Foreign Policy

Lectures and readings in the field of American foreign relations since 177 with special emphasis, in the second semester, upon affairs since 1900. A genera survey course.

Year course (3-3)

### 179A-179B. Intellectual History of the American People

A study of the ebb and flow of ideas in the United States since the foundin of the English colonies, with special attention devoted to social and political thought

Year course (3-3)

### 191A-191B. History of the Far East

Particular emphasis during the first semester on the history, both internal an international, of the Far East through the 19th century. The second semester wil be devoted to a consideration of developments in the 20th century.

Year course (3-3)

### 199. Special Course for Advanced Students

Required of all students with a history major in the liberal arts curriculum and to be attended during the senior year. Other students may be admitted with th permission of the instructor.

Spring (2)

## LIBRARY SCIENCE

### 10. Use of the Library

The chief object is to give a working knowledge of some of the resources of the library which every teacher and student should understand—the decimal classification, the card catalog, periodical indexes, and the most important reference books, together with some instruction in the preparation of bibliographies. The course will be a requirement of those students added to the library's staff of student assistants, although it will not prepare the student to become a librarian.

Fall and Spring (2)

## MERCHANDISING

### 20. Consumer Economics

Growing importance of consumption as a field for study; consumer incomes in the United States; consumption and business cycles; bases of consumer choice-making; practical problems of buying food, clothing, shelter, transportation, insurance, etc.; family budgeting; a survey of the methods by which products reach the consumer; market structure and functions seen from the consumer's point of view.

Fall (3)

### 24. Merchandising

A study of retail stores, emphasizing the problems of store managers and merchandising executives; store location, organization, personnel, sales promotion, buying and handling of merchandise, inventory, turnover, and control methods. Changing conditions in retailing, problems of profitable operation under present conditions.

Spring (3)

### 25. Salesmanship

Theoretical and psychological backgrounds of salesmanship, newer concepts of selling; the selling of ideas and services; steps in a sale: attention, interest, desire, closing; the development of clienteles and of good will; the personal factor in salesmanship.

Fall (3)

### 26. Applied Salesmanship

Classroom practice in selling; supervised work in cooperating stores, or outside selling; relationships between theory and practice in specific selling situations; incentive methods of payment in selling; the problem of sales managers in reducing selling costs.

Spring (2)

### 26A. Life Insurance Salesmanship

A study of the special problems of life insurance selling, with emphasis on the psychological aspects of insurance selling, and on specific techniques for finding prospects, and for managing the sales interview. A course for students interested in life insurance selling, and for those planning to obtain life underwriter's certification. To be taken in conjunction with 26 (see above) and not available as a separate course.

Spring (26 and 26A, taken together, 3 units)

### 27. Advertising

A survey of advertising from the point of view of the business man and the consumer; business principles applied to advertising; basic psychological appeals employed; market analysis as an advertising tool; budgeting of appropriations; selection of mediums; layout, art work, copy; publicity devices; institutional advertising; the function of agencies; radio as a specialized advertising problem.

Spring (3)

## PHILOSOPHY

### 1A, 1B. Introduction to Philosophy

A non-historical introduction to the types and problems of philosophy. The most inclusive and influential world-views are studied at length, then the principal problems of philosophy are considered in terms of these basic systems. Prerequisite: Sophomore standing, or permission of instructor.

(1A, Fall and Spring, 3) (1B, Fall and Spring, 3)

### 3A, 3B. History of Thought

A study of the basic ideas of Western Civilization in their historical development. The making of the modern mind as revealed in the development of philosophy and in the relations between philosophy and science, art and religion. The history of ideas against the social and political backgrounds from which they came. Prerequisite: Sophomore standing, or permission of instructor.

Fall, Spring (3, 3)

### 8. Social Philosophies

The study of man's speculation regarding his "right" organization, together with the assumptions, analogies and economics determining his temporary conclusions. Among the thinkers studied are Hobbes, James I, Rousseau, Locke, Jefferson, Kropotkin, Mill, Marx, Mussolini, Dewey, Pius XI, Hoover, Roosevelt, etc. (May be taken for lower or upper division credit.)

Spring (3)

## Upper Division

### 108. Social Philosophies—(see Philosophy 8)

### 120. Reflective Thinking (Logic)

Analysis of fallacies, and the logic of argument and proof; an examination of reflective procedures in various fields of knowledge, and a review of some psychological descriptions of thought. Prerequisites: Psychology 1A and at least one semester of philosophy.

Spring (3) (1947-48 and alternate years)

### 130. Ethics

The search for the Good Life. The principal theories of ethical obligation, the sources of moral authority, and the various views regarding the nature of the "highest good" and the related goals of intelligent living.

Fall (3) (1947-48 and alternate years)

### 136. Philosophy of Art

A study of the nature of esthetic experience, both in itself and in relation to the rest of human experience. Particular effort is made to disentangle man's esthetic attitude and activity (whether in the field of art, nature or daily life) from those experiences and evaluations with which the esthetic is frequently confused. The principal theories of art, both traditional and contemporary, are studied at length—both in relation to actual artistic production and to art's role in society.

Spring (3)

### 137. Philosophy of Science

A critical examination of the basic concepts and methods underlying contemporary scientific thought. Nature of scientific knowledge, conceptions of nature, natural law, relation of the scientific interest to other interests, and contributions of the special sciences to a view of the universe as a whole.

Fall (3)

## POLITICAL SCIENCE

The minor in Political Science: From 15 to 18 units of work is recommended. At least 9 units must be chosen from upper division courses.

It is suggested that students who expect to major in Political Science plan their lower division work to include both Political Science 1A-1B and 71A-71B, and either Economics 1A-1B or History 4A-4B.

## Lower Division Courses

### 1A-1B. Comparative Government

A comparative study of typical governments. Semester I: England, France and Switzerland. Semester II: Italy, Germany, Russia and Japan.

Year course (3-3)

### 1A-71B. American Government and Politics

Semester I: Governmental organization in the United States; Federal system, rganization, powers and functions of the legislative, executive and judicial branches of .ie national government, and the expansion of its activities. Semester II: Develop-ient of the means of democratic control of government in the United States; the istory, motivation, methods and control of political parties; party machines; election ystems; influence of minority groups; the lobby; the press.

This course is not open to freshmen.

Year course (3-3)

### Upper Division Courses

### 01. American Institutions

A study of the principles of the Constitution of the United States, and a survey f the political and social institutions which have developed under it.

Fall (2)

### 11A-111B. Theory of the State

The nature of the State, its organization and activities, and its relation to the ıdividual and to other states. Special attention is given to recent developments in the eld of political thought.

Year course (3-3)

### 33A-133B. Principles of International Law

This course is concerned with the function of law in the international community. 'he historical development of the theory and rules of international law, the application f international law in international relations and the application of international law ı national courts.

Year course (3-3)

### 41. Theories of International Relations

Fall (3)

# TWO-YEAR CURRICULA

These curricula are organized for students who have not yet qualified for enrollment in a four-year curriculum leading to the Bachelor of Arts degree. Regularly qualified students who prefer a shorter completion course will take only such two-year courses as may be required in the specialized curricula they are following. Upon satisfactory completion of the requirements in these two-year curricula the student is granted a diploma. By maintaining a high grade of scholarship the student may secure the opportunity of transfer to a four-year program. Such transfers are made by action of a faculty committee after the student has completed one or more semesters in a two-year curriculum. Upon transfer the credits earned in courses in the two-year program in which grades of A and B have been received are allowed to count toward the Bachelor of Arts degree but are reduced by one step in grade.

Courses numbered 40 and 45 are not open for credit to students in a four-year curriculum.

A two-year student may elect any other college lower division subject under guidance where his high school scholarship record, or his scores in the aptitude and achievement tests, or his college record indicates probable success in that field. He must, of course, meet all prerequisites for the course under consideration.

## TWO-YEAR CURRICULUM IN LIBERAL ARTS

| First Year | *Units Sem. I* | *Units Sem. II* |
|---|---|---|
| English 40A or 40B and 40C | 3 | 3 |
| *Physical Science 40 or equivalent | -- | 3 |
| *Biology 40 or equivalent | 3 | -- |
| Social Science 40 | 3 | -- |
| Sociology 40 | -- | 3 |
| Health Education 1 or 2 | -- | 2 |
| Physical Education | ½ | ½ |
| Psychology 40 | 3 | -- |
| Elective | 3 | 4 |
| | 15½ | 15½ |
| **Second Year** | | |
| Speech Arts 40 or English 45, 46 or 47 | 3 | -- |
| Social Science (Economics 45A, Geography 40B, Merchandising 20, or Social Science Elective) | 3 | -- |
| Social Science 45 | -- | 3 |
| Elective | 9 | 12 |
| Physical Education | ½ | ½ |
| | 15½ | 15½ |

* Not less than 6 units of natural science must be completed in college.

## TWO-YEAR CURRICULUM IN ART

### First Year

| | *Units Sem. I* | *Units Sem. II* |
|---|---|---|
| English 40A, or 40B | 3 | -- |
| English 40C | -- | 3 |
| Social Science 40 | 3 | -- |

| June 9 | Semester ends. |
| June 10 | Commencement. |

## SUMMER SESSION, 1949

Term I —June 20-July 29
Term II —August 1-September 2
Term IIA—August 1-19

# FUNCTIONS OF THE STATE COLLEGES

The state colleges have three major functions, namely: (1) To help the individual student to develop a well-rounded and adjusted personality; (2) to promote civic intelligence and competence; and (3) to create supplies of trained men and women, some to serve as teachers in the elementary and secondary schools, some to fill intermediate places of leadership, and some to transfer to graduate institutions to equip themselves to extend the frontiers of knowledge and to occupy the higher positions of leadership. In terms of publicly supported higher education, the state colleges and the university together make provision for the realization of all the essential objectives of higher education in our State.

To achieve their unique purposes the state colleges have developed and are improving offerings as follows:

1. Teacher education curricula for those students who plan to teach in the elementary school, the junior high school, and in secondary schools.
2. Preprofessional curricula.
3. Curricula of varying lengths in such fields as business, industry, governmental services, homemaking, and social service.
4. General education for students who take work which leads toward the bachelor of arts degree or to the higher professions through graduate work.
5. Guidance services to assist the individual student to plan his educational program and to make his college and life adjustments.
6. Extension courses in appropriate fields.

The state colleges accept the principle that higher education should be available to all capable high school graduates. The preservation and improvement of democracy depends upon the full and unhampered development of all potential citizenship and leadership resources. In keeping with this principle the state colleges maintain flexible entrance requirements. Each applicant is treated individually in terms of his potential capacity and his potential contribution and not in terms of past academic pattern or accomplishment alone.

The state colleges purposely maintain not only flexible entrance requirements, but also, adjustive curricula, and adequate and effective guidance and counseling services to promote the personal and educational development of worthy students. The state colleges modify traditional academic restrictions and provide new curricula and services whenever such modifications and additions seem to serve the legitimate desirable needs of indiivduals and society.

The promotion of civic intelligence and competence is the underlying aim of all activities on state college campuses. Special emphasis centers on warm personal relationships between instructors and students, on friendly counsel in time of need, and on the day-to-day routine of living in a friendly atmosphere. Because the majority of state college students live at home, it is possible to link together the college, the home, and the community in realistic democratic relationships.

The democratic controls exercised over the state colleges make them readily and effectively responsive to individual and community needs and encourage them continuously to make significant improvements in both curriculum and personal services. The state colleges are thus laboratories in which the facts and theories developed in research, in community living, and in daily association with students are reflected in the instructional program.

The state colleges plan their program of higher education so as to provide educational services inherent in the principle of equality of opportunity.

# THE COLLEGE

## LOCATION AND ENVIRONMENT

Renowned as a winter resort with a mild but invigorating climate, San Diego ias become equally famous for its cool summers. High cultural standards in art, nusic, literature, and science create a stimulating environment for a college. Many f these advantages are to be found in the heritage resulting from the expositions of 915-16 and 1935-36, including the buildings themselves, which portray the best types f Spanish colonial art and architecture. Housed in these buildings are the Fine Arts allery, exhibits in anthropology, natural history, and American archaeology, which re in many respects unsurpassed. The outdoor organ, the Ford Bowl, and the hortiultural gardens make Balboa Park, in which all these facilities are located, world enowned. The Scripps Institute of Oceanography, operated by the University of alifornia at La Jolla, gives opportunity for important cooperation in the biological ciences.

## BUILDINGS AND EQUIPMENT

On February 1, 1931, the college was moved to the new campus, located one mile orth of the city's principal east-west boulevard, El Cajon Boulevard. The buildings re of Spanish-Moorish architecture which is well suited to the landscape and climate f this region. They include the Academic Building (which houses lecture halls, lassrooms and administrative offices); the Science Building; the Library; the Little heater; the Music Building; the Campus Elementary School; Scripps Cottage a social clubhouse for women students); the Cafe and Book Store; and the Physical ducation Building (a structure with adequate facilities for both men and women). he gymnasium contains a very fine basketball floor with stands that will accomodate 1,500 spectators. A fine concrete stadium, constructed in a natural site, has seating capacity that is adequate for present needs. The open air theater, seating ,200 persons, serves as a meeting place for large groups.

## FACILITIES FOR THE EDUCATION OF TEACHERS

The college maintains a modern elementary school on the campus where it has eveloped an extensive program for the education of elementary school teachers. he classroom-laboratory plan which calls for the use of work-rooms, the library, nd shops, affords unusual opportunities for the induction of students into teaching. y arrangement with the San Diego city schools, directed teaching is provided in the lementary and secondary schools.

## THE FACULTY

The professional education of the faculty places the college at the 97 percentile osition among teacher education institutions of the Country. For listing and further etails see the directory on page 171.

## THE LIBRARY

The library facilities of this college are noteworthy for an institution of its ize. The library consists of well over 110,000 books and receives more than 700 ifferent periodicals selected to meet the requirements of a modern educational instiution. Professionally trained librarians are available to render assistance to students nd faculty in their reading and reference work.

The Campus Elementary School Library, representing a collection of 14,000 olumes, possesses equipment and building facilities that are unique.

## LIVING ACCOMMODATIONS

Living arrangements for students whose homes are not in San Diego or within ommuting distance are made through the offices of the Dean of Women or the Dean of en. Women students are urged to live in the residence hall adjoining the campus. areful consideration is given to study conditions, healthful living, and adequate social pportunities. Room and board may be secured for approximately $275 per semester, ayable in four installments. Opportunities to reduce this figure by working a few ours each week are occasionally available. Reservations should be made in advance hrough the Manager of Quetzal Hall, 5192 College Avenue, San Diego 5, California. ingle women students under the age of 21 who find other accommodations more esirable must file with the Dean of Women a statement from the parent or guardian.

## VETERANS' EDUCATION AND HOUSING

The college has been approved by various accrediting agencies to offer courses for veterans leading toward the A.B. Degree in some 19 major fields and to the general Secondary Credential upon the completion of a graduate year. A veterans' office is maintained on the campus to facilitate registration, aid in the establishment of benefits, afford special counseling services, and serve as an information center. A joint student-faculty committee on veterans' affairs serves as a clearing house for suggestions relating to policies and procedures affecting veterans.

Through the City of San Diego, 400 family units formerly under the jurisdiction of the Federal Public Housing Authority have been made available to the college for the housing of its married veterans. These units are located some eight miles from the campus proper at Aztec Terrace, midway between Old Town and Loma Portal. Applications for housing at Aztec Terrace are made through the office of the Dean of Men.

## STUDENT LIFE

A rich field of extracurricular activities is available to the student throughout his college life. The student is urged to select these activities carefully in order that he may profit by such extra-class experiences without lowering his standards of scholarship. The *Student Handbook*, available at the time of registration, gives information concerning activities which include organizations in every department of the college, and opportunities for individual and group experience in the social, athletic, fraternal, religious and governmental life of the campus.

## STUDENT HEALTH SERVICE

The Health Department is maintained for the protection and care of student health. A complete physical examination is required of each student upon admission to college. Careful attention is given to cases undergoing remedial treatment or to cases in which a modification of study load or amount of participation in physical activities seem advisable.

A college physician and school nurse are available for consultation and emergency treatment. Students who have been absent over three days because of illness should receive clearance from the Health Office before returning to classes.

A group plan for accident insurance is in operation for students who desire t participate.

## PLACEMENT AND OCCUPATIONAL GUIDANCE SERVICE

A Placement and Occupational Guidance Office is maintained by the college t serve the needs of the students. The office staff assists students in choosing thei occupational goals and serves as a clearing house for part-time and full-time jobs both in industrial and teaching fields.

Standard tests are employed in the measurements of students' interests, capacities and traits. In addition, an occupational library is maintained to acquaint th student with the information needed relative to any chosen field.

An effort is made to place all students upon graduation. The staff maintains contact with employers in the field who in turn refer to the office for informatio concerning graduates or nongraduates whom they are considering for employment

Included in the service of the office are the listing of part-time jobs of all types available, including opportunities to work for room and board, and part-time or full time jobs in commerce and industry.

Confidential records for all graduates, both Liberal Arts and and teacher candidates, are kept in the office.

This service is free to students, who are invited to arrange for interviews wit members of the office staff. The Placement Secretary should be seen or called regardin vacancies or work applications.

## VOCATIONAL REHABILITATION SERVICE

The Bureau of Vocational Rehabilitation, California State Department of Education, offers its service to students who have an employment handicap resulting fro physical disability of any kind. Included are vocational counseling, the payment o tuition and fee, and the providing of textbooks without charge to the trainee. Detail of the service may be obtained from the Registrar's Office.

## SCHOLARSHIPS

A number of scholarships for both men and women has been made available through the efforts of the alumni, civic organizations, student organizations, business and professional groups and individuals, and other friends of the college. Superiority in ability and achievement, strength of character, and worthiness from the point of view of need are the standards upon which selection is based. Scholarship aid is limited for the most part to students who have completed at least one semester at the San Diego State College. Except for athletics grants-in-aid, which are initiated through the Director of Athletics, scholarship applications are made through the office of the Dean of Women.

Unless otherwise stipulated, all scholarship awards are determined and announced by the faculty Committee on Loans and Scholarships in October of the college year. Applications for scholarships for the fall semester must be filed with the office of the Dean of Women prior to October 15th. The scholarships available for 1948-1949:

**ALTRUSA CLUB.** Two scholarships of $50 each are made available annually by the Altrusa Club of San Diego. Applications are considered from women students enrolled in San Diego State College who are worthy and in need.

**AMERICAN ASSOCIATION OF UNIVERSITY WOMEN.** One scholarship of $100 is given each year in June to a graduating senior who will begin work in an accredited college or university toward a higher degree or credential. The scholarship is made available by the San Diego Branch of the American Association of University Women. Interviews with representatives of that organization are required.

**AMERICAN SOCIETY OF CIVIL ENGINEERS, SAN DIEGO SECTION.** A scholarship of $75 is awarded annually through the San Diego Section of the American Society of Civil Engineers to the engineering student selected for the scholarship on a basis of character, ability, personal qualities, and financial need. Nominations are made by the Engineering Department of the College. At least sophomore status is required for nomination.

**ANONYMOUS (B).** A scholarship of $100 is given each year to be divided among students in financial need, at the discretion of the faculty Loans and Scholarships Committee. The committee gives consideration to scholastic attainment, financial need, and character.

**ANONYMOUS (E).** A $50 scholarship, awarded each semester through the Loans and Scholarships Committee, is made available by a public spirited citizen who prefers to assist a student majoring in science.

**ART GUILD.** The Art Guild of San Diego State College awards a $25 scholarship each year to a student outstanding in the field of art.

**ASSOCIATION OF CHILD EDUCATION.** The Association of Child Education makes available each year a $50 scholarship to a student in the Kindergarten-Primary program. The award is customarily made to an upper division student showing promise in a particular field who is in need financially.

**CAP AND GOWN.** Two $50 scholarships are awarded annually to upper division women students who have attended San Diego State College for at least one year previous to date of making application and who have maintained at least a "B" average in scholarship for their entire college career. The scholarships are made available through the San Diego State College chapter of Cap and Gown.

**DAUGHTERS OF THE AMERICAN REVOLUTION.** Two scholarships of $25 each are presented each spring, one to a young man and the other to a young woman outstanding in citizenship and Americanism. Applicants should have at least a "B" average in scholarship, should be able to demonstrate need for financial assistance, and should have junior standing in the college when selected. The scholarships are made available through the Daughters of the American Revolution.

**INTERSORORITY COUNCIL.** A $50 scholarship, $25 each semester, is made available each year by the Intersorority Council of San Diego State College to the sorority woman applying with the highest grade point average. The applicant must be an upper division student carrying at least twelve units, and must have attended San Diego State College at least one year previous to the date of application.

**MARCY, MAY FINNEY.** Scholarships of varying amounts are awarded from time to time by the committee administering the May Finney Marcy Fund to selected San Diego State College students, preferably members of Cap and Gown. Inquiries concerning eligibility for these awards should be addressed to the Dean of Women.

**SAN DIEGO BASEBALL CLUB.** An annual scholarship of $250, made available by the San Diego Baseball Club, is distributed to San Diego State College athletes with a principal interest in baseball. Recipients are selected by the Director of Athletics of the college.

**SAN DIEGO CITY TEACHERS ASSOCIATION.** Two scholarships of $50 each are presented each year to prospective teachers with no restrictions as to college year. Applications are made on forms supplied by the San Diego City Teachers Association and are reviewed by the association's committee on scholarships. Personal interviews are required.

**SAN DIEGO COUNTY TEACHERS ASSOCIATION.** Two $50 scholarships, made available annually by the San Diego County Teachers Association, are awarded to students in the field of elementary education. Selections are made by the faculty Loans and Scholarships Committee.

**SAN DIEGO ENGINEERS CLUB.** A scholarship of $50 is given each semester by the San Diego Engineers Club to a student majoring in engineering who shows particular ability in that field. The Loans and Scholarships Committee recommends three candidates from all students applying, which candidates in turn are interviewed by the members of the Engineers Scholarship Committee, who make the final selection.

**SKULL AND DAGGER.** Skull and Dagger of the San Diego State College awards $25 annually to each of two students judged to possess superior talent in drama. Selections are made by Skull and Dagger.

**TAU ZETA RHO ALUMNAE.** A scholarship of $50 is given annually by the alumnae chapter of the Tau Zeta Rho sorority of the San Diego State College to a nonsorority woman student enrolled in either her junior or senior year of teacher training.

**THEATRE GUILD.** One or two $25 awards are made each year by the Theatre Guild of the San Diego State College. The guild selects students outstanding in theatrical work.

**WALKER, RALF MARC.** A scholarship in the amount of $500 is made available by the Walker-Scott Corporation in memory of the late Mr. Ralf Marc Walker to a woman student majoring in merchandising or retail trade at the San Diego State College. The scholarship is presented to a girl in Walker's Hi-Debber Council each year. The total scholarship is deposited in the San Diego State College Foundation and is handed to the recipient at the rate of $50 a semester for each of the first three years and $100 a semester for the two senior semesters.

**WEINBERGER, HENRY, INTERFAITH SCHOLARSHIP.** A scholarship of $100 is awarded in April of each year to the student of any religious faith enrolled at the San Diego State College who is judged to have done the most to further interfaith ideals among the students of the college during the year of the award. This scholarship is made available by Mr. Henry Weinberger of the Lasher Lodge of B'nai B'rith.

## ADDITIONAL DONORS

Additional donors to scholarship funds or to the San Diego State College Foundation include the following:

Al Bahr Temple
Associated Women Students
Nate Baranov
Del Mar Charities
John Fox
Percy Goodwin
Philip Gildred
E. T. Hale and Sons
Frances Heilbron

## LOANS

Both long-term and short-term loans are available to students who have attended the San Diego State College for at least one semester and who have demonstrated ability to do satisfactory college work. Applications for loans are made to the Committee on Loans and Scholarships through the offices of the Dean of Men or Dean of Women.

# ADMISSION AND REGISTRATION

## GENERAL ADMISSION REQUIREMENTS

High school graduates and other applicants possessing equivalent preparation may be admitted to this college upon evidence of fitness to profit by college instruction, such fitness to be shown by previous scholastic records, by evidence of good moral character and personal qualifications, and by satisfactory scores on tests which the college may require. Due to crowded conditions the college probably will have to refuse all qualified applicants who do not file application blanks and official transcripts prior to the dates indicated in the calendar on page 5.

## ADMISSION OF HIGH SCHOOL GRADUATES

(1) A high school transcript must be presented showing satisfactory scholarship, and (2) applicants must demonstrate readiness for college instruction by making satisfactory scores on such tests as the college may designate.

**Regular status** will be granted if the student has earned A or B grades in not less than 16 semester courses in English, social sciences, foreign language, mathematics, natural sciences, and related fields, during the tenth, eleventh, and twelfth grades.

**Provisional status** will be granted if the student has earned A or B grades in not less than 12 semester courses of any type during the tenth, eleventh, and twelfth grades. Individuals who fall slightly below the above standard may be admitted to provisional status if qualifying examination scores indicate probable success in college. Transfer to regular status may be attained upon completion of 24 or more units of college work with grade average of C or better. Full credit is allowed for all regular college work completed.

**Adult special status** may be granted an applicant who is over 21 years of age or is a veteran of World War II, provided that he demonstrates through qualifying examinations satisfactory ability to do college work. Such students may be transferred to regular status upon removal of all matriculation deficiencies and after completion of 24 or more units of college work with grade average of C or better. Full credit is allowed for all regular college work completed.

## ADMISSION BY EXAMINATION

Certificates of successful examination before the College Entrance Examination Board will be accepted when candidates cannot meet the above scholarship requirements.

## SPECIAL STUDENTS

In exceptional cases, persons over 21 years of age or veterans of World War II who do not fully meet the college entrance requirements may be admitted as special students upon presentation of evidence showing good character and ability to do satisfactory work at this college. Non-high school graduates may be required to complete, in addition to the usual requirements for the A.B. Degree, three semester units of college work for each two semester courses lacking high school graduation. College graduate students who do not qualify for admission to graduate status (see admission to graduate status) may be admitted as special students.

## ADMISSION WITH ADVANCED STANDING

Credit earned in recognized institutions of collegiate grade will be evaluated and advanced standing allowed accordingly toward the graduation requirements of this institution. Applicants must show an average grade of C or better for all college work, for the last college attended, and for the last semester of attendance in order to qualify for regular status. A student who enters with advanced standing is one who has completed at least 15 units of passing work in another collegiate institution. However, no applicant may disregard his collegiate record and apply for admission only on the basis of his high school work. No credit earned after a student has accumulated 64 units of work in all types of collegiate institutions may be transferred from a junior college.

Students seeking admission with advanced standing must furnish complete tran scripts for all work attempted beyond the eighth grade. If an official evaluation is desired, a deposit of $2 must accompany the application and be received together with all transcripts at least 30 days before the date of registration. At least 45 semester units must be completed before a student may apply for an evaluation.

## ADMISSION TO GRADUATE STATUS

A student who holds a bachelor's degree from an accredited institution may be admitted upon application and the filing of official transcripts of all college work. A student not meeting these requirements in full may apply for admission as a special student.

Admission to graduate courses (numbered 200 to 299) is restricted to students (1) who hold a standard bachelor's degree from an accredited institution, (2) who receive a satisfactory score on graduate entrance examinations, (3) who meet the prerequisites for specific courses, and (4) who qualify under one of the following categories:

a. Admission to candidacy for the General Secondary Credential; or
b. Maintenance of a satisfactory grade point average in all postgraduate work; or
c. The course concerned is the first course taken from those numbered 200 to 299

## EXTENDED DAY PROGRAM

In order to meet the needs of adults in the community for certain types of college work, this institution offers late afternoon and evening classes under an extended day program. Most of these courses are on the upper division and graduate levels and all carry full college credit. Among the fields in which work is offered are: Education commerce, personnel work, and engineering. Courses may be set up to meet the need of a particular group who desire special instruction. Requests for such courses should be made through the office of the Dean of General Education. A special bulletin describing the current offerings is issued each semester from the above office.

## AUDITORS

Properly qualified persons may apply for admission to attend classes as auditors. Such students pay the same fees as those who take equivalent work for credit.

## TESTS REQUIRED AT REGISTRATION TIME AND LATER

1. A physical examination is required of all students entering or reentering the college after an absence of one semester or more, except that students carrying 6 units or less are not required to take the physical examination. This examination is scheduled during the orientation and registration period.

2. All entering students are required to take a college aptitude test. Exceptions may be made for graduate students and for those who register for five units or less and for those registered only in Extended Day classes.

3. All entering freshmen and college transfer students who present less than a minimum of 15 units of college credit must take the regular battery of achievement and aptitude tests. The freshman English course which a student will take will be determined by results of these tests.

4. Students entering teacher education should see admission requirements on page 25.

## LATE REGISTRATION

Students who register after the scheduled registration days are subject to a late registration fee of $1. Students may be accepted for late registration with the approval of the Reigstrar within two weeks after scheduled registration days. Registration will be closed after that date. Students failing to complete all registration requirements within the period allowed, as announced in registration instructions, are subject to cancellation of registration.

## CHANGES IN REGISTRATION

Petitions for changes in program may be secured at the Registrar's office. A fee is charged for changes in program after registration books are filed.

# FEES AND EXPENSES

## PROBABLE EXPENSES FOR ONE SEMESTER

An estimate of the expense of attendance for one semester is given below. No estimate is made as to the cost of clothing, or other personal items, since these figures vary with the demands of the individual. Laboratory fees are additional.

### A Partial Estimate of Expenses

One Semester

| | *Minimum* | *Maximum* |
|---|---|---|
| Fees and deposits | $23.50 | $30.50 |
| Books | 18.00 | 30.00 |
| Board and room | 275.00 | ---- |
| Transportation, lunches, incidentals | 20.00 | 60.00 |
| Miscellaneous | | 5.00 |

Before enrolling in college, the student should possess sufficient resources to meet he minimum expenses for one semester. A limited amount of clerical work in offices and in the library may be offered from time to time but ordinarily it is not sufficiently remunerative to reduce expenses materially.

## LIST OF FEES AND DEPOSITS (SUBJECT TO REVISION)

### Enrollment Fees and Deposits

(Payable at time of registration)

| | |
|---|---|
| By all students: | |
| Tuition (auditors pay same fees as other students): | |
| Regular students (carrying over 5 units) | $6.50 |
| Limited students (carrying 5 units or less) per unit | 2.50 |
| Materials and service: | |
| Regular students | 4.50 |
| Limited students per unit | .50 |
| Student activity fees (not a State Fee): | |
| Regular students | 10.00 |
| Limited students | 3.50 |
| Associated Students Group Accident Insurance | 2.50 |

### Miscellaneous Fees and Deposits

(Fees payable when service is rendered)

| | |
|---|---|
| Change of program | $0.50 |
| College Bulletin | .35 |
| Duplicate library card | .25 |
| Duplicate registration book | .50 |
| Evaluation of transfer records for advanced standing | 2.00 |
| Late filing of registration book | 1.00 |
| Late registration | 1.00 |
| Transcript of record (1st copy free) | 1.00 |
| (Deposits payable before laboratory work is started) | |
| Chemistry | 5.00 |

### Graduation Fees

| | |
|---|---|
| State teaching credentials (each credential) | $3.00 |
| Diploma | 1.00 |

The credential fee is collected through the college by cashier's check or post office money order made payable to the State Department of Education.

# GENERAL REGULATIONS

## INFORMATION

All inquiries relative to the college should be directed to the Registrar's Office.

## NUMBERING OF COURSES

Courses numbered 1 through 99 are in the lower division; those numbered 100 through 199 are in the upper division; and those numbered 200 or over are in the graduate division. Courses numbered 300 or over are professional education courses on the graduate level.

## SCHOLARSHIP, GRADES, AND GRADE POINTS

The following grades are used in reporting the standing of students at the end of each semester: A, excellent; B, good; C, fair; D, passed; F, failed; I, incomplete; E, conditioned (may be made up to grade of D); Cr, credit (without grade); WP, withdrawal passing; and WF, withdrawal failing.

Grades of I or E must be made up by the end of the next semester; otherwise the grade of F will be recorded.

Grade points are assigned as follows: Grade A, 3 points per unit; B, 2 points per unit; C, 1 point per unit; D, no points; F or WF, minus 1 point per unit. Grades of I, Cr, or WP are disregarded in computing grade points. The grade of E is treated as minus 1 point per unit until a final grade is recorded. The number of grade points a student has earned in a subject is determined by multiplying the number of points he has received by the number of units allowed. The grade point average is determined by dividing the grade points earned by the number of units attempted. A student must earn at least a C average in all work undertaken at the college to qualify for a degree or a transcript of record with recommendation to another collegiate institution. Any course may be repeated, but not for additional credit; however, only the second grade earned is considered in the student's average.

### Revision of Grade Point Scale

Beginning in January, 1949, a revision of the present grade point scale will become effective. The change will involve the elimination of the minus grade points assigned to failing grades. Other regulations regarding grade points will also be revised to correspond to the changes in the grade point scale.

## CLASS, UNITS OF WORK, AND STUDY LIST LIMIT

Students who have completed 0 to 29 units of work are classified as freshmen; 30 to 59 units as sophomores; 60 to 89 units as juniors; and 90 or more as seniors.

A unit of credit represents 50 minutes of lecture or recitation combined with two hours of preparation per week through one semester, or three hours of laboratory or field work in the case of laboratory credit.

Students are not ordinarily permitted to enroll for more than 16 units * for credit toward graduation. A normal semester's program is 15 units.

Certain exceptions to this rule exist. If during the preceding semester the student has carried at least 12 units *: (1) If a grade point average of at least 1.5 was earned, 17 units * may be carried for credit toward graduation; and (2) if a grade point average of 2.0 (B) was earned, 18 units * may be carried.

Exceptions to these regulations may be secured only through a petition to the Scholarship Committee.

No student may register for less than 12 units (the minimum full-time load) without the approval of the Dean of General Education or the Dean of Professional Education.

---

* In addition to the required one-half unit physical education activity courses.

# PROBATION AND DISQUALIFICATION

## Probation

Any student whose scholarship record shows a cumulative deficit of 12 or more grade points below a C average for all work undertaken in the college will be placed on probation. Probationary status may be continued provided that the student does not increase his grade point deficiency.

## Disqualification

Any student on probation whose scholarship falls below an average grade of C n any single semester is disqualified from further attendance at the college. A scholarship record below a D average for any single semester also disqualifies a student.

A disqualified student may be reinstated after an interval of one semester for reasons satisfactory to the Executive Committee of the Faculty. All applications for reinstatement must be in writing.

Beginning in January, 1949, a revision of the standards for disqualification will be made to correspond with the anticipated grade point revision to become effective at the same time.

# WITHDRAWALS FROM CLASS

Forms for withdrawal from class may be obtained at the Registrar's Office. If a student withdraws from class during the first seven weeks of a semester, a grade of WP will be recorded upon his permanent record for each class which he has dropped. If he withdraws during the remainder of the semester, either an I or a WF will be recorded unless a grade of WP is approved by the proper dean. A grade of I automatically becomes an F unless the work is completed by the end of the next semester of attendance.

# TRANSCRIPTS OF RECORD

Students may secure upon request one transcript of record without fee. Thereafter, a fee of $1 is charged for each transcript secured upon request. Once a student has matriculated in this college, transcripts from other schools will not be returned, or copies of them made. No fees are charged for transcripts required for military purposes.

Transcripts in the possession of students are to be regarded as unofficial records.

# ELIGIBILITY FOR DIRECTED TEACHING

No student shall be eligible for directed teaching (Education 116) leading to the Kindergarten-Primary, General Elementary, General Junior High, and Special Secondary Credentials who has not completed 75 units, been admitted to Teacher Education, and whose entire record, as well as for the preceding semester, does not average at least a 1.2 grade.

No student shall be eligible for directed teaching (Education 316) leading to the General Secondary Credential who has not been admitted to the teacher education program prescribed for admission to candidacy for this credential.

# THE HONORS GROUP

All students who at the end of the sophomore year have attained a grade-point average of 2.5, and such others as have attained a high average in the department in which their major is selected, and who have received the recommendation of that department and the consent of the Committee on Honors, may if they so elect, constitute an honors group, for special treatment in their major subject.

Such students, so far as the facilities of the department and the best interests of he students under its charge allow, shall be treated as befits their individual needs and as their individual capacities warrant. They shall be eligible to enroll in honors or special study courses, although credit in such courses shall be limited to 5 units a emester. They shall not be held to regular attendance in the established courses of their departments if, in the opinion of the instructor, the course requirements can be met hrough special assignments and examinations or by satisfactory performance in the regular examinations in the course. With the consent of the major department, requirements concerning minors and specific courses or sequences in the major may be se aside. Each honor student shall be assigned to a member of his major department fo advice and direction.

Students in the honors group who fail to take advantage of the opportunitie there offered may at the end of any semester be transferred by the department to th general course. Students in the general course who show unusual capacity, upon recommendation of the department and the Committee on Honors, may at the end of an semester, be transferred to the honors group if such transfer appears practicable.

Students who wish to apply for entrance in the Honors Group may do so by fillin out cards to be obtained from their major departments. The applications should b filed with the chairman of the major department not later than a week after registration opens. Units earned by students doing individual study under this plan will b recorded under the symbol 166 and will be subject to the formulated rules dealing wit limitations of student load.

## THE DEGREE WITH HONORS AND WITH DISTINCTION

Upon recommendation of the Committee on Honors, graduation with honors shal be granted to the upper 10 percent of the graduating class. Each department shal determine which students it will recommend for distinction in the major field at graduation, and report its recommendation to the Committee on Honors for transmission t the faculty.

## EXAMINATIONS

No final examinations shall be given to individual students before the regula time. Any student who finds it impossible to take a final examination on the date scheduled must make arrangements with the instructor to have an incomplete grade reporte and must take the deferred final examination not later than the end of the first semeste of attendance following that in which the incomplete was given. No exception shall b made to this rule without the approval of the Dean of General Education or the Dea of Professional Education and the instructor concerned.

## CREDIT FOR EXTENSION COURSES

The amount of credit for extension and correspondence courses acceptable i fulfillment of the requirements for the Bachelor of Arts Degree will depend upon th nature of the courses, the quality of the work done, and the student's preparatio for work in the field of the course. The college ordinarily limits credit to such course as have been approved, and the total of such acceptable credit to 12 units. **Extensio courses are not accepted for graduate credit.**

## CREDIT GRANTED FOR MILITARY SERVICE

Six units of lower division elective credit will be granted to students who hav served in the armed forces of this country upon the completion of the prescribed basi training program before January 1, 1947. Documentary evidence bearing the signature of the proper commanding officer must be filed before credit will be accorded t the student.

Additional units of credit may be granted to students who can document the fac that they have completed officer's or other specialized training, and have been assigne to active military duty before January 1, 1947.

# THE BACHELOR OF ARTS DEGREE

## GENERAL REQUIREMENTS FOR THE BACHELOR OF ARTS DEGREE IN TEACHER EDUCATION AND IN LIBERAL ARTS

### TYPES OF CURRICULA

San Diego State College offers two types of curricula leading to the A.B. Degree:
(1) The curricula leading to the California teaching credentials,
(2) The liberal arts curricula.

### GRADUATION REQUIREMENTS

(a) A minimum of 120 semester units of college work representing a four-year ourse is required for graduation.

(b) Twenty-four units of work, ordinarily taken in the senior year, must be arned at this college.

(c) At least a C average in scholarship must be maintained in all work applied oward the degree, in the major field, and in all work taken at this college.

(d) At least 40 units must be completed in the upper division, 30 of which must e earned after all lower division requirements have been satisfied.

(e) Student must comply with the State requirements in United States Constiution, American history, institutions, and ideals.

(f) All major, minor, and specific curriculum requirements must be met.

## LOWER DIVISION REQUIREMENTS FOR ALL CURRICULA

| | *Units* |
|---|---|
| hysical Education | 2 |
| ealth Education 21 | 2 |
| nglish | 6 |
| sychology | 3 |
| oreign Language (not required in commerce, general engineering, or in teacher education in the elementary, junior high and special secondary curricula) | 10 |
| athematics A and B, 6 units, or high school algebra and geometry | 0-6 |
| ocial Sciences | 12 |
| atural Sciences | 12 |
| lectives to make total of 60 units, including lower division preparation for the major and minor. | |

### EXPLANATION OF LOWER DIVISION REQUIREMENTS

**nglish**

The English requirement should be satisfied in either the freshman or sophomore ear. Unless departmental regulations specify other courses, the student should satisfy his requirement by taking English 1 and either English 2 or any optional course pproved by the English Department. English majors are not required to take English 2. The prerequisite for English 1 is a passing mark in the English A qualifying xamination or completion of the course in English A. Credit in English A may be used oward graduation but not in satisfaction of the 6-unit lower division requirement in nglish.

**sychology**

The requirement in psychology should ordinarily be satisfied in the freshman ear by completion of Psychology 1.

**oreign Languages**

At least 10 units in one foreign language are required in the lower division except hat no language is required in commerce, general engineering, or in teacher education in the elementary, junior high, and special secondary curricula. No degree credit i given for only the beginning college semester of a foreign language (except Spanish 70)

*Reduction of unit requirement.* High school work completed with grade of or better for the final semester of a year course in foreign language may meet th foreign language requirement in part. Each year course completed in high school i any foreign language is counted in satisfaction of 3 units of this requirement. A tota of 9 units so credited will satisfy in whole the foreign language requirement. If tw or more years have elapsed since the completion of a high school course in any foreig language, the final year of the high school course may be repeated for college credit Foreign language courses for which a D grade was received in the final semester o a year course in high school may also be repeated for college credit. The student shoul register in a college foreign language course for credit as follows:

| *Year courses completed in high school* | *If completed with grade of C or better student should register as follows:* | *After lapse of 2 years or D grade, student may register as follows:* |
|---|---|---|
| 1 year | Course A for 2 units | Course A for 5 units |
| 2 years | Course B for 4 units | Course A for 2 units |
| 3 years | Course C for 3 units | Course B for 4 units |
| 4 years | Course D for 3 units | Course C for 3 units |

### Social Sciences

Twelve units chosen from two or more of the following fields in social scienc are required: anthropology, economics, geography (except 1, 3 and 4), history, politi cal science, social science, and sociology. Eight of the 12 units must be in th lower division. (Note: Courses in commerce, home arts, library science, philosophy, o psychology may not be used in satisfaction of this 12 unit social science requirement.)

*Reduction of unit requirement.* Two high school semester courses in the field of history, political science, sociology, and economics taken in the senior year wit grades of B or better may be used to reduce the 12 unit social science requiremen to 9 units.

### Natural Sciences

Twelve units, at least 8 of which are in the lower division, selected from course representing each of the following groups, are required:

*(a) Life sciences.* Courses must be selected from one of the following fields bacteriology, biology, botany, physiology, or zoology. This requirement may be satis fied by completion of a year course in high school or by a semester course in colleg (recommended: Biology 1). If laboratory credit is desired, select from life scienc courses listed in section (c) below.

*(b) Physical sciences.* Courses must be selected from the following fields astronomy, chemistry, Geography 1 or 3 (but not both), geology, physical science or physics. A semester course in college in any one of these subjects will satisfy thi requirement. This requirement may also be satisfied by completion of a year cours in high school chemistry or physics. (Students who expect to satisfy this requiremen by a physical science course in college should register for the following: those wh have not completed a year course in high school in either physics or astronomy, shoul take Physical Science 1A; those who have not completed a year course in high schoo in either chemistry or geology should take Physical Science 1B.) If laboratory credi is desired, select from physical science courses listed in section (c) below.

*(c) Laboratory course in natural sciences.* This requirement may be satisfie by completion of a year course in high school with grade of C or better for the fina semester of the junior or senior year in one of the following fields: botany, chemistry physics, or zoology. The laboratory requirement may be satisfied by one of the following college courses:

| *Life Sciences* | *Physical Sciences* |
|---|---|
| Bacteriology 1 | Chemistry 1A or 1B |
| Biology 10A and 10B | Chemistry 2A and 2B |
| Botany 2A or 2B | Geology 1A and 1B |
| Physiology 1C | Physics 1A and 1B or 1C and 1D |
| Zoology 1A or 1B | Physics 2A, 2B, 3A, and 3B |
| | Astronomy 1 and 9 and 10 |

*Reduction of unit requirements.* The 12 unit natural science requirement may reduced to 9 units by completion of a high school year course in biology, botany, emistry, physics, physiology, or zoology taken in the senior year with grade of B better for the final semester.

### athematics

Mathematics A (elementary algebra) and Mathematics B (plane geometry) e required. This requirement may be satisfied by completion of a year course in gh school in algebra and a year course in plane geometry with grade of C or better r the final semester of each course. College credit will be granted for completion of athematics A or B unless the corresponding high school course was completed with ade of C or better in which case the repeated course will be classified as a "refresher" urse carrying no college credit. Students having one semester high school credit in igonometry, intermediate algebra or solid geometry may repeat the corresponding urse in college for 1½ units of college credit.

### ower Division Preparation for the Major

See description of requirements for teaching majors on page 23. Specific requireents for the majors in the liberal arts curricula are listed in connection with the scriptive list of courses in each major field (see pages 71 to 167).

### ower Division Preparation for the Minor

See description of requirements for liberal arts minors on page 20 and for teachg minors on page 23.

# UPPER DIVISION REQUIREMENTS FOR THE BACHELOR OF ARTS DEGREE IN LIBERAL ARTS

## MAJORS IN LIBERAL ARTS

The liberal arts curricula lead to the Bachelor of Arts Degree with majors i **art, chemistry, commerce, economics, English, French, general engineering, geography, history, life science, mathematics, music, physics, political science, psychology, sociology, Spanish, speech arts, and zoology** and qualify for graduate wor in these fields in recognized American colleges and universities. Completion of th requirements of these curricula also enables the graduate to satisfy undergraduat requirements for the general secondary credential which, with graduate work, wil enable the holder to teach in a senior high school or junior college.

## MINORS IN LIBERAL ARTS

Minors must be established in one of the following fields: **anthropology, ar botany, chemistry, commerce, comparative literature, economics, education, English, French, geography, geology, health education, history, journalism, lif science, mathematics, music, philosophy, physical education, physics, politica science, psychology, recreation, sociology, Spanish, speech arts, and zoology.**

## UPPER DIVISION REQUIREMENTS

### Preparation for Upper Division

Students must complete the lower division requirements for all curricula. I addition, lower division requirements for the major and minor must be completed. Refe to the section of this bulletin on Courses, pages 71 to 167, and to the outlines of curricula, pages 51 to 70, for further information.

### Minimum Units and Credit Limitations

Major and minor work are required as follows:

| | *Units* |
|---|---|
| Minor (minimum in upper division courses) | 9 |
| Major (upper division courses) | 24 |

At least 40 units in upper division courses must be completed, 30 of which mus be earned after all lower division requirements have been satisfied. If a student i approaching upper division standing, he may carry sufficient lower division units t complete the required minimum of 60 units and carry upper division units for th remainder of his study load. Students with sophomore standing may carry upper division courses for upper division credit provided that they have the written approval o the chairman of the department and the Dean of General Education or Dean of Professional Education.

## MAJORS AND MINORS

### Majors

The specific requirements for each major are listed at the beginning of eac departmental division among the description of courses. (See pages 71 to 167.) Th student is advised to choose his major as early in his college course as practicable s that he may be able to plan his work according to the major requirements. Failure t meet the lower division requirements of the major department before the junior yea may make it impossible to satisfy the upper division requirements within the norma period of two years. In addition to departmental majors, the following majors are als offered:

**The General Major:** The general major of 36 upper division units must be chose from three fields with not more than 15 units nor fewer than 6 to 9 units from any on field. A minimum of a year course in each field must be completed in the lower divisio as foundation for upper division work in the general major. A minor is not required however, 4 additional upper division elective units must be completed to meet the minimum requirement of 40 upper division units for graduation.

The general major is planned for students who are preparing for home arts, law journalism, library work, social work, theology, recreation, or for any other vocatio requiring a background of general training. The program of the student should be planned in consultation with the Dean of General Education and approved, revised, or rejected by the chairmen of the departments represented in the major.

**Life Science Major:** Lower division requirements: Zoology 1A-1B or Biology 10A-10B; Zoology 20; Botany 2A-2B; Chemistry 1A-1B or 2A-2B; Physics 2A-2B-3A-3B. Recommended: Geology 1A, Astronomy 1. Upper division requirements: A minimum of 24 upper division units in zoology and botany of which 6 units may be from a related field. The plan for this major must be with the approval of the Chairman of the Division of Life Sciences.

### Minors

A minor consists of at least 15 units of work completed in one of the above fields of study. At least nine of these units must be earned in upper division courses. The entire requirement for a minor may be met with upper division courses provided these courses have no lower division prerequisites. Prerequisites for each course are listed among the course descriptions on pages 71 to 167.

In addition to the departmental minors listed above, the following minors are offered:

**Minor in Life Science:** Lower division requirements: Biology 10A-10B or equivalent; Zoology 20; Chemistry 2A-2B or 1A. Recommended: Astronomy, geology, physics. Upper division requirements: At least 9 upper division units in zoology and botany to be selected with the approval of the Chairman of the Division of Life Sciences.

**Minor in Recreation:** Students must show credit for 4 semesters of physical education activity courses and in addition a minimum of 6 lower division units to include Physical Education 51, 53, and electives chosen from Art 61B or fields of dance, drama, or music. Upper division courses must include a minimum of 9 units, including Physical Education 165, 170, and 199. Consultation with the Chairman of the Division of Health, Physical Education, and Recreation is advised.

## EXAMINATION REQUIREMENTS IN THE UNITED STATES CONSTITUTION AND AMERICAN HISTORY, INSTITUTIONS, AND IDEALS

Each student of a state college to qualify for graduation shall demonstrate competence in the United States Constitution and American history, institutions and ideals, by passing satisfactorily a comprehensive examination on these fields prepared and administered by the college. Students transferring from other institutions of collegiate grade who have already met this requirement may have this examination waived, except that candidates for a teaching credential must meet the United States Constitution requirement by examination or by completion of a course covering the Constitution in a California institution of collegiate grade. The examination ordinarily should be taken in the junior year.

This graduation requirement may be fulfilled by any one of the following alternatives:

1. Passing satisfactorily comprehensive examinations in both United States Constitution and American history, institutions and ideals.
2. Completion of History 17A and 17B, or History 171A and 171B, or History 172A and 172B, or Political Science 139A and 139B.
3. Completion of Political Science 71A and 71B, or Political Science 101, plus satisfactory completion of an examination in American history, institutions and ideals.
4. Completion of History 8A and 8B, or History 173A and 173B, or History 179A and 179B, plus satisfactory completion of an examination on the United States Constitution or the substitutes for that examination enumerated in item 3.
5. Completion of comparable courses in other institutions of collegiate grade, except that candidates for the A.B. Degree and a teaching credential must have completed the course covering the United States Constitution in a California institution of collegiate grade.

## PROFESSIONAL, PREPROFESSIONAL, AND VOCATIONAL CURRICULA

For description of professional curricula in education, see pages 27 to 50; for pre-professional and vocational curricula, see pages 51 to 70.

# UPPER DIVISION REQUIREMENTS FOR THE BACHELOR OF ARTS DEGREE IN TEACHER EDUCATION

## TEACHING CREDENTIALS

San Diego State College is authorized by the State of California to recommen students for the teaching credentials listed below. To be recommended, students mus complete, or have completed, the A.B. Degree in one of the curricula offered for teachers

| *The credential* | *Subjects and grades for which it is valid* |
|---|---|
| General Elementary | All grades through the eighth. |
| Kindergarten-Primary | Kindergarten through third. |
| General Junior High (Must be taken with another credential) | All subjects in grades seven, eight and nine in al elementary or secondary schools. |
| General Secondary | All subjects in the public schools in grade 7 and above |
| Special Secondary in Art | Art in all grades of the public schools. |
| Special Secondary in Business Education | Business education subjects in all grades of the publi schools. |
| Special Secondary in Music | Music in all grades of the public schools. |
| Special Secondary in Physical Education | Physical education in all grades of the public schools |
| Special Secondary in Speech Arts | Speech in all grades of the public schools. |
| Special Secondary in Correction of Speech Defects | Correction of speech defects in all grades of the publi schools. |
| Administration in Elementary Education | Authorizes for certificate to serve as superintendent, deputy superintendent, assistant superintendent, principal, vice principal, and supervisor of instruction in elementary schools. |
| Supervision in Elementary Education | Authorizes for certificate to supervise instruction in elementary schools. |
| Special Subject Supervision | Supervision of the special subject in all grades. |

## COMBINATION OF CREDENTIALS

Students who seek more than one teaching credential must complete in full the curriculum for each, with only such exceptions as are indicated in the statement of requirements. For each credential in addition to one, at least 12 additional units must be earned. These 12 units may be taken in nonprofessional courses if all basic curriculum requirements have been satisfied.

A combination of the elementary school credential and the junior high school credential may be secured by completing the requirements for the elementary school credential and the following additional requirements:

(a) A teaching major.
(b) Education 100B in the major field.
(c) Three units of directed teaching, or equivalent, in a junior high school.
(d) Education 115B.
(e) A minimum total of 132 units.

A combination of the junior high school credential and a special secondary credential may be secured by completing the requirements for the special secondary credential and the following additional requirements:

(a) A junior high school teaching major.
(b) Education 100B in the junior high school teaching major.
(c) Three units of student teaching in the junior high school teaching major.
(d) A minimum of 132 units.

A candidate for either the general elementary credential or the kindergarten-rimary credential may secure the other credential subsequently or concurrently by taking 12 additional units. Four of these units shall be in directed teaching (Educaion 116) at the new level and the remainder as prescribed by the Director of Elementary Education.

## EXAMINATION REQUIREMENTS IN THE UNITED STATES CONSTITUTION, AMERICAN HISTORY, INSTITUTIONS, AND IDEALS

For explanation of these requirements, see page 21.

## UPPER DIVISION REQUIREMENTS

### Preparation for Upper Division

Students in teacher education curricula must complete the lower division requirements for all curricula as indicated on page 17. Additional pattern requirements are utlined under each specific curriculum on the following pages.

### Minimum Units and Credit Limitations

A minimum of 40 units in upper division courses must be completed, 30 units of which must be earned after all lower division requirements have been satisfied. If a tudent is approaching upper division standing, he may carry sufficient lower division nits to complete the required minimum of 60 units and carry upper division units for he remainder of his study load. Students with sophomore standing may carry upper ivision courses for upper division credit provided that they have the written approval f the chairman of the department and the Dean of Professional Education.

A maximum of 40 units of credit in any one subject matter field or in education ourses may be applied toward the requirements of the A.B. Degree.

### Preparation for Graduate Work

Students who take the A.B. Degree with a special credential and who contemlate doing graduate work for a master's degree in an academic field or for the general secondary credential, will find it advantageous to use their electives to provide a founation for that work.

## MAJORS AND MINORS

All teaching curricula require one major and one minor.

### Major and Minor for the Elementary Credential

**Education** shall be the major for the kindergarten-primary and general elementary chool credentials. Its requirements are outlined under those curricula. It is recommended that the minor for these credentials be chosen from the academic fields of **English, foreign languages, mathematics, science or social science.** The minor in ocial science must include 6 upper division units in history or in geography and 3 units elected from anthropology, economics, geography, history, political science, or sociology. A second minor, though not required, may be chosen from one of these fields or from art, music, physical education or speech arts. Students taking an elementary creential in combination with a special secondary credential may use the special major or their minor in elementary education.

### Teaching Major for Junior High School and Special Secondary School Credentials

A teaching major for the junior high school credential consists of a minimum of 4 units of which a minimum of 18 units must be in the upper division. An average f C in scholarship is required in all upper division courses in the field of the teaching major. Teaching majors may be established in the following fields: **English, foreign languages, general science, mathematics, and social science.** A teaching major in he special secondary credential curricula of art, business education, music, physical ducation, and speech arts ranges from 24 to 40 units, depending upon the curriculum. Refer to the following pages for outlines of requirements for these credentials.

*A Teaching Major in English* shall include English 1; 6A; 56A-56B or 60A-60B; nd 18 units of upper division work. This credit must include 3 units in American literature and 3 units in Shakespeare. Recommended: English 192.

*A Teaching Major in General Science* shall include a minimum of 24 units, not less than 18 of which are upper division, including a college year course in a biological science, a year course in high school or college physics and a concentration of 12 units, at least 6 of which are upper division, in one major subject (botany, chemistry, physics, zoology). See definition of teaching majors.

*A Teaching Major in Social Science* shall include a minimum of 24 units not less than 18 of which are upper division. There shall be a concentration of 12 units, at least 6 of which are upper division, in one major subject (anthropology, economics, geography, history, political science, sociology). A year course in American History must be included. See definition for teaching majors for the junior high school credential.

### Teaching Minor for Junior High and Special Secondary Credentials

A teaching minor consists of 15 units in a given field, of which 9 or more must be in upper division courses. Teaching minors may be established in the following fields: **art, business education, English, foreign languages, general science, health education, mathematics, music, social science, physical education, recreation, and speech arts.** (See requirement above for elementary school credentials.)

*A Teaching Minor in English:* Candidates for the teaching minor in English must include English 1; 6A; and 9 elective units in upper division English. This credit must include 3 units in American Literature, taken either in lower division or in upper division. Credit in journalism and speech arts may not be used to fulfill the requirements for the English minor.

*A Teaching Minor in Health Education* shall include: Physical Education 51, Home Arts 61A, and Health Education 65 in the lower division; Health Education 152, 153, Physical Education 199 or equivalent in the upper division. For physical education majors, Health Education is allowed only as a second minor area.

*A Teaching Minor in Music:* Candidates for the teaching minor in music are required to take music aptitude tests at the time the minor is chosen and to enroll in at least one music activity each semester. In special cases this requirement may be waived by permission of the faculty of the Music Department.

Applicants for music minors must maintain a grade average of C in all music courses. All students must show credit for Music 1A or clear this requirement by examination. Music 7A is required of all candidates for the elementary credential. In the lower division, with the proper regard for course sequences, 6 units may be chosen from the following courses: Music, 1A-1B-1C-1D, 2A, 3A, 4A-4B, 6A, 8A-8B, 16, 17, 18, Aesthetics 1A-1B. Nine units of upper division music are required, not more than two of which may be selected for credit from the activity courses (Treble Clef, orchestra, etc.).

*A Teaching Minor in Physical Education:* Men must show credit for: four semesters of physical education activity courses, Physical Education 51, 53 and 72 in the lower division; Education 100B-PE, Physical Education 154, 170 and at least two units in an upper division Professional Activity course approved by the department.

Women must show credit for: four semesters of physical education activity courses, Physical Education 53, and 3½ units of electives in the lower division; nine units chosen from Physical Education 153, 156A-156B, 161, 164 and 170 in the upper division.

*A Teaching Minor in Recreation:* A teaching minor in recreation shall include 4 semesters of physical education activity courses and in addition Physical Education 51, 53, 165, 170 and electives selected from Art 61B or from the fields of dance, drama, or music. The upper division must include Physical Education 199, Special Study in Physical Education or Recreation, to meet the individual needs of the student; to be planned in consultation with the Chairman of the Division of Health, Physical Education, and Recreation. Physical Education majors may use this as a second minor only.

*A Teaching Minor in Social Science:* A teaching minor in social science must include the general education lower division requirement and in addition a minimum of 9 units of upper division social science courses, selected from anthropology, economics, geography, history, political science, or sociology, 6 units of which must consist of a year course sequence. A year course in American History must be completed in either the lower or upper division.

### Teaching Majors for General Secondary Credential

Teaching majors may be established in the following fields: **art, business edu- ation, chemistry, economics, English, history, life science, music, physical science, hysics, social science, and speech arts.** In most fields, 12 semester units are required n the lower division and 24 semester units in the upper division. Some departments ermit 6 units of these 24 upper division units to be selected from related fields with he approval of the departmental representative. In addition to these undergraduate equirements, 2 to 5 semester units of graduate work are required in the major field uring the postgraduate year. Refer to pages 39 to 48 for the programs for each epartment. Candidates for the General Secondary credential should consult with the irector of Secondary Education. Refer to page 39 for requirements for admission to andidacy for the General Secondary credential.

### Teaching Minors for the General Secondary Credential

Teaching minors may be established in the following fields: **art, business edu- ation, chemistry, economics, English, French, health education, history, life cience, mathematics, music, physical education for men, physical education for omen, physics, recreation, Spanish, and speech arts.** In most fields, 6 semester nits are required in the lower division and 9 semester units in the upper division for he A.B. Degree. This credential requires enough additional units to make a minimum f 21 semester units to be completed by the date of recommendation for the credential. efer to pages 39 to 48 for the programs for each department.

## ADMISSION TO TEACHER EDUCATION

Students who expect to become teachers should apply for admission to teacher ucation during the first semester of the sophomore year. Students entering the college t the end of the sophomore year will apply at the beginning of the junior year. No urses in education may be taken until admission is granted; any exception to this le must have the approval of the Dean of Professional Education. *Admission to the llege* does not guarantee that the student will be admitted to teacher education. The llowing requirements must be met for admission to teacher education curricula:

1. A satisfactory score on a college aptitude test taken at the college.
2. Evidence of competence in the use of the English language and of satisfactory ability in arithmetic, handwriting, reading, and spelling indicated by having passed the Fundamentals Test. (See college calendar for dates of test which should be taken in the *freshman year.)*
3. Assurance of correct speech habits and voice control by having satisfactorily completed a course in corrective speech or by having passed a speech test given by the college.
4. Assurance of physical fitness.
5. If the student is to be a candidate for the general secondary credential or one of the special secondary credentials, he must furnish a recommendation from the chairman of that department stating that the student has ability and shows promise of teaching success in his field and that the department looks with favor upon his application.
6. The completion of the first two years or more of a given curriculum, or its equivalent, and of subsequent work with a grade point average of 1.2 or better for all credentials except the general junior high school or the general secondary, for which shall be required a grade point average of 1.5 or better in all work and 1.75 in the major field.
7. If the student is a candidate for any credential on the secondary school level (general junior high school, special secondary, or general secondary), he must have a satisfactory score on a General Culture Test.
8. If the student is a candidate for the General Secondary credential he must have a tentative program approved by the authorized departmental representative of his major field, minor field, and the education department.
9. All applicants need to be approved by an interviewing committee of the college faculty. In its evaluation the committee will consider the following factors established by the State Board of Education: intelligence, scholarship, professional aptitude, personality and character, speech and language usage, and many-sided interests.

### Transfer Students

Students who have completed two or more semesters of work in another college, upon transferring to San Diego State College, should make application for admission to teacher education as soon as they enroll in the college. Transfer students should take the necessary tests for admission to teacher education given during the orientation period. (See college calendar for dates.)

### Transfer Students With Emergency Credentials in Elementary Education

Certain adaptations in the education courses have been made to meet the needs o experienced teachers who hold an emergency credential in elementary education. See the Director of Elementary Education for details.

### Advanced Standing in Teacher Education

A minimum of 6 units in education courses is required for graduation from thi college. The college also requires satisfactory evidence of successful teaching ability.

After an interval of 5 years, courses in education are reevaluated and subject t deduction in credit, in light of such new requirements as may have been put int effect and changes in educational procedures. Students formerly in attendance wil not be considered to be working in the curriculum until an evaluation and statemen of credit has been secured from the Registrar's office. All courses taken either at thi college or elsewhere must be approved by an official adviser in order to be credite toward meeting degree requirements.

### Admission to Graduate Courses (200-299)

For requirements for admission to 200-299 courses, see page 12.

# PROFESSIONAL CURRICULA IN EDUCATION

Professional curricula in education, requiring from four to five years to complete, lead to the teaching credentials.

All candidates in teacher education curricula should observe carefully the requirements for admission to teacher education and be prepared to meet them at the end of the sophomore year. Students in other colleges who contemplate transferring to San Diego State College should arrange their programs so as to meet the requirements of their particular curriculum as early as possible. See college calendar for dates when the Fundamentals Test will be given. See page 25 in this bulletin for requirements for admission to teacher education.

## CURRICULA LEADING TO THE GENERAL ELEMENTARY, KINDERGARTEN-PRIMARY, OR GENERAL JUNIOR HIGH SCHOOL CREDENTIAL

### A.B. DEGREE WITH GENERAL ELEMENTARY OR KINDERGARTEN-PRIMARY CREDENTIAL

One teaching minor is required. See page 23 for statement.

### Freshman Year

| | *Units for General Elem.* | *Units for Kdg.-Primary* |
|---|---|---|
| *First Semester* | | |
| Art 6A, Design | 2 | 2 |
| English 1, Freshman Composition | 3 | 3 |
| Health Education 21, Principles of Healthful Living | 2 | 2 |
| Physical Education (activity course) | ½ | ½ |
| Physical Science 1A, Introduction (If year-course in high school physics completed, substitute another science) | 3 | 3 |
| Electives (Advisable to start social science or other lower division requirements; also minor. See page 17) | 6 | 6 |
| *Second Semester* | | |
| Art 6B, Design | 2 | 2 |
| English 2, Freshman Literature or optional course | 3 | 3 |
| Physical Education (activity course) | ½ | ½ |
| Physical Science 1B, Introduction (If year-course in high school chemistry completed, substitute another science) | 3 | 3 |
| Psychology 1, General | 3 | 3 |
| Electives (Continue social science, other lower division requirements, or minor) | 3–5 | 3–5 |
| | 31–33 | |

## Sophomore Year

| | Units for General Elem. | Units for Kdg.-Primary |
|---|---|---|
| *First Semester* | | |
| Art 61A, Crafts in the Elementary Schools | 2 | 2 |
| Biology 1, Survey of Biology (If no previous science laboratory, take Biology 10A-10B or Botany 2A. Not required if year-course in high school biology, botany, physiology, or zoology completed. See page 18) | 3 | 3 |
| Geography 1, Elements (natural science credit) | 3 | 3 |
| Music 1A, Musicianship—Fundamentals of Music | 3 | 3 |
| Music 28A, Piano (or equivalent by examination, but without credit. May be taken in the junior year) | – | 1 |
| Physical Education (activity course) | ½ | ½ |
| Electives (social science, natural science, or minor) (Prepare for the graduation requirement in U. S. Constitution, American history, institutions, and ideals. See page 21.) | 3 | 3 |
| *Second Semester* | | |
| Geography 2, Regions (social science credit) | 3 | 3 |
| Music 7A, Music Materials for the Elementary School | 3 | 3 |
| Music 28B, Piano (or the equivalent by examination) | – | 1 |
| Physical Education 53, Physical Education in the Elementary School | 2½ | 2½ |
| Spanish 70, Spanish for Elementary School Teachers (Not required but recommended if no high school Spanish) | 5 | – |
| Speech Arts 2A, Fundamentals | – | 3 |
| Electives (Complete lower division requirements and continue minor) | 1–4 | 1–4 |
| | 29–32 | |

## Junior Year

Students transferring from another curriculum in lower division or from anothe college or junior college may interchange this semester with semester II of the senio year. (Forty units of upper division work are needed.) The Education Departmen will probably find it necessary to ask some students who have met all requirements t defer entering practicum until the second semester of the junior year in order to equat class size. Those who defer entering the practicum should use this semester to

1. Complete lower division requirements in art, music, Physical Education 53 natural science, social science and others as needed.
2. Complete minor requirements.
3. Meet requirement for American History and U. S. Constitution.
4. Elect Education 102A or 102B if needed to complete program.

| | | | |
|---|---|---|---|
| *First Semester* | | | |
| Education 102A, Measurement and Evaluation in Elementary Education or Education 102B, Child Growth and Development | | 3 | 3 |
| Health Education 151, Health Education for Teachers (taken with practicum) | | 2 | 2 |
| Education 147, Education Practicum—Primary Level | | 10 | 10 |
| Methods in Primary Reading | 2 | | |
| Elementary School Methods, including Children's Literature | 2 | | |
| Elementary Music Education | 1 | | |
| Elementary Art Education | 1 | | |
| Mental Hygiene and Speech | 2 | | |
| Directed Teaching | 2 | | |

Proficiency in use of audio-visual equipment is required by examination. Specific instruction in audio-visual materials is given in each subject matter method course.

| | | Units for General Elem. | Units for Kdg.-Primary |
|---|---|---|---|
| *Second Semester* | | | |
| Education 102A, Measurement and Evaluation in Elementary Education, or 102B, Child Growth and Development | | 3 | 3 |
| Education 148, Education Practicum—Intermediate Level | | 12 | 8 |
| Elementary Arithmetic Education | 2 | | |
| Elementary Social Studies and Science Ed. | 2 | | |
| Elementary Art Education | 1 | | |
| Elementary Music Education | 1 | | |
| Educational Psychology (learning process, including theory of audio-visual education) | 2 | | |
| Additional 4 units for General Elementary, but not Kindergarten-Primary | | | |
| Language Arts | 2 | | |
| Directed Teaching | 2 | | |
| Education 116, Student Teaching, primary grades | | - | 3 |

## Senior Year

| | Units for General Elem. | Units for Kdg.-Primary |
|---|---|---|
| *irst Semester* | | |
| Education 116, Directed Teaching | 7 | 4 |
| Education 146, Kindergarten-Primary Practicum (follows Education 148) | - | 4 |
| Education 115A, History and Philosophy of Education (or in second semester) | 2 | 2 |
| Elective | 3 | 3 |
| *econd Semester* (and summer session if needed) | | |
| Elective to complete one minor and to equal total for degree | 16–18 | 16–18 |
| Total | 120 units | |

## Summary

| | Units for General Elem. | Units for Kdg.-Primary |
|---|---|---|
| rt 6A-6B, 61A | 6 | 6 |
| duc. 102A, 102B, 115A, 116, 146, 147, 148 | 37 | 37 |

| Total | 120 | 120 |

## A.B. DEGREE WITH GENERAL JUNIOR HIGH SCHOOL CREDENTIAL

Refer to page 23 for statements concerning teaching majors and minors. Students who expect to secure the General Secondary Credential should refer to pages 39 to 48, and use their elective units to work toward such programs outlined. Students who expect to secure the Master of Arts Degree should refer to page 17 and use their elective units to work toward a liberal arts major or minor. See statements on page 22 regarding combinations of this with other credentials. This credential may be earned only in conjunction with a second credential.

### Freshman Year

| | *Units* | |
|---|---|---|
| | *1st Sem.* | *2d Sem.* |
| Biology 1, Survey of Biology (see page 18) | 3 | – |
| English 1, Freshmen Composition, and 2, Freshman Literature, or optional course | 3 | 3 |

## .B. DEGREE WITH SPECIAL SECONDARY CREDENTIAL IN MUSIC

Students intending to become applicants for this credential must show evidence musical ability, before entering the course. They must be able to play artistically on the piano, music of the grade of the simpler *Songs Without Words* of Mendelssohn else possess a corresponding degree of proficiency in voice or an orchestral instru- nt. No credit is given to music majors for the basic courses of Music 1A and sic 7A, but if a deficiency exists in the field of general musicianship, the student ll be required to take either or both of these courses without credit.

All music majors are required to enroll in one musical activity each semester. tivities should be included from *both* instrumental and choral groups. In special ses this requirement may be waived by petition to the Music Department. All stu- nts are required to pass examinations in applied music in order to receive dit. No credit is allowed to majors in voice or orchestral instruments for any work piano which is below the level of artistic hymn playing.

Applicants for the Special Secondary Credential in Music must maintain a grade erage of C or better in music courses.

Each senior music major will perform, two months before his graduation, for the sic faculty, his senior recital in its entirety. At this time the faculty will judge the istry of the performance and choose those students who will be granted the privilege a public recital.

This course leads to the A.B. Degree with a Special Secondary Credential in sic which will authorize the holder to teach music in the elementary, junior and nior high schools of the State.

A maximum of 40 units in Music may be used toward the A.B. Degree. Of these units a maximum of 3 may come from the field of musical activities: band, choir, orus, glee clubs and orchestra.

# CURRICULA LEADING TO THE GENERAL SECONDARY SCHOOL CREDENTIAL

## INFORMATION CONCERNING THE GENERAL SECONDARY SCHOOL CREDENTIAL

A candidate for this credential must complete the requirements for the bachelor's gree from an accredited institution with a major and a minor commonly taught in secondary schools of California. Admission to candidacy for this credential should sought during the second semester of the sophomore year or upon admission to San ego State College with advanced or graduate status. Refer to page 25 for require- nts for admission to teacher education programs.

Students desiring a major in art, business education, music, physical education or eech arts should complete the requirements for the Special Secondary Credential in respective area desired, then continue with the graduate program. Refer to pages 39 48 for further details regarding these majors.

Students desiring one of the other areas as a major for which San Diego State llege is authorized (refer to page 25 for a complete list of majors and minors author- d) should complete a program leading to the A.B. Degree at the end of four years d the General Secondary Credential upon completion of the graduate year require- nts outlined on the following pages.

Any person desiring this credential should consult with the Director of Secondary ucation during his first semester of attendance at San Diego State College.

## RECOMMENDED PROGRAM FOR THE GENERAL SECONDARY SCHOOL CREDENTIAL

| | *Units* |
|---|---|
| Education 102C, Growth and Development of the Adolescent | 3 |
| Education 115B, Principles of Secondary Education | 3 |
| Health Education 151, Health Education for Teachers | 2 |
| Education 102D, Measurement and Evaluation in Secondary Education | 2 |
| Education 130, Educational Psychology | 2 |
| Education 115A, History and Philosophy of Education | 2 |
| Education 100B, Methods of Teaching (in the major and minor subjects) | 3 |

The graduate work must consist of a minimum of 24 semester units of upper vision or graduate work including the following specific requirements:

1. At least 12 semester units must be completed at San Diego State College.
2. At least one course of graduate level work (200 number) in the major field.
3. Enough units to complete a 21 semester unit minor. Refer to page 25.
4. Professional Education—completion of the courses listed above and the following:

| | *Units* |
|---|---|
| Ed. 201, Curricular Problems of the Secondary School | 3 |
| Ed. 202, Guidance Problems of the Secondary School | 3 |
| Ed. 316, Directed Teaching (or equivalent) | 6 |

The following pages outline tentative programs for the majors and minors for ich San Diego State College is authorized to recommend for the General Secondary edential.

### ajor in Art

The requirements for the A.B. Degree and the Special Secondary Credential in t should be completed simultaneously. (Students transferring from another institu- n with the A.B. Degree and a major in art should consult with the departmental resentative for special program planning.) Refer to page 31 for the recommended gram for the Special Secondary Credential in Art. After the above requirements ve been met, and the candidate has been accepted by the art staff for graduate work in art, the candidate for the General Secondary Credential shall complete a gradu year (refer to page 25) including the following courses in his major:

| *Graduate Year* | *Un* |
|---|---|
| Art 200A-200B, Special Problems in Art | 4 |

## Minor in Art

A minimum of 21 semester units, of which at least 9 units shall be upper division or graduate courses, must be completed.

*Lower Division*

| | |
|---|---|
| Art A-B, Drawing and Composition | 2– |
| Art 6A-6B, Design | 4 |
| Art elective (Art 14A, Lettering, recommended) | 0– |
| Aesthetics 50, Appreciation and History of Art | 2 |
| Aesthetics 5, Art Orientation, or Art 51, Survey of Mexican Art | 2 |

*Upper Division*

| | |
|---|---|
| Upper division electives in Art | 9 |
| Aesthetics 150, Appreciation and History of Art | 2 |

## Major in Business Education

The requirements for the A.B. Degree and the Special Secondary Credential in Business Education must be completed simultaneously. Refer to page 32 for the recommended program for the Special Secondary Credential in Business Education. After the above requirements have been met, the candidate for the General Secondary Credential shall complete a graduate year (refer to page 25) including the following courses in his major:

*Graduate Year*

Select four units from the following:

| | |
|---|---|
| Commerce 203, Secretarial Administration | 2 |
| Commerce 213, Problems in Business Education | 2 |
| Commerce 223, Problems in Merchandising | 2 |
| Commerce 233, Administration and Supervision of Business Education | 2 |
| Commerce 260, Advanced Problem Analysis (Accounting) | 2 |

## Minor in Business Education

A minimum of 21 semester units, of which at least 9 units shall be upper division or graduate courses, must be completed.

This minor is not approved as part of the requirements for the A.B. Degree unless the degree and a credential are awarded simultaneously. It is recommended as a second minor area only.

*Lower Division*

| | |
|---|---|
| Commerce 14A-14B, Principles of Accounting | 6 |
| Economics 1A-1B, Principles of Economics | 6 |

*Upper Division*

| | |
|---|---|
| Upper division commerce courses selected with approval of the departmental representative | 9 |

## Major in Chemistry

*Lower Division*

| | |
|---|---|
| Chemistry 1A-1B, General | 10 |
| Chemistry 5, Quantitative Analysis | 3 |
| Mathematics 7A-7B, Mathematical Analysis, or 3A-3B, Plane Analytic Geometry and First Course in Calculus, and 4A-4B, Second and Third Course in Calculus | 6–1 |
| Physics 2A-2B, General, and 3A-3B, Physcial Measurements (or 1A-1B-1C-1D, Principles) | 8–1 |

*Upper Division*

| | Units |
|---|---|
| Chemistry 101, 102, 103, Organic Chemistry | 10 |
| Chemistry 105, Advanced Quantitative Analysis | 3 |
| Chemistry 110A-110B, Physical Chemistry | 6 |
| Electives in upper division chemistry, or electives in a related field approved by the departmental representative | 5 |

*Graduate Year*

| | |
|---|---|
| Chemistry 200, Seminars | 4 |

### Minor in Chemistry

A minimum of 21 semester units, of which at least 9 units shall be upper division or graduate courses, must be completed.

*Lower Division*

| | |
|---|---|
| Chemistry 1A-1B, General | 10 |
| Chemistry 5, Quantitative Analysis | 3 |
| Physics 2A-2B, General, and 3A-3B, Physical Measurements (or 1A-1B-1C-1D, Principles) | 8–12 |

*Upper Division*

| | |
|---|---|
| Chemistry 101, Organic | 4 |
| Electives in upper division chemistry selected with approval of departmental representative | 5 |

### Major in Economics

*Lower Division*

| | |
|---|---|
| Economics 1A-1B, Principles of Economics | 6 |
| Lower division year course in history, political science or sociology | 6 |

*Upper Division*

| | |
|---|---|
| Economics 100A-100B, Modern Economic Thought | 6 |
| Economics electives, including a maximum of 6 units in a related field approved by the departmental representative | 18 |

*Graduate Year*

| | |
|---|---|
| Economics 200A-200B, Seminar in Modern Economic Thought | 4 |

### Minor in Economics

A minimum of 21 semester units, of which at least 9 units shall be upper division or graduate courses, must be completed.

*Lower Division*

| | |
|---|---|
| Economics 1A-1B, Principles of Economics | 6 |
| A year course in another social science area | 6 |

*Upper Division*

| | |
|---|---|
| Economics 100A, Modern Economic Thought | 3 |
| Upper division economics courses selected under the supervision of the departmental representative | 6 |

### Major in English

*Lower Division*

| | |
|---|---|
| English 1, Freshman Composition | 3 |
| English 6A-6B, The Study of Literature | 6 |
| English 56A-56B, Survey of English Literature or 60A-60B, The Literary Personality | 6 |

*Upper Division*

| | |
|---|---|
| Upper Division English courses selected under the supervision of the departmental representative | 24 |

*Graduate Year* Unit

One of the following seminars 2

English 201, Shakespeare
English 202, Mark Twain
English 221, Regionalism in American Literature
English 222, Utopias

English 192, The English Language (if not taken as an undergraduate) or 191, 195, or an additional seminar from the foregoing list 2–3

### Minor in English

A minimum of 21 semester units, of which at least 9 units shall be upper division or graduate courses, must be completed.

*Lower Division*

Lower division English courses to be selected under supervision of departmental representative 12

*Upper Division*

Upper division English courses to be selected under the supervision of the departmental representative 9

### Minor in French

A minimum of 21 semester units, of which at least 9 units shall be upper division or graduate courses, must be completed.

*Lower Division*

French A, B, C, D or equivalent 15–1
History 4A-4B, History of Modern Europe, or equivalent 6

*Upper Division*

French 101A-101B, Conversation and Composition 6
French Literature (select one course) 3

### Major in History

*Lower Division*

History 4A-4B, History of Modern Europe, or 8A-8B, History of the Americas, or 9A-9B, History of the Pacific Ocean Area 6

Political Science 1A-1B, Comparative Government, or Political Science 71A-71B, American Government and Politics, or Economics 1A-1B, Principles 6

Two of the above history courses are recommended for students planning to major in history, and it is suggested that History 4A-4B be included as one of the courses.

*Upper Division*

History 199, Special Course for Advanced Students 2
United States History course 3–6
Select from three of the following areas with approval of departmental representative 16–1

1. Ancient and Medieval
2. Modern European
3. Latin America
4. Pacific Area and Far East

*Graduate Year*

History 270A-270B, Seminar 2–2

### Minor in History

A minimum of 21 semester units, of which at least 9 units shall be upper division or graduate courses, must be completed. A year course in United States History must be included.

*Lower Division*

History 4A-4B, History of Modern Europe, or 8A-8B, History of the Americas, or 9A-9B, History of the Pacific Ocean Area 6

Electives chosen from anthropology, economics, geography (except Geography 1, 3, 4), political science, sociology 6

*Upper Division*

Upper Division History selected with approved of departmental representative 9

### Major in Life Science

*Lower Division*

| | Units |
|---|---|
| Zoology 1A-1B, General | 8 |
| Botany 2A-2B, General | 8 |
| Zoology 20, Human Anatomy and Physiology | 3 |
| Chemistry 1A-1B, General, or 2A-2B, Fundamentals | 6–10 |
| Physics 2A-2B, General, and 3A-3B, Physical Measurements | 8 |
| Geology 1A, Physical, and Astronomy 1, Descriptive, recommended. | |

*Upper Division*

| | |
|---|---|
| Upper division Zoology and Botany, of which 6 units may be from a related field with the approval of the departmental representative | 24 |

*Graduate Year*

| | |
|---|---|
| Zoology 200, Seminar | 2 |
| Zoology 202, Hydrobiology, or Zoology 213, Advanced Studies in Ornithology | 2 |

### Minor in Life Science

A minimum of 21 semester units, of which at least 9 units shall be upper division or graduate courses, must be completed.

*Lower Division*

| | |
|---|---|
| Biology 10A-10B, General Biology, or Zoology 1A-1B, General Zoology | 6–8 |
| Botany 2A-2B, General Botany | 8 |
| Chemistry 1A, General, or 2A-2B, Fundamentals | 5–6 |

*Upper Division*

| | |
|---|---|
| Upper division courses in Zoology and Botany to be selected with approval of the departmental representative | 9 |

### Minor in Mathematics

A minimum of 21 semester units, of which at least 9 units shall be upper division or graduate courses, must be completed.

*Lower Division*

| | |
|---|---|
| Mathematics 7A-7B, Elementary Mathematical Analysis | 6 |
| Two courses selected from courses in related areas listed below | 6 |
| Or the following courses: | |
| Mathematics D, Trigonometry (or high school equivalent, for which pattern credit may be allowed) | 3 |
| Mathematics 3A, Plane Analytic Geometry | 3 |
| Mathematics 3B, First Course in Calculus | 3 |
| One course selected from courses in related areas | 3 |

*Courses in related areas:* Commerce 2, Mathematics of Finance; or Engineering 1A, Plane Surveying; or Engineering 21, Descriptive Astronomy; or Physics 1A, Mechanics of Solids; or Physics 2A, General.

*Upper Division*

| | |
|---|---|
| Upper division units in mathematics selected with the approval of the departmental representative | 9 |

One course in each of the areas, algebra, geometry, and history of mathematics, is desirable.

### Major in Music

The requirements for the A.B. Degree and the Special Secondary Credential in Music should be completed simultaneously. Students transferring from another institution with the A.B. degree and a major in Music should consult with the departmental representative for special program planning. Refer to page 33 for the recommended program for the Special Secondary Credential in Music. After the above requirements have been met, the candidate for the General Secondary Credential shall complete a graduate year (refer to page 25) including 4 units selected from the following courses in his major:

| *Graduate Year* | *Unit* |
|---|---|
| Four units selected from the following: | |
| Music 200A-200B, Special Problems in Music | 2–2 |
| Music 203, Musicology | 2 |
| Music 206, Composition | 2 |

## Minor in Music

A minimum of 21 semester units, of which at least 9 units shall be upper division or graduate courses, must be completed.

*Lower Division*

| | |
|---|---|
| Music 1A or equivalent, and 1B, Musicianship | 2–5 |
| Music 4A-4B, Elementary Harmony | 6 |
| Aesthetics 1A-1B, Survey of Music | 4 |
| Music activities selected from Music 11, 12, 13, 15, 20, 26, 30 | 0–2 |

*Upper Division*

Select 9 units with approval of departmental representative from:

| | |
|---|---|
| Aesthetics 102A-102B, Music History | 4 |
| Aesthetics 100, Great Music | 3 |
| Music 105A-105B, Advanced Harmony and Composition | 6 |
| Music 106, Counterpoint | 2 |
| Music 107, Form and Analysis | 2 |
| Music 119A, Instrumental Conducting | 1 |
| Music 120A, Vocal Conducting | 1 |
| Music 121A-121B, Instrumentation and Arranging | 4 |
| Music 117A-117B, Advanced Individual Study of Voice | 2 |
| Music 118A-118B, Advanced Individual Study of Piano or Organ | 2 |

## Major in Physical Education for Men

The requirements for the A.B. Degree and the Special Secondary Credential in Physical Education must be completed simultaneously. Refer to page 35 for the recommended program for the Special Secondary Credential in Physical Education. After the above requirements have been met, the candidate for the General Secondary Credential shall complete a graduate year (refer to page 25), including the following courses in his major:

Select two courses from the following:

| | |
|---|---|
| Physical Education 200, Evaluation Procedures in Health, Physical Education and Recreation | 2 |
| Physical Education 201, Developmental Physical Education | 2 |
| Health Education 202, Problems in Health Education | 2 |
| Physical Education 203, Problems in Physical Education | 2 |
| Physical Education 204, Problems in Recreation | 2 |

## Minor in Physical Education for Men

A minimum of 21 semester units, of which at least 9 units shall be upper division or graduate courses, must be completed.

A student contemplating advanced degree work should plan to complete an academic minor as well as this minor.

*Lower Division*

| | |
|---|---|
| Physical Education 51, First Aid and Safety Education | 2 |
| Physical Education 53, Physical Education in the Elementary Schools | 2 |
| Physical Education 72, Introduction | 2 |

*Upper Division*

| | |
|---|---|
| Professional Activity courses selected with approval of departmental representative | 2 |
| Physical Education 154, Principles and Administration of Physical Education in Secondary Schools | 3 |
| Physical Education 170, Recreational Leadership | 2 |

### Minor in Health Education for Men or Women

A minimum of 21 semester units, of which at least 9 units shall be upper division or graduate courses, must be completed.

Students majoring in physical education may use this only as a second minor. Students contemplating advanced degree work should plan to complete an academic minor as well as this minor.

| | Units |
|---|---|
| *Lower Division* | |
| Physical Education 51, First Aid and Safety Education | 2 |
| Home Arts 61A, Nutrition | 2 |
| Health Education 65, Community Health | 3 |
| *Upper Division* | |
| Health Education 152, Health Education Programs | 3 |
| Health Education 153, Administration of School Health Program | 3 |
| Physical Education 199, Special Study in Health | 1–3 |

### Minor in Recreation for Men or Women

A minimum of 21 semester units, of which at least 9 units shall be upper division or graduate courses, must be completed.

Students majoring in Physical Education may use this only as a second minor. Students contemplating advanced degree work should plan to complete an academic minor as well as this minor.

| | |
|---|---|
| *Lower Division* | |
| Physical Education 51, First Aid and Safety Education | 2 |
| Physical Education 53, Physical Education in Elementary Schools | 2 |
| Electives selected from Art 61B, Crafts, or from the fields of dance, drama or music | 2 |
| *Upper Division* | |
| Physical Education 165, Administration of Community Recreation | 3 |
| Physical Education 170, Recreational Leadership | 3 |
| Physical Education 199, Special Study in Physical Education or Recreation | 1–3 |

### Major in Physical Education for Women

The requirements for the A.B. Degree and the Special Secondary Credential in Physical Education must be completed simultaneously. Refer to page 36 for the recommended program for the Special Secondary Credential in Physical Education. After the above requirements have beeen met, the candidate for the General Secondary Credential shall complete a fifth year (refer to page 25) including the following courses in his major:

*Graduate Year*

Select two courses from the following:

| | |
|---|---|
| Physical Education 200, Evaluation Procedures in Health, Physical Education, and Recreation | 2 |
| Physical Education 201, Developmental Physical Education | 2 |
| Health Education 202, Problems in Health Education | 2 |
| Physical Education 203, Problems in Physical Education | 2 |
| Physical Education 204, Problems in Recreation | 2 |

### Minor in Physical Education for Women

A minimum of 21 semester units, of which at least 9 units shall be upper division or graduate courses, must be completed.

A student contemplating advanced degree work should plan to complete an academic minor as well as this minor.

| | |
|---|---|
| *Lower Division* | |
| Physical Education 1A, Fundamental Skills | ½ |
| Physical Education 1B, Folk Dancing | ½ |
| Physical Education 1C, Rhythmic Skills | ½ |
| Physical Education 1D, Team Sports | ½ |
| Physical Education 53, Physical Education in Elementary Schools | 2½ |
| Physical Education electives | 1½ |
| *Upper Division* | |
| Physical Education 156A-156B, Sports Methods | 4 |
| Physical Education 161, Folk Dancing Materials and Advanced Techniques | 2 |
| Electives selected from Physical Education 153, 170, 164A-164B | 3 |

### Major in Physical Sciences

This teaching major may be used as a major for the A.B. Degree if the lower and upper division requirements listed below are completed and the student has been admitted to candidacy for the General Secondary Credential and has completed at least nine units of professional courses in education by the date of degree candidacy.

*Lower Division*

| | *Units* |
|---|---|
| Chemistry 1A-1B, General Chemistry | 10 |
| Physics 1A-1B-1C-1D, Principles (or 2A-2B, General, and 3A-3B, Physical Measurements) | 8–12 |
| Mathematics 3A, Plane Analytic Geometry, 3B, First Course in Calculus, 4A, Second Course in Calculus (recommended 4B, Third Course in Calculus) | 9–12 |
| Biology 1, Survey | 3 |

*Upper Division*

| | |
|---|---|
| Twenty-four units in chemistry and physics, with a minimum of 9 units in each of these two departments. Six units may be selected from related fields with approval of the departmental representative | 24 |

*Graduate Year*

Select 4 units from the following:

| | |
|---|---|
| Chemistry 200, Seminar | 2–4 |
| Physics 200, Seminar | 2–4 |

### Major in Physics

*Lower Division*

| | |
|---|---|
| Physics 1A-1B-1C-1D, Principles, or equivalent | 12 |
| Chemistry 1A-1B, General | 10 |
| Mathematics 3A-3B, Plane Analytic Geometry and First Course in Calculus | 6 |
| Mathematics 4A-4B, Second and Third Course in Calculus | 6 |

*Upper Division*

| | |
|---|---|
| Physics 105A-B, Analytical Mechanics | 6 |
| Physics 110A, Principles of Electrostatics and Electromagnetism | 3 |
| Physics 102, Electronics, or 110B, Electromagnetism | 3 |
| Electives from upper division physics, with a maximum of 6 units selected from related areas upon approval of departmental representative | 12 |

*Graduate Year*

Select 4 units from the following:

| | |
|---|---|
| Physics 200, Seminars (both semesters) | 2–2 |

### Minor in Physics

A minimum of 21 semester units, of which at least 9 units shall be upper division or graduate courses, must be completed.

*Lower Division*

| | |
|---|---|
| Physics 1A-1B-1C-1D, Principles, or equivalent | 12 |
| Chemistry 1A-1B, General | 10 |
| Mathematics 3A, Plane Analytic Geometry, 3B, First Course in Calculus, 4A-4B, Second and Third Course in Calculus | 12 |

*Upper Division*

| | |
|---|---|
| Upper division courses to be selected with approval of departmental representative | 9 |

### Major in Social Sciences

This teaching major may be used as a major for the A.B. Degree if the lower and upper division requirements listed below are completed and the student has been admitted to candidacy for the General Secondary Credential and has completed at least 9 units of professional courses in education by the date of degree candidacy.

*Lower Division*

A student must complete a minimum of 6 units in each of at least 3 fields he may select from the departments named below:

Economics
Geography
History
Political Science
Sociology and/or anthropology

*Upper Division*

A student must complete a minimum of 30 units with the approval of the departmental representative as follows:

| | Units |
|---|---|
| 1. A minimum of 12 units from any field named above | 12 |
| 2. A minimum of 6 units from each of two fields named above, excluding the field selected for the major upper division concentration | 12 |
| 3. Electives from social science fields | 6 |

*Graduate Year*

Select 4 units from the following:

| | |
|---|---|
| History 270A-270B, Seminar | 4 |
| Economics 200A-200B, Seminar in Modern Economic Thought | 4 |

### Minor in Spanish

A minimum of 21 semester units, of which at least 9 units be upper division or graduate courses, must be completed.

*Lower Division*

| | |
|---|---|
| Spanish, A, B, C, D or equivalent | 15–16 |
| History 4A-4B, History of Modern Europe, or 8A-8B, History of the Americas, or equivalent | 6 |

*Upper Division*

| | |
|---|---|
| Spanish 101A-101B, Conversation and Composition | 6 |
| Spanish Literature (select one course) | 3 |

### Major in Speech Arts

*Lower Division*

| | |
|---|---|
| Speech Arts 1, Voice and Diction, or 2A, Fundamentals of Public Speaking, or 2B, Extemporaneous Speaking, or 11A or 11B, Interpretation | 3 |
| Speech Arts 55A-55B, Elementary Acting, or 57A-57B, Radio Production, plus 2 units from 61, Intercollegiate Debate, or 63, Verse Choir | 6 |
| Speech Arts 56A-56B, Dramatic Production, or 60A-60B, Argumentation and Debate | 6 |

*Upper Division*

| | |
|---|---|
| Speech Arts 150, Phonetics | 3 |
| Speech Arts 154A-154B, History of the Theatre, or 155, Advanced Acting, and any first semester upper division course, or 140A-140B, Stage Design, or 179A-179B, Nervous Speech Disorders, or 192A-192B, Advanced Public Speaking | 6 |
| Speech Arts 179A-179B, Nervous Speech Disorders, or 158A or 158B, Advanced Radio Techniques, or 159A or 159B, Stage Direction, or 191, Organized Discussion (select two courses) | 6 |
| Speech Arts 108, Advanced Interpretation, or 118A or 118B, Playwriting, or 152A-152B, Stage Costume, or 154A or 154B, History of the Theatre, or 161, Advanced Argumentation | 3 |
| A maximum of 6 units may be selected from related fields with approval of departmental representative | 0–6 |

| *Graduate Year* | *Unit* |
|---|---|
| Select four units from the following courses: | |
| Speech Arts 260, Seminar in Interpretation | 2 |
| Speech Arts 221, Seminar in Articulatory Problems in Speech | 2 |
| Speech Arts 245, Seminar in Technical Practice | 2 |
| Speech Arts 259, Seminar in Stage Direction | 2 |
| Speech Arts 200, Seminar in History of Oratory | 2 |

### Minor in Speech Arts

A minimum of 21 semester units, of which at least 9 units shall be upper division or graduate courses, must be completed.

| | |
|---|---|
| *Lower Division* | |
| Speech Arts 2A-2B, Fundamentals of Public Speaking and Extemporaneous Speaking; or 55A-55B, Elementary Acting; or 56A-56B, Dramatic Production; or 55A, Elementary Acting, and 2A, Fundamentals of Public Speaking, or 2B, Extemporaneous Speaking; or 55A, Elementary Acting, and 11A or 11B, Interpretation, or 1, Voice and Diction; or 57A-57B, Radio Production | 12 |
| *Upper Division* | |
| Upper division Speech Arts electives selected with the approval of departmental representative | 9 |

# CURRICULA LEADING TO CREDENTIALS IN ADMINISTRATION AND SUPERVISION

## CURRICULA LEADING TO CREDENTIALS IN ELEMENTARY SCHOOL ADMINISTRATION AND SUPERVISION

In addition to the general requirements of the State of California for all degree the candidate shall meet the following requirements:

(a) Possess a valid General Elementary Credential.
(b) Present written evidence of two years of successful teaching experience i the elementary schools.
(c) Complete 30 semester units for the Administration Credential (24 unit for the Supervision Credential) of upper division or graduate work i addition to the holding of the General Elementary Credential. These unit shall include specific courses designed by the State Department of Edu cation and the college.
(d) Maintain a grade point average of 1.75.
(e) Complete a minimum of 18 units of work in residence at San Diego Stat College.
(f) Make formal application to the Director of Elementary Education.
(g) Earn the recommendation of the Department of Education.

Students applying for the Elementary Administration or Supervision Credential should register with the office of the Dean of Professional Education and confer wit the Director of Elementary Education concerning the courses which may be offere in satisfaction of the requirements. Outlines of pattern requirements for either th Elementary Supervision or Administration Credentials may be obtained by writin the Director of Elementary Education.

## SPECIAL SUBJECT SUPERVISION CREDENTIAL

This credential is available for persons who wish to supervise in a special sub ject area. Those desiring this credential should see the Dean of Professional Education

# THE BACHELOR OF EDUCATION DEGREE AND THE GENERAL ELEMENTARY CREDENTIAL

## ELIGIBILITY FOR CANDIDACY

Teachers holding the Provisional General Elementary School Credential are ligible for candidacy for the Bachelor of Education Degree. The purpose of this degree s to increase the professional competence of teachers who do not hold a bachelor's egree. The educational program of each applicant shall be determined on the basis f his previous preparation and of the services he is to render. In the period of pro- ssional preparation the applicant shall be guided into those learning experiences esigned to meet his cultural and professional needs.

## MINIMUM REQUIREMENTS

An applicant for the general elementary credential and the Bachelor of Educa- on Degree shall comply with the procedures for application and with the requirements r personal qualifications and general training and shall have completed a program cluding the following minimum requirements:

a. A four-year college course of 120 semester units, or the equivalent.

b. Eighteen semester units, or the equivalent, of professional work in education, constituting an organized program designed to prepare candidates in the following areas:

(1) The evolution of educational thought and practice as to the function of the school in a democratic society, with emphasis on the elementary school.

(2) The nature of individual growth and development; the psychological aspects of learning; child study, with emphasis on directed observation of children; mental hygiene and personality development; parent education; guidance practices.

(3) The selection and arrangement of learning experiences, instructional materials, learning methods and appraisal techniques related to all statutory requirements for teaching, including reading, writing, spelling, language study, arithmetic, geography, history of the United States and of California, civics including the Constitution of the United States, music, art, physical education, healthful living, morals and manners, safety education, and fire prevention.

(4) The use of audio-visual aids in instruction.

c. Directed teaching in the elementary school, eight semester units, or the equivalent, under the supervision of superior teachers in actual classroom situations of the elementary school level.

d. Sixty-one semester units or the equivalent in basic subject fields, distributed approximately as follows:

(1) *Social Studies.* Twelve semester units, or the equivalent, with emphasis upon current economic, political, and social problems and world history and geography, sociology and anthropology. The legal requirement in United States Constitution and American history, institutions, and ideals shall be included in the social studies program.

(2) *Science.* Twelve semester units, or the equivalent, in the fields of physical and biological science, with emphasis upon the study and use of the environment.

(3) *English*, including speech. Twelve semester units, or the equivalent, including oral and written expression, world literature, children's literature, dramatics, detection and correction of speech defects, and the use of books and libraries.

(4) *Mathematics.* Three semester units, or the equivalent, including subje matter and techniques essential in the teaching of mathematics in th elementary school.

(5) *Health and Hygiene.* Three semester units, or the equivalent, includin personal hygiene, subject matter and techniques essential in health edu cation to elementary school pupils.

(6) *Physical Education.* Three semester units, or the equivalent, includin subject matter and techniques essential in the teaching of physical educa tion to elementary school pupils.

(7) *Music.* Eight semester units, or the equivalent, including content an techniques appropriate for the elementary school.

(8) *Art.* Eight semester units, or the equivalent, in graphic art and indus trial arts applicable to learning experiences appropriate for elementar school children.

e. The remaining units necessary to complete the requirements for the Bachelo of Education degree shall be distributed among those offerings of the institu tion that best serve the cultural and professional needs of the candidate.

## EVALUATION OF TEACHING EXPERIENCE AND SUBJECT MATTER FIELDS

a. A candidate with two or more years' teaching experience may be awarde a maximum of 8 semester units of credit, or the equivalent, in directed teachin provided he demonstrates satisfactory skill to a representative of the institu tion under whose direction he is completing his degree program, or provide other conditions set by the institution to insure classroom skill are met. Thi credit shall not be applied until the candidate has completed at least 11 semester units, or the equivalent, of his program.

b. Credit toward the B. Ed. degree may be secured by passing comprehensiv examinations in the fields of study mentioned in paragraphs (b) and (d above.

## INSTITUTION AND RESIDENCE REQUIREMENTS

a. A minimum of 30 semester units, or the equivalent, must be secured from th college conferring the degree.

b. At least 12 semester units, or the equivalent, must be earned in campus resi dence course work at the college conferring the degree and must be secure after completion of at least 90 semester units, or the equivalent.

c. A maximum of 30 units may be secured by examination.

# PREPROFESSIONAL AND VOCATIONAL CURRICULA

Preprofessional and vocational curricula, ranging in length from two to four urs of collegiate work, are offered. Curricular outlines of preprofessional study, ich are presented on the following pages, meet the typical requirements for admisn to professional schools. Students expecting to complete their professional training other institutions should modify the suggested outlines of study to meet the requirents of the professional schools of their choice. Curricular outlines for complete ining leading to vocations are also presented on the following pages.

Curricular outlines are presented for agriculture, commerce, dentistry, education, ineering, home arts, inter-American relations, journalism, law, life science occuions, medicine, nursing, optometry, pharmacy, recreation, and veterinary science. idents desiring to modify these curricular outlines in terms of liberal arts majors uld consult the advisers in the respective curricula.

## PRE-AGRICULTURAL CURRICULA

The high school program should include the following subjects: elementary ebra, 1 unit; plane geometry, 1 unit; intermediate algebra, 1 unit; trigonometry, unit; chemistry, 1 unit; physics, 1 unit; mechanical drawing, 1 unit; foreign guage, 3 units in one language.

Students should ascertain the lower division requirements of the agricultural ege they expect to enter.

### CURRICULUM IN PLANT SCIENCE

#### Freshman Year

| | *Units* | |
|---|---|---|
| | *1st Sem.* | *2d Sem.* |
| sical Education (activity courses) | ½ | ½ |
| lth Education 21, Principles of Healthful Living | 2 | – |
| mistry 1A-1B, General | 5 | 5 |
| any 2A-2B, General | 4 | 4 |
| sics 2A-2B, General | 3 | 3 |
| lish 1, Freshman Composition | – | 3 |
| tive | 2 | 1 |
| | 16½ | 16½ |

#### Sophomore Year

| | | |
|---|---|---|
| sical Education (activity courses) | ½ | ½ |
| nomics 1A-1B, Principles | 3 | 3 |
| lish 2, Freshman Literature, or optional course | – | 3 |
| mistry 101, Elementary Organic, and 102, Laboratory | 4 | 3 |
| logy 1A, Physical, or 2A, General | 3 | – |
| teriology 1, General | – | 4 |
| ogy 1A, General | 4 | – |
| chology 1, General | – | 3 |
| tive | 2 | – |
| | 16½ | 16½ |

## CURRICULUM IN ANIMAL SCIENCE

### Freshman Year

| | *Units* | |
|---|---|---|
| | *1st Sem.* | *2d Sen* |
| Physical Education (activity courses) | ½ | ½ |
| Chemistry 1A-1B, General | 5 | 5 |
| Zoology 1A-1B, General | 4 | 4 |
| Physics 2A-2B, General | 3 | 3 |
| English 1, Freshman Composition, and 2, Freshman Literature, or optional course | 3 | 3 |
| | 15½ | 15½ |

### Sophomore Year

| | | |
|---|---|---|
| Physical Education (activity courses) | ½ | ½ |
| Health Education 21, Principles of Healthful Living | 2 | – |
| Psychology 1, General | 3 | – |
| Economics 1A-1B, Principles | 3 | 3 |
| Bacteriology 1, General | – | 4 |
| Botany 2A, General | 4 | – |
| Chemistry 101, Elementary Organic, and 102, Laboratory | 4 | 3 |
| Zoology 100, Embryology | – | 3 |
| Zoology 20, Human Anatomy and Physiology, or 8, Human Anatomy | – | 3 |
| | 16½ | 16½ |

## COMMERCE CURRICULUM

The first two years of the curriculum are introductory. During this period the student acquires a basis for further study and an understanding of the place that business fills in modern economic life. The choice of the major field should be made at the beginning of the junior year. The student then follows a program of studies that is designed to provide a vocational ability in at least one particular area.

Students desiring to continue secretarial training on a four year basis should consult with the Chairman of the Department.

### Lower Division

| | *Units* |
|---|---|
| Physical Education (activity courses) | 2 |
| English 8, Business English, and 2, Freshman Literature, or optional course | 6 |
| Health Education 21, Principles of Healthful Living | 2 |
| Psychology 1, General | 3 |
| Natural Sciences (including Geography 1, Elements) | 9–12 |
| History, Political Science, or Sociology | 6 |
| Geography 10, Economic | 3 |
| Economics 1A-1B, Principles | 6 |
| Commerce 2, Mathematics of Finance | 3 |
| Commerce 14A-14B, Principles of Accounting | 6 |
| Commerce 18A-18B, Commercial Law | 6 |
| Electives | 0–8 |

Marketing subfield should include:

| | |
|---|---|
| Commerce 20, Consumer Economics | 3 |
| Commerce 24, Merchandising | 3 |
| Commerce 25, Salesmanship | 3 |
| Commerce 27, Advertising Principles | 3 |
| Art 7, Line, Color, Display | 3 |

(Geography 10 and Commerce 2 are not required of students who elect the marketing subfield.)

### Upper Division

| | |
|---|---|
| Minor | 9 |
| Major | 24 |

Including: Economics 111, Economic History of the United States; Economics 140, Statistics; Commerce 121, Business Administration; and 15 units selected from one of the following groups:

A. Accounting: Commerce 160A-160B, 161A-161B, 162, 164A-164B, 165A-165B.

B. Banking and Finance: Commerce 133, 134, 137; Economics 131, 135, 142.

C. Business Administration: Commerce 123, 125, 126, 127, 133, 134, 137, 153, 184; Economics 128, 142, 150, 170.

D. Marketing: Commerce 123, 153, 184, 185, 186, 187A, 187B, 188, 189; Home Arts 160A-160B.

Electives (at least 7 of which must be upper division) 17–27

# PRE-DENTAL CURRICULUM

Candidates for a degree in dentistry should ascertain the entrance requireme of the dental college to which they expect to transfer and should make whate changes in the following typical requirements that may seem desirable in satisfyi the requirements of the specific dental college.

The high school program should include the following subjects: elementa algebra, 1 unit; plane geometry, 1 unit; chemistry, 1 unit; physics, 1 unit; forei language, 3 units in one language; mechanical drawing, 1 unit.

## Freshman Year

| | *Units* *1st Sem.* | *2 Se* |
|---|---|---|
| Physical Education (activity courses) | ½ | |
| Health Education 21, Principles of Healthful Living | 2 | – |
| Chemistry 1A-1B, General | 5 | 5 |
| Physics 2A-2B, General | 3 | 3 |
| Physics 3A-3B, Physical Measurements | 1 | 1 |
| English 1, Freshman Composition, and 2, Freshman Literature, or optional course | 3 | 3 |
| Psychology 1, General | – | 3 |
| Elective | 0–2 | 0– |
| | 16½ | 16 |

## Sophomore Year

| | | |
|---|---|---|
| Physical Education (activity courses) | ½ | |
| Chemistry 101, Elementary Organic, and 102, Laboratory | 4 | 3 |
| Zoology 1A-1B, General | 4 | 4 |
| Mathematics C, Intermediate Algebra, and D, Trigonometry | 3 | 3 |
| Social Science (year course selected from Anthropology 1A-1B, General; Economics 1A-1B, Principles; History 4A-4B, Modern Europe, or 8A-8B, the Americas, or 17A-17B, American Civilization; Political Science 1A-1B, Comparative Government) | 3 | 3 |
| Electives (a course in public speaking is recommended) | 2 | 3 |
| | 16½ | 16 |

The following courses are suggested for a third year in preparation for dentist for those who fail to receive an acceptance from a dental college after completing t prescribed 60 units.

## Junior Year

| | | |
|---|---|---|
| Chemistry 5, Quantitative Analysis | 3 | – |
| Zoology 106, Comparative Anatomy of the Vertebrates | 4 | – |
| Zoology 100, Embryology | – | 4 |
| Art 119A, Ceramics (see prerequisite) | 2 | – |
| Psychology 11, Applied | – | 3 |
| Additional Year Course in Social Science | 3 | 3 |
| Electives | 4 | 6 |
| | 16 | 16 |

The curriculum for Dental Hygiene is essentially the same as the above for pr dentistry.

## GENERAL ENGINEERING CURRICULUM

The four year curriculum in general engineering leads to the A.B. Degree in eneral Engineering and is designed to give students a sound training in the fundamentals of engineering education plus the broader training and experiences which onstitute a liberal arts education.

Students may stay at San Diego State College for less than four years and hen complete their training for professional engineering at the University of California or some other engineering school. In such cases the curriculum for the first two ears should be essentially the same as that outlined below, but the student should lan his work carefully with the help of a faculty adviser to insure satisfaction of ll requirements.

In the freshman and sophomore years all general engineering students must take he courses listed below. In the junior and senior years optional programs are available hich provide for some specialization in aeronautical, chemical, civil, electrical, electronic, or mechanical engineering or in engineering physics or engineering economics.

The general engineering curriculum follows the plan of the general major. (See age 20.) This requires completion during the junior and senior years of a minimum of 6 upper division units chosen from three different fields with no more than 15 units r less than 6 units from any one field to count as part of the minimum of 36 units. n chemical engineering, the three fields are engineering, physics, and chemistry. In ll the other optional upper division programs, the three fields which make up the eneral engineering major are engineering, physics, and economics. Training in mathematics beyond the minimum requirements is very desirable, and it is recommended hat at least Mathematics 119, Differential Equations, be included among the upper ivision electives. In the field of physics, a maximum of 6 units may be chosen from athematics 118, Advanced Calculus, Mathematics 119, Differential Equations, and athematics 124, Vector Analysis. For elective courses in economics it is recommended at at least two courses be selected from Economics 131, 150, and 170.

The general engineering curriculum allows considerable latitude in the choice of lectives in the junior and senior years. Students are encouraged to choose electives hich suit their particular needs in broadening their training in the field of general ducation. The choice of electives must follow a logical plan approved by a faculty ommittee.

The high school program should include the following subjects: elementary lgebra, 1 unit; plane geometry, 1 unit; intermediate algebra, 1 unit; solid geometry, unit; trigonometry, ½ unit; chemistry, 1 unit; physics, 1 unit; mechanical drawing, unit.

### Lower Division

Courses must be included to satisfy all college requirements for the A.B. Degree, cept the foreign language requirement. (See page 17.)

| | *Units*<br>*1st Sem.* | <br>*2d Sem.* |
|---|---|---|
| *reshman Year* | | |
| Math. 3A-3B, Analytic Geometry and First Course in Calculus | 3 | 3 |
| Physics 1A-1B, Mechanics of Solids and Fluids, and Heat | 3 | 3 |
| Chemistry 1A-1B, General Chemistry | 5 | 5 |
| English 1, Freshman Composition | 3 | – |
| Health Education 21, Principles of Healthful Living | 2 | – |
| Biology 1, Survey of Biology (unless taken in high school) | – | 3 |
| Physical Education (activity courses) | ½ | ½ |
| Electives | – | 2 |
| | 16½ | 16½ |
| *ophomore Year* | | |
| Math. 4A-4B, Second and Third Courses in Calculus | 3 | 3 |
| Physics 1C-1D, Electricity and Magnetism, Sound and Light | 3 | 3 |
| Economics 1A-1B, Principles of Economics | 3 | 3 |
| Engineering 21, Descriptive Geometry | 3 | – |
| Physical Education (activity courses) | ½ | ½ |
| Other courses to complete lower division preparation, including Psychology 1, English, and Social Science (see page 17) | 4 | 7 |
| | 16½ | 16½ |

One of the following groups of courses is required, dependent upon the field specialization desired in the upper division:

| For Civil Engineering | Uni |
|---|---|
| Engineering 1A-1B, Plane Surveying | 6 |
| Astronomy 3, Surveyor's Course in Practical Astronomy | 3 |
| For Mechanical, Electrical and Aeronautical Engineering | |
| Engineering 1A, Plane Surveying | 3 |
| Engineering 22, Machine Drawing | 3 |
| Elective | 3 |
| For Chemical Engineering | |
| Chemistry 5, Quantitative Analysis | 3 |
| Chemistry 101, Organic Chemistry | 4 |
| Elective | 2 |
| For Engineering Economics | |
| Commerce 14A-14B, Principles of Accounting | 6 |
| Elective | 3 |
| For Engineering Physics | |
| Engineering 22, Machine Drawing (recommended) | 3 |
| Elective | 6 |

Students should, if possible, complete all of the college lower division requirements in the sophomore year. (See page 17.) Any not completed then must be completed in the junior year.

## Upper Division

The choice of a field of specialization and the choice of electives must be approve by faculty committee appointed by the Chairman of the Physical Science Division Students normally will submit proposed programs for formal committee approva before the beginning of the junior year. Any subsequent deviations from this pla must be approved by the committee.

All upper division requirements of the college for the A.B. Degree must be met These include:

Examination in American History and U. S. Constitution. (See page 21.)

Completion of the requirements for the General Major. (See page 20.)

The courses required for general engineering include a core group required fo all general engineering students plus those required for each field of specialization These are indicated below:

### Required for All General Engineering Students

| *Junior Year* | Unit |
|---|---|
| Engineering 102A-102B, Analytical Mechanics | 6 |
| Engineering 100A-100B, Elements of Electrical Engineering | 6 |
| Engineering 140, Strength of Materials | 3 |
| *Senior Year* | |
| Engineering 128, Applied Engineering Thermodynamics | 3 |
| Engineering 105, Hydraulics | 3 |
| Engineering 198, Senior Report | 2 |

### Additional Requirements for Various Fields of Specialization

*Aeronautical Engineering*

| *Junior Year* | |
|---|---|
| Engineering 122, Machine Design | 3 |
| Engineering 141, Materials of Engineering Laboratory | 2 |
| Elective—including 6 units upper division economics | 10 |
| *Senior Year* | |
| Engineering 156, Aerodynamics | 3 |
| Engineering 142, Stress Analysis | 3 |
| Engineering 129, Heat Power Laboratory | 2 |
| Elective—including 9 units upper division economics and/or physics | 14 |

*Chemical Engineering*

| *Junior Year* | *Units* |
|---|---|
| Chemistry 102, Organic Chemistry Laboratory | 3 |
| Chemistry 110A-110B, Physical Chemistry | 6 |
| Engineering 141, Materials of Engineering Laboratory | 2 |
| Elective | 4 |

| *Senior Year* | |
|---|---|
| Chemistry 144A-144B, Chemical Engineering | 6 |
| Elective | 16 |

*Civil Engineering*

| *Junior Year* | |
|---|---|
| Engineering 130, Route and Construction Surveying | 3 |
| Engineering 141, Materials of Engineering Laboratory | 2 |
| Elective—including 6 units upper division economics | 10 |

| *Senior Year* | |
|---|---|
| Engineering 131, Advanced Surveying | 3 |
| Engineering 106, Hydraulics Laboratory | 2 |
| Elective—including 9 units upper division economics and/or physics | 17 |

*Electrical Engineering*

| *Junior Year* | |
|---|---|
| Engineering 101A-101B, Electrical Engineering Laboratory | 4 |
| Elective—including 6 units upper division economics | 11 |

| *Senior Year* | |
|---|---|
| Physics 107, Electrical Measurements | 2 |
| Physics 102, Electronics | 3 |
| Elective—including 4 units upper division economics and/or physics | 17 |

*Mechanical Engineering*

| *Junior Year* | |
|---|---|
| Engineering 122, Machine Design | 3 |
| Engineering 141, Materials of Engineering Laboratory | 2 |
| Elective—including 6 units upper division economics | 10 |

| *Senior Year* | |
|---|---|
| Engineering 129, Heat Power Laboratory | 2 |
| Engineering 106, Hydraulics Laboratory | 2 |
| Engineering 145, Internal Combustion Engines | 3 |
| Elective—including 9 units upper division economics and/or physics | 15 |

*Engineering Economics*

| *Junior Year* | |
|---|---|
| Commerce 121, Business Administration | 3 |
| Economics 133, Corporation Finance | 3 |
| Commerce 18A, Commercial Law | 3 |
| Economics 140, Statistics | 3 |
| Elective | 3 |

| *Senior Year* | |
|---|---|
| Economics 170, Government and Business | 3 |
| Commerce 150, Labor Problems | 3 |
| Economics 131, Public Finance | 3 |
| Electives | 13 |

| | Unit |
|---|---|
| *Engineering Physics* | |
| *Junior Year* | |
| Mathematics 119, Differential Equations | 3 |
| Elective—including 6 units upper division economics | 12 |
| *Senior Year* | |
| Physics 102, Electronics | 3 |
| Physics 107, Electrical Measurements | 2 |
| Physics 110A, Electricity and Electromagnetism | 3 |
| Elective | 14 |
| *Electronics Engineering* | |
| *Junior Year* | |
| Physics 102, Basic Electronics | 3 |
| Engineering 104 or Physics 104, Communications | 2 |
| Physics 122, Electronics Laboratory | 2 |
| *Senior Year* | |
| Engineering 124 or Physics 124, Radio Measurements | 2 |
| Engineering 150, Industrial Electronics | 2 |
| Physics 152, Advanced Electronics | 2 |
| Physics 107, Electrical Measurements | 2 |

The upper division requirements for the General Engineering curriculum may b met by various combinations of courses other than those outlined above. For example the core group of required upper division courses may be combined with selected uppe division courses in Astronomy, Geology or Mathematics to make up the total of 3 upper division units required. Any such deviations from the curricula outlined abov must be approved by the Chairman of the Division of Physical Sciences.

# HOME ARTS CURRICULUM

The Home Arts curriculum is planned to meet the needs of those students who ish to apply their knowledge to the various problems of home living. This curriculum ill lead to a general major in Liberal Arts, which means it will be combined with two ther fields. (See General Major Requirements, page 20.) By selecting the right comination of courses, it will be possible to prepare for professional work in journalism, ıdio, community recreation, home service in industry, merchandising, and several hases of social work. The student should consult the Dean of General Education for is approval and then see the Chairman of the Home Arts Department for help in lanning a course of study.

## Lower Division

| | Units | |
|---|---|---|
| *reshman Year* | *1st Sem.* | *2d Sem.* |
| Physical Education (activity courses) | ½ | ½ |
| English 1, Freshman Composition, and 2, Freshman Literature or optional course | 3 | 3 |
| Psychology 1, General | 3 | – |
| Health Education 21, Principles of Healthful Living | 2 | – |
| Chemistry 2A-2B, General | 3 | 3 |
| Art 6A, Design | 2 | – |
| Home Arts 1, General | – | 3 |
| Electives (See lower division requirements, page 17. Student should also see prerequisites for upper division courses for the general major) | 3 | 7 |
| | 16½ | 16½ |

| *ophomore Year* | | |
|---|---|---|
| Physical Education (activity courses) | ½ | ½ |
| Home Arts 61A-61B, Nutrition and Laboratory | – | 3 |
| Home Arts 5, Food Preparation | 3 | – |
| Home Arts 10, Fundamentals of Clothing | – | 2 |
| Sociology 50A-50B, Introduction | 3 | 3 |
| Electives (completion of lower division requirements and prerequisites for upper division courses for the general major) | 10 | 8 |
| | 16½ | 16½ |

Preparation for U. S. Constitution and American History requirement.

Suggested electives for the first two years:

Biology 10A-10B (6), or Biology 1 (3), Zoology 20 (3)
Physics 2A-2B (6)
Speech Arts 2A-2B (6)
History 17A-17B (6)
Health Education 90 (1)
Art 6B (2), 61B (2)

## Upper Division

Home Arts courses to satisfy the general major should be selected from the llowing:

| | *Units* |
|---|---|
| Home Arts 101, Clothing Selection | 3 |
| Home Arts 105, Family Meals | 3 |
| Sociology 108, Marriage and the Family | 3 |
| Home Arts 160A, Merchandise Analysis—Textiles | 2 |
| Home Arts 160B, Merchandise Analysis—Non-Textiles | 2 |
| Education 102B, Child Growth and Development | 3 |

# INTER-AMERICAN RELATIONS

The purpose of this curriculum is (1) to furnish a basis for a more intelligent an effective understanding of the opportunities and problems of international relations i the western hemisphere; (2) to provide facilities for a basic education and training fo a business or professional career which involves international relations.

Competition for opportunities of service in international affairs is severe. Th student who plans a career in this field should therefore organize his electives to provid for a concentration in some area of work in which there are greater vocational opportu nities. Preparation for employment as a foreign representative of an American busines organization implies concentration in economics. The student who pursues this curricu lum as a guide for training for the foreign service in consular, vice consular, secretaria and other public offices should include additional courses in foreign language, histor political science, geography, and economics to furnish more effective preparation fo the comprehensive competitive examinations required for appointment to the Servic and for entrance to the Foreign Officers Training School at Washington, D. C.

This program should be completed either with a major in economics or a genera major. Consult the Dean of General Education for details.

The high school program should include the following subjects: algebra, 1 unit plane geometry, 1 unit; foreign language, 3 units in one language, preferably Spanish

## Freshman Year

| | Units 1st Sem. | Units 2d Sem |
|---|---|---|
| Physical Education (activity courses) | ½ | ½ |
| Health Education 21, Principles of Healthful Living | 2 | – |
| English 1, Freshman Composition, and 2, Freshman Literature, or optional course | 3 | 3 |
| Spanish | 0–5 | 0–5 |
| Natural Science (see page 18) | 3–5 | 3–5 |
| History 8A-8B, History of the Americas | 3 | 3 |
| Psychology 1, General | – | 3 |
| Elective | 4–8 | 0–3 |
| | 15½ | 15½ |

## Sophomore Year

| | Units 1st Sem. | Units 2d Sem |
|---|---|---|
| Physical Education (activity courses) | ½ | ½ |
| Additional Natural Science (if needed to meet requirement) | 0–3 | – |
| Economics 1A-1B, Principles | 3 | 3 |
| Political Science 1A-1B, Comparative Government, or 71A-71B, Introduction to American Government and Politics | 3 | 3 |
| Geography 1, Elements of Physical Geography | 3 | – |
| Elective | 0–6 | 9 |
| | 15½ | 15½ |

## Junior Year

| | Units 1st Sem. | Units 2d Sem |
|---|---|---|
| Economics 195, International Economic Relations | – | 3 |
| Political Science 150A-150B, International Relations | 3 | 3 |
| History 173A-173B, The Expansion of the United States | 3 | 3 |
| Spanish 104A-104B, Spanish-American Literature | 3 | 3 |
| Elective | 3 | 3 |
| Economics elective | 3 | – |
| Examination in U. S. Constitution (see page 21) | — | — |
| | 15 | 15 |

## Senior Year

| | Units 1st Sem. | Units 2d Sem |
|---|---|---|
| Economics 190, Principles of Foreign Trade | – | 3 |
| Economics 198, Investigation and Report (Western Hemisphere) | 3 | – |
| History 161, Mexico and the Caribbean Countries | 3 | – |
| History 162, South America Since Independence | – | 3 |
| Geography 116, Geography of Latin America | – | 3 |
| Geography 121, Geography of North America | 3 | – |
| Electives from economics, history, political science, or geography to complete the general major | 3 | 3 |
| Elective | 3 | 3 |
| | 15 | 15 |

# PRE-JOURNALISM CURRICULUM

Students desiring to emphasize journalism in working for the A.B. Degree at this llege should work toward a general major with journalism included as one of the ree major fields of study. (Refer to page 20 for explanation of the general major.)

The curriculum suggested below takes cognizance of the widely held contention at a candidate for a position in the newspaper, magazine, or publishing field should more than a product of vocational training. A competent journalist must bring to his rk a broad educational background, with particular emphasis on the social sciences.

Students interested in specialized journalism (such as a foreign correspondence, entific, financial, or political reporting) should attempt to fit specialized courses into eir curricula. Additional social science courses are recommended as electives.

Students preparing for degrees in journalism from other colleges should ascertain trance requirements of the college to which they expect to transfer, and should mold eir programs accordingly.

The following curriculum is suggested for students who have not decided upon y field of specialization within journalism:

## Lower Division

| | *Units* | |
|---|---|---|
| *eshman Year* | *1st Sem.* | *2d Sem.* |
| Physical Education (activity courses) | ½ | ½ |
| Health Education 21, Principles of Healthful Living | 2 | - |
| English 1, Freshman Composition, and 2, Freshman Literature or optional course | 3 | 3 |
| Psychology 1, General; and 10, Advanced General, or 11, Applied | 3 | 3 |
| History 4A-4B, Modern Europe, or 8A-8B, The Americas, or 17A-17B, American Civilization (this course, if elected, must be taken in the sophomore year) | 3 | 3 |
| Natural Science (see page 18) | 3 | 3 |
| Elective | - | 3 |
| | 14½ | 15½ |
| *phomore Year* | | |
| Physical Education (activity courses) | ½ | ½ |
| Journalism 51A-51B, News Gathering and Reporting | 3 | 3 |
| Foreign Language (if not completed in high school) | 5 | 5 |
| Natural Science (see page 18) | 3 | 3 |
| Economics 1A-1B, Principles; or Sociology 50A-50B, Introduction and General | 3 | 3 |
| Library Science 10, Use of the Library | - | 2 |
| | 14½ | 16½ |

## Upper Division

On acquiring upper division status, the student should confer with his adviser in nning courses to meet his specific and specialized needs and that meet the requireents for the A.B. Degree with a general major, including U. S. Constitution and nerican history graduation requirement.

# PRE-LEGAL CURRICULUM

*The entrance requirements of law colleges range from two years to three and fou years of pre-legal work. The lower division requirements of the liberal arts curricul should be met in full whether the curriculum extends over a period of two, three, o four years.*

The following curriculum meets the recommendations of standard American la colleges for a broad and liberal education. For the majority of pre-legal students general major (see page 20) with concentration in economics, political science, an history, or a major-minor combination in these fields, will constitute the most effectiv preparation for later professional study in law and for later activities in the fiel of business.

## Lower Division

| | *Units* | |
|---|---|---|
| | *1st Sem.* | *2d Sem* |
| *Freshman Year* | | |
| Physical Education (activity courses) | ½ | ½ |
| Health Education 21, Principles of Healthful Living | – | 2 |
| Foreign Languages (if needed to complete requirement) | 0–5 | 0–5 |
| Natural Science (see lower division requirements) | 3–6 | 3–6 |
| English 1, Freshman Composition, and English 2, Freshman Literature, or optional course | 3 | 3 |
| Commerce 14A-14B, Principles of Accounting | 3 | 3 |
| Psychology 1, General | 3 | 0–4 |
| Elective | | |
| | 15½ | 15½ |
| *Sophomore Year* | | |
| Physical Education (activity courses) | ½ | ½ |
| Additional Natural Science (if needed to meet requirement) | 3 | – |
| Economics 1A-1B, Principles of Economics | 3 | 3 |
| Philosophy 1A-1B, Introduction, or 3A-3B, History of Thought | 3 | 3 |
| Political Science 1A-1B, Comparative Government or 71A-71B, Introduction to American Government and Politics | 3 | 3 |
| Electives | 3 | 6 |
| | 15½ | 15½ |

## Upper Division

In the junior and senior years, the student should select his concentration according to the general field of legal practice in which he will be working, with the counsel of his adviser and the departments most concerned. For example, a student expecting to work in the foreign service or international field on an administrative level would probably have his major concentration in international law. Students going into federal employment on an administrative level would need appropriate political science courses. A student expecting to become a lawyer working in the field of criminal law would include pertinent sociology courses (105, 106) in his program. For the broad field of general legal practice and its relations with the field of business, the economics area will constitute the concentration. Since this latter area is by far the larger, more students will be interested in the suggested curriculum given below. It is flexible, to be varied according to the aims of the student with the counsel of his advisers and members of the departments in which he wishes to concentrate.

| | *Units* | |

# LIFE SCIENCE VOCATIONAL CURRICULA

Students planning to enter any of the terminal curricula listed below shou include in their high school program the following subjects: elementary algebı 1 unit; plane geometry, 1 unit; chemistry, 1 unit; physics, 1 unit; French or Germa 3 units.

## Lower Division

| | Units<br>1st Sem. | <br>2d Se |
|---|---|---|
| *Freshman Year* | | |
| English 1, Freshman Composition, and 2, Freshman Literature or optional course | 3 | 3 |
| Chemistry 1A-1B, General | 5 | 5 |
| Zoology 1A-1B, General | 4 | 4 |
| Social Science (see page 18) | 3 | 3 |
| Physical Education (activity courses) | ½ | |
| | 15½ | 15 |
| *Sophomore Year* | | |
| Botany 2A-2B, General | 4 | 4 |
| Bacteriology 1, General | 4 | – |
| Psychology 1, General | – | 3 |
| Social Science (see page 18) | 3 | 3 |
| Speech Arts 2A, Fundamentals of Public Speaking | 3 | – |
| Physical Education (activity courses) | ½ | |
| Electives (complete lower division requirements. See page 17) | 2 | 6 |
| | 16½ | 16½ |

Preparation for U. S. Constitution and American History graduation requirement.

## Upper Division

Work in the upper division should be planned in consultation with the Chairma of the Division of Life Sciences. A terminal curriculum is offered leading to th following occupational fields: fish and game, and wild life. Courses may be selecte from those listed below.

### WILD LIFE, FISH AND GAME

General Entomology
Cold Blooded Vertebrates
Parasitology
General Physiology
Ecology
Taxonomy of Plants
Microtechnique

Mammalogy
Ornithology
Economic Biology
Organic Chemistry
Statistics
Public Administration

## PRE-MEDICAL CURRICULUM

The entrance requirements of medical colleges ordinarily range from three to four years of pre-medical work. The lower division requirements of the liberal arts curricula include the general requirements of standard medical colleges and should therefore be met in full whether the curriculum extends over a period of three or of four years. All plans for pre-medical work should include an arrangement of courses to meet the requirements of the medical college which the student expects to enter.

A student who is pursuing a four-year pre-medical curriculum should major in chemistry or zoology in his junior and senior years, and must meet all upper division requirements for the A.B. Degree in the liberal arts curricula.

The high school program should include the following subjects: elementary algebra, 1 unit; plane geometry, 1 unit; chemistry, 1 unit; physics, 1 unit; French or German, 3 units. Two units of Latin are recommended.

### Lower Division

| | *Units*<br>*1st Sem.* | <br>*2d Sem.* |

| | 15 | 15 |

# PRE-NURSING CURRICULUM

A student who plans to complete a curriculum in nursing leading to a degree an a certificate in nursing in another collegiate institution should ascertain the low division requirements of that institution.

The high school program should include the following subjects: elementa algebra, 1 unit; plane geometry, 1 unit; chemistry, 1 unit; physics, 1 unit; Frenc or German, 3 units; domestic science (foods), 1 unit; 2 units of Latin are re ommended.

| | *Units* | |
|---|---|---|
| **Freshman Year** | *1st Sem.* | *2d Sem.* |
| Physical Education (activity courses) | ½ | ½ |
| Health Education 21, Principles of Healthful Living | – | 2 |
| Biology A, Mathematics of Solutions and Dosage | 2 | – |
| Chemistry 2A-2B, Fundamentals | 3 | 3 |
| Home Arts 61A, Nutrition, and 61B, Nutrition Laboratory | – | 3 |
| English 1, Freshman Composition, and 2, Freshman Literature, or optional course | 3 | 3 |
| French or German (if needed to complete requirements) | 0–5 | 0–5 |
| Elective | 3–8 | 0–5 |
| | 16½ | 16½ |

| **Sophomore Year** | *1st Sem.* | *2d Sem.* |
|---|---|---|
| Physical Education (activity courses) | ½ | ½ |
| Psychology 1, General, and 11, Applied | 3 | 3 |
| Economics 1A-1B, Principles, or Sociology 50A, Introduction, and 50B, General | 3 | 3 |
| Bacteriology 1, General | 4 | – |
| Physiology 1A, Human Physiology, and 1C, Laboratory | – | 5 |
| Zoology 8, Human Anatomy | 3 | – |
| Elective | 3 | 5 |
| | 16½ | 16½ |

## PRE-OPTOMETRY CURRICULUM

The high school program should include the following subjects: elementary algebra, 1 unit; plane geometry, 1 unit; intermediate algebra, 1 unit; trigonometry, ½ unit; physics, 1 unit; chemistry, 1 unit; foreign language, 3 units.

The following curriculum prepares for junior standing in university schools of optometry. Student should consult the catalogue of the school to which he expects to transfer.

| Freshman Year | Units<br>1st Sem. | <br>2d Sem. |
|---|---|---|
| Chemistry 1A-1B, General | 5 | 5 |
| English 1, Freshman Composition, and 2, Freshman Literature, or optional course | 3 | 3 |
| Speech Arts 2A, Fundamentals of Public Speaking | – | 3 |
| Foreign Language (if needed to complete requirement) | 5 | 5 |
| Physical Education (activity courses) | ½ | ½ |
| Electives (social science or other lower division requirement. See page 17) | 3 | 3 |
| | 16½ | 16½ |

| Sophomore Year | | |
|---|---|---|
| Physics 2A-2B, General | 3 | 3 |
| Physics 3A-3B, Physical Measurements | 1 | 1 |
| Psychology 1, General | – | 3 |
| Mathematics 3A, Plane Analytic Geometry | 3 | – |
| Social Science (complete requirement) | 3 | 3 |
| Physiology 1A, Human Physiology | – | 3 |
| Physiology 1C, Human Physiology (Laboratory) | – | 2 |
| Health Education 21, Principles of Healthful Living | 2 | – |
| Chemistry 101, Elementary Organic | 3 | – |
| Physical Education (activity courses) | ½ | ½ |
| | 15½ | 15½ |

## PRE-PHARMACY CURRICULUM

The high school program should include the following subjects: elementary algebra, 1 unit; plane geometry, 1 unit; intermediate algebra, 1 unit; chemistry, 1 unit; physics, 1 unit; foreign language, 2 units.

The American Association of Colleges of Pharmacy allows not more than one year of credit for work completed in an institution other than a college of pharmacy. Generally the first year work and part of that of the second year may be completed before transfer, the time required in the college of pharmacy cannot be reduced to less than three academic years. Students should ascertain the requirements of the college of pharmacy they expect to enter.

| Freshman Year | Units<br>1st Sem. | <br>2d Sem. |
|---|---|---|
| Physical Education (activity courses) | ½ | ½ |
| English 1, Freshman Composition, and 2, Freshman Literature, or optional course | 3 | 3 |
| Chemistry 1A-1B, General | 5 | 5 |
| Botany 2A-2B, General, or Zoology, 1A-1B, General | 4 | 4 |
| Mathematics C, Intermediate Algebra, and D, Trigonometry (if not completed in high school) | 3–0 | 3–0 |
| Physics 2A-2B, General, and 3A-3B, Physical Measurements | 4 | 4 |
| | 16½ | 16½ |

The following courses are also commonly required or recommended: (See, however, three-year rule, above.) Chemistry 5, Quantitative Analysis, 101, Elementary Organic, 102, Organic Chemistry Laboratory; Psychology 1, General; Physiology 1A, Human Physiology, or Zoology 20, Human Anatomy and Physiology.

# RECREATION CURRICULUM

The curriculum in recreation is arranged under the plan of the general majo to provide a program to train for playground work, camp leadership, work with youtl groups, and related activities. See page 20 for general major.

## Lower Division

| | | Unit |
|---|---|---|
| Health Education 21, Principles of Healthful Living | | 2 |
| Physical Education | | 7½–8 |
| Activity courses: 3 for men; 6 for women, selected from the following: 2A, 3A-3B, 4, 5, 6, 9, 11A, 13, 14. | | |
| Physical Education 44, Professional Activities (men) | 2 | |
| Physical Education 51, First Aid | 2 | |
| Physical Education 53, Physical Education for Elementary Schools | 2½ | |
| Social Science (to include Sociology 50A, Introduction, and 50B, General). (See page 18) | | 12 |
| Psychology 1, General, and 11, Applied | | 6 |
| Foreign Language (if 3 years not completed in high school) | | 10 |
| Natural Science (Physical Science 1A, Introduction, or Astronomy 1, Descriptive) and additional units selected from Biology 1, Survey, 10A-10B, General, Botany 4, California Plants, Geology 2A, General. (Include laboratory science if needed) | | 12 |
| English 1, Freshman Composition, and 2, Freshman Literature, or optional course | | 6 |
| Speech Arts 2A, Fundamentals of Public Speaking | | 3 |
| Elective | | 1–1½ |
| Prepare for U. S. Constitution and American History graduation requirement. | | |
| | | 60 |

## Upper Division

| | | |
|---|---|---|
| General Major (see page 20) | | 36 |
| Sociology (minimum of 9 units; maximum of 15 units) | | |
| Sociology 106, Criminology and Penology | 3 | |
| *Sociology 107, Juvenile Delinquency | 3 | |
| Sociology 109, Fields of Social Work | 3 | |
| *Sociology 110, Race Relations | 3 | |
| *Sociology 195, Community Welfare Organization | 3 | |
| Sociology 197, Urban Sociology | 3 | |
| Physical Education (minimum of 9 units; maximum of 15 units) | | |
| Physical Education 145, Professional Activities (men) or 156A-156B (women) | 2 | |
| Physical Education 146, Professional Activities (men) or 161 (women) | 2 | |
| *Physical Education 165, Community Recreation | 3 | |
| *Physical Education 170, Recreational Leadership | 3 | |
| *Physical Education 199, Special Study in Recreation | 3 | |
| Select a third field for the general major from the following: speech arts, psychology, art, music, education, biological science (minimum of 9 units; maximum of 15 units) | | |
| Education 174, Audio-visual Education | | 2 |
| Electives (including at least 2 units of upper division) | | 22 |
| | | 120 |

Consultation with an adviser in the Department of Physical Education is advised in selecting courses and fields of study for the general major.

---

* These courses are required.

## PRE-SOCIAL WORK CURRICULUM

The professional curriculum in social service prepares for admission to graduate work in recognized American schools of social work. This curriculum should be pursued by those who plan careers in federal, state and local welfare work; social work in public schools including preparation for a teaching credential; family and children's private case work agencies; social settlement work; county probation work; child welfare agencies; statistical and investigational work in private and public agencies; work in public institutions for the defective and delinquent; medical social service and psychiatric social work in hospitals and clinics; executive positions in social work; and social work in numerous other organizations.

The lower division requirements of the liberal arts curricula include the general requirements of recognized professional schools of social work and should therefore ordinarily be met in full. The outline of courses below meets the requirements for the general major. See page 20.

The following subjects should be completed in high school: elementary algebra, 1 unit; plane geometry, 1 unit; intermediate algebra, 1 unit; foreign language, 3 units in one language.

| Lower Division | *Units* *1st Sem.* | *Units* *2d Sem.* |
|---|---|---|
| *Freshman Year* | | |
| Physical Education (activity courses) | ½ | ½ |
| Health Education 21, Principles of Healthful Living | – | 2 |
| English 1, Freshman Composition, and 2, Freshman Literature, or optional course | 3 | 3 |
| Biology 10A-10B, General | 3 | 3 |
| Foreign Language (if needed to complete requirement) | 0–5 | 0–5 |
| Psychology 1, General, and 11, Applied | 3 | 3 |
| Electives (see natural science requirement, page 18)<br>(Also recommended: Speech Arts 2A-2B, Public Speaking) | 1–6 | 1–4 |
| | 15½ | 15½ |
| *Sophomore Year* | | |
| Physical Education (activity courses) | ½ | ½ |
| Economics 1A-1B, Principles | 3 | 3 |
| Political Science 1A-1B, Comparative Government, or 71A-71B, Introduction to American Government and Politics | 3 | 3 |
| Additional Natural Science (if needed to meet requirement) | 3 | – |
| Sociology 50A-50B, Introduction and General | 3 | 3 |
| Electives (anthropology recommended) | 3 | 6 |
| | 15½ | 15½ |
| **Upper Division** | | |
| *Junior Year* | | |
| Economics 100B, Modern Economic Thought, or 111, Economic History of the United States | – | 3 |
| Sociology 103, Introduction to Social Research | 3 | – |
| Sociology 109, Fields of Social Work | – | 3 |
| Psychology 150, Abnormal Psychology | 3 | – |
| Psychology 145, Social Psychology | – | 3 |
| Zoology 165, Human Heredity | 2 | – |
| Elective | 7 | 6 |
| Examination in U. S. Constitution and American History. | | |
| | 15½ | 15½ |
| *Senior Year* | | |
| Economics 185, Social Insurance, or 150, Labor Problems | 3 | – |
| Sociology 197, Urban Sociology | 3 | – |
| Sociology Elective | – | 3 |
| Psychology 151A, Clinical (Diagnostic) | 3 | – |
| Economics Upper Division Elective | – | 3 |
| Political Science 140, Principles of Public Administration, and 141, Organization and Procedure in Public Administration, or upper division anthropology | 3 | 3 |
| Additional upper division electives in Economics or Psychology | 3 | 6 |
| | 15 | 15 |

# PRE-VETERINARY CURRICULUM

Most colleges of veterinary medicine require but one year (32 units) of pre veterinary college work. There are a few colleges which require two years and it i best to consult the bulletin of the college to which admission is desired for specia requirements.

## Freshman Year

| | Units 1st Sem. | Units 2d Sem |
|---|---|---|
| Physical Education (activity courses) | ½ | ½ |
| Chemistry 1A-1B, General | 5 | 5 |
| Zoology 1A-1B, General | 4 | 4 |
| English 1, Freshman Composition, and 2, Freshman Literature, or optional course | 3 | 3 |
| Health Education 21, Principles of Healthful Living | 2 | – |
| Electives | 2 | 4 |
| | 16½ | 16½ |

## Sophomore Year

| | Units 1st Sem. | Units 2d Sem |
|---|---|---|
| Botany 2A-2B, General | 4 | 4 |
| Physics 2A-2B, General | 3 | 3 |
| Physics 3A-3B, Physical Measurements | 1 | 1 |
| Chemistry 101, Elementary Organic | 4 | – |
| Psychology 1, General | – | 3 |
| Social Science | 3 | 3 |
| Physical Education (activity courses) | ½ | ½ |
| Electives | 1 | 2 |
| | 16½ | 16½ |

Suggested electives are additional Mathematics, Foreign Language, Entomology.

# ANNOUNCEMENT OF COURSES

## COURSE NUMBERS

Courses numbered from 1 to 99 are lower division (freshman or sophomore) ourses; those numbered 100 to 199 are upper division (junior or senior) courses; hose numbered 200 to 299 are graduate courses (see page 12 for information conerning eligibility to enroll in these courses); those numbered 300 to 399 are profesional education courses to be taken at the graduate level.

## CREDIT FOR UPPER DIVISION COURSES

Freshmen are not admitted to upper division courses.

A sophomore may enroll in an upper division course for lower division credit rovided he has earned an average grade of not less than 1.5 in all college work ndertaken, and provided he receives the instructor's permission to enroll in the course.

A second semester sophomore may enroll in an upper division course for upper ivision credit without the foregoing grade limitations provided the units earned in he upper division course or courses are in excess of the 60 units required in the ower division.

A student with sophomore standing may carry upper division courses for upper ivision credit provided that he has the written approval of the chairman of the departent and the Dean of General Education or the Dean of Professional Education.

## UNITS

Figures in parentheses indicate the unit value of the course.

One "unit" represents 50 minutes of recitation or lecture, together with the equired preparation, or three hours laboratory work each week for a semester of 8 weeks.

## ORDER IN WHICH COURSES ARE OFFERED

The semester in which courses are offered is designated as follows: Fall (given n Fall only); Spring (given in Spring only); Fall or Spring (given in either Fall r Spring); Fall and Spring (a year course beginning in either the Fall or Spring); ear Course (beginning in Fall).

Either semester of a year course may be taken first unless otherwise designated.

Although the college fully expects to carry out the arrangements planned in the ist of courses, it reserves the right to make changes. Classes in which the enrollment oes not come up to the minimum number set by the State Department of Education ay not be offered or may be postponed.

## PREREQUISITES

Prerequisites for courses are stated. A student should not enroll in a course for hich he is not eligible.

## PROVISIONAL COURSES

Courses numbered 40 to 45 are open only to students who are in the provisional rogram. Other students (those not having provisional status) are not eligible to ake these courses.

# AESTHETICS

## IN THE DIVISION OF FINE ARTS

### Major

A *liberal arts major* is not offered in aesthetics; however, certain courses in thi field are required as part of the liberal arts major in art and in music. For specifi information, refer to these departments.

A *teaching major* is not offered in aesthetics; however, certain courses in thi field are required as part of the teaching major in art and in music for the genera secondary and the special secondary credentials in these fields. For specific information refer to the outlines of requirements for these credentials.

### Minor

A *liberal arts minor* is not offered in aesthetics.

A *teaching minor* is not offered in aesthetics; however, certain courses in this field are required as part of the teaching minor in art for the general secondary, the general junior high school, and the special secondary credentials. For specific information, refer to the outlines of requirements for these credentials.

### Lower Division Courses

**1A-1B. Survey of Music**

Correlation of music and other arts. Designed to stimulate enjoyment of music by developing intelligent listening. The elements of music, its structure, folk music of all countries, musical instruments, and the contributions of the best known composers, with some biographical study of these men. Compositions are presented by orthophonic recording and by class members. Attendance at a number of local concerts is required. No previous musical training or background is necessary. Music majors are required to complete additional assignments for full credit.

Year course (2-2)

**5. Art Orientation**

An illustrated lecture course dealing with aesthetic meaning and its relation to the structure of art products. Designed to increase both understanding and appreciation of the visual world in general and of the fine arts in particular.

Spring (2)

**50. Appreciation and History of Art**

A survey of art development in the painting, sculpture, architecture, and handicrafts from dawn of art to the Renaissance. Illustrated.

Fall (2)

**51. Survey of Mexican Art**

A study of Mexican and Middle American Art from earliest time to present.

Fall (2)

**52A-52B. Survey of Oriental Art**

A study of the art of the great cultures of the Orient. (52A is a prerequisite for 52B.)

Fall and Spring (3-3)

### Upper Division Courses

**100. Great Music**

A listening course designed especially for the layman and concert-goer. Masterpieces of instrumental and vocal music will be performed by means of recordings and by local musicians. A study of artistic trends and their effect upon musical composition and performance. Correlation of musical art and other arts. No prerequisites. No credit for music majors.

Summer (3)

**2A-102B. Music History**

The various movements in the development of music as related to the other arts. he chronological development of the art of music with particular emphasis on the rger works. Considerable attention is given to the works of modern composers. Many mphonic works are studied from the orchestral scores. Music majors are required to mplete additional assignments for full credit. Prerequisite: Aesthetics 1A or 1B.
Year course (2-2)

**0. Appreciation and History of Art**

The period from the Renaissance through the modern school treated in the same anner as in Aesthetics 50.
Spring (2)

# ANTHROPOLOGY

## IN THE DIVISION OF SOCIAL SCIENCES

### Major

A *liberal arts major* is not offered in anthropology. Students wishing to use thropology as a field of concentration in the *general major* should include the lowing courses in the lower division: Anthropology 1A-1B, 2 or 3; Geography 1, 2; ology 1A-1B; Psychology 1, 10 or 11; Sociology 50A-50B; recommended: Spanish, rman, or French. Recommended fields of concentration in addition to anthropology the upper division of the general major with a view to later specialization in one of following areas of anthropological work: *area of archaeology:* art, geography, ology, history; *area of physical anthropology:* psychology and zoology; *area of seum work:* art, education, geology, psychology. For further information on the neral major, refer to page 20.

A *teaching major* is not offered in anthropology; however, it may be used as rt of the *social science major* for the general junior high school credential or the neral secondary credential. For specific information, refer to the outlines of the quirements for these credentials.

### Minor

A *liberal arts minor* is offered in anthropology. The minor must include at least units of work in anthropology, 9 units of which must be from courses carrying per division credit.

A *teaching minor* is not offered in anthropology for the general secondary cre-ntial; however, anthropology may be used as a part of the *social science minor* for general junior high school, the special secondary, the general elementary, and the dergarten-primary credentials. For specific information, refer to the requirements the teaching minor for these credentials.

**-1B. General Anthropology**

Origin and antiquity of man. Theories of human descent. Classification of races. gin and early development of civilization.
Year course (3-3)

**Physical Anthropology**

An introduction to the studies of primatology and anthropometry. The compara- anatomy of the monkeys and great apes, the emergence of the anthropoids, the nstruction of early man from fossil evidence. The landmarks, measures and indices d in the metrical study of the living human body and skeletal material. Sexual differ- es and growth changes in the skull and skeleton.
Fall (3)

**Survey of Archaeology**

A review of the history of modern archeology and a discussion of its methods. The elopment of archaeological techniques in reconstructing the ancient cultures of the literranean world. The problems of present day archaeology in the Near East, the ent and the Americas. The principles and basic techniques used in the excavation of s and the reporting of findings.
Spring (3)

### 54. Social Anthropology

An anthropological study of social institutions in primitive and civilized societi The evolution of family organization, religion, property right, and government traced elementary and advanced civilization.

Spring (3) (Not offered in 1948-49)

## Upper Division Courses

### 151A. The North American Indian

Pre-Columbian cultures of the North American Indian. The origin and migrati of New World peoples. Industries, arts, crafts, social organization, religion and oth phases of American Indian civilization.

Fall (3)

### 151B. Indian Civilization of Middle America

The development of civilization in Pre-Columbian Mexico and Central Americ Aztec, Mayan, and related cultures.

Spring (3)

### 152. World Ethnography

The cultural patterns of representative aboriginal peoples. Industries, arts, soci organization and supernaturalism considered with a view to environmental adjustme historical development and functional interrelation. Ethnological theories reviewed a applied in interpreting illustrative aboriginal societies.

Fall (3) (Not offered in 1948-49)

### 153. Primitive Religion

Beliefs and ritual of primitive man. Magic and religion. Forms of animism a polytheism. Primitive mentality and the supernatural.

Spring (3) (Not offered in 1948-49)

### 161. The California Indian

A survey of native California Indian culture with stress on the Indian groups Southern California. The industries, arts, social organization, folklore and religi will be considered as revealed through the study of living peoples and archaeologic evidences.

Offered only during summer sessions (3)

### 165. Ethnology and Race Psychology

The biological basis of race, somatic and serologic typology, racial mentality, tes and their ethnopsychological significance, abnormality in ethnic groups. Race and cu ture; ethnic aspects of demography.

Fall (3) (Not offered in 1948-49)

### 172. Indian Cultures of the Southwest

Pueblo Indian culture of the Southwestern states and its background in the art crafts, architecture and religion of the past. The culture of contemporary Pueblo villages interpreted in terms of earlier civilizations revealed through archaeolog Recent trends in archaeological research reviewed.

Offered only during summer sessions (3)

# ART

## IN THE DIVISION OF FINE ARTS

### Major

A *liberal arts major* is offered in art. Every student who plans to major in art,
hether under the liberal arts program or the teacher training program, should com-
te the following basic courses: Aesthetics 5 or 51, and 50, Art A-B, 6A-6B, and 14A.
nder the liberal arts program the student majoring in art may choose either a group
courses in which the crafts are emphasized or a group of courses in which the graphic
ts are emphasized. One of the following plans should be selected:

Emphasis on crafts: The student should add to the list of basic courses required
all art majors the following courses: lower division: Art 6D, 7, 11A-11B, and 61B;
per division: Aesthetics 150, Art 106A or B or C, 106D, 117A-117B, 119A-119B, and
nits of art electives. This program points in the direction of industrial design, inte-
r design, cabinet making, sculpture, weaving, textile design, ceramics, etc.

Emphasis on graphic arts: The student should add to the list of basic courses
quired of all art majors the following courses: lower division: Art 15A, 16A, and 4
its of art electives; upper division: Aesthetics 150, Art 106A, 112A-112B, 115A-
5B, 116A-116B, 117A, and 6 units of art electives. This program points in the direc-
n of illustration, portraiture, landscape painting, mural design, poster design, pro-
ction illustration, advertising design, fashion design, etc.

A *teaching major* in art is offered for the general secondary credential and the spe-
l secondary credential. Students planning to teach art in the secondary schools should
d to the list of basic courses required of all art majors the following courses: lower
ision: Art 61A-61B, and 6 units of art electives; upper division: Aesthetics 150,
t 116A, 112A, 106A, 119A, 195, and 6 units of art electives. Speech Arts 140A should
o be completed. For further information, refer to the outlines of requirements for the
ecial secondary and general secondary credentials.

### Minor

A *liberal arts minor* is offered in art. The minor must include at least 15 units of
rk in art, 9 units of which must be from courses carrying upper division credit.

A *teaching minor* is offered in art for the general secondary, the general junior
h school, and the special secondary credentials. Art may be offered only as a second
ching minor for the general elementary and the kindergarten-primary credentials.
r specific information, refer to the outlines of requirements for these credentials.

### Art Appreciation, History and Orientation

For courses in appreciation, history of art, and art orientation, see aesthetics.
ny students, regardless of the field in which they may be majoring, recognize the
ed for an intelligent approach to the subject of art and art appreciation. However,
e to the erroneous popular feeling that art is a subject requiring "talent", these stu-
nts may refrain from enrolling in art courses. For students who desire a better under-
nding of art, but who do not hope to acquire any of the art skills, the following
rses are recommended:

| | *Units* |
|---|---|
| Aesthetics 5, Art Orientation | 2 |
| Aesthetics 50, History and Appreciation of Art | 2 |
| Aesthetics 51, Survey of Mexican Art | 2 |
| Aesthetics 52A-52B, Survey of Oriental Art | 6 |
| Art 8, Costume and Home-furnishing | 2 |

Other courses which require certain skills but which are not beyond the ability
the average college student are:

| | |
|---|---|
| Art 61B, Crafts | 2 |
| Art 6A, Design | 2 |
| Art A, Drawing and Composition | 2 |
| Art 94, Costume design | 2 |

## Lower Division Courses

### A. Drawing and Composition

Problems involving perspective to develop ability to draw still life, furnitu exteriors, interiors, and the like. (High school equivalent may excuse the student fr this course.)
Fall or Spring (2)

### Art B. Drawing and Composition

Drawing of mechanical and natural forms by the use of line and value. Empha on proportion and structure. Some quick sketching, gesture and contour drawing. P requisite: Art A.
Fall or Spring (2)

### 6A. Design

Fundamentals of design and composition and theory of color. Basic course used a prerequisite for all advanced work.
Fall or Spring (2)

### 6B. Design

Original work in creative design and representation with special stress on mod tendencies. Prerequisite: Art 6A.
Fall or Spring (2)

### 6D. Design

Study of the principles of design through the making of furniture. Prereq site: 6A.
Fall or Spring (2)

### 7. Line, Color and Display

The principles of line, color and arrangement applied to store and window d play. Study and observation of windows, color and materials used in display. Build models and practical problems in arranging colors, textures, and forms in windo to fit different kinds of merchandise.
Fall or Spring (2)

### 8. Costume and House Furnishings

An appreciative study of modern architecture and modern house furnishin with emphasis on the spirit of gracious living and an appreciative study of the mod dress with emphasis on suitability to the figure, the personality and the occasion.
Fall or Spring (2)

### 11A. Industrial Design

Design of objects for manufacture with reference to their use, materials, a in accordance with factory practices and machine techniques. Prerequisite: Art 6 6B, A.
Fall (2)

### 11B. Advanced Industrial Design

Advanced problems with particular attention to the techniques of presentation working drawings, renderings in perspective and scale models. Prerequisite: Art 6 6B, A, 11A.
Spring (2)

### 14A. Lettering

Fundamental art principles applied to lettering. Practice for quick, accur lettering; original problems using letters as design. Prerequisite: Art 6A.
Fall (2)

### 14B. Posters and Commercial Art

The application of lettering to posters, newspaper and magazine advertisin and other forms of commercial art. The study of composition combined with lett ing and special study of modern tendencies in publicity. Prerequisites: Art 6A, 14
Spring (2)

### A-15B. Life Drawing

Drawing from the nude model. Prerequisite: Art A-B.
Fall and Spring (2-2)

### A-16B. Painting

Semester I: Composition of still life in oil. Semester II: Landscape and more vanced composition in oil. Prerequisite: Art A-B.
Fall and Spring (2-2)

### A-17B. Sculpture

Creative design in such materials as clay, wood, stone, concrete, etc. Prerequi- es: Art 6A-6B.
Fall and Spring (2-2)

### A. Crafts in the Elementary Schools

A foundation course which develops unification of work of the elementary grades rough activities and experiences. These experiences grow out of environmental tivities. They include study and working of clay, lumber and tools, textiles, and rdboard construction. Prerequisite: Art 6A.
Fall or Spring (2)

### B. Crafts

Problems involving the application of design principles to various fields—pottery, tiles, weaving, metal work, wood-carving, and book-binding. Prerequisite: Art 6A.
Fall or Spring (2)

### A-94B. Costume Design

Original designs of modern costumes suitable to the individual or to distinct es; the drawing of fashion figures; the rendering of fabrics and textures. Prerequi- se: Art 6A.
Fall and Spring (2-2)

### A-95B. Interior Decoration (See Art 195A-195B)

## Upper Division Courses

### A-106B. Printmaking

Study of print crafts which includes the making of linoleum blocks, wood engrav- s, etchings and lithographs. Prerequisites: Art A, B, 6A.
Fall and Spring (2-2)

### C. Illustration

Same as 106A-B except that printmaking is applied to problems of book illus- tion. Prerequisites: Art A, B, 6A.
Spring (2)

### D. Advanced Furniture Design

(See Art 6D) Prerequisite: Art 6D.
Fall or Spring (2)

### A-112B. Design and Composition

Imaginative organization of space by means of color, dark and light, perspective, textures of various materials. Prerequisites: Art A-B, 6A-6B.
Year course (2-2)

### A-115B. Life Drawing and Painting

Drawing and painting from nude and costume models. Prerequisite: Art A-B.
Fall and Spring (2-2)

### C-115D. Advanced Life Drawing and Painting

Painting from nude and costume models and advanced composition in oil. Por- ture. Prerequisite: Art 115A-115B.
Fall and Spring (2-2)

**116A-116B. Advanced Painting**

Painting in oils from still life and landscape, stressing composition. Prerequ Art 16A or 16B.
Fall and Spring (2-2)

**117A-117B. Sculpture**

Creative design in such materials as clay, wood, stone, concrete, etc. Prer sites: Art 6A-6B and 17A or 17B.
Fall and Spring (2-2)

**119A. Ceramics**

Building of pottery on the basic techniques of coil, slab, mold making, an casting. Ceramic sculpture, glazing and kiln operations. Prerequisite: Art 6A.
Fall (2)

**119B. Ceramics**

Study of glazes and elementary clay technology. Mold making, slip casting application to individual creative problems. Prerequisite: Art 119A.
Spring (2)

**166. Special Studies**

A student with the necessary grade point average may apply for work i upper division art course and register for Art 166, Special Studies. (See page

**194A-194B. Costume Design** (For description, see Art 94A-94B)

Prerequisite: Art 6A and consent of instructor.
Fall and Spring (2-2)

**195A-195B. Interior Design**

The consideration of the house as a unit; the arrangement of garden, h floor plan, and furniture as functional and decorative problems. Prerequisite: A and 6A. 195A is a prerequisite for 195B.
Fall and Spring (2-2)

## Graduate Courses

**200A-200B. Special Problems**

A graduate course in which students may carry out projects in various fiel art under the direction of faculty members who are specialists in the field ch Students registering for this course must apply for work within a certain field discussions with the art faculty. Prerequisite: Graduate standing and conse instructor.
Fall and Spring (2-2)

# ASTRONOMY

## IN THE DIVISION OF PHYSICAL SCIENCES

### Major

A *liberal arts major* is not offered in astronomy. Students desiring to prepare for lvanced work in astronomy should include the following courses: Astronomy 1, 2, 9, and 10; Mathematics 3A-3B, 4A-4B; Physics 1A-1B-1C-1D; a reading knowledge French and German.

A *teaching major* is not offered in astronomy; however, astronomy may be used part of the general science major for the general junior high school credential. For ecific information, refer to the outline of requirements for the general science teach- g major for this credential.

### Minor

A *liberal arts minor* is not offered in astronomy.

A *teaching minor* is not offered in astronomy; however, astronomy may be used part of the *general science minor* for the general junior high school, the special condary, the general elementary, and the kindergarten-primary credentials. For ecific information, refer to the requirements of the teaching minor for these edentials.

### Lower Division Courses

**Descriptive Astronomy**

A cultural course planned to develop an appreciation of astronomy with special nphasis on the solar system. Only calculations of an elementary nature are used. pecial attention is given to the methods and instruments by means of which astro- mical knowledge has been gained. A six-inch John Byrne refractor and an eight-inch flecting telescope are available for observation. Prerequisites: Elementary algebra d plane geometry.

Fall and Spring (3)

**Modern Astronomy**

A study of the stellar system in the light of modern research, especially photo- aphic and spectrographic. Prerequisite: Astronomy 1 or permission of the instructor.

Spring (3)

**Surveyor's Course in Practical Astronomy**

The principles of spherical astronomy adapted to the needs of engineering stu- nts. Computation and observation. Two lectures and one three hour laboratory period ch week. Prerequisite: Surveying 1A or permission of the instructor. Astronomy 1 d 9 desirable.

Spring (3)

**Practice in Observing**

A laboratory course designed particularly to go along with and to supplement tronomy 1. The course will include constellation study, use of astronomical coordi- tes, elementary methods of determining time and latitude, and descriptive observa- ns of celestial objects with the six-inch telescope. One three hour evening laboratory riod each week. Prerequisite: Astronomy 1 or registration in Astronomy 1 or permis- n of the instructor.

Fall or Spring (1)

**Advanced Observational Astronomy**

A continuation of Astronomy 9. More advanced problems in observing will be en up such as the determination of azimuth by observations of Polaris, astronomical otography, etc. One three hour evening laboratory period each week. Prerequisites: tronomy 1 and 9.

Spring (or upon demand) (1)

**Elementary Navigation**

A study of compass corrections, drift problems, time, line of position, use of estial coordinates, Bowditch Tables, etc. A few class hours at the close of the term are devoted to the use of tables such as Ageton, Dreisonstok and H. O. 214 for solution of astronomical triangle. One three hour laboratory period each we Offered if demand is sufficient. Prerequisite: Astronomy 1 or permission of instruct

Fall (3) (Offered in 1948-1949)

### Upper Division Courses

**100. Special Problems**

Admission by consent of instructor. Credit and hours to be arranged in each ca Open to students who have completed three units in astronomy.

Fall or Spring (1 or 2)

**105. Historic Development of Astronomy**

A study of the more important problems and astronomical concepts in the li of their historical development. Particular attention is given to the biography contributions of the more important astronomers, such as, Galileo, Kepler, Newt Herschel, Bessel, etc.

Spring (3)

**107. Method of Least Squares and Computing Practices**

Fundamental principles with applications in the fields of astronomy, phys and engineering.

Spring (3) (Not offered 1948-49)

## BACTERIOLOGY

### IN THE DIVISION OF LIFE SCIENCES

*Majors* and *Minors* are not offered in bacteriology; however, courses in this fi may be used as part of the liberal arts major in zoology. Courses in this field recommended for students who are preparing to teach science in junior high sch or life sciences in high school.

### Lower Division Courses

**1. General Bacteriology**

An introduction to bacteriology. Effects of physical and chemical agencies up bacteria; biochemical activities of bacteria; microscopic examination and cultivati of bacteria; the bacteria of air, water, soil, milk and dairy products, other foo industrial applications. Introduction to disease-producing bacteria. Two hours of lect and six hours of laboratory per week. Prerequisite: Chemistry 1A or 2A.

Fall or Spring (4)

### Upper Division Courses

**101. General Bacteriology**

Lectures and laboratory work of Bacteriology 1 with additional work to prescribed by the instructor. Prerequisite: Chemistry 1A or 2A.

Fall or Spring (4)

**199. Special Problems**

Work other than is outlined in the regular courses. Admission only by cons of the instructor with whom the work is to be done. Credit and hours to be arrang in each case. Open to students who have completed at least 15 units of work in life sciences (including courses in Bacteriology) with grades of A or B.

Fall or Spring (1 or 2)

# BIOLOGY

## IN THE DIVISION OF LIFE SCIENCES

### Major

A *liberal arts major* is not offered in biology; however, courses in biology may be used as part of the *liberal arts major in life science.* Refer to page ___ for outline of the life science major.

A *teaching major* is not offered in biology; however, Biology 10A-10B may be used for the year course required in a biological science for the *general science major* for the general junior high school credential or the *physical science major* for the general secondary credential. For specific information, refer to the outlines of requirements for these credentials.

### Minor

A *minor* is not offered in biology; however, biology may be used as part of the *general science minor* for the general junior high school and special secondary credentials. For specific information, refer to the outlines of requirements for the teaching minor for these credentials.

### Lower Division Courses

**A. Solutions and Dosage**

Arithmetic review with computing of dosage, percentage of solutions, apothecaries weights. Two hours per week.
Fall (2)

**. Survey of Biology**

A survey of life science, stressing the development of modern concepts in the ields of plant and animal science, bacteriology, genetics, and physiology. Emphasis s placed on the relationships of biology to modern life and the application of scientific analysis to every day problems. Three lectures and one hour of demonstration and discussion per week. Not open to students with credit for Biology 10A-10B, Zoology A-1B, or Botany 2A-2B.
Fall or Spring (3)

**0A-10B. General Biology**

A year course in life science, more extensive than "Biology 1." Continues hroughout the year and includes a three-hour laboratory period, and two hours of lectures per week. Designed for those who do not expect to specialize in zoology or otany; not open to students with credit for Biology 1, 40, Zoology 1A, 1B, Botany A, or 2B. Biology 10A is a prerequisite for 10B. Students who have taken 10A-10B may elect Zoology 1B or Botany 2A or 2B for credit.
Year course (3-3)

# BOTANY

## IN THE DIVISION OF LIFE SCIENCES

### Major

A *liberal arts major* is not offered in botany; however, courses in this field m be used as part of the liberal arts major in zoology or as part of the *liberal arts maj in life science*. For specific information, refer to zoology and to page 21 for outline requirements for the life science liberal arts major.

Students who are preparing for advanced work in botany should include t following courses: Botany 2A-2B, 104; Chemistry 1A-1B, 101. Recommended: Frenc German, and elementary courses in other biological sciences.

A *teaching major* is not offered in botany; however, botany may be used as pa of the *general science major* for the general junior high school credential or as pa of the *life science major* for the general secondary credential. For specific informatio refer to the outlines of requirements for these credentials.

### Minor

A *liberal arts minor* is offered in botany. The minor must include at least 15 uni of work in botany, 9 units of which must be from courses carrying upper divisi credit.

A *teaching minor* is not offered in botany; however, botany may be used as pa of the *general science minor* for the general junior high, the special secondary, t general elementary, and the kindergarten-primary credentials or as part of the *li science minor* for the general secondary credential. For specific information, refer the outlines of requirements for these credentials.

### Lower Division Courses

**2A-2B. General Botany**

A year course covering the fundamentals of structure and general behavior seed plants, the morphology and relationship of the lower plants, including an intr duction to classification and distribution of seed plants. Two lectures and six hours laboratory work per week. Botany 2A is a prerequisite to 2B.

Year course (4-4)

**4. California Plants**

Classification and ecology of representative orders of wild flowers, trees, an chaparral of the San Diego region, including practice in the use of keys. One lectu and three hours laboratory per week. Occasional Saturday field trips.

Spring (2)

### Upper Division Courses

**101. Plant Pathology**

A practical course dealing with the principles of disease in plants, contr measures, and quarantine procedures. Of particular interest to students of agricultur forestry and horticulture. Emphasis is placed on the determination and control mea ures of those pathogenic organisms which affect truck and field crops, garden an ornamental trees and shrubs and nursery stock. Two lectures and one laborato period per week. Prerequisite: Botany 2A-2B.

Fall (3)

**102. Plant Geography**

Lectures and field work on the principles of geographical distribution of plant Prerequisite: Botany 2A-2B, or 4, or equivalent.

Fall (2) (Offered in 1948-49 and alternate years)

**104. Plant Taxonomy**

Identification, classification and distribution of representative orders of flowerin plants. One hour lecture and six hours per week of laboratory and field work. Pr requisites: Botany 2A-2B, or 4.

Spring (3) (Offered in 1947-48 and alternate years)

### 105. Cultivated Trees and Shrubs

Recognition of the common cultivated trees and shrubs of the San Diego region. Trips to local parks and private gardens. One lecture and three hours per week laboratory or field work.

Fall (2)

### 107. Plant Physiology

The activities of plants, including food manufacture, absorption, conduction, transpiration, respiration, growth and movement. Two lectures and two laboratory periods per week. Prerequisites: Biology 10A-10B or Botany 2A, and Chemistry 2A-2B or equivalent.

Spring (4)

### 123. Economic Biology

Study of the uses of plants and animals to man and the ways in which they njure him and his possessions. Consideration is also given to general methods of control and conservation. Prerequisite: Zoology 1A, Biology 1, or Biology 10B. Not open to students who have credit in Zoology 123.

### 124. Scientific Illustration

Drawing and photography of scientific subjects. Students are assigned individual projects, following their respective inclinations. It is desirable for students electing this course to have a definite project, or projects in mind and to confer with the instructor in advance in case specialized needs are required. Six hours of laboratory work per week. Not open to students who have credit in Zoology 124.

Fall (2)

### 130. Readings in Biology

Reading from a suggested bibliography with informal class discussion of topics. Subjects discussed will include history of biology, biological principles, ecology, economic zoology, zoogeography, breeding habits, and animal behavior. Not open to students who have credit in Zoology 130.

Spring (2)

### 55. Genetics

An introductory course to the principles of heredity and cytogenetics, including he genetics of man, other animals and plants. Designed primarily for science majors. Two lectures per week. Not open to students who have taken Zoology 155 or 165. Prerequisite: Biology 10A-10B, Zoology 1A-1B, or Botany 2A-2B.

Spring (2)

### 99. Special Problems

Work other than is outlined in the above courses. Admission by consent of the nstructor with whom the work is to be done. Credit and hours to be arranged in each case. Open only to students who have completed at least fifteen units of Botany with a grade A or B.

Fall and Spring (1 or 2)

# CHEMISTRY
## IN THE DIVISION OF PHYSICAL SCIENCES

### Major

A *liberal arts major* is offered in chemistry. Two plans are provided: One fo students expecting to enter chemistry as professional chemists; the other for student intending to use chemistry in a related field. In addition, varying degrees of concen tration in chemistry are available in the teaching major in physical science and in th chemical engineering option of the general engineering major.

A *teaching major* is offered in chemistry for the general secondary credential o as part of the *general science major* for the general junior high school credential or a part of the *physical science major* for the general secondary credential. For specifi information, refer to the outlines of the requirements for these credentials.

### Minor

A *liberal arts minor* is offered in chemistry. The minor must include Chemistr 1A-1B plus at least 9 units of credit in upper division chemistry courses.

A *teaching minor* is offered in chemistry for the general secondary credential o as part of the *general science minor* for the general junior high, the special secondary the general elementary, and the kindergarten-primary credentials. For specific infor mation, refer to the outlines of the requirements for these credentials.

### Curricula for Liberal Arts Majors in Chemistry

Plan A, outlined below, is recommended for all students who intend to becom professional chemists. It follows the recommendations of the Committee on Professiona Training of the American Chemical Society. It qualifies graduates for many types o positions as chemists and provides the training required by most universities fo admission to graduate work in chemistry.

Plan B is designed for students who do not intend to become professiona chemists, but who desire the major in chemistry as part of a general education or i preparation for training in a related profession. By proper choice of electives, gradu ates can meet the requirements for admittance to medical schools. This plan is als suitable for students interested in teaching in secondary schools who desire mor intensive chemical training than that required in the physical science major.

The recommended sequence of courses for each plan is presented below. Al courses except electives are required. The foreign language requirement may be me by courses taken in high school plus an examination to demonstrate competence in reading. Some variation in sequence is permissible with the consent of the faculty adviser.

#### Plan A
#### (For chemists)

| First year | *Units* |
|---|---|
| Chemistry 1A-1B | 5–5 |
| Physics 1A-1B | 3–3 |
| Mathematics 3A-3B | 3–3 |
| English 1 and 2 | 3–3 |
| Health Education 21 | 0–2 |
| Physical Education | ½–½ |
| | 14½–16½ |

| Second year | *Units* |
|---|---|
| Chemistry 5 | 3–0 |
| Chemistry 101 | 0–4 |
| Physics 1C-1D | 3–3 |
| Mathematics 4A-4B | 3–3 |
| German A-B | 5–5 |
| Psychology 1 | 3–0 |
| Physical Education | ½–½ |
| | 17½–15½ |

#### Plan B
#### (For related professions)

| First year | *Units* |
|---|---|
| Chemistry 1A-1B | 5–5 |
| Physics 2A-2B | 3–3 |
| Physics 3A-3B | 1–1 |
| Mathematics 7A-7B | 3–3 |
| English 1 and 2 | 3–3 |
| Physical Education | ½–½ |
| | 15½–15½ |

| Second year | *Units* |
|---|---|
| Chemistry 5 | 3–0 |
| Chemistry 101 | 0–4 |
| French or German A-B | 5–5 |
| Health Education 21 | 2–0 |
| Psychology 1 | 0–3 |
| *Elective | 6–3 |
| Physical Education | ½–½ |
| | 16½–15½ |

---

* Should include preparation for minor.

| Third year | *Units* |
|---|---|
| Chemistry 102-103 | 3–3 |
| Chemistry 110A-110B | 3–3 |
| Chemistry 105 | (3–0) or 0–3 |
| Minor | (0-3) or 3-0 |
| † Social Science | 6–6 |
| | 15–15 |

| Fourth year | *Units* |
|---|---|
| Chemistry 111 | 3–0 |
| Chemistry elective | 0–2 |
| Minor | 3–3 |
| Electives | 9–10 |
| | 15–15 |

| Third year | *Units* |
|---|---|
| Chemistry 102-103 | 3–3 |
| Chemistry 110A-110B | 3–3 |
| Chemistry 105 | (3–0) or 0–3 |
| Minor | (0-3) or 3-0 |
| † Social Science | 6–6 |
| | 15–15 |

| Fourth year | *Units* |
|---|---|
| Chemistry elective | 3–3 |
| Minor | 3–3 |
| Electives | 9–9 |
| | 15–15 |

## Lower Division Courses

### 1A-1B. General Chemistry

The general principles of chemistry, and a description of the elements and their common compounds. Three lectures and two laboratory periods per week. The laboratory work in the second semester consists of work in qualitative analysis. Prerequisites: Two years of high school mathematics. Recommended: High school chemistry, physics, and additional mathematics. Chemistry 1A is a prerequisite for Chemistry 1B. Only 2 units of credit per semester will be allowed to students who have credit for Chemistry 2A-2B.

Year course (5-5)

### 2A-2B. Fundamentals of Chemistry

A general course for those not intending to take advanced courses in chemistry. The work in the first semester stresses inorganic chemistry and fundamental principles; that of the second semester covers an introduction to organic chemistry and biochemistry. Emphasis is placed on applications of chemistry to everyday life. Two lectures and one laboratory period per week. Required of prenursing students and recommended for those desiring chemistry as part of a liberal education. Not open for credit to students who have credit in Chemistry 1A-1B.

Year course (3-3)

### 5. Elementary Quantitative Analysis

The principles of gravimetric and volumetric analysis. Discussions of the theory of quantitative analysis and practice in the standardization of reagents and the analysis of samples. One lecture and quiz, and two laboratory periods per week. Prerequisite: Chemistry 1A-1B.

Fall or Spring (3)

### 101. Elementary Organic Chemistry

An introductory study of the chemistry of carbon compounds, both aliphatic and aromatic. The laboratory work illustrates properties and reactions of typical compounds and stresses development of technique. Three lectures and one laboratory period per week. Prerequisite: Chemistry 1A-1B.

Fall or Spring (4)

### 102. Organic Chemistry Laboratory

Synthesis of typical aliphatic and aromatic compounds. Study of the theory and practice of laboratory distillation, crystallization and related operations. Approximately the last third of the work covers an introduction to the systematic qualitative analysis of organic compounds by group reactions and individual tests. Three laboratory periods per week. Prerequisite: Chemistry 101.

Fall or Spring (3)

---

† To meet college requirement, see page 18.

**103. Intermediate Organic Chemistry**

A continuation of Chemistry 101. Further study of types of aliphatic and aromatic compounds, their derivatives and interrelationship. Introduction to mechanism of organic reactions. Three lectures per week. Prerequisite: Credit or registration i Chemistry 102.

Spring (3)

**105. Advanced Quantitative Analysis**

Advanced work in the theory and practice of volumetric, gravimetric, and electroanalysis. One lecture, one quiz, and two laboratory periods per week. Prerequisite Chemistry 5.

Fall or Spring (3)

**110A-110B. Physical Chemistry**

Theoretical principles of chemistry, with emphasis on mathematical relations The class will be divided into Sections A and B. Students with credit or registration i Mathematics 4B will be admitted to Section A; others to Section B. In Section B th mathematical treatment of some topics will be less rigorous and discussions will includ more descriptive material than in Section A. Three lectures per week, problems an reports. Prerequisites: Chemistry 1A-1B; Physics 1A-1B-1C-1D (or Physics 2A-2B 3A-3B); and Mathematics 4B (or Mathematics 7B) and credit or registration i Chemistry 101. Chemistry 110A is a prerequisite for Chemistry 110B.

Year course (3-3)

**111. Physical Chemistry Laboratory**

Physico-chemical apparatus and measurements. Discussion period and three laboratory periods per week. Prerequisite: Credit or registration in Section A of Chemistry 110A.

Spring (3)

**114. Biochemistry**

The chemistry of fats, carbohydrates, proteins, vitamins, hormones and enzymes. Chemotherapy, nutrition, digestion and intermediary metabolism are discussed briefly. Three lectures per week. Prerequisite: Chemistry 103. Recommended: Elementary biology or zoology.

Fall (3)

**115. Biochemistry Laboratory**

Laboratory work in the synthesis, isolation and analysis of biochemical materials. Chemical rather than biological considerations are emphasized. Two laboratory periods per week. Prerequisites: Chemistry 5, 102, 103 and credit or registration in Chemistry 114.

Spring (2)

**118. Colloid Chemistry**

The theoretical principles of colloid chemistry and the preparation, properties and practical applications of colloids. Two lectures per week. Prerequisite: Chemistry 101, 110A and 110B.

Fall (2)

**122. Glass Blowing**

Elementary training in the manipulation of glass. Prerequisite: Chemistry 1A-1B. One laboratory period per week.

Fall (1)

**127. Advanced Inorganic Chemistry**

A lecture course dealing with such topics as the physical basis of the periodic system, complex inorganic compounds, and the nature of the chemical bond. Three lectures per week. Prerequisite: Chemistry 1A-1B. Recommended Chemistry 110A-110B.

Spring (3)

**144A-144B. Principles of Chemical Engineering**

Industrial stoichiometry, flow of fluids, heat transfer, unit processes and types of ndustrial equipment. Three lectures per week, problems and reports. Prerequisite: Credit or registration in Chemistry 110A. Chemistry 144A is a prerequisite for Chemistry 144B.

Year course (3-3)

**155. Instrumental Methods of Analysis**

Training in the theory and manipulation of instruments used in modern chemical and physical testing laboratories. Discussions, laboratory work and field trips. Two aboratory periods per week. Prerequisite: Chemistry 5.

Fall (2)

**199. Special Problems**

Supervised individual work in specialized branches of chemistry. Admission only by the consent of the instructor. Hours of credit to be arranged in each case. Open only to students who have shown ability to do A or B work in chemistry.

Fall and Spring (1-2)

## Graduate Courses

**200. Seminar**

Intensive study of some phase of advanced chemistry under the direction of a member of the staff. Each student will choose a topic from one of the following fields for study and will prepare and present a paper on this topic to the staff members and other seminar students.

A. Advanced Organic Chemistry
B. Chemical Kinetics
C. Chemical Thermodynamics
D. Molecular Structure
E. Electrochemistry
F. Advanced Biochemistry
G. Spectrographic Analysis

Prerequisite: Graduate standing with suitable background in chemistry and consent of the instructor. Maximum credit 4 units.

Fall and Spring (2-2)

**299. Special Problems**

Individual work on some topic in advanced chemistry and preparation of formal written report. Problem selected to develop familiarity with chemical literature and research techniques. Prerequisite: Graduate standing with suitable background in chemistry and consent of the instructor. Maximum credit 3 units.

Fall or Spring (1-3)

# COMMERCE

## IN THE DIVISION OF SOCIAL SCIENCES

### Major

A *liberal arts major* is offered in commerce. In addition to meeting the general lower division requirements for all students, the following courses are required of commerce majors in the lower division: Economics 1A-1B; Commerce 2, 14A-14B. 18A-18B; Geography 1 and 10, or equivalent; English 2 and 8. Students majoring in the marketing subfield must also include Commerce 20, 24, 25, 27, and Art 7. These students are not required to take Geography 10 and Commerce 2. Upper division requirements: a minimum of 24 upper division units including Economics 111, 140, Commerce 121, and 15 units selected from one of the following groups:

a. Accounting: Commerce 160A-160B, 161A-161B, 162, 164A-164B, 165A-165B.
b. Banking and Finance: Commerce 133, 134, 137; Economics 131, 135, 142.
c. Business Administration: Commerce 123, 125, 126, 127, 133, 134, 137, 153, 184; Economics 128, 150, 142, 170.
d. Marketing: Commerce 123, 153, 184, 185, 186, 187A, 187B, 188, 189; Home Arts 160A-160B.

Students who elect the marketing group must complete Commerce 24 and 25 or 27 in the lower division.

A *teaching minor* is not offered in commerce; however, certain courses in this field are required as part of the *teaching minor in business education* for the general secondary, the general junior high school, or the special secondary credential. For specific information, refer to the outlines of requirements for these credentials.

Note: Courses in commerce may not be used to meet any part of the lower division social science requirement, nor may they be used as part of a social science major or minor.

### Lower Division Courses

#### A. Business Mathematics

A practical course in the mathematics of business. A thorough study of interest, compound interest, discount, insurance rates, etc.

Fall or Spring (1)

#### 1A-1B. Typewriting

A rapid development of a thorough command of a keyboard by the touch method. The acquisition of speed and the artistic arrangement of typewritten material with special reference to commercial forms, tabulation and billing; specifications, legal forms, and preparation of manuscripts; transcription, mimeographing, etc. Seven hours lecture and laboratory practice. (1A is a prerequisite for 1B.)

Year course (3-3)

#### 2. Mathematics of Finance

Interest and annuities; amortization; sinking funds; valuation of bonds; depreciation; mathematics of building and loan associations; mathematics of life insurance. Prerequisites: Two years of algebra in high school, or equivalents.

Fall or Spring (3)

#### 2A. Typewriting

A short course designed for those not wishing to enter the business office but desiring a knowledge of the use of the typewriter. Five hours laboratory practice.

Fall or Spring (2)

**A. Office Procedure**

Practice and principles of office management, including organization, arrange- ent and operation. Study and use of modern office appliances such as the multigraph, imeograph, filing devices, calculating and bookkeeping machines. Prerequisite: Com- erce 1A or its equivalent.

Fall or Spring (3)

**A-5B. Shorthand**

An intensive course designed for the practical preparation of office secretaries. thorough study of the Gregg System. Development of the ability to read and write orthand rapidly and correctly, both literary and commercial. The shorthand speed cessary to pass a civil service examination is attained by the end of the year. (5A is prerequisite for 5B.)

Year course (5-5)

**-6B. Advanced Shorthand**

Development of speed in writing and transcription. Advanced dictation on letter ms, legal forms, speeches, and literary and technical material. Prerequisite: Com- rce 5A-5B or equivalent. (6A is a prerequisite for 6B.)

Year course (3-3)

**iglish in Business** (See English 8)

**A-14B. Principles of Accounting**

A knowledge of bookkeeping not required and not advantageous. The balance eet; profit and loss statement; various types of books of original entry; the opening, nducting, and closing of books for different kinds of businesses; organizations, reor- nizations, dissolutions, and consolidations, etc., keeping in view the best modern counting practice. Five hours lecture and laboratory. (14A is a prerequisite for 14B.)

Year course (3-3)

**A-16B. Secretarial Accounting**

A course in secretarial accounting covering the fundamental principles of counting and the application of those principles to the accounting work done by lege graduate secretaries and teachers of business education. Required for four- r secretarial and business education majors. (16A is a prerequisite for 16B.)

Year course (3-3)

**A-18B. Commercial Law**

The leading and fundamental principles of business law. Simple cases showing actual application of the principles to commercial and business transactions, rather n the development of those principles. The subjects covered: contracts, sales, ncy, negotiable instruments, insurance, and wills, with a brief study of evidence. her semester may be taken first.

Fall and Spring (3-3)

**Consumer Economics**

Consumer incomes; bases of consumer choice-making; practical problems of ing food, clothing, shelter, transportation, insurance, etc.; family budgeting; rket structure and functions seen from the consumer's point of view; importance he business man of an understanding of the consumers' needs and problems.

Fall (3)

**Organization and Management of Small Business**

A course dealing with the problems confronting the small business man with rd to finance, organization, management.

(3)

**Merchandising**

A study of retail stores, emphasizing the problems of store managers and mer- ndising executives; store location, organization, personnel, sales promotion, buying handling of merchandise, inventory, turnover, and control methods. Changing litions in retailing, problems of profitable operation under present conditions.

Spring or Fall (3)

**25. Salesmanship**

Theoretical and psychological backgrounds of salesmanship, newer concepts selling; the selling of ideas and services; steps in a sale: attention, interest, desi closing; the development of clienteles and of good will; the personal factor in sal manship.

Spring or Fall (3)

**26. Applied Salesmanship**

Classroom practice in selling; supervised work in cooperating stores, or outsi selling; relationships between theory and practice in specific selling situations; ince tive methods of payment in selling; the problem of sales managers in reducing selli costs. Prerequisite: Commerce 25 and consent of instructor.

Spring (2)

**27. Advertising Principles**

A study of advertising as a sales promotional tool in our modern marketi activities, dealing with the organization of the advertising industry; consumer, mark and product analysis; advertising media; preparation of advertisements; measureme of advertising effectiveness; economic and legal aspects of advertising; public re tions; advertising campaigns.

Fall or Spring (3)

A course in the application of accounting practice and principles to accounti practice; the technical arrangement of accounting forms, records and reports fou in business. Opportunity afforded students through the use of practice sets, etc., secure practice in applying principles to actual work done in business. Prerequisit Commerce 14A-14B or 16A-16B. Commerce 65A is a prerequisite for 65B.

Year course (1 to 3 each semester)

**103A. Office Management**

A study of the general functions of the office, the duties of the office manag the organization of the office including record keeping and the efficient use of calc lating and other similar equipment. Two hours lecture and 3 hours laboratory p week. Not open to students who have credit for Commerce 3A.

Fall or Spring (3)

**103B. Office Management**

A study of the organization, direction and improvement of the communicati functions and records of the office together with a study of improvement in the us of dictating machines, duplicating machines and filing techniques. Two hours of lectu and 3 hours of laboratory per week. Not open to students who have credit for Co merce 3A. Prerequisite: Commerce 1A or its equivalent.

Fall or Spring (3)

**118A-118B. Advanced Commercial Law**

An advanced study of the law of personal and real property, partnership, co poration and the laws regulating trade and trade practices and competition. Electi for commerce majors.

Fall and Spring (3-3)

**121. Business Administration**

Problems of business administration as an interrelated whole and as an indicati of lines of study which may lead to the solution of those problems. A discussion of t problems of the business administrator with particular reference to the character of t problems involved and to the control policies and devices of the manager. Questio problems, and case studies. Prerequisite: Economics 1A-1B.

Fall or Spring (3)

**123. Marketing Principles**

A general survey of the field of marketing covering such topics as the place marketing in our economic structure; consumer demand in relation to the marketi machinery; marketing functions; marketing activities of producers, wholesale retailers and other middlemen; channels of distribution; integration of marketi

tivities; price policies; government regulation; analysis of marketing costs, effi-
ency and trends. Prerequisite: Economics 1A-1B or Commerce 45A-45B if earned
ith grades of A or B.
Fall or Spring (3)

### 4. Marketing Administration

An advanced course dealing with all the phases of marketing utilized in most
stributive campaigns. Basic marketing principles are applied to the solutions of
actical problems faced by producers, wholesalers, retailers and other middlemen
the marketing of their products. Problems covered include adaptation of products
meet consumer demand; selection of channels of distribution; brand policy; sales
omotion; price determination; operating control; legislative regulation of prices;
agnosis marketing policies. Prerequisite: Commerce 123.
Spring (3)

### 5. General Insurance

Economic theory of risk, its extent and importance to both the individual and
siness; transfer of risk; distribution and prevention of loss; types of insurance
rriers; problems of rate making; the insurance contract; coverages; special forms
life, fire, marine and casualty insurance; state supervision.
Fall (3)

### 6. Casualty Insurance

The nature and reasons for existing practices in compensation and casualty
surance. The social and legal bases of insurance, fundamental principles of rate
king, policy provisions, state regulation and state insurance.
Spring (3)

Designed to stimulate independent study and investigation; to furnish guidance the collection, organization, and presentation of factual material; to improve the chnique of term reports.
Fall and Spring (3-3)

### 9A-199B. Special Study

Designed exclusively for seniors with a major in economics.
Fall (1), Spring (1 or 2)

## Graduate Courses

### 0A-200B. Seminar in Modern Economic Thought

A critical study of contemporary economic thought to provide a clearer under-anding of major economic problems of the day. Prerequisite: Graduate standing and nsent of the instructor.
Fall and Spring (2-2)

# EDUCATION

## IN THE DIVISION OF EDUCATION

### Major

A *liberal arts major* is not offered in education; however, education is a majo for the general elementary and kindergarten-primary credentials. For specific infor mation, refer to the requirements for these credentials.

A *teaching major* is offered in education for the general elementary and kinder garten-primary credentials.

### Minor

A *liberal arts minor* is offered in education. This minor consists of a minimum o 15 upper division units in education selected from Education 102A-102B, 102C-102D 115A-115B with the approval of the Dean of Professional Education.

A *teaching minor* is not offered in education.

### Lower Division Courses

A. Review of Arithmetic
H. Review of Handwriting
R. Review of Reading
S. Review of Spelling

Each of the Review courses is a noncredit course designed to increase competenc in the skill subjects. Diagnosis of individual student difficulties will be made followe by directed practice and evaluation of progress. Open only to students who do no qualify on the respective sections of the Fundamentals Test required of all applicant to teacher education.

Fall or Spring (0)

**50. The School and Society**

A nonprofessional survey of education designed to acquaint the student with th school as a social institution in American life. Lectures will be given by differen instructors who will lead discussion periods on the various topics. Students majorin in education should consult the instructor.

Fall or Spring (2)

### Upper Division Courses

**100B. Methods and Materials of Instruction and Audio-visual Aids**

A series of professional courses in specific teaching fields designed to be take just prior to or concurrently with the first directed teaching assignment. Each cours emphasizes the application of principles of best practice with reference to motivatio individual differences, audio-visual aids, evaluation and the achievement of an effectiv learning situation in the major and minor subject fields.

Subject fields for sections in 100B are as follows:

100B-A, Methods in Art
100B-B, Methods in Accounting
100B-BE, Objectives and Curricula in Business Education
100B-E, Methods in English
100B-L, Methods in Romance Language
100B-MA, Methods in Mathematics
100B-ME, Methods in Merchandising
100B-MU, Methods in Music
100B-PE, Methods in Phys. Ed. (Men)
100B-PE, Methods in Phys. Ed. (Women)
100B-SC, Methods in Science
100B-S, Methods in Shorthand
100B-SA, Methods in Speech Arts
100B-S.SC, Methods in Social Sci.
100B-SS, Methods in Secretarial Subjects
100B-T, Methods in Typing
Fall (3) [Major (2)] [Minor (1)]

**02A. Measurement and Evaluation in Elementary Education**

A course required of all students preparing for an elementary teaching credential. t deals with the use of tests in the diagnosis and improvement of learning; construction of objective examinations; problems of evaluation in education; and the lements of statistical techniques.

Fall or Spring (3)

**02B. Child Growth and Development**

The course deals with a study of the mental, emotional, social, and physical levelopment during childhood and early adolescence. Directed observation required. Not open for credit to students who have credit for Psychology 102.

Fall or Spring (3)

**02C. Growth and Development of the Adolescent**

A course to improve understanding of the adolescent's physiological, psycho-ogical, social, and emotional development. Field work with adolescent groups in the ommunity is required. To be taken during the junior year. (Not open for credit to tudents who have credit in Psychology 103.)

Fall or Spring (3)

**02D. Measurement and Evaluation in Secondary Education**

This course deals with problems of evaluation in secondary education, construc-ion of examinations, the elements of statistics, the selection and interpretation of tandardized measures. Field work required.

Fall or Spring (2)

**15A. History and Philosophy of Education**

Historical backgrounds and underlying philosophies upon which the public chool system has been established. Emphasis will be placed on the meaning of educa-ion, educational aims and values, and democracy and education. Prerequisite: Senior tanding or the equivalent.

Fall or Spring (2)

**15B. Secondary Education**

This course will serve as an introduction to understanding the development of econdary education and its present status as a social institution. The topics developed will include: curriculum; teaching methods; organization and administration; guid-nce; and objectives. Field work required. To be taken during the junior year.

Fall or Spring (3)

**16. Directed Teaching**

Systematic observation, participation and teaching under supervision in the ampus elementary school, the affiliated elementary, junior high and senior high chools. During each semester of student teaching in the secondary schools a weekly onference period is required as indicated in the time schedule.

The general plan is for elementary school credential candidates to take, following he education practicums, a half-day of teaching daily for one semester in the campus lementary school or in one of the affiliated elementary schools. Junior high school nd special secondary school credential candidates will be guided by their adviser elative to the distribution of their student teaching. For those seeking a combination f credentials, the requirements for each teaching level must be satisfied. Further nformation regarding this requirement should be requested of the Dean of Professional ducation when the student first registers for directed teaching.

Thirty clock hours of student teaching will usually carry one unit of credit in the ourse, but the final amount of credit allowed will depend upon the character and uality of the teaching done by the student. Student teaching requirements may be educed for those who furnish evidence of successful public school experience.

The maximum amount of credit allowed for student teaching is 12 units.

The universities usually reduce the amount of student teaching credit they will llow to four units. Students planning to transfer to such institutions should be repared to meet this reduction with an equal number of acceptable units in other ourses.

No grade below "C" is acceptable for credit in student teaching.

Prerequisites: Completion of 75 units of college work; admission to teacher ducation; a C average in all college work and in the work of the preceding semester;

three units of work in psychology; a minimum of one semester's work in this college No credit will be given unless the student registers in advance for this course in th office of the Dean of Professional Education.
Fall or Spring (a maximum of 12 units )

**117A. Elementary Music Education**

Objectives of music teaching in the elementary school. Study of the child voice Organization of song material by grades. Procedure in presenting rote songs, ear training, elementary notation, music reading, and part singing. Conducting. Prerequisite Music 1A, or the equivalent. Not open to students who have had Music 7A.
Fall or Spring (2)

**117B. Methods in Instrumental Music**

A study of the theory of problems or organizing and conducting school band and orchestras, and the selection of materials. Provides practical experience in conducting a children's orchestra and teaching sectional groups. A study of systemati planning of courses of study for pupils of various ages and abilities will be made.
Fall or Spring (2)

**119. Art in the Elementary School**

Discussion of the elements and principles of art and their place in the ar expression and appreciation of the elementary school child. Lectures illustrated with examples of children's work and opportunity given for experience with media use in elementary school problems. Not open to students taking the elementary credential Prerequisite: Art 6A.
Fall or Spring (2)

**122. Social Studies in the Elementary School**

A study of the nature and purpose, scope, organization and instructional procedures in the social studies in the elementary school. Opportunity will be given fo the development of curriculum units and the analysis of teaching materials.
Fall or Spring (2)

**123. Science in Elementary Education**

A laboratory course designed to assist teachers in developing a science program related to the elementary curriculum. Study will be made of the following topics Objectives of elementary science, the relation of science experiences to instructional units in the social sciences, the construction and use of equipment, the effective use of audio-visual aids, the use of environmental resources, and the use of texts an supplementary material. Each student in the course will participate in the preparation, demonstration, and evaluation of typical science experiments.
Fall or Spring (3)

**125. Curriculum in Elementary Education**

A systematic survey of the following elementary subject areas: The languag arts, mathematics, music, science, and the social sciences. Emphasis will be placed upon the selection of content, teaching methods, and materials as they relate to social needs, psychological principles, and the nature of the learner.
Fall or Spring (3)

**126. Literature in Elementary Education**

An introduction to children's literature at all levels of the elementary school. Consideration will be given to the following topics: Criteria for the selection of children's literature, children's reading interests, children's literature and the development of units of instruction in the social studies, the use of the verse choir, dramatic readings and similar procedures, and the use of the library. Each student in the course will have an opportunity to read widely in the field.
Fall or Spring (3)

**129. Arithmetic in Elementary Education**

A course for teachers of arithmetic in the elementary and junior high school. Emphasis is placed upon the understanding of the systems of notation and language techniques. Opportunity will be given for the development of instructional materials and procedures.
Fall or Spring (2)

### 0. Educational Psychology

A study of the science of human behavior as it relates to learning. Emphasis is ven to the principles of learning and the nature of the learner. Some of the areas eated are the growth of meanings, thinking, memory and habit formation, motiva- n, transfer of learning, organic and environmental conditions affecting learning, dustrial differences, and the theory of audio-visual education. Observation and field ork required. Prerequisite: Psychology 1. Not open to students with credit for ychology 130.

Fall or Spring (2)

### 6. Reading in Elementary Education

A systematic study of the reading process. Emphasis will be placed on reading a thinking process. Consideration will be given to topics such as: Scientifically veloped procedures for determining reading readiness, beginning reading, inde- ndence in work recognition, vocabulary development, word analysis, standards of tainment, types of reading programs, and the selection, preparation and use of ading materials. Analysis will be made of individual and group learning problems roughout all levels of the elementary school.

Fall or Spring (3)

### 3. Adult Education

A study of the aims and scope of adult education and its function as a part of e public school system. Individual and group work will be emphasized. Admission permission of the instructor.

Fall or Spring (3)

### 4. Diagnosis and Remedial Treatment of Difficulties in Reading

A study of the causes of reading difficulties and the procedures for diagnosis d remedial treatment. Students will be expected to do practical work with children 10 have reading difficulty. The work is designed primarily for principals, supervisors d teachers-in-service. Prerequisite: Education 102B or Education 102A, or one ar of successful teaching experience.

Fall or Spring (3)

### 5. Organization and Administration of Music Education

Theory of the general principles of music administration; correlation of music th the various subjects in the public schools; music tests; creative work.

Fall or Spring (2)

### 6. Education Practicum (Kindergarten-Primary)

This course is a continuation of Education 148 and will accompany Education 6 in the kindergarten. A study of the theory of early childhood education providing perience with children of nursery school and kindergarten ages. Prerequisite: Educa- n 147, 148.

Fall or Spring (4)

### 7. Education Practicum

This course is required of all students who expect to receive a credential which ll qualify them to teach in the kindergarten or in the elementary school. Students ould take the course during the next semester after admission to Teacher Education, ich is usually the first semester of the junior year. Registration is strictly limited those who have been approved by the Committee on Admission to Teacher Education.

Education Practicum is a unified course which deals with the interpretation and elligent application of theory and practice in elementary education. The child d accumulated knowledge are studied as one affects the other. The psychology of rning is interpreted while the college student is immediately associated with chil- en in the process of learning. For two or three hours each day classes are held in ich the psychology and philosophy of education are studied and analyzed as systems knowledge and concurrently interpreted in reference to the actual teaching partici- tion to which the student is assigned for one hour daily. The course includes thods in Primary Reading (2); Elementary School Methods, including Children's

Literature (2) ; Elementary Music Education (1) ; Elementary Art Education (1) Mental Hygiene and Speech (2) ; Directed Teaching (2).

The course is taught by college teachers who supervise in the Campus Elementary School, and other faculty members (10).

Fall or Spring (10)

### 148. Education Practicum

This course is a continuation of Education 147 and is required of all students who are candidates for the general elementary credential or the kindergarten-primary credential. An extended analysis is made of the psychology of education in various fields and application is made through directed teaching in grades 4 to 6. The course includes Elementary Arithmetic Education (2) ; Elementary Social Studies and Science Education (2) ; Elementary Art Education (1) ; Elementary Music Education (1) ; Educational Psychology (learning process and theory of audio-visual education) (2) Additional 4 units for General Elementary only : Language Arts (2) ; Directed Teaching (2). Prerequisite: Education 147.

Fall or Spring (12)

### 149A. Laboratory in Elementary Education

A general course in observation and theory, including a study of arithmetic, reading, language, music, science, social studies, art, spelling. Students in this course will observe in the summer demonstration school and discuss with the staff the teaching procedures.

Summer only (3)

### 149B. Workshop in Elementary Education

Students in this course will select a problem related to their professional assignment for the coming year and work upon it in the summer session under the guidance of the staff. Students should correspond with the Director of Elementary Education in advance to secure most effective planning of the course. This course may profitably be combined with 149A, the two courses in combination giving 6 units of credit.

Summer only (3)

### 149C. Laboratory in Rural Education

Observation in a one-room multigraded summer demonstration school. Students will observe demonstrations, discuss procedures with the staff, and prepare material for their own schools.

Summer only (6)

### 149D. Workshop in Elementary Education

Participants in the workshop will select classroom problems for study under the guidance of workshop consultants.

Summer only (3)

### 155. Principles of Guidance

A study of the basic principles of guidance and their function in the educational process.

Fall or Spring (3)

### 156. Guidance Conference

A series of lecture and discussion sessions centering on current problems in counseling and guidance. Designed to serve the needs of teachers, administrators, counselors, personnel workers, and others desiring to keep informed of developments in this area. Admission upon permission of the director of this conference.

Summer only (1)

### 161. Legal Aspects of Education

A study of the school law of California, important court decisions, rulings of the California State Superintendent of Public Instruction and the Attorney General, historical and current trends, and comparative data from throughout the United States.

Fall or Spring (3)

### 74. Audio-visual Education

A study of audio-visual aids as they affect learning. Analysis and development of aterials of instruction and their presentation ; operation of equipment.

Fall or Spring (2)

### 4BE. Audio-visual Business Education

A review of the skills and knowledges necessary to use Audio-Visual aids, llowed by intensive study and research in the literature available and by practice ith the materials and techniques that apply to business education.

Summer (3)

### 6. Problems of Speech Correction and Articulation

Analysis and discussion of the major articulatory problems as encountered in iblic school work, particularly in California. Required of all students for the speech rrection credential.

(3)

### 7. The Teaching of Lip Reading

History, theory and methods of lip reading. Aids for the classroom teacher ; pro- am and materials of instruction for the specialized teacher. Opportunities for practice aching are offered.

(2)

### 8. Problems of the Hard of Hearing

The adjustment of the hard of hearing group with emphasis on the public school ild. State and county hearing programs ; technique of audiometry ; use of hearing ds ; educational, classroom, and social problems.

(2)

### 9A-179B. Nervous Speech Disorders

Classification of speech defects and disorders. Nervous speech disorders ; stam- ering, stuttering, hesitation, cluttering. Teacher training in corrective technique for e in public schools ; clinic observation. Required of candidates for the Special Sec- dary Credential in Correction of Speech Defects. Not open to students with credit in eech Arts 179A-179B.

Year course (3-3)

### 1. Exceptional Children

A course designed to meet the needs of teachers of the mentally handicapped, but o open to all teachers interested in studying the problems of exceptional children. A idy will be made of mental, physical, and emotional deviates.

Fall (3)

### 2. Curriculum and Methods for Teaching Mentally Retarded Children

The course deals with the selection, organization and presentation of curricular terials for teaching mentally retarded children.

Spring (3)

### 3. Practicum for Teaching Mentally Retarded Children

Interpretation and application of educational procedures utilized in teaching the arded learner. A demonstration class will be available for observation. Educa- n 182 must be taken prior to, or concurrently with, Education 183.

Summer only (3)

### ). Educational Problems

A course for senior and graduate students in residence and enrolled in teacher ication who have shown ability to work independently on educational problems. The blem will be chosen after consultation with a staff member. Admission by consent the staff. Credit and hours to be arranged.

Fall or Spring (Credit to be arranged)

## Graduate Courses

See page 12 for general requirements for admission to graduate courses. In addition to these general requirements, 12 units of professional education are prerequisite for enrollment in all graduate courses.

### 200. Seminar in Elementary Education

A study of the methodology of research with particular reference to the basic research in the psychology and teaching of the elementary school subjects. Prerequisite: 12 units in elementary education, consent of the instructor, and graduate standing

Fall or Spring (2)

### 201. Curricular Problems in Secondary Education

A study of the present status and development of the secondary school curriculum Emphasis will be placed upon individual study and development of solutions of problems of the students. Prerequisite: Graduate standing and consent of the instructor.

Fall or Spring (3)

### 202. Guidance Problems in Secondary Education

Individual and group study of the theory and practice of guidance with emphasis upon practical problems of the members of the class. Prerequisite: Graduate standing and consent of the instructor.

Fall or Spring (3)

### 203. Research in Curricular Problems

Individual study by graduate students who have demonstrated exceptional ability and a need for such work. Admission by consent of the Director of Secondary Education. Prerequisite: Graduate standing.

Fall or Spring (1 to 3)

### 204. Research in Guidance Problems

Individual study by graduate students who have demonstrated exceptional ability and a need for such work. Admission by consent of the Director of Secondary Education. Prerequisite: Graduate standing.

Fall or Spring (1 to 3)

### 236. Teaching of Reading

Advanced study of developmental instruction in reading. Problems to be considered include reading readiness, the teaching of word recognition, developmental sequences in reading skills and abilities, reading in the content fields, individual differences, measurement, and interests. Students will select projects or problems of immediate interest to them. Prerequisities: Education 136 and 144, or equivalents, and graduate standing.

Fall or Spring (3)

### 255. Workshop in Secondary Education

This course is designed to meet the needs of individual or groups of teachers who wish to develop or continue the study of some problem with the consultation of the College Staff and the San Diego County Curriculum Staff. Teachers should correspond with the Director of Secondary Education, San Diego State College, before registration to secure maximum value from this course. Prerequisite: Graduate standing.

Summer only (4)

### 260. Federal, State, County and City School Organization and Administration

A study of the organization, administration and supervision of federal, state, city and county school systems. Includes school finance, housing, and business administration. Prerequisite: Graduate standing.

(3)

### 262. The Organization and Administration of Elementary Schools

A study will be made of the problems of personnel, local finance, curriculum, plant, community relations, and legal aspects of elementary schools. Required as a prerequisite to Education 266. Prerequisite: Teaching experience and graduate standing.

(3)

### 63. The Organization and Administration of the Secondary School

A course designed for persons preparing for secondary school administration. opics will cover all aspects of the duties of an administrator, including: personnel; nance; curriculum; equipment and supplies; public relations; transportation and w. Prerequisite: Possession of a valid General Secondary Credential and graduate anding.

(3)

### 64. Elementary School Supervision

Principles and practices of supervision and methods of evaluating instruction id the curriculum in elementary education. Prerequisite: General elementary credenal and teaching experience.

(3)

### 65. Secondary School Supervision

A course designed for those who will be responsible for the supervision and evaluion of the curriculum and teaching methods in the secondary school. Prerequisite: ossession of a valid General Secondary Credential and graduate standing.

(3)

### 66. Field Work in Elementary School Administration and Supervision

A first-hand study of the administration and supervision of an elementary school, required for the Elementary School Administration and Supervision Credentials. ield work will be carried on by all students under the direction of a college staff memr. Prerequisites: Education 262 or 264 and graduate standing.

Fall (2)

### 67. Field Work in Secondary School Administration and Supervision

A study of practices as they are found in secondary schools relative to adminisation and supervision; to insure direct contact with existing programs and proceures. Prerequisite: Education 263 or 265 and graduate standing.

(3)

### 6. Directed Teaching

Systematic observation, participation, and teaching under supervision in an affilied high school. Thirty clock hours of student teaching will usually earn one unit of edit, but the credit finally allowed will depend upon the nature and quality of the aching done. Any work below a C grade is unacceptable for credit in this course.

No student can enroll in this course until he has completed at least 5 units of work education.

During the semester in which the student takes his first assignment in student ching, he must meet with the college supervisor one hour each week for conference d discussion of problems encountered in his teaching.

Students who have had student teaching in preparation for the junior high school special secondary credentials should confer with their departmental and educational visers concerning partial fulfillment of this requirement as the result of having cometed the student teaching required for the credentials mentioned above.

Year course (3-3)

# ENGINEERING

## IN THE DIVISION OF PHYSICAL SCIENCES

*Majors* and *minors* are not offered in engineering. Students desiring major wor in this field should elect the *general major* with a concentration in engineering. Fo specific information, refer to the outline of the curriculum in general engineerin page 55, and page 20 for further information regarding the general major.

### Lower Division Courses

**1A-1B. Plane Surveying**

Use and adjustment of surveying instruments, computations and map-makin together with a study of land, topographic, city and mine surveying. Two instructio periods and one three-hour period for field work and mapping each week. Prerequisites Trigonometry and Mechanical Drawing, or equivalent, and sophomore standing.
Year course (3-3)

**2. Mechanical Drawing**

Freehand lettering, use and care of drafting equipment, simple orthographi projection, introduction to problems of dimensioning. Open to students lacking credi for a year course in senior high school mechanical drawing.
Fall or Spring (2)

**S3. Summer Class in Surveying**

Practical field problems in reconnaissance, triangulation, location and top graphic surveys. Observations for meridian, time and latitude. Precise work in linea and angular measurements. Development of self-reliance, accuracy, and professiona skill on the part of the student. Four weeks course held in the mountains near Sa Diego. For details regarding location of camp, date of registration, date of openin and other arrangements, a special announcement of the surveying camp may b secured at the Registrar's Office. Offered if demand is sufficient. Prerequisite: Surveying 1A-1B.
Summer (3)

**21. Descriptive Geometry**

Fundamental principles of descriptive geometry and their application to problems of engineering. Lectures and drafting. Prerequisites: One year of mechanica drawing, and sophomore standing.
Fall (3)

**22. Machine Drawing**

Design and drawing of simple machine parts with emphasis upon the production of standard drawings. Lectures and drafting. Prerequisite: Engineering 21 Mathematics 3A-3B.
Spring (3)

**23. Materials of Construction**

Manufacturing processes, structural properties and adaptability of the principa materials used in engineering. Lectures. Prerequisite: Sophomore standing.
Spring (2)

### Upper Division Courses

**100A-100B. Elements of Electrical Engineering**

Theory and characteristics of electrical equipment with emphasis on industria applications.

**100A. Direct current circuits, generators and motors.** Introduction to alternating current circuits.

**100B. Alternating current circuits, transformers, alternators, induction an synchronous motors, conversion apparatus and transmission lines**

Lectures and problems. Prerequisites: Mathematics 4A, Physics 1C or permissio of the instructor.
Year course (3-3)

### 1A. Electrical Engineering Laboratory

Laboratory determination of the characteristics of direct current machinery and rcuits, single phase alternating current circuits. One three-hour lab. and report per eek. Prerequisite: Engr. 100A (may be taken concurrently).
Fall (2)

### 1B. Electrical Engineering Laboratory

Laboratory determination of the characteristics of single phase and polyphase rcuits, machines, and related equipment. One three-hour laboratory period and report r week. Prerequisite: Engr. 100B (may be taken concurrently).
Spring (2)

### 2A-102B. Analytical Mechanics

Treatment of the fundamental principles of Newtonian mechanics. First semes- r: Study of the statics and kinematics of particles and rigid bodies. Second semester: udy of the dynamical principles underlying linear and rotary motion of rigid bodies, th additional work in elastic and inelastic impact. Use of elementary vector analysis solving engineering applications in mechanics. Prerequisites: Physics 1A-1B or -2B, and a working knowledge of the calculus. (Engineering 102A is a prerequisite r 102B.) Students with credit in Physics 105A-105B may not receive credit in this urse.
Year course (3-3)

### 4. Communications

An intensive study of the elements and systems used in radio and wire com- inication including: Circuit elements and resonant circuits, oscillators, modulators, tectors, wave radiation and propagation. Students with credit for Physics 104 may t receive credit for this course. Prerequisite: Physics 102.
Spring (2)

### 5. Hydraulics

A general course in hydraulics including the fundamental principles of hydro- atics and hydrodynamics applied to the flow of water through orifices, over weirs, rough pipes and canals. Lectures and problems. Prerequisites: Mathematics 4A, ysics 1C. Recommended: Physics 105A-105B.
Spring (3)

### 6. Hydraulics Laboratory

Laboratory determination of the characteristics of fluid flow and hydraulic equip- nt. Includes flow through pipes, orifices, weirs; characteristics of various types of mps. One three-hour lab. period and report per week. Prerequisite: Engr. 105 (may taken concurrently).
Spring (2)

### 2. Machine Design

A study of motions, velocities, and accelerations in linkages, cams, gears, and ated mechanisms. Designs of riveted and welded joints. Design of simple machine rts such as clutches, gears, and couplings. Two lectures, one three-hour drafting riod per week. Prerequisite: Physics 105A (may be taken concurrently), Engi- ering 22.
Fall (3)

### 4. Radio Measurements

A laboratory course on measurements of the parameters of resonant circuits at lio frequencies. Study of the properties of oscillators, modulators, detectors and ve guides. Prerequisite: Previous or concurrent enrollment in Engineering 104. idents with credit in Physics 124 may not receive credit for this course.
Spring (2)

### 3. Applied Engineering Thermodynamics

Principles of thermodynamics. Application of principles in study of combustion ocess, boiler, steam engines, turbines, auxiliary apparatus. Prerequisites: Math , Physics 1B.
Fall (3)

**129. Heat Power Laboratory**

Boiler testing and heat balance. Flue gas analysis, testing of steam powe equipment. One three-hour lab. and report per week. Prerequisite: Engr. 128 (ma be taken concurrently).
Fall (2)

**130. Route and Construction Surveying**

Application of surveying to engineering problems. Reconnaissance, preliminar location, and maintenance surveys for highways, railroads, and airfields. Constructio surveys for buildings and other structures. Earthwork computations. Two lecture and one three-hour field period per week. Prerequisites: Engr. 1B, Ast. 3.
Fall (3)

**131. Advanced Surveying**

Special problem in surveying. Methods of geodetic surveying; adjustment c observations, geodetic positions, map projections. Two lectures and one three-hou field period per week. Prerequisites: Engr. 1B, Ast. 3, recommended Engr. 130.
Fall (3)

**140. Strength of Materials**

Elastic and ultimate strengths of materials. Analyses of types of failure. Stres analysis and deformation of simple structural and machine members. Photoelasticit Lectures and problems. Prerequisite: Physics 105A.
Spring (3)

**141. Materials of Engineering Laboratory**

Theory and operation of testing machines and auxiliary apparatus. Standar tests to determine the significant characteristics of the commonly used engineerin materials. Heat treatment of metals. One laboratory period plus outside reading an report per week. Prerequisite: Engr. 140 (may be taken concurrently).
Spring (2)

**142. Stress Analysis**

Determination of stresses in simple framed structures such as roof trusses an highway bridges. Aircraft structures. Effects of combined stresses. Statically indeter minate beams. Special problems. Analytical and graphical methods of solution. Lecture and problems. Prerequisites: Physics 105A-B, Engr. 140.
Fall (3)

**145. Internal Combustion Engines**

Application of theory of thermodynamics to internal combustion engines. Essen tial features of design, operating characteristics, and application of gasoline, diesel, an gas engines, and the gas turbine. Lectures and problems. Prerequisites: Physics 1B Math. 4A. Recommended: Engr. 128.
Spring (3)

**150. Industrial Electronics**

The application of electron tubes in fields other than communications; considera tion of high power rectification, induction and dielectric heating, measurement an control systems. Prerequisite: Physics 102.
Fall (2)

**156. Aerodynamics**

Properties of air, air flow, air foils, drag, engines and propellers, aircraft perform ance and stability, types of aircraft, aircraft instruments. Lectures and problems. Pre requisites: Physics 105A-105B.
Spring (3)

**199. Senior Report**

Investigation of specific problems of advanced nature. Preparation of report. Pre requisite: Advanced senior standing.
Spring (2)

NOTE.—In laboratory courses special emphasis is placed upon the preparation o neat, concise, complete and intelligent reports.

# ENGLISH

## IN THE DIVISION OF LANGUAGES AND LITERATURE

### Major

A *liberal arts major* is offered in English. Lower division requirements: at least 5 units of work, including English 1, 6A-6B, and 56A-56B or 60A-60B. Upper division equirements: a minimum of 24 upper division units in English and comparative literture, selected with the approval of the departmental representative; 2 years of lower ivision work in a foreign language approved by the departmental representative or he equivalent reading knowledge determined by examination. Further work in the anguage, in upper division courses, is highly recommended.

A *teaching major* is offered in English for the general secondary credential or the eneral junior high school credential. For specific information, refer to the outlines of equirements for these credentials. English majors who have been admitted to candiacy for the general secondary credential may satisfy the foreign language requireient by one year of lower division foreign language, or equivalent, if 9 units of proessional education units have been completed.

### Minor

A *liberal arts minor* is offered in English. The minor must include at least 15 units f work in English, 9 units of which must be from courses carrying upper division redit.

A *teaching minor* is offered in English for the general secondary, the general unior high school, the special secondary, the general elementary, and the kindergartenrimary credential. For specific information, refer to the outlines of requirements for iese credentials.

### Comparative Literature

For courses in world literature, giving credit toward the English major or minor r toward the Comparative Literature minor, see Comparative Literature, page 95.

### Lower Division Courses

**English Fundamentals**

The elements of composition, including drill in grammar and usage; exercises in ocabulary building and in fundamental reading skills; theme writing. Credit in this ourse is equivalent to passing the English A examination and may be counted toward raduation as an elective but not to satisfy lower division English requirements in any urriculum.

Fall or Spring (2)

**Reading Clinic**

A semi-tutorial service offered by the English Department to those wishing to nprove reading ability. Open to all students at any level of college work. Consult epartment chairman.

Fall or Spring (0)

Fall (3)

## Graduate Courses

### 1. Shakespeare

Bibliography, critical study, special problems, criticism. Prerequisite: Graduate nding. Recommended: At least one undergraduate course in Shakespeare.

Spring (2) (Offered in 1949-1950 and alternate years)

### 2. Mark Twain

Studies in the numerous aspects of Mark Twain's work and in his significance a product of the Frontier and as a representative American voice. Prerequisite: aduate standing.

Fall (2)

### 1. Regionalism in American Literature

Bibliography, special problems, with concentration on selected regions. Pre- quisite: Graduate standing. Recommended: At least one undergraduate course in erican literature.

Fall (2) (Offered in 1949-1950 and alternate years)

### 2. Utopias

A study of Utopian thought from a literary rather than a sociological viewpoint. mparative study of the forms of the projected ideal and of the satirical dream from to through Sir Thomas More, Shakespeare, Swift, Shelley, Morris, Wells, A. xley, and others. Prerequisite: Graduate standing.

Spring (2)

# FRENCH

## IN THE DIVISION OF LANGUAGES AND LITERATURE

### Major

A *liberal arts major* is offered in French. Lower division requirements: Frenc A-B-C-D; German A-B or Spanish A-B; History 4A-4B. Upper division requirements: A minimum of 24 upper division units, at least 21 units of which must be i French, including French 199. The remaining 3 units may be selected from Geograph 118; History 143, 121; or Comparative Literature 118, 155, or 158, in consultatio with the Chairman of the Department. An average of C grade or better is require in upper division major courses.

A *teaching major* is offered in French for the general junior high school credential. For specific information, refer to requirements for this credential.

### Minor

A *liberal arts minor* is offered in French. The minor must include at least 1 units of work in French, 9 units of which must be from courses carrying upper divisio credit.

A *teaching minor* is offered in French for the general secondary, the genera junior high school, the special secondary, the general elementary, and the kindergarten primary credential. For specific information, refer to the outlines of requirements fo these credentials.

### Lower Division Courses

**A-B. Elementary**

Intensive study of French grammar and syntax; daily written work discusse in class; class drill in conversational idiom and pronunciation; reading with ora discussion and résumés; dictation; introduction to contemporary prose writers Credit not given for French A unless followed by French B. Students who have ha one year of French in high school should register for French A for which only 2 unit will be allowed. Those who have had two years of French in high school shoul register for French B for which only four units will be allowed. For specific information, refer to page 17. French A, or its equivalent, is a prerequisite for French B.

Year course (5-5)

**C-D. Intermediate Reading**

Reading and composition; study of standard prose as a basis for class work collateral reading with résumés and written reports; dictation. Prerequisite for C French B or three years of high school French. Prerequisite for D: French C or fou years of high school French.

Year course (3-3)

**SC. Scientific Reading**

Reading taken from the fields of chemistry, physics, medicine, zoology, biology etc. Outside readings of books and periodicals, with written reports. Prerequisite French B or equivalent.

Fall (2)

### Upper Division Courses

**101A-101B. Conversation and Composition**

Translation into French from moderately difficult English prose. Outside readin of modern French prose, with written reports in French monthly. Readings and ora discussions in French of various facets of French life and culture.

Prerequisite: French D, or its equivalent, with grade of C.

Year course (3-3)

**105A-105B. Modern French Drama**

Plays of Victor Hugo, de Vigny, de Musset, Scribe, Augier, Dumas fils, Pailleron Brieux, Hervieu, Maeterlinck, Rostand, and others read and discussed as to subjec matter and technique. Outside reading and reports. Prerequisite: French D, or it equivalent, with grade of C.

Year course (3-3) (Offered in 1949-50)

**7A-107B. Eighteenth Century Literature**

The works of Montesquieu, Voltaire, Rousseau, the Encyclopédistes, and others. erequisite: French D, or its equivalent, with a grade of C.
Year course (3-3)

**0A-110B. Modern French Novel**

The French novel from Victor Hugo to the present day, including such authors : Hugo, Dumas, Stendhal, Balzac, Flaubert, Loti, Anatole France, Bourget, Bor- ux, Bazin, Barrès, Romain Rolland, A. Gide, Marcel Proust, and others. Class ding, outside reading, and reports. Prerequisite: French D, or its equivalent, with de of C.
Year course (3-3) (Offered in 1951-52)

**1A-111B. Seventeenth Century Dramatic Literature**

Reading in class of plays of Molière, Corneille, and Racine. Outside readings l lectures on the background of the seventeenth century in France. Prerequisite: ench D or its equivalent, with a grade of C.
Year course (3-3) (Offered in 1950-51)

**0. Comprehensive Reading and Survey Course**

Designed to fill up the gaps in the reading done in courses. Class meeting once veek for guidance, reports, and quizzes. Required of all seniors majoring in French.
Spring (3)

# GENERAL LANGUAGE

## IN THE DIVISION OF LANGUAGES AND LITERATURE

*Major* and *minor* work are not offered in general language.

### Lower Division Course

**Latin and Greek Word Derivation**

A general and elementary course in philology. A study of Latin and Greek roots most frequent occurrence in English, and of the English words derived from them.
Fall (3)

**Language for Music and Speech Students**

Study of the pronunciation of French, German, and Italian for the use of gers, radio announcers, etc. No prerequisite. This course may be taken for one, o or three units of credit depending on the individual student's need. Credit in this rse does not count toward the 10 unit foreign language requirement.
Spring (1-3)

# GEOGRAPHY

## IN THE DIVISION OF SOCIAL SCIENCES

### Major

A *liberal arts major* is offered in geography. Lower division requirement Geography 1, 2, 3; Geology 1A--1B. Recommended: A reading knowledge of Frenc or German. Upper division requirements: a minimum of 24 upper division units i geography, or 18 units in geography and 6 units selected from related fields wit approval of the departmental representative.

A *teaching major* is not offered in geography; however, courses in geograph may be used as part of the *social science major* for the general junior high scho credential or the general secondary credential. For specific information, refer to th outlines for requirements for these credentials.

### Minor

A *liberal arts minor* is offered in geography. The minor must include at leas 15 units of work in geography, 9 units of which must be from courses carrying uppe division credit.

A *teaching minor* is not offered in geography for the general secondary credential however, it may be used as a part of the *social science minor* for the general junio high school, the special secondary, the general elementary, and the kindergarten-pr mary credentials. For specific information, refer to requirements for these credential

NOTE: Geography 1, 3, or 4 may not be used to meet any part of the 12-uni social science requirement. Geography 1 or 3 (but not both) may be used to meet par of the 12-unit natural science requirement.

### Lower Division Courses

**1. Introduction to Geography: Physical Elements**

The nature of maps, weather and climates of the world; natural vegetation land forms and their associated soils, with reference to their climatic relationships the seas and their coasts. One all-day field trip. This course is classified as a natura science. (See lower division requirements.)

Fall or Spring (3)

**2. Introduction to Geography: Natural and Cultural Regions**

The regional differentiation of the world by human activity; areal bases o economy and nationality. Prerequisite: Geography 1.

Fall and Spring (3)

**3. Elementary Meteorology**

An elementary study of the earth's atmosphere and changes in it which produc our weather and influence human affairs. Special attention given to local condition instruments, and records. Aeronautical meteorology stressed in the fall semeste This course is classified as a natural science. (See lower division requirements.)

Fall or Spring (3)

**4. Map Reading and Map Interpretation**

Representation of geographic data by means of maps. Interpretation of projec tions, scales, symbols, land forms, and culture from topographic maps; measurement of cultural data on maps. This course may not be counted toward lower division socia science requirement.

Fall (2)

**10. Economic Geography**

Beginning course in economic geography designed for commerce and economi majors. Prerequisite: Geography 1.

Fall or Spring (3)

## Upper Division Courses

### 2. Geography of California

The physiographic regions of California and the cultural landscapes developed the successive cultural groups. Prerequisite: Geography 1 or consent of instructor.

Spring (3)

### 3. Climatology

A survey of the principal classifications of climates of the world; regional aracteristics of climate; relations to soils, vegetation, and human activities. Prequisite: Geography 1 or consent of instructor.

Fall (3)

### 6. Geography of Latin America

The natural regions of Latin America; their occupational condition and historical olution. Prerequisite: Geography 1 or consent of instructor.

Fall (3)

### 7. Geography of Northern and Eastern Europe

A study of the cultural development of the countries of northern and eastern rope in relation to physical background and historical evolution. Prerequisite: eography 1 or consent of instructor.

Fall (3)

### 8. Geography of the Mediterranean Area

A study of the cultural development of the countries of Southern Europe, Western sia, and North Africa in relation to physical background and resources. Prerequisite: eography 1 or consent of instructor.

Spring (3)

### 1. Geography of North America

The natural regions of North America, their formation and economic and storical development. Prerequisite: Geography 1 or consent of instructor.

Spring (3)

### 14. Geography of Asia

The cultural regions of Asia, their physical environment, and historical development. Prerequisite: Geography 1 or consent of instructor.

Fall (3)

### 15. Geography of the San Diego Area

Directed individual urban and rural field work in the San Diego area; the pping of a small area and making its geographic interpretations. Prerequisites: ography 1 and 2 or consent of instructor.

Spring (3)

### 11. Advanced Economic Geography

A survey of the raw materials of world trade; their production and distribution related to major geographic regions of the world. Prerequisite: Geography 1 or sent of instructor.

Fall (3)

### 13. Political Geography

A survey of the geographic bases of national power; geographic aspects of intertional problems; theories of leading political geographers. Prerequisite: Geography r consent of instructor.

Spring (3)

### 1. Honors Course

To be arranged after consultation with the chairman of the department. (See ge 15)

Fall or Spring (Credit to be arranged)

# GEOLOGY

## IN THE DIVISION OF PHYSICAL SCIENCES

### Major

A *liberal arts major* is not offered in geology. Students preparing for later professional training in geology should plan on completing Chemistry 1A-1B; Physic 1A-1B-1C-1D; Mathematics 3A-3B; Engineering 1A-1B, 21A; and Geology 1A-1B 21A-21B.

A *teaching major* is not offered in geology; however, courses in this field may b used as part of the *general science major* for the general junior high school credential For specific information, refer to the outline of requirements for this credential.

### Minor

A *liberal arts minor* is offered in geology. The minor must include at least 1 units of work in geology, 9 units of which must be from courses carrying upper divisio credit.

A *teaching minor* is not offered in geology; however, courses in this field may b used as part of the *general science minor* for the general junior high school, the specia secondary, the general elementary, and the kindergarten-primary credentials. Fo specific information, refer to the outlines of requirements for these credentials.

### Lower Division Courses

**1A. Physical**

The composition, origin, and distribution of earth materials, and their modification through mechanical and chemical process of change. Three lectures and on three-hour laboratory period weekly with related field study during the semester. (No open to students who have had Geology 2A except for one unit upon the completion o the laboratory section.)

Fall (4)

**1B. Historical**

Theories of earth origin, and the evolutionary history of the earth as trace through rock and fossil records. Consideration of the Paleontologic Sequence. Thre lectures and one three-hour laboratory period weekly, with arrangement for field stud and conference during the semester. Prerequisite: Geology 1A or equivalent.

Spring (4)

**2A. General**

Similar to Geology 1A but without laboratory. Emphasis upon origin an development of earth's surface features. Open to all students except those alread presenting credit in Geology 1A. Two lectures and one demonstration and discussio hour weekly.

Fall (3)

**2B. Physiography of United States**

A study of the land forms of the United States and their physiographic history a illustrative of universal geologic conditions. Two lectures and one discussion hou weekly. Prerequisite: Geology 1A or 2A.

Spring (3)

**21A-21B. Mineralogy**

Study of the common minerals and rocks. Use of the blowpipe, simple chemica reagents, and the petrographic microscope, but with emphasis upon sight determination Prerequisite: Geology 1A and high school chemistry, or equivalents.

Year course (3-3)

### Upper Division Courses

**100. Structural Geology**

The evolution and description of the structural and topographical features of the earth. Faulting, folding, and orogenic forces with practical illustrations from the North American Continent and California geologic conditions. Lectures, discussions, and occasional field trips. Prerequisite: Geology 1A-1B or 2A-2B.

Fall (3)

### 01. Museum Work

Selection and preparation of materials for the college museum collections. mphasis upon creation of self instructive displays for use on the elementary and condary as well as the collegiate level. Prerequisite: Geology 1A-1B, and consent of e instructor.

Fall or Spring (1 to 2)

### 2. Geology of California

Directed reading and group discussion of California geologic literature. Designed acquaint the student not only with the important structural and geomorphic units the State but with the variety of important source materials of geologic literature well. Use of bibliographies, state and federal surveys, research publications, etc. rerequisite: Geology 1A-1B, and consent of the instructor.

Spring (2)

### 8. Field Geology

Field instruction in geologic methods. Reconnaissance of adjacent unmapped eas with preparation of a geologic map and accompanying report. Work accom- ished primarily on week-ends with minimum classroom activity during the week r organizational details. Prerequisite: Geology 1A-1B, and consent of the instructor.

Fall or Spring (1 to 4)

### 9. Special Study

Individual work in field, library, laboratory, or museum under staff supervision. pen only to qualified students upon consultation.

Fall or Spring (1 or 2)

# GERMAN

## IN THE DIVISION OF LANGUAGES AND LITERATURE

*Major* and *minor* work are not offered in German; however, students desiring to carry advanced work in German should consult with the Chairman of the Department of Foreign Languages.

### Lower Division Courses

**A-B. Elementary**

Pronunciation, reading and grammar, with practice in simple conversation, narration and description, both oral and written. Credit not given for German A unless followed by German B. Students who have had one year of German in high school should register for German A for which only two units will be allowed. Those who have had two years of German in high school should register for German B for which only four units will be allowed. For specific information, refer to page 17. German A, or its equivalent, is a prerequisite for German B.

Year course (5-5)

**C-D. Intermediate Review and Reading**

Reading and composition; study of standard prose as basis for class work; collateral reading with written reports; German conversation, with the texts read as a basis; dictation. Prerequisite: German B or three years of high school German, or its equivalent. Students with credit for four years high school German, or its equivalent, should enter German D.

Year course (3-3)

**SC-SD. Scientific Reading**

First semester, readings in scientific reader on chemistry, physics, etc.; occasional written reports on scientific subjects read outside of class; sight reading. Second semester, readings in special scientific or technical works; weekly written reports required; sight reading. Prerequisite for SC: German B with a grade of C or three years of high school German; for SD: German SC, German C, with a grade of C, or four years of high school German.

Year course (3-3) (Offered 1949-50)

### Upper Division

**101A-101B. Advanced Conversation and Composition**

Translation into German of moderately difficult English prose. Free composition in German, written and oral. Outside reading of modern German plays and prose, dealing with various aspects of German life and culture, with written reports and oral discussions in German. Oral and written practice in conversational German. Prerequisite: German D, or equivalent, with grade of C.

Year course (3-3)

# HEALTH EDUCATION

## IN THE DIVISION OF HEALTH, PHYSICAL EDUCATION, AND RECREATION

*Major* work is not offered in health education.

### Minor

A *liberal arts minor* is offered in health education. The minor must include at least 15 units of work, 9 units of which must be from courses carrying upper division credit. The minor must include the following courses: Physical Education 51, Home Arts 61A, Health Education 65, 152, 153, and 199.

A *teaching minor* is offered in health education for the general secondary, the general junior high school, and the special secondary credentials. Physical education majors may use health education as a second teaching minor only. For specific information, refer to the outlines of requirements for these credentials.

### Lower Division Courses

**21. Principles of Healthful Living**

A course concerned with the personal health problems of college students; designed to provide scientific health information; promote wholesome attitudes and practices relating to healthful living. Required of all freshmen.

Fall or Spring (2)

**65. Community Health**

A study of community health problems; the role of the citizen, the public and private (or voluntary) agencies in promoting and protecting the health of the community. Prerequisite: Health Education 21. Required of physical education major students.

Fall (3)

**90. Physiology of Reproduction**

A course consisting of a series of lectures and discussions dealing with normal and abnormal physiology and anatomy of reproduction; facts and frauds in sex hygiene, and related topics. Prerequisite: Health Education 21.

Fall or Spring (1)

### Upper Division Courses

**151. Health Education for Teachers**

A course for teacher education students designed to develop a teacher awareness of pupil health needs. The elements of the health education program are considered, emphasizing the responsibility of the teacher in health guidance; observation of school children; techniques and procedures for screening defects; promoting health instruction; and providing a safe, sanitary, healthful school environment. A study of the community agencies promoting the health and welfare of the school child.

Fall or Spring (2)

**152. Health Education Programs**

The construction of the health education program including objectives, scope and sequence of instruction, teaching methods, source materials and evaluation procedures; with practice in building functional instructional units. Prerequisite: Health Education 151.

Fall (3)

**153. Administration of School Health Program**

The principles, policies and practices in organizing and conducting the school health program as an integral part of the total school and community program. A study of the administrative aspects of the divisions of the school health program; health nstruction, health service (including health guidance), healthful school living, and elationship to physical education and recreation. Partially fulfills Health and Development Credential requirement for nurses.

Spring (3)

### 199. Special Study in Health

An opportunity is presented for extensive review of pertinent literature, individual research, and advanced study of problems in the profession. Credit will range from 1 to 3 units according to the type and amount of work. Prerequisite: Approval of the Chairman of the Division.

Fall or Spring (1 to 3)

## Graduate Courses

### 202. Problems in Health Education

A survey of current problems facing the Health Education profession is studied through a review of the literature, discussion of trends, observation of school situations together with the analysis and evaluation of actual problems. Written reports are required. Prerequisite: Graduate standing.

Fall or Spring (2)

# HISTORY

## IN THE DIVISION OF SOCIAL SCIENCES

### Major

A *liberal arts major* is offered in history. Lower division preparation for the major: History 4A-4B, or 8A-8B, or 9A-9B, and either Political Science 1A-1B, or 71A-71B, or Economics 1A-1B. Two of the above history courses are recommended for students planning to major in history, and it is suggested that History 4A-4B be included as one of the courses. Upper division requirements: a minimum of 24 upper division units in history, including History 199, and a minimum of a year of concentration in each of three of the following fields: (a) Ancient and Medieval; (b) Modern Europe; (c) United States; (d) Latin America; (e) Pacific Area and the Far East. These courses must be selected under the guidance of the chairman of the department. A reading knowledge of one foreign language is strongly recommended.

A *teaching major* is offered in history for the general secondary credential. History may also be used as part of the *social science major* for the general junior high school credential or the general secondary credential. For specific information, refer to the outlines of requirements for these credentials.

### Minor

A *liberal arts minor* is offered in history. The minor includes from 15 to 18 units of work in history, 9 units of which must be from courses carrying upper division credit ncluding a year course.

A *teaching minor* is offered in history for the general secondary credential or as part of the *social science minor* for the general junior high school, the special secondary, he general elementary, and the kindergarten-primary credentials. For specific infornation, refer to the outlines of requirements for these credentials.

NOTE: History 17A-17B does not count toward credit for a major or minor in istory.

Any history course, with the exception of History 270A-270B, may be taken either emester, the A part without the B part, or vice versa.

### Lower Division Courses

**A-4B. History of Modern Europe**

A survey of European society, institutions and politics from about 1500 to the resent. Fall semester: 1500-1799. Spring semester: 1799 to the present.

Year course (3-3)

**A-8B. History of the Americas**

Survey of the history of the western hemisphere from its discovery to the present ime.

Year course (3-3)

**A-9B. History of the Pacific Ocean Area**

A general survey of the history and civilization of the peoples of the Pacific, with pecial emphasis upon exploration, trade, international rivalries, and social evolution f the island areas.

Year course (3-3)

**7A-17B. History of American Civilization**

Survey of the political and social development of the United States, with emphasis pon the rise of American civilization and ideals.

NOTE: This course is not open to freshmen.

Year course (3-3)

### Upper Division Courses

**11A-111B. Ancient History**

Fall semester: Greek history to the Roman conquest. Spring semester: Roman istory to the fourth century A.D.

Year course (3-3)

**21A-121B. Medieval History**

Survey of the main events of European social, cultural, religious, political and conomic history, between 500 and 1300 A.D.

Year course (3-3)

**131A-131B. Renaissance, Reformation and Counter-reformation**

A history of personalities and events connected with the social, political, cultural economic and religious change between 1300 and 1600.

Year course (3-3)

**141. Europe in the Seventeenth and Eighteenth Centuries**

European thought, politics and international relations from the Thirty Years War and Louis XIV to the Seven Years' War.

Fall (3)

**142. The French Revolution and Napoleonic Era**

Study of conditions in France prior to 1789, the Revolution, 1789-1799, the organization of France and Europe under Napoleon, character of his empire, and the reorganization of Europe at the Congress of Vienna.

Spring (3)

**143A-143B. Europe in the Nineteenth Century**

Reaction in Europe, the development of nationalism, the impact of industrialism and the background of World War I. Covers period 1815-1914.

Year course (3-3)

**144A-144B. Europe and the World Wars**

Developments in Europe from 1914 to the present. Fall semester: 1914-1939 Spring semester: 1939 to present.

Year course (3-3)

**151A-151B. History of England**

A survey of political and constitutional development in England since 1066; the transition from medieval England to modern; Tudor despotism; struggle for self government under the Stuarts; rise and development of present-day political and socia institutions. This course is designed for pre-legal students, majors in English, and as background for American history.

Year course (3-3)

**156A-156B. History of British Expansion**

A study of the growth, development, and break-up of the older overseas empire the beginnings of the newer empire after 1783; the rise, federation, and imperial relations of the British Commonwealth of Nations; the crown colony system; India under British rule; British expansion in Africa and the Pacific; development of the British mandates. History 156B is not open to students with credit for Political Science 160.

Year course (3-3)

**161. Mexico and Caribbean Countries**

Special attention to relations between the United States and these countries, and to recent developments in Mexico.

Fall (3)

**162. South America Since Independence**

Republics of South America. Development of nationality, struggles for political stability, exploitation, diplomatic and commercial relations with the United States, and other international problems of South America. Survey of present-day conditions.

Spring (3)

**171A-171B. The Rise of the American Nation**

Semester I: Lectures and readings on English colonization in North America, the development of colonial institutions and political customs, and areas of international conflict during the eighteenth century. Semester II: The revolutionary movement and the establishment of the government under the Constitution of 1787 to the close of the War of 1812.

Year course (3-3)

**172A-172B. Constitutional History of the United States**

Colonial governments, formation of the national Constitution, historical development of constitutional government, and significant phases of American constitutional law. Not open to students with credit for Political Science 139A and 139B.

Year course (3-3)

### 173A-173B. The Expansion of the United States

Lectures and readings on Jacksonian democracy, territorial expansion and the Mexican War, the slavery controversy, Civil War and Reconstruction, and attention to the growth and progress of the United States to the close of the nineteenth century.
Year course (3-3)

### 175. The United States in the Twentieth Century

The rise of the United States to the position of a world power; social and economic problems posed by the machine age; political action and adjustment, actual and proposed, intended as solutions for these problems.
Spring (3)

### 176A-176B. History of American Foreign Policy

Lectures and readings in the field of American foreign relations since 1776, with special emphasis, in the second semester, upon affairs since 1900. A general survey course. Not open to students with credit for Political Science 158A-158B.
Year course (3-3)

### 179A-179B. Intellectual History of the American People

A study of the ebb and flow of ideas in the United States since the founding of the English colonies, with special attention devoted to social and political thought.
Year course (3-3)

### 181A-181B. History of the West

The American frontier: Expansion, exploration, settlement and building of the new states, with emphasis upon frontier problems of defense, communications, finance, etc.; the development of cultural institutions. A critical examination of the causes, effects and results of the frontier experiences of the American people. Second semester deals chiefly with the Far West and its political influence upon the American people. Frontier influences on American ideals and politics.
Year course (3-3)

### 191A-191B. History of the Far East

Particular emphasis during the first semester upon the history, both internal and international, of the Far East through the nineteenth century. The second semester will be devoted to a consideration of developments in the twentieth century.
Year course (3-3)

### 192. Modern Russia

A general survey of Russian history, with emphasis upon the period since Peter the Great; the relations between the Russian Empire and its national minorities; Tsarist experiments in political and social reform; the rise and spread of revolutionary socialism; the collapse of the Russian Empire; the development of the U. S. S. R.
Spring (3)

### 193. History of China

A survey of Chinese history and institutions from antiquity to the present.
Fall (3)

### 194. History of Japan

A general survey of the political, economic and social development from the foundation of the empire to contemporary times. Special attention will be given to religions, phliosophy, literature and the arts.
Fall (3)

### 199. Special Course for Advanced Students

Required of all students with a history major in liberal arts and those working toward a General Secondary credential with a history major. To be attended during the senior year.
Spring (2)

## Graduate Course

### 270A-270B. Seminar

Required of all candidates for a General Secondary credential with history as he major. Special emphasis upon the application of research in American history to eaching in junior high school, high school, and junior college. History 270A is a preequisite to 270B. Prerequisite: Graduate standing.
Year course (2-2)

# HOME ARTS

## IN THE DIVISION OF SOCIAL SCIENCES

*Majors* and *minors* are not offered in home arts. Students desiring major wor in home arts at this college should plan for a *general major* with the field of conce tration in home arts. For specific information on the home arts curriculum, refer page 59 and for further information on the general major, refer to page 20.

NOTE: Courses in home arts may not be used to meet any part of the 12-un social science requirement, nor may they be used as part of a social science major minor.

### Lower Division Courses

**1. General Home Arts**

Consideration of necessary preparation for marriage, family budgets and mon management; recreation, entertaining and social usage; finding a home, its furnishin and equipment with consideration of arrangement and care; child care, proper traini and guidance. Open to men and women.

Fall or Spring (3)

**5. Food Preparation**

Principles of food selection, preparation and service with consideration aesthetic and nutritional values. Experience in food preparation and meal servic One lecture and two three-hour laboratories per week.

Fall (3)

**10. Fundamentals of Clothing**

Selection of clothing with self-analysis as a basis; wardrobe planning and buyi procedures. A study of commercial patterns and principles of garment constructio Two three-hour laboratories per week.

Fall (2)

**61A. Nutrition**

Practical problems of nutrition including food requirements, food selection, a food habits. For men and women. One two-hour lecture per week.

Spring (2)

**61B. Nutrition Laboratory**

Nutrition principles applied to food preparation, meal preparation, and speci diets. One three-hour laboratory per week.

Spring (1)

### Upper Division Courses

**101. Clothing Selection**

Aims to develop taste in dress through a better understanding of the relation art principles, psychology, fashion trends, personality and physical characteristics individuals. History of costume is studied briefly as an aid in understanding recurri cycles in fashion. A consideration of buymanship information necessary in wardro selection to insure satisfaction and economy.

Spring (3)

**105. Family Meals**

This course deals with the planning, preparing, and serving of attractive, wel balanced meals for different income levels, and for various occasions. The student wi have responsibility for menu making, food purchasing, and meal management. Tw three-hour laboratories, one hour lecture per week.

Fall (3)

**160A. Merchandise Analysis—Textiles**

Properties, uses, selection and care of textile fibers and fabrics. The aim is develop judgment in the evaluation involved in the selection of textiles.

Fall (2)

**160B. Merchandise Analysis—Nontextiles**

Properties, uses, selection and care of metals, glass, rubber, fur, enamels a plastics.

Spring (2)

# INDUSTRIAL ARTS

## IN THE DIVISION OF PHYSICAL SCIENCES

*Major* and *minor* work are not offered in industrial arts. Courses in this field nay not be used to satisfy any part of the lower division requirements in natural science nor may they be used as part of major work in physical science.

### Lower Division Courses

**1. General Shop Theory and Practice**

A study of shop practices in the processing and fabrication of various engineering naterials. Students investigate standard tools and equipment used in modern technology and learn how to obtain data from tables and formulas necessary to successful hop work.
Fall (3)

**1. Introductory General Shop**

A general introductory shop course covering the areas of wood, machine and ench metal, sheet metal, foundry, forge, welding, and electricity. Basic elements of he above areas will be mastered during the first half of the semester with special onsideration given to individual interests and needs during the second half.
Fall or Spring (3)

# JOURNALISM

## IN THE DIVISION OF LANGUAGES AND LITERATURE

### Major

A *liberal arts major* is not offered in journalism. Students desiring major work 1 journalism at this college should plan for a *general major* with the field of concenration in journalism. For specific information regarding this plan, refer to the curriclum in pre-journalism, page 61, and to the description for the general major, page 20.

### Minor

A *liberal arts minor* is offered in journalism. The minor must include at least 5 units of work in journalism, 9 units of which must be from courses carrying upper ivision credit.

A *teaching minor* is not offered in journalism.

### Lower Division Courses

**1A-51B. News Gathering and Reporting**

Study of news sources and types; practice in news and feature writing; newsaper organization; excursions and special lectures. Prerequisite: Sophomore standing. 1A is prerequisite for 51B.
Year course (3-3)

### Upper Division Courses

**1. Feature Writing**

Study and practice in writing special articles for newspapers, general circulation agazines and nontechnical trade magazines. Frequent written assignments.
Spring (3) (Offered in 1949-50 and alternate years)

**2. Editorial Writing**

Study and practice in writing effective presentation of opinion for publication. xtensive practice in this form of writing. Prerequisite: Journalism 51A-51B.
Spring (3)

**3. Editing and Copyreading**

A laboratory course in the final preparation of copy for publication, making up e newspaper and use of photographic art. Prerequisite: Journalism 51A-51B.
Fall (3)

# LATIN

## IN THE DIVISION OF LANGUAGES AND LITERATURE

*Major* and *minor* work are not offered in Latin.

### Lower Division Courses

**A-B. Elementary**

Thorough study of Latin grammar with daily written exercises and the transl
tion of selected passages from Caesar, Cicero, and Pliny. The importance of the
authors and their culture to western civilization will be considered. Students who ha
had one year of Latin in high school should register for Latin A for which only 2 uni
will be allowed. Those who have had two years of Latin in high school should regist
for Latin B for which only 4 units will be allowed. For specific information, refer
page 17. Latin A, or its equivalent, is a prerequisite for Latin B.

Year course (5-5)

**C-D. Intermediate**

Survey of Latin poetry with chief emphasis upon Vergil's *Aeneid*. Selectio
will be read from Catullus, Horace, Ovid, and others. Parallel European poetry will
considered. Latin B or equivalent is a prerequisite for Latin C. Latin C or equivalent
a prerequisite for Latin D.

Year course (3-3)

# LIBRARY SCIENCE

## IN THE DIVISION OF SOCIAL SCIENCES

*Major* and *minor* work are not offered in library science.

NOTE: Library science may not be used to satisfy any part of the 12-uni
social science requirement, nor may it be used as part of a social science major o
minor.

### Lower Division Courses

**10. Use of the Library**

The chief object is to give a working knowledge of some of the resources of th
library which every teacher and student should understand—the decimal classifica
tion, the card catalog, periodical indexes, and the most important reference book
together with some instruction in the preparation of bibliographies. The course wi
be a requirement of those students added to the library's staff of student assistant
although it will not prepare the student to become a librarian.

Fall or Spring (2)

# MATHEMATICS

## IN THE DIVISION OF PHYSICAL SCIENCES

### Major

A *liberal arts major* is offered in mathematics. Lower division requirements: Mathematics 3A-3B, 4A. Recommended: Two or more of the following: Astronomy 1; Economics 1A-1B; Commerce 2, Engineering 1A, 21; French A-B; German A-B; Physics 1A-1B or 2A-2B-3A-3B. Upper division requirements: a minimum of 24 upper division units in mathematics, or 18 units in mathematics and 6 units selected from the following with approval of the Chairman of the Department: Astronomy 107; Chemistry 111A-111B, 144; Physics 105A-105B, 112; or other courses approved by the Chairman of the Department.

A *teaching major* is offered in mathematics for the general junior high school credential. For specific information, refer to the outline of requirements for this credential.

### Minor

A *liberal arts minor* is offered in mathematics. The minor must include at least 15 units of work in mathematics, 9 units of which must be from courses carrying upper division credit selected from the following: Mathematics 101, 102, 104, 105, 106, 111, 117, 119, 140.

A *teaching minor* is offered in mathematics for the general secondary, the general junior high school, the special secondary, the general elementary, and the kindergarten-primary credentials. For specific information, refer to the outlines of requirements for these credentials.

NOTE: Courses in mathematics may not be used to meet any part of the 12-unit natural science requirement.

### Lower Division Courses

**A-B. Basic Mathematics**

A year course roughly equivalent to the two-year sequence in algebra and geometry as given in the high school. More time is given to arithmetic and numerical trigonometry and less to demonstrative geometry.

Year course (3-3)

**C. Intermediate Algebra**

The course begins with an extensive review of elementary algebra. Topics covered include quadratic equations, simultaneous equations, ratio and proportion, variation, arithmetic and geometric progressions, bionominal expansion and logarithms. It is equivalent to the second year-course in high school algebra. Prerequisites: Elementary algebra and geometry or Mathematics A-B.

Fall and Spring (3)

**D. Trigonometry**

Roughly equivalent to the high school course in plane trigonometry but with more attention than is often given to those aspects needed in analytic geometry and calculus. Prerequisites: Intermediate algebra, Mathematics C.

Fall and Spring (3)

**E. Solid Geometry**

A course in intuitive solid geometry with much attention to the calculation of surfaces and volumes for the simpler solids and for certain others used in industry. Prerequisites: Intermediate algebra, Mathematics C.

Fall (2)

**S. Slide Rule**

Theory and use of the slide rule. Practice in performing the fundamental operations of arithmetic. Some attention is given to more involved computations. Prerequisites: Trigonometry, Math. D.

Fall and Spring (1)

### 1. College Algebra

Review of algebra and trigonometry. New material includes identities, graph solution of algebraic and trigonometric equations, determinants, and mathematica proofs. Prerequisites: Two years of algebra and trigonometry.

Fall and Spring (3)

### 3A. Plane Analytic Geometry

Equations and loci, conic sections, coordinate transformations, cartesian an polar coordinates, and parametric representation. Prerequisites: Algebra, plan geometry, intermediate algebra, and plane trigonometry, with a high degree of pr ficiency, or a satisfactory grade in Mathematics 1, College Algebra. In order t determine the degree of proficiency, examinations in intermediate algebra and plan trigonometry will be given during the first week of the semester. Students falling belo the required standard will be assigned to Mathematics 1.

Fall and Spring (3)

### 3B. First Course in Calculus

Introduction to differential and integral calculus, with applications to problem involving variable rates and summations. Prerequisite: Mathematics 3A.

Spring (3)

### 4A. Second Course in Calculus

Differentiation, integration, infinite series, and a brief treatment of solid analyti geometry. Prerequisite: Mathematics 3B. Solid geometry is recommended.

Fall (3)

### 4B. Third Course in Calculus

Partial differentiation, successive integration, and applications. Prerequisite Mathematics 4A.

Spring (3)

### 7A-7B. Mathematical Analysis

Designed for students who do not intend to prepare for a professional career i physical science or in engineering but who desire or need one year of college mathe matics. Consideration is given to the processes and applications of algebra, trigo nometry, and differential and integral calculus. Prerequisites: High school algebr and plane geometry. 7A is a prerequisite to 7B. Students who have had Math 1 or 3 may not enroll in this course for credit.

Year course (3-3)

## Upper Division Courses

### 101. Elementary Geometry for Advanced Students

Non-Euclidean geometry, transformations, constructions with ruler and com passes, and famous problems. Prerequisite: Mathematics 4A or 7B.

Fall (3) (Offered 1948-49 and alternate years)

### 102. Elementary Algebra for Advanced Students

The number system, simultaneous equations, calculation of logarithms, and othe topics related to the elementary field. Prerequisite: Mathematics 4A or 7B.

Spring (3) (Offered 1948-49 and alternate years)

### 104. History of Mathematics

History of mathematics down to early modern times. Prerequisite: Mathematic 3A-3B or 7B.

Fall (3) (Offered in 1947-48 and alternate years)

### 105. College Geometry

A continuation of the geometry of the high school with emphasis on modern topics. Prerequisite: Mathematics 3B or 7B.

Fall (3) (Offered 1948-49 and alternate years)

### 106. Projective Geometry

Concurrence of lines, collinearity of points and other properties of figures not altered by projections; construction and study of ellipses, hyperbolas and parabolas by means of projections. Prerequisite: Mathematics 3A-3B or 7B.
Fall (3) (Offered in 1947-48 and alternate years)

### 111. Theory of Algebraic Equations

Determinants, complex numbers, and theory of algebraic equations. Prerequisites: Mathematics 3A and 3B or 7B.
Spring (3) (Offered in 1948-49 and alternate years)

### 112. Analytic Geometry of Space

The coordinate systems in space; lines, planes, and quadric surfaces; applications. Prerequisite: Mathematics 4A.
Spring (3) (Offered 1948-49 and alternate years)

### 117. Intermediate Calculus

Essentially the same as Mathematics 4B with additional special work for advanced students. Prerequisite: Mathematics 4A. Credit not allowed for both 4B and 117.
Spring (3)

### 118. Advanced Mathematics for Engineering Students

Hyperbolic, elliptic, Bessel and gamma functions; line integrals; Fourier series, etc. Applications. Prerequisites: Mathematics 4A-4B. (4B concurrently if desired).
Fall (3)

### 119. Differential Equations

Ordinary differential equations of first and second order, with applications. Prerequisite: Mathematics 4A-4B (4B concurrently if desired).
Spring (3)

### 124. Vector Analysis

Theory and applications to engineering problems. Prerequisites: Mathematics 4A-4B (4B concurrently if desired).
Fall (3)

### 140. Probability and Statistics

Statistical theory and method from the mathematical standpoint; applications in social and natural science. Prerequisite: Mathematics 4A or 7B.
Spring (3) (Offered in 1948-49 and alternate years)

### 199. Special Study

Study of materials mainly supplementary to the courses listed above. Prerequisite: Average grade of B or better in at least 12 units beginning with Mathematics 3A.
Fall and Spring (1 or 2, each semester)

# MUSIC

## IN THE DIVISION OF FINE ARTS

### Major

A *liberal arts major* is offered in music. Lower division requirements: Music 1B-1C-1D, 4A-4B, 4 units of applied music (study of piano, voice, or orchestral instrument); Aesthetics 1A-1B. Upper division requirements: a minimum of 24 upper division units in music selected from the following: Music 105A-105B, 106, 107, 119A, 120A, 121A-121B, 128; 4 units of applied music, Aesthetics 102A-102B, and 4 units of music activity (Music 111, 112, 113, 115, 126, or 130). As laboratory work, each music major is required to carry one music activity per semester. It is recommended that both vocal and instrumental activities be included at some time during the college course. At least a C average in upper division music courses is necessary.

At least two months before graduation, each senior music major will present a recital before the music faculty. At this time, the faculty will select those students who are to be granted he privilege of a public recital.

A *teaching major* is offered in music for the general secondary credential and the special secondary credential in music. For specific information, refer to the outlines of requirements for these credentials.

### Minor

A *liberal arts minor* is offered in music. The minor must include at least 15 units of work in music, 9 units of which must be from courses carrying upper division credit

A *teaching minor* is offered in music for the general secondary, the general junior high school, and the special secondary credentials. It may be offered only as a second teaching minor for the general elementary and the kindergarten-primary credentials. For specific information, refer to the outlines of the requirements for these credentials.

### Lower Division Courses

(Descriptions of courses in the field of music appreciation and history of music are listed under *aesthetics.*)

**1A. Musicianship—Fundamentals of Music**

The elements of music; scale construction; elementary music theory; drill in music reading both with syllables and with words; ear training, elementary music dictation. Basic course for all general elementary credential students. Music majors receive no credit toward the major. All music majors are required to register for Section 1, only.

Fall or Spring (3)

**1B. Musicianship—Music Reading and Ear Training**

Tonal and rhythmic dictation; rhythmic writing; sight singing. Basic course for majors and minors. Text—Smith and Krone: Fundamentals of Musicianship Book I. Prerequisite: Music 1A.

Fall or Spring (2)

**1C-1D. Musicianship—Advanced Music Reading and Ear Training**

Tonal work in minor keys; modal scales; dissonant triads and seventh chords; interval feeling in all chords; rhythmic progression and elementary forms; rhythmic, melodic and harmonic dictation. Prerequisite: Music 1B. 1C is a prerequisite for 1D.

Year course (2-2)

**2A. String Instruments**

Beginner's class in violin, viola, 'cello and string bass. Required of all music majors working for a Special Secondary credential unless this orchestral section is the major or minor field.

Fall or Spring (1)

**3A. Woodwind Instruments**

Beginner's class in oboe, clarinet, flute and bassoon. Required of all music majors working for a Special Secondary credential unless this orchestral section is the major or minor field.

Fall or Spring (1)

**4A-4B. Elementary Harmony**

Scale construction, intervals, by-tones and diatonic harmonies. Transposition and original composition in the simpler forms. Text—Alchin: Applied Harmony Vol. I. Prerequisites: Music 1A-1B, or the equivalent, and at least one year of piano study. 4A is a prerequisite for 4B.
Year course (3-3)

**6A. Brass Instruments**

Beginner's class in trumpet, French horn, baritone, trombone and tuba. Required of all music majors working for a Special Secondary credential unless this orchestral section is the major or minor field.
Fall or Spring (1)

**7A. Music Materials for the Elementary School**

Study of the song material in the state music texts and in the supplementary texts. Appreciation materials applicable to the elementary school. Required course for all general elementary credential students. Prerequisite: Music 1A.
Fall, Spring and Summer I, II (3)

**11A-B-C-D. Women's Glee Club—Treble Clef**

Entrance upon examination.
Fall and Spring ($\frac{1}{2}$-$\frac{1}{2}$)

**12A-B-C-D. Men's Glee Club**

Entrance upon examination.
Fall and Spring ($\frac{1}{2}$-$\frac{1}{2}$)

**13A-B-C-D. Orchestra**

Permission of the conductor required for membership.
Fall or Spring (1-1)

**15A-B-C-D. Choral Club**

Entrance upon examination.
Fall or Spring ($\frac{1}{2}$-$\frac{1}{2}$)

***16A-16B-16C-16D. Individual Study of an Orchestral Instrument**

Fall and Spring (1-1)

***17A-17B-17C-17D. Individual Study of Voice**

Fall or Spring (1-1)

***18A-18B-18C-18D. Individual Study of Piano or Organ**

Prerequisite: The ability to play artistically hymns and folk songs of the type found in the Golden Book of Favorite Songs.
Fall or Spring (1-1)

**20A-B-C-D. Chorus**

Open to anyone interested in singing standard choral works. No examination required. No public performances.
Fall or Spring ($\frac{1}{2}$-$\frac{1}{2}$)

**26A-B-C-D. Band**

Permission of the conductor required for membership.
Fall or Spring (1-1)

**28A-28B. Piano**

Fundamental playing and reading technics for the pianoforte. Emphasis upon playing by ear, and the development of interpretative ability. For beginners only. No credit for music majors and minors.
Year course (1-1)

---

* See page 138, conditions under which credit may be given for music study under rivate instructors.

### 28C-28D. Continuation of First Year Piano

Study of more advanced piano literature. Considerable emphasis upon ensem piano playing and accompanying. Prerequisites: Music 28A-28B, and consent instructor. No credit for music majors. Credit will be given to music minors. 28C a prerequisite for 28D.

Year course (1-1)

### 29A-29B. Class Voice

A class for beginners in the vocal field taking up the problems of breath contr, tone placement, articulation and enunciation. Frequent performance before cla required. Limited to 15. 29A or equivalent is a prerequisite for 29B.

Year course (1-1)

### 29C-29D. Continuation of First Year Voice

Study of more advanced songs with attention being given to interpretation, well as continued work on tone, articulation and placement. Frequent performan before class required. Limited to 15. 29C or equivalent is a prerequisite for 29D.

Year course (1-1)

### 30A-30B. Chamber Music

String and woodwind ensembles. The consent of the instructor necessary f admission to class.

Year course (1-1)

## Upper Division Courses

(For description of courses in the field of music appreciation and history music, see *aesthetics*).

### 105A-105B. Advanced Harmony and Composition

Study of the possible types of modulation and chromatic harmonies: continuati of harmonic analysis and original composition. Text—Alchin: Applied Harmo Vol. II. Prerequisite: Music 4A-4B. 105A is a prerequisite for 105B.

Year course (3-3)

### 106. Counterpoint

Study of the five species of counterpoint with much practice in writing in su forms. Application of contrapuntal style to modern composition. Prerequisit Music 4A-4B.

Fall (2)

### 107. Form and Analysis

Aural and visual analysis of music forms through a consideration of structur harmonic content, and style. Prerequisite: Music 105A-105B.

Spring (2)

### 111A-B-C-D. Women's Glee Club—Treble Clef

Entrance upon examination.

Fall or Spring (½-½) (A maximum of 2 units in glee club may be counte toward the A.B. Degree).

### 112A-B-C-D. Men's Glee Club

Entrance by examination.

Fall or Spring (½-½) (A maximum of 2 units in glee club may be counte toward the A.B. Degree).

### 113A-B-C-D. Orchestra

Permission of the conductor required for membership.

Fall or Spring (1-1). A maximum of 4 units in orchestra may be counte toward the A.B. Degree).

### 115A-B-C-D. Choral Club

Entrance by examination.

Fall or Spring (½-½) (A maximum of 2 units in choral club may be counte toward the A.B. Degree).

***116A-116B-116C-116D. Advanced Individual Study of an Orchestral Instrument**

Fall or Spring (1-1)

***117A-117B-117C-117D. Advanced Individual Study of Voice**

Fall or Spring (1-1)

***118A-118B-118C-118D. Advanced Individual Study of Piano or Organ**

Fall or Spring (1-1)

**119A. Instrumental Conducting**

Conducting and reading of orchestral scores.
Fall or Spring (1)

**120A. Vocal Conducting**

The theory of vocal conducting together with practical experience gained from directing the college chorus. Prerequisite: Upper division music major or minor.
Fall and Spring (1)

**121A-121B. Instrumentation and Arranging**

Arranging of music for full orchestra. Selected works of pupils to be performed by standard orchestras. 121A is a prerequisite for 121B.
Year course (2-2)

**126A-B-C-D. Band**

Permission of the conductor required for membership.
Fall or Spring (1-1) (a maximum of 4 units in band may be counted toward the A.B. Degree)

**128. Methods in Teaching Piano**

Teaching of beginning intermediate and beginning piano. Survey of materials available for child and adult classes. Special consideration of the problems of the adult beginner. Supervised teaching of beginning students in individual lessons and in class groups.
Summer (3)

**130A-130B. Chamber Music**

String quintet and woodwind ensembles only. Permission of the instructor necessary for class membership.
Year course (1-1)

## Graduate Courses

**200A-200B. Special Problems in Music**

A graduate course in which students may carry out projects in various fields of music under the direction of faculty members who are specialists in the field chosen. Students registering for this course must apply for work within a certain field after conference with the music faculty. Prerequisite: Graduate standing.
Fall and Spring (2-2)

**Music 203. Musicology**

Survey of bibliography and methods of research in music history and literature. Emphasis upon inter-relationship of musical developments and trends in other arts. Completion of an acceptable thesis in fields of investigation chosen by the student. Prerequisites: Aesthetics 102A-102B, graduate standing and consent of the instructor. Advanced courses in Harmony, Composition, and Form and Analysis are desirable.
Fall (2)

**Music 206. Composition**

Music composition in the larger forms. Students will be required to submit a complete work in one of the larger musical forms as thesis in the course. Prerequisites: Music 105A-105B, 106A, 107A, 121A, graduate standing and consent of the instructor.
Spring (2)

---

* See page 138, conditions under which credit may be given for music study under private instructors.

## CONDITIONS UNDER WHICH CREDIT MAY BE GIVEN FOR MUSIC STUDY UNDER PRIVATE INSTRUCTORS

Credit may be allowed for private instruction in music under the following c ditions:

1. The applicant for such credit must be a regularly enrolled student in the mu department of the college.

2. The instructor giving such private work must be approved by the Mu Department. All private work and the names of all such teachers must be registered the office of the music department chairman at the beginning of the semester.

3. In the case of first semester private study, a placement examination conduc by the music department faculty at the beginning of the semester will show the sta of the student at the beginning of his work.

4. Evidence that the standards of the Music Department have been met will shown by an examination conducted by the music department faculty at the end of semester.

5. Ten clock-hours of lessons, and 100 hours of practice per semester are requi for one unit of credit.

# PHILOSOPHY

## IN THE DIVISION OF SOCIAL SCIENCES

*Major* work is not offered in philosophy.

### Minor

A *liberal arts minor* is offered in philosophy. The minor must include at least units of work in philosophy, 9 units of which must be from courses carrying up division credit.

A *teaching minor* is not offered in philosophy.

NOTE: Courses in philosophy may not be used to meet any part of the 12-u social science requirement, nor may they be used as part of a social science major minor.

### Lower Division Courses

**1A-1B. Introduction to Philosophy**

A non-historical introduction to the types and problems of philosophy. The m inclusive and influential world-views are studied at length, then the principal proble of philosophy are considered in terms of these basic systems. 1A is a prerequisite for 1

Fall and Spring (3-3)

**3A-3B. History of Thought**

A study of the basic ideas of Western Civilization in their historical developme The making of the modern mind as revealed in the development of philosophy and the relations between philosophy and science, art and religion. The history of id against the social and political backgrounds from which they came. Philosophy 3A i prerequisite for 3B.

Year course (3-3)

**20. Logic**

Logic and language. The logic of argument and proof. Analysis of fallacies. Ap cation of formal principles to scientific and everyday thinking.

Spring (3)

## Upper Division Courses

### 101. Contemporary Philosophy

A study of the most influential philosophies of the mid-twentieth century, particularly those playing a dynamic role in contemporary life. Pragmatism, idealism, naturalism, hedonism, positivism, theism, economic determination, materialism, authoritarianism and liberalism (of various types) will be considered, and the student will be encouraged to analyze and evaluate each in a critical manner.

Spring (3)

### 111A-111B. Theory of the State

The nature of the state, its organization and activities, and its relation to the individual and to other states. Special attention is given to recent developments in the field of political thought. Not open to students with credit in Political Science 111A-111B.

Year course (3-3)

### 130. Ethics

The search for the Good Life. The principal theories of ethical obligation, the sources of moral authority, and the various views regarding the nature of the "highest good" and the related goals of intelligent living.

Fall (3)

### 136. Philosophy of Art

A study of the nature of esthetic experience, both in itself and in relation to the rest of human experience. Particular effort is made to disentangle man's esthetic attitude and activity (whether in the field of art, nature or daily life) from those experiences and evaluations with which the esthetic is frequently confused. The principal theories of art, both traditional and contemporary, are studied at length—both in relation to actual artistic production and to art's role in society.

Spring (3)

### 137. Philosophy of Science

A critical examination of the basic concepts and methods underlying contemporary scientific thought. Nature of scientific knowledge, conceptions of nature, natural law, relation of the scientific interest to other interests, and contributions of the special sciences to a view of the universe as a whole.

Fall (3)

# PHYSICAL EDUCATION

## IN THE DIVISION OF HEALTH, PHYSICAL EDUCATION AND RECREATION

### Major

A *liberal arts major* is not offered in physical education.

A *general major* is offered in the field of recreation. For specific requirement refer to the outline for the curriculum in recreation, page 68, and to page 20 for fu ther information on the general major.

A *teaching major* is offered in physical education for the general secondary an the special secondary credentials. Refer to the outlines of requirements for the credentials.

### Minor

A *liberal arts minor* is offered in physical education or in recreation. The pla for these minors must be approved by the departmental representative. A minor co sists of at least 15 units of work in one field, 9 units of which must be from cours carrying upper division credit. Refer to page 21 for further information on th minor in recreation.

A *teaching minor* is offered in physical education for the general secondary, th general junior high school, and the special secondary credentials. It may be offere only as a second teaching minor for the general elementary and the kindergarte primary credentials. For specific information, refer to the outlines of requiremen for these credentials.

A *teaching minor in recreation* is offered only as a second minor for studen majoring in physical education. Non-physical education majors may select recreatio as a teaching minor for the general junior high school or the special secondary cr dential. For specific information, refer to the outlines of requirements for the credentials.

### MEN'S DEPARTMENT

Candidates for a teaching credential in physical education should refer to th statement "Admission to Teacher Education Curricula" on page 25. For the teache education curriculum in physical education, see page 35.

With the exceptions listed, all lower division students must elect one or mo courses each semester. Two units of activity credit must be offered for graduatio Exceptions: (a) veterans of World War II; (b) students over 25 years of age and (c) limited students who may be excused by the department chairman. N permanent excuses from required activity courses will be granted. The college phys cian, in conjunction with the chairman of the department, will consider stringent case on an individual basis and recommend.

A medical examination is given each student when entering and recommendatio is made as to type of activity most beneficial. Developmental physical education class to care for special needs are offered. The content of the required courses is planne to give each student an opportunity to participate in many activities of carry-ov value, developmental nature, and recreational interest. An opportunity is afforde for students to participate in competitive sports and intramural programs.

Freshmen are required to choose from courses numbered 1-10. Sophomores an upper division students may choose from all courses offered. An activity course ma be taken for credit once only. The complete uniform will be furnished by the studen

## Lower Division Courses

## ACTIVITY COURSES

**1A-1B-1C-1D. Developmental Physical Education**
Fall and Spring (½-½-½-½)

**2. Basketball**
Fall and Spring (½)

**3. Boxing**
Fall and Spring (½)

**4. Gymnastics**
Fall and Spring (½)

**5. Soccer**
Fall (½)

**6. Softball**
Spring (½)

**7. Touch Football**
Fall (½)

**8. Track and Field**
Spring (½)

**9. Volleyball**
Fall and Spring (½)

**10. Wrestling**
Fall and Spring (½)

**13. Archery**
Fall and Spring (½)

**14. Badminton**
Fall and Spring (½)

**15. Fencing**
Fall and Spring (½)

**16. Golf**
Spring (½)

**17. Handball**
Fall and Spring (½)

**18. Tennis**

**36. Wrestling**
Spring (½)

## WOMEN'S DEPARTMENT

Candidates for a teaching credential in physical education should refer to the atement "Admission to Teacher Education Curricula" on page 25, and to the utline for the A.B. Degree with Special Credential in Physical Education on page 36.

With the exceptions listed, all lower division students must elect one or more ourses each semester. Two units of activity credit must be offered for graduation. xceptions: (a) veterans of World War II; (b) students over 25 years of age; nd (c) limited students who may be excused by the department chairman. No permanent excuses from required activity courses will be granted. The college physician, conjunction with the chairman of the department, will consider stringent cases on individual basis and recommend.

A medical examination is given each student when entering and recommendation made as to type of activity most beneficial. Developmental physical education asses to care for special needs are offered. The content of the required courses is anned to give each student an opportunity to participate in many activities of rry-over value, developmental nature, and recreational interest.

Freshmen are required to choose from courses numbered 1-10. Sophomores may oose from all courses offered. An activity course may be taken for credit once ly. The complete uniform will be furnished by the student.

The individual activities, tennis, golf, archery, badminton, and dancing are ered through the year. Candidates for the special secondary credential in physical ucation must select one as a major activity and two others as minors. Skills in the tivities must be maintained as prerequisite to the senior course, Physical Edution 185.

## Lower Division

## ACTIVITY COURSES

**-1B. Fundamental Skills**

Practice in efficient fundamental body movements.
Fall and Spring (½-½)

**2A-2B. Folk Dancing** (Men and Women)
(2A is a prerequisite for 2B)
Fall and Spring (½-½)

**3A-3B. Modern Dance**
Practice in dance techniques and rhythms.
(3A is a prerequisite for 3B)
Fall and Spring (½-½)

## TEAM SPORTS

**4. Fieldball, Soccer, Speedball**
Fall or Spring (½)

**5. Softball, Volleyball, Hockey**
Fall or Spring (½)

**6. Basketball**
Fall or Spring (½)

**11A-11B. Ballroom Dancing** (Men and Women)
(11A is a prerequisite for 11B)
Fall and Spring (½-½)

**12A-12B. Advanced Modern Dance** (Men and Women)
Laboratory experiments in advanced choregraphy and percussion accompai ment. Prerequisites: 3A and 3B.
Year course (1-1)

**13A-13B. Archery**
Fall and Spring (½-½)

**14A-14B. Badminton**
Fall and Spring (½-½)

**16A-16B. Golf**
Fall and Spring (½-½)

**18A-18B-18C. Tennis** (Beginning, intermediate, advanced)
(18A is a prerequisite for 18B; 18B is a prerequisite for 18C)
Fall and Spring (½-½-½)

**20A. Swimming** (Nonswimmers only)
Fall and Spring (½)

**20B. Swimming** (Intermediate)
Fall and Spring (½)

**21. Life Saving**
Learning of safety in and on the water and the ability to assist or rescue a per in danger of drowning. Course content qualifies for the American Red Cross I Saving Certificate.
Fall and Spring (½)

## PROFESSIONAL THEORY COURSES

### Men and Women
### Lower Division Courses

**43. Professional Activities** (Men)
This course presents an opportunity for majors to develop the skills and t niques of the dance as well as other phases of the activity program. Organization presentation of materials are emphasized.
Fall (2)

### 44. Professional Activities (Men)

Emphasis is placed on acquiring the skills, teaching techniques, and development of knowledge and interests in the combative activities, tumbling, apparatus, and stunts.
Spring (2)

### 51. First Aid and Safety Education

The accepted procedure in meeting the emergencies which arise daily in any of the many places where the physical education teacher is called on for first aid. Attention s given to the prevention and minimizing of common accidents. Course contents qualifies for American Red Cross Certificate.
Fall or Spring (2)

### 53. Physical Education in the Elementary School

The content of the State program in physical education for the elementary school orms the basis of the course. Candidates for the Elementary Credential are required o take the course section which includes two lectures and two laboratory periods per week.
Fall or Spring (2½)

Candidates for the Special Secondary Credential in physical education may take he course section which includes two lectures without laboratory periods.
Fall (2)

### 2. Introduction to Physical Education

The history and principles of physical education and sports movements of the past. The aims and objectives of the modern school program are studied and an effort s made to give the student a basic philosophy or a background for his professional raining. Required of all physical education majors and minors.
For Men: Fall (2)
For Women: Spring (2)

## Upper Division Courses

### 45. Professional Activities: Team Sports (Men)

The skills, rules, teaching techniques, officiating, and organization of materials in uch sports as soccer, touch football, softball, hockey, basketball, and others are mphasized.
Fall (2)

### 46. Professional Activities: Individual Sports (Men)

The skills, rules, teaching techniques, officiating, and organization of materials in uch sports as handball, tennis, badminton, archery, golf, and others are emphasized.
Fall (2)

### 47. Professional Activities: Coaching Baseball and Track (Men)

Organization of practice sessions, drills for developing fundamental drills and ecial abilities. Problems of scheduling, handling teams and game strategy are taken p. Rules, sessions, and officiating techniques are given attention.
Spring (2)

### 48. Professional Activities: Coaching Football and Basketball (Men)

Organization of practice sessions, drills for developing fundamental skills and ecial abilities. Problems of scheduling, handling teams, and game strategy are taken p. Rules, sessions, and officiating techniques are given attention.
Fall (2)

### 55. Applied Anatomy and Kinesiology

Anatomical and kinesiological analysis of human structure and movement. pplication of analysis relative to mechanical principles as influenced by efficiency ctors of body functions. Prerequisite: Zoology 8 or 20.
Fall (3)

### 6A-156B. Sports Methods (Women)

Analysis of skills in basketball, hockey, soccer, speedball, volleyball, and softball; ethods of presenting sports to large groups; study of rules and officiating. Prequisites: Physical Education 4, 5, and 6.
Fall and Spring (2-2)

**160. Teaching of Body Mechanics** (Women)

A study of efficient use of the body in daily living; evaluation and classification o exercises, methods, and practice in planning and presenting material.

Fall (2)

**161. Folk Dancing Materials and Advanced Techniques** (Women)

A study of folk customs, festivals, and costumes. Selection of dance material for various age groups. Practice in advanced techniques. Prerequisite: Physica Education 2A.

Fall (2)

**164A-164B. Methods in Modern Dance**

Methods in the teaching of modern dance techniques and choreography. Selectio of materials and course planning for the secondary school. Prerequisite: Physica Education 12A-12B.

**165. Administration of Community Recreation**

An introductory course in the principles of organization and promotion of leisu time and recreation activities. Content consists of a study of recreation leadership, th growth of the recreation movement, the operation of areas and facilities, program activities, features, services, organization and administration problems. A require course for Recreation minors.

Fall (3)

**168. Physiology of Exercise**

A non-laboratory course emphasizing the relation of physiology to muscula exercise in physical activities. Prerequisites: Physiology 1A and Zoology 8 equivalent.

Spring (3)

**170. Recreational Leadership**

A study of the practical application of the activities adapted to group recreatio programs. Activities include arts and crafts, special athletic events, drama, dancin music, hobbies, camping and hiking, socials, games and contests and stunts. Th course is presented through lectures, discussions, field trips and actual class partic pation in the above activities. Required of all Physical Education majors, Physic Education and Recreation minors.

Spring (3)

**177. Individual Program Adaptation**

The adaptation of programs to the capacities and physical needs of individua including analysis and evaluation of aims, techniques and procedures in development preventive and corrective measures. Special problems, such as survey of the situatio recognition of divergencies, selecting and assigning of students, instructional problem motivation, follow-up, teacher limitations and public relations are considered. Pre quisites: P.E. 155 and senior standing.

Spring (3)

**185. Techniques of Individual Sports** (Women)

A course summarizing rules and teaching methods and testing individual playi techniques and knowledge in tennis, archery, badminton, and swimming. Prerequisit Senior standing.

Fall (1)

**190. Administration of Physical Education in the Secondary School**

Consideration of the problems and practices in the organization and administ tion of the secondary school activity program. Study and selection and adaptation activities, examination, and grouping of pupils, use and evaluation of tests. Selecti and maintenance of equipment and facilities. Women must take this course only wh offered in the women's department.

For Women: Fall (3)
For Men: Spring (3)

**199. Special Study in Physical Education or Recreation**

An opportunity is presented for extensive review of pertinent literature, individual research and advanced study of problems in the profession. Credit will range from 1 to 3 units according to the caliber of work. Prerequisite: Approval of the Chairman of the Division.
Fall or Spring (1 to 3)

### Graduate Courses

**200. Evaluation Procedures in Health, Physical Education and Recreation**

A study of tests and measurements in the profession with practice in their use, construction and interpretation of results. Prerequisite: Graduate standing.
Spring (2) (Offered in 1948-1949)

**201. Developmental Physical Education**

Intensive study of postural divergencies, lack of physical development, and methods of correcting such conditions through exercise are studied. Practice in making physical examinations, constructing individual exercise programs, teaching remedial exercises, as well as ethical procedures and limitations are considered. Prerequisite: Applied Anatomy and Kinesiology and graduate standing.
Fall (2)

**203. Problems in Physical Education**

A survey of current problems facing the Physical Education profession is studied through a review of the literature, discussion of trends, observation of school situations together with the analysis and evaluation of actual problems. Written reports are required. Prerequisite: Graduate standing.
Summer 1949 (2)

**204. Problems in Recreation**

A survey of current problems facing the Recreation profession is studied through a review of the literature, discussion of trends, observation of school situations together with the analysis and evaluation of actual problems. Written reports are required. Prerequisite: Graduate standing.
Summer 1949 (2)

## PHYSICAL SCIENCE

### IN THE DIVISION OF PHYSICAL SCIENCES

*Major* and *minor* work are not offered in physical science.

### Lower Division Courses

**1A. Introduction to Physical Science**

A survey course dealing with the nature of man's physical universe. Emphasis will be upon materials chosen from topics in astronomy and physics to show the nature and development of the scientific method and man's use of energy. Not open to students who have had a high school course with grades of A or B or who have credit for a college course in physics or astronomy or Physical Science 40. May be taken with or without plans to continue with 1B.
Fall and summer (3)

**1B. Introduction to Physical Science**

A continuation of Physical Science 1A. Emphasis will be upon units chosen from geology and chemistry to show the origins of natural materials and their use by man in the modern world. Not open to students who have had a high school course with grades of A or B or who have credit for a college course in either chemistry or geology. May be taken with or without credit in Physical Science 1A.
Spring (3)

# PHYSICS

## IN THE DIVISION OF PHYSICAL SCIENCES

### Major

A *liberal arts major* is offered in physics. Lower division requirements: Physics 1A-1B-1C-1D; Mathematics 3A-3B, 4A-4B; Chemistry 1A-1B or their equivalents. Recommended: A reading knowledge of French or German. Upper division requirements: A minimum of 24 upper division units in physics including Physics 105A-105B, 110A, 3 units chosen from 102 or 110B, and 199 (2 units). Six of the 24 units may be selected from a related field with approval of the Chairman of the Department.

A *teaching major* is offered in physics for the general secondary credential or as part of the *general science* major for the general junior high school credential or as part of the *physical science major* for the general secondary credential. For specific information, refer to the outlines of requirements for these credentials.

### Minor

A *liberal arts minor* is offered in physics. The minor must include at least 15 units of work in physics, 9 units of which must be from courses carrying upper division credit.

A *teaching minor* is offered in physics for the general secondary credential or as part of the *general science minor* for the general junior high, the special secondary, the general elementary, and the kindergarten-primary credentials. For specific information, refer to the outlines of requirements for these credentials.

Note: A maximum of 12 units of lower division physics credit may be applied toward the A.B. degree.

### Lower Division Courses

**1A-1B-1C-1D. Principles of Physics**

A four semester course developing the fundamental ideas which underlie the subject of physics, with applications in the discussion of practical problems. This course is designed for students in the various fields of science and engineering who desire a thorough background of the elementary principles. Prerequisites: Concurrent or previous registration in Mathematics 3A. Physics 1A is a prerequisite to Physics 1B, 1C or 1D. Students are expected to take the courses in the following sequence and deviations from this may be made only with the permission of the instructor. Each course provides two lectures and one three-hour laboratory period per week.

**1A. Mechanics of Solids**
Fall, spring, summer (3)

**1B. Mechanics of Fluids and Heat**
Spring, summer (3)

**1C. Electricity and Magnetism**
Fall, summer (3)

**1D. Sound and Light**
Spring, summer (3)

**2A-2B. General Physics**

A year course covering the elementary principles of physics. This course is primarily for liberal arts and certain pre-professional students who do not desire an intensive preparation in the field. Lectures, demonstrations and discussions. First semester: Properties of matter, mechanics and heat. Second semester: Electricity and magnetism, sound and light. Prerequisite for 2A: Two years of high school mathematics. Prerequisite for 2B: Physics 2A.

Year course (3-3)

**3A-3B. Physical Measurements**

A year course in laboratory physics designed to accompany Physics 2A-2B. First semester: Properties of matter, mechanics and heat. Second semester: Electricity and magnetism, sound and light. One three-hour laboratory period per week.

Prerequisite for 3A: Concurrent or previous registration in Physics 2A. Prerequisite for 3B: Concurrent or previous registration in Physics 2B.

Year course (1-1)

## Upper Division Courses

### 102. Basic Electronics

The fundamental principles of electron tubes and their associated circuits, including high-vacuum and gas tubes, rectifiers, amplifiers, oscillators and electronic instrumentation. Prerequisites: Physics 1C and Mathematics 4A.

Fall (3)

### 104. Communications

An intensive study of the elements and systems used in radio and wire communication including: Circuit elements and resonant circuits, oscillators, modulators, detectors, wave radiation and propagation. Students with credit for Engineering 104 may not receive credit for this course. Prerequisite: Physics 102.

Spring (2)

### 105A-105B. Analytical Mechanics

Treatment of the fundamental principles of Newtonian mechanics. First semester: Study of the statics and kinematics of particles and rigid bodies. Second semester: Study of the dynamical principles underlying linear and rotary motion of rigid bodies, with additional work in vibration and impact. Use of elementary vector analysis in solving of physical applications in mechanics. Students with credit in Engineering 102A-102B may not receive credit for this course. Prerequisites: Physics 1A-1B or 2A-2B; and a working knowledge of the calculus. Physics 105A is prerequisite for Physics 105B.

Year course (3-3)

### 106. Optics

A study of reflection, refraction and dispersion of light, with applications to optical instruments, followed by a survey of phenomena indicative of the physical nature of light, including interference, diffraction, polarization and spectral radiation. Prerequisite: Physics 1D or 2B-3B.

Fall (3) (Offered in 1948-49 and alternate years)

### 107. Electrical Measurements

The theory and use of electrical measurements, including measurements of current, voltage, power, resistance, capacitance, inductance, and the parameters of resonant circuits. One hour of lecture and three hours of laboratory work per week. Prerequisites: Physics 1C or 2B-3B and a working knowledge of the calculus.

Spring (2)

### 108. Atomic Particles

A study of the experimental evidence for the existence of the elemental physical particles and their properties and of the physical concepts to which this experimental evidence has led. Prerequisites: Physics 1C or 2B-3B.

Spring (3)

### 110A. Principles of Electrostatics and Electromagnetism

Elements of the mathematical theory of steady and quasi-steady electric and magnetic fields with applications. Prerequisites: Physics 1C or 2B-3B and a working knowledge of the calculus.

Fall (3)

### 110B. Electromagnetism

Extension of the material covered in Physics 110A, including alternating and transient current phenomena and electromagnetic radiation. Prerequisite: Physics 110A.

Spring (3) (Offered in 1948-49 and alternate years)

### 112. Heat and Themodynamics

A study of the thermal properties of matter with an introduction into the kinetic theory of gases and the laws of thermodynamics. Prerequisites: Eight units in physics and a working knowledge of the calculus.

Fall (3) (Offered in 1949-50 and alternate years)

**114. Acoustics**

A study of wave motion and its applications to the production, transmission and reception of sound. Material in architectural acoustics, speech and hearing, and acoustical instruments is presented. Prerequisites: Physics 10 or 2B-3B.

Spring (3) (Offered in 1949-50 and alternate years)

**122. Electronics Laboratory**

An experimental study of electron tubes and their associated circuits. Study of the cathode ray oscilloscope, vacuum tube voltmeter, characteristics of power supplies, amplifiers and filter systems. One hour of lecture and three hours of laboratory work per week. Prerequisite: Previous or concurrent registration in Physics 102, or permission of the instructor.

Fall (2)

**124. Radio Measurements**

A laboratory course in measurements of the parameters of resonant circuits at radio frequencies. Study of the properties of oscillators, modulators, detectors and wave guides. Students with credit in Engineering 124 may not receive credit for this course. Prerequisite: Previous or concurrent registration in Physics 104.

Spring (2)

**126. Optical Measurements**

An experimental study of lenses, optical systems and instruments, including the study of the wave character of light and the measurement of the wave length of light. One hour of lecture and three hours of laboratory work per week. Prerequisite: Previous or concurrent registration in Physics 106, or permission of the instructor.

Fall (2) (Offered in 1948-49 and alternate years)

**128. Experimental Atomic Physics**

Laboratory measurements in the fundamental properties of atomic particles. Prerequisite: Previous or concurrent registration in Physics 108 or permission of the instructor.

Spring (2) (Offered in 1948-49 and alternate years)

**132. Heat and Pyrometry Laboratory**

Laboratory work selected from experiments in thermal expansion, specific heat, heat of combustion, radiation, calibration and use of various temperature measuring devices. One hour of lecture and three hours of laboratory work per week. Prerequisite: Previous or concurrent registration in Physics 112 or permission of the instructor.

Fall (2) (Offered in 1949-50 and alternate years)

**134. Acoustical Measurements**

Experimental study of wave motion, velocity of sound in various media, diffraction, refraction and reflection of sound, microphone and loudspeaker characteristics. One hour of lecture and three hours of laboratory work per week. Prerequisite: Previous or concurrent registration in Physics 114 or permission of the instructor.

Spring (2) (Offered in 1949-50 and alternate years)

**152. Advanced Electronics**

A study of the internal behavior of electron tubes with an introduction to electron optics; consideration of special tubes used in physics and engineering. Prerequisite: Physics 102.

Spring (2)

**166. Honors Course**

An individual study arrangement for students admitted to the Honors Group. Enrollment through the Department Chairman, subject to the approval by the Committee on Honors. See page 15 for requirements for admission to this group.

Fall or Spring (Credit to be arranged)

**199. Special Study**

Reading and laboratory work on a special problem in physics selected by the student. Each student will be assigned a member of the staff who will supervise his work. All candidates for the A.B. Degree in physics are required to enroll for two

units of this course during the upper division work. Credit, hours and topics to be arranged in each case.
Fall and Spring (1 or 2—1 or 2)

### Graduate Courses

**200. Seminar**

An intensive study of some phase of advanced physics under the immediate direction of a member of the staff. Each student will choose a problem from one of the following fields for study and will prepare and present a paper to the combined staff and all students enrolled in this course.

a. Mathematical Physics.
b. Advanced Mechanics.
c. Kinetic Theory of Gases.
d. Advanced Acoustics.
e. Advanced Electronics and Electricity.
f. Electromagnetic Radiation.
g. Atomic Physics.

Prerequisite: Graduate standing.
Fall and Spring (2-2)

**299. Special Study**

Independent theoretical and experimental investigation of some topic in physics chosen by the student. Each student taking work in this course will be required to write a paper reporting his results. A member of the staff will be assigned to supervise the work. Prerequisite: Graduate standing.
Fall and Spring (1 or 2—1 or 2)

# PHYSIOLOGY

## IN THE DIVISION OF LIFE SCIENCES

*Major* and *minor* work are not offered in physiology. Courses in physiology, however, may be used as part of the major in zoology and are recommended as part of the lower division requirements for the major in psychology. For specific information, refer to these departments.

### Lower Division Courses

**1A. Human Physiology**

A lecture course considering the functions of the human body, and including a brief reveiw of the microscopic and gross anatomy of the structures discussed. Prerequisites: Elementary chemistry and high school or college biology or zoology. Three hours of lecture per week. Credit reduced to 2 units, for students having credit for Zoology 20.
Spring (3)

**1C. Human Physiology**

A study of the human functions through laboratory experiments and demonstrations. Prerequisites: Physiology 1A completed or in progress. Six hours of laboratory per week.
Spring (2)

### Upper Division Courses

**101. General Physiology**

Fundamentals of plant and animal functions. Two lectures and two laboratory periods per week. Prerequisites: Biology 10A-10B or Zoology 1A-1B and Chemistry 1A-1B or Chemistry 2A-2B.
Spring (4)

# POLITICAL SCIENCE

## IN THE DIVISION OF SOCIAL SCIENCES

### Major

A *liberal arts major* is offered in political science. This major consists of 36 units of work in political science and closely related work chosen from the fields of economics, geography, history, philosophy, psychology, and sociology. Under the direction of the Chairman of the Department, the 36 units will be distributed as follows:

(a) Required courses: Political Science 1A-1B and 71A-71B (one year-course of which should be taken in the lower division) and Political Science 199.

(b) Eighteen upper division units in political science distributed among two of the following groups: Group I: theory and government—courses numbered 100-139; Group II: administration—courses numbered 140-149; Group III: international affairs—courses numbered 150-179.

(c) Six units of upper division work selected from the related fields listed above, this work to be chosen under the direction of the Chairman of the Department and to be outside the field of the student's minor.

Students majoring in political science are advised to become as familiar as possible with the related fields listed above. Majors should have a reading knowledge of at least one foreign language.

A *teaching major* is not offered in political science; however, courses in political science may be used as part of the *social science major* for the general junior high school credential or the general secondary credential. For specific information, refer to the outlines of requirements for these credentials.

### Minor

A *liberal arts minor* is offered in political science. The minor consists of from 15 to 18 units of work, 9 units of which must be from courses carrying upper division credit.

A *teaching minor* is not offered in political science for the general secondary credential; however, courses in political science may be used as part of the *social science minor* for the general junior high school, the special secondary, the general elementary, and the kindergarten-primary credentials. Refer to the outlines of requirements for these credentials.

### Lower Division Courses

**1A-1B. Comparative Government**

A comparative study of typical governments. Semester I: England, France and Switzerland. Semester II: Italy, Germany, Russia and Japan.

Year course (3-3)

**71A-71B. Introduction to American Government and Politics**

Semester I: Governmental organization in the United States; the federal system; the organization, powers and functions of the legislative, executive and judicial branches of the government; the relations between federal, state and local units of government.

A critical analysis of the organization by which the international community seeks to provide for the exercise of legislative, administrative and judicial functions on the international level: Diplomatic and consular corps; conferences; administration through commissions and unions; amicable procedures for settlement of disputes; The League of Nations-United Nations experiment. (Formerly part of Political Science 141A-141B.)

Spring (3)

### 153. Principles of International Law

The function of law in the international community. The historical development of the ideas and rules of international law and their place in the modern diplomatic and legal structure. (Formerly part of Political Science 133A-133B.)

Fall (3)

### 154. International Law and the Courts

A case study of the application of the rules of international law in national and international courts. (Formerly part of Political Science 133A-133B.)

Spring (3)

### 158A-158B. American Foreign Policy

Lectures and reading in the field of American foreign relations since 1776, with special emphasis, in the second semester, upon affairs since 1900. A general survey course. (Formerly Political Science 176A-176B.) Not open to students with credit for History 176A-176B.

Year course (3-3)

### 160. Government of the British Dominions

Development of the new British Empire and imperial relations of the self-governing dominions; government of Canada, Australia, New Zealand, and South Africa; conditioning historical, economic and racial factors. Not open to students with credit for History 156B.

Spring (3)

### 199. Special Studies for Advanced Students

Directed study and research in the field of political science.

Spring (2)

# PSYCHOLOGY

## IN THE DIVISION OF SOCIAL SCIENCES

### Major

A *liberal arts major* is offered in psychology. Lower division requirements: sychology 1, 10, and 11 or 12; 6 units in biology, zoology, or physiology; 6 units philosophy, anthropology, or sociology. Recommended: Mathematics C. Upper divi- on requirements: a minimum of 24 upper division units in psychology including sychology 104A and 160A.

A *teaching major* is not offered in psychology.

### Minor

A *liberal arts minor* is offered in psychology. The minor must include at least units of work in psychology, 9 units of which must be from courses carrying upper vision credit.

A *teaching minor* is not offered in psychology.

NOTE: Courses in psychology may not be used to meet any part of the 12-unit cial science requirement, nor may they be used as part of a social science major minor.

### Lower Division Courses

#### General

An elementary survey of normal adult psychology, descriptive and organizational; e subjective and objective aspects of behavior. Furnishes basis for all other courses psychology and is prerequisite therefor.

Fall or Spring (3)

#### . Advanced General Psychology

A comprehensive treatment of the fundamentals of psychology as the science of havior and experience through a historical and an experimental approach. Required all majors. Prerequisite: Psychology 1.

Fall or Spring (3)

#### . Applied Psychology

A survey of the fields in which the basic principles of psychology may be applied. introduction to an interpretation of statistical data and its utilization in the plication of psychological principles to problems of daily living. Required of all nmajors who plan to take upper division courses in psychology. Prerequisite: ychology 1.

Fall or Spring (3)

#### Mental Hygiene

An examination and interpretation of the factors which go into the making of person as he adapts himself to the social world about him. The development of the rmal personality. Prerequisite: Psychology 1.

Fall or Spring (3)

### Upper Division Courses

#### 2. Child Psychology

A survey of the child's motor, social, emotional and intellectual development m conception to pre-adolescence, with a view to identifying general trends, and luating individual differences in performance and in developmental patterns. Pre- uisite: Psychology 10, 11, or 12. Not open to students with credit in Education 102B.

Fall or Spring (3)

#### . Psychology of Adolescence

A study of the characteristics of normal adolescent children, as indicated by ent research in the field of adolescent growth, development and behavior, and by t-hand observations to be conducted by class members, with a view to (1) pro- ting and understanding of the behavior of normal adolescents, (2) developing sitivity for detection of deviation from the norm, and (3) recognizing practical plications for meeting the needs of adolescents. Prerequisite: Psychology 10, 11, 12. Not open to students with credit in Education 102C.

Fall or Spring (3)

### 104A. Statistical Methods in Psychology

An introduction to the use of quantitative methods in psychology, with emphasi upon measures of central tendency and variability, graphic methods and percentiles linear correlation, and the applications of the normal probability curve. Prerequisite Psychology 10, 11, or 12.

Fall or Spring (3)

### 104B. Advanced Statistics

A further study of quantitative methods in psychology with particular emphasi on methods of correlation, chi-square, and contingency, and an introduction to th analysis of variance. Prerequisites: Mathematics C and Psychology 104A, or per mission of the instructor.

Spring (3)

### 105A. Psychological Testing (Group)

A critical review of the principal intelligence, personality, aptitude and voca tional interest tests, with emphasis upon problems of measurement in the variou fields. Attention is given to procedures used in test construction and administratior Prerequisite: Psychology 11 or Psychology 104A.

Fall (3)

### 105B. Psychological Testing (Individual)

A course offering instruction in the principles of individual testing and practic in the administration of the Stanford-Binet, Wechsler-Bellevue and the more widel used individual mechanical aptitude tests. Prerequisite: Psychology 105A or Psycholog 104A and consent of instructor.

Spring (3)

### 121. Personnel and Industrial Psychology

Psychological principles applied to problems of selection and assignment industrial personnel, employee training, and fatigue. Prerequisite: Psychology 104 or Economics 140, or Sociology 103.

Fall or Spring (3)

### 122. Measurement of Public Opinion and Attitude

A survey of the history, methods, and problems of public opinion and attitu measurement. Emphasis will be placed upon the polling of consumers and voters. order to give students experience in field work, they will be asked to serve as inte viewers in several community investigations. Prerequisite: Psychology 11 or 104 or Economics 140, or Sociology 103.

Fall or Spring (3)

### 130. Educational Psychology

A study of the science of human behavior as it relates to learning. Emphasis given to the principles of learning and maturation of the organism. Special aspec treated are the growth of meanings, thinking, memory and habit formation, motiv tion, transfer of learning, organic and environmental conditions affecting learnin individual differences, and the theory of audio-visual education. Not open to studen with credit in Education 130. Prerequisite: Psychology 1.

Fall or Spring (2)

### 131. Psychological Foundations of Personality

The nature of the human organism, its interaction with social and materi stimuli in the environment, and the resultant changes in the development of the pe sonality. Methods of studying and evaluating personality. A study of concepts that a basic in the development of a genuine mental hygiene. Course designed for perso engaged in social work or similar professions. Prerequisite: One full year of psycholo or equivalent.

Fall (2)

### 32. Problems of Personality Adjustment

A study of the application of the fundamental principles of personality to prob- ms of adaptation. Included will be such topics as the mental hygiene of the infant, the ild, and the adolescent, and mental hygiene in relation to school, home, marriage, ligion, vocational selection and occupational adjustment, and the adjustment prob- ms of war veterans. Prerequisite: Psychology 131 or permission of instructor.

Spring (2)

### 0. Physiological Psychology

Topics covered include the history of physiological psychology, neurophysiology ith emphasis upon integrative activities, receptor and effector processes, and the fects of hormones and narcotics upon behavior. Prerequisite: Psychology 10, 11 or 12 d Physiology, Biology or Zoology.

Spring (3)

### 5. Social Psychology

Personality as it develops in relation to social environment. Suggestion, imitation, dership, the crowd, public opinion, social control, prejudice, propaganda, sex differ- ces, race differences, etc. Prerequisites: Psychology 11 or 104A.

Spring (3)

### 0. Abnormal Psychology

The relation of psychology to the psychoneuroses and insanity; the appearance abnormal traits in incipient stages of mental disturbances. Methods of diagnosis d early treatment. Prerequisites: Psychology 10, 11, or 12 and Physiology, Biology Zoology.

Fall or Spring (3)

### 1A. Clinical Psychology: Diagnostic

A study of diagnostic devices in psychology, tests of clinical significance, ratings, erviewing for securing information, projective and case study analyses; problems insight, rapport, empathy, and prediction of individual behavior. Prerequisites: ychology 105A, 105B, 140, or 150.

Fall (3)

### 1B. Clinical Psychology: Therapies

A study of nonmedical psychotherapies—ancient, medieval, and modern, but contemporary; particularly nondirective counseling and such directive methods as ively operate in making friends and influencing people. Prerequisite: Psychology 1A unless waived by consent of instructor.

Spring (3)

### A-160B. Experimental Psychology

An experimental approach to the fundamental principles of psychology. The first m deals with the fields of memory and learning, including conditioning, problem ving, and thinking. The second term deals with the sensory and motor processes, luding such topics as errors of perception, work and fatigue. Two laboratory ses- ns and one hour of lecture each week. Laboratory work includes group and individual eriments, demonstrations of classical experiments, and extensive readings. Pre- uisites: Psychology 10 and 104A. Either semester course may be taken independently the other.

Fall and Spring (3-3)

### . Honors Course

A special study arrangement for students admitted to the Honors Group. Enroll- nt through the Department Chairman, subject to approval by the Committee on nors. (See page 15.)

Fall or Spring (Credit to be arranged)

### . Individual Studies in Psychology

Limited to students in the senior year. Permission to enroll must be obtained m a member of the staff. Credit limited to three units.

Fall and Spring (1-3)

# SOCIOLOGY

## IN THE DIVISION OF SOCIAL SCIENCES

### Major

A *liberal arts major* is offered in sociology. Lower division requirements: Sociology 50A-50B. Upper division requirements: a minimum of 24 upper division units i sociology, including Sociology 103, 105, 108 and 152.

A *teaching major* is not offered in sociology; however, courses in sociology may b used as part of the *social science major* for the general junior high school credentia or the general secondary credential. For specific information, refer to the outlines o requirements for these credentials.

### Minor

A *liberal arts minor* is offered in sociology. The minor must include at least 1 units of work in sociology, 9 units of which must be from courses carrying upper division credit.

A *teaching minor* is not offered in sociology for the general secondary credential however, courses in sociology may be used as part of the *social science minor* for th general junior high school, the special secondary, the general elementary, and th kindergarten-primary credentials. For specific information, refer to the outlines c requirements for these credentials.

The application of the principles of design, color and perspective to the design settings for the production of period and modern plays. Students will learn to make etches and models and paint the scenery for the departmental productions. Prerequi- te: 56A-56B or equivalent.

Year course (3-3)

### 5. Stage Lighting

A course for directors, designers and technicians in school and community thea- rs concerning the principles and practice of light, color, lighting instruments, and ntrol equipment, including the design and planning of lighting of plays. Students will rve as light crews for departmental production.

Spring (3)

### 0. Phonetics

Auditory and kinesthetic analysis of the sounds of the English language. Valu- le as a corrective course in pronunciation and articulation. Required of speech majors d those seeking the Speech Correction Credential.

Fall (3)

### 2. Stage Costume

Principles of design of stage costume. Consideration of materials, color, and dye- g. Study of history of costume of important periods. Projects in design of costumes r plays of various periods.

Fall (2) (Not offered in 1948-49)

### 4A-154B. History of the Theater

A study of the theater from primitive times to the present. Special attention will given to the theater as a mirror of the social and cultural background of the various untries and periods in which it is studied. Carries aesthetics credit. (Speech Arts 4B may be taken without 154A.)

Year course (3-3) (Not offered 1948-1949)

### 5. Advanced Acting

More advanced forms of dramatic expression are studied. Acting of different riods and countries in workshop productions. Prerequisite: 55AB or the equivalent.

Fall (3)

### 156. Advanced Dramatic Production

Problems and projects in scenery and lighting in connection with the workshop and major productions of the department.

Offered in summer session only (3)

### 157A-157B. Advanced Radio Production

Preparation and production of radio plays and various types of radio material. Prerequisite: 57A-57B. (157A is a prerequisite for 157B or permission of instructor.)

Year course (3-3) (Offered in 1948-1949 and alternate years)

### 158A-158B. Advanced Radio Techniques

Designed to enable students to specialize in different fields of radio. Special attention given to original work. Prerequisite: 57A-57B. (158A is a prerequisite for 158B.)

Year course (3-3) (Offered in 1947-1948 and alternate years)

### 159A-159B. Stage Direction

This course is planned for prospective directors of plays in schools, colleges and community theaters. Through lectures, discussions, and exercise projects the student will become acquainted with the principles, procedure and methods of stage direction. Each student will be required to direct several short plays during the year (159A is a prerequisite for 159B.)

Year course (3-3)

### 161. Advanced Argumentation

Presents a further and more detailed study in the preparation of briefs and the organizing of evidence; opportunity for participation in intramural debates, intercollegiate debate, and community speaking activity. Prerequisite: 2A or 2B.

Fall (3)

### 179A-179B. Nervous Speech Disorders

Clinical survey of newest methods of speech correction with special emphasis given to stammering. Required course for Special Corrective Credential. Not open to students with credit in Educ. 179A-179B. (Speech Arts 179A is a prerequisite for 179B.)

Year course (3-3)

### 191. Organized Discussion

Consideration of the symposium, the panel, the open forum, the business session, and varieties of conference speaking. Emphasis upon organization and presentation. Attention to parliamentary procedure for informal groups. Prerequisite: Speech Arts 60 or equivalent.

Spring (3)

### 192A-192B. Advanced Public Speaking

Careful attention given to the preparation and delivery of longer speeches, using as models classics in the field of oratory. Prerequisite: 2A or 2B.

Year course (3-3) (Not offered 1948-1949)

### 199. Special Problems in Speech and Dramatic Art

Fall or Spring (1-3)

## Graduate Courses

### 200. Seminar in History of Oratory

An advanced course for those already familiar with the techniques and theories of public speaking and debate. A history of public address from the time of Greece up to the present, organized around the theories of representative orators and their relationships to the social environment. Prerequisite: Graduate standing.

Spring (2) (Offered in 1949-1950)

### 221. Articulatory Problems of Speech

Analysis and discussion of articulatory problems as encountered in public school work, particularly in California. Required of all students for the speech correction credential. Prerequisite: Speech Arts 150 and graduate standing.

Fall (2)

### 245. Seminar in Technical Practice

Advanced technical projects in planning school theaters and their mechanical equipment, lighting control and lighting instruments and the design of lighting layouts for elaborate plays will be assigned, executed and discussed. Prerequisite: Graduate standing.
(2)

### 259. Seminar in Stage Direction

An advanced course for those who are ready to direct full-length plays and to consider the problems of handling various styles and types of drama in the great periods of dramatic literature for modern production. For graduates with experience in directing plays. Prerequisite: Graduate standing.
Fall (2) (Offered 1949-1950)

### 260. Seminar in Oral Interpretation

Application of the aesthetic discipline to the oral reading of masterpieces of poetry and prose. Projects will include analysis of thought and emotional content and aesthetic form, including unity and harmony, variety and contrast, balance and proportion, rhythm, and the interpretation to an audience of the results of the study. Prerequisite: Graduate standing.

# ZOOLOGY

## IN THE DIVISION OF LIFE SCIENCES

### Major

A *liberal arts major* is offered in zoology. Lower division requirements: Zoology 1A-1B; Chemistry 1A-1B or 2A-2B. Recommended: German or French; Botany 2A-2B, 4. Upper division requirements: a minimum of 24 upper division units, at least 18 units of which must be in zoology and 6 units of which may be in related courses in botany, chemistry, physics, physiology, or bacteriology selected with approval of the departmental representative.

A *teaching major* is not offered in zoology; however, courses in zoology may be used as part of the *life science major* for the general secondary credential or as part of the *general science major* for the general junior high school credential. For specific information, refer to the outlines of requirements for these credentials.

### Minor

A *liberal arts minor* is offered in zoology. The minor must include at least 15 units of work in zoology, 9 units of which must be from courses carrying upper division credit.

A *teaching minor* is not offered in zoology; however, it may be used as part of the *teaching minor in life science* for the general secondary credential, or as part of the *teaching minor in general science* for the general junior high school, the special secondary, the general elementary, and the kindergarten-primary credentials. For specific information, refer to the outlines of requirements for these credentials.

### Lower Division Courses

**1A-1B. General Zoology**

An introduction to animal biology dealing with structures, functions, evolution of animal life. Designed primarily for those who expect to do advanced work in the department. Two lectures and 6 hours of laboratory work each week. Students who have credit for Biology 10A-10B do not receive credit for Zoology 1A but may for Zoology 1B. Prerequisite for Zoology 1B: Biology 10B or Zoology 1A.

Year course (4-4)

**8. Human Anatomy**

A study of human structure through the use of models, prepared dissections and microscope slides. Prerequisite: high school biology, Biology 10A, 1, or Zoology 1A. Two hours of lecture and three hours of laboratory per week. Required of prenursing students. Credit reduced to 2 units if student has credit for Zoology 20.

Fall (3)

**20. Human Anatomy and Physiology**

An elementary course in human anatomy and physiology. Prerequisite: High school biology, or Biology 1 or 10A or Zoology 1A. Lectures three hours per week. Credit reduced to 2 units if student has credit for Zoology 8 or Physiology 1A.

Fall and Spring (3)

### Upper Division Courses

**100. Embryology**

The development of vertebrates as illustrated by the frog, chick, and pig. Six hours of laboratory and two hours of lecture and quiz per week. Prerequisite: Zoology 1B or Biology 10B.

Spring (4)

**101. General Physiology**

Fundamentals of plant and animal functions. Two lectures and two laboratory periods per week. Prerequisites: Biology 10A-10B or Zoology 1A-1B, Chemistry 1A-1B or Chemistry 2A-2B.

Fall (4)

**104. Microtechnique**

Introduction to methods of preparation of tissues for microscopic study. Six hours of laboratory and one hour of lecture per week. Prerequisite: One year college chemistry and Zoology 1A-1B, Botany 2A-2B or Biology 10A-10B.

Fall or Spring (3)

### 06. Comparative Anatomy of the Vertebrates

Dissection, study and comparison of organ systems of typical vertebrates. Two ours per week of lecture and six hours of laboratory. Prerequisite: Zoology 1B or iology 10B.

Fall (4)

### 12. Marine Invertebrates

Identification and study of behavior and life histories of invertebrates of the San iego region. Frequent collecting trips to the beaches required. Prerequisite: Zoology A or Biology 10B. Two hours of lecture and six hours of laboratory or field work er week.

Fall (4)

### 13A. Mammalogy

Lectures on classification, adaptations, and ecological relationships of mammals. aboratory and frequent field trips to familiarize the student with the local mam- als, taxonomic procedures and field techniques. One lecture and six hours of laboratory er week. Prerequisites: Zoology 1A or Biology 10B.

Spring (3)

### 3B. Ornithology

The study and identification of birds, especially those of the Pacific Coast and e San Diego region. One hour of lecture and six hours per week of laboratory, or ld excursions. Prerequisite: Zoology 1B or Biology 10B.

Spring (3)

### 4. Evolution

The development of theories of evolution. Two lectures per week.

Spring (2)

### 5. Cold-blooded Vertebrates

The classification, natural history and distribution of fishes, amphibians, and ptiles with special reference to the local fauna. Practice in the techniques of collec- on and the use of keys for identification. Frequent field trips. One lecture and two boratory periods per week. Prerequisites: Zoology 1B or Biology 10B.

Spring (3)

### 1. General Entomology

The classification, life history, structure, and physiology of insects. Prereq- site: Zoology 1A or Biology 10B. Two hours of lecture and three hours of laboratory r week.

Fall (3)

### 2. Systematic Entomology

Classification of insects with especial emphasis on a group of insects of the ndent's choice. To be taken with or to follow 121. May be repeated for credit but th a total of not more than 3 units. Three to six hours of laboratory work each ek.

Spring (1 or 2)

### 3. Economic Biology

Study of the uses of plants and animals to man and the ways in which they ure him and his possessions. Consideration is also given to general methods of ntrol and conservation. Prerequisite: Zoology 1A, Biology 1, or Biology 10B. Not en to students who have credit in Botany 123.

Fall (2)

### 4. Scientific Illustration

Drawing or photography of scientific subjects. Students are assigned individual jects, following their respective inclinations. It is desirable for students electing s course to have a definite project, or projects in mind and to confer with the

instructor in advance in case specialized needs are required. Six hours of laboratory work per week. Not open to students who have credit in Botany 124.
Fall (2)

### 125. Economic Entomology

A course designed primarily for students of agriculture, horticulture, and their specialized fields, but also of use and value to those majoring in the biological sciences. Emphasis is placed on determination and control of insects affecting plants and their products. Quarantine measures are also studied. Two lectures and one laboratory period per week. Prerequisites: Zoology 1A or Biology 10B.
Spring (3)

### 126. Medical Entomology

The role of insects and other arthropods in transmission and causation of human diseases. Three hours of laboratory and two hours of lecture per week. Prerequisite: Zoology 1A or Biology 10B.
Fall (3)

### 130. Readings in Biology

Reading from a suggested bibliography with informal class discussion of topics. Subjects discussed will include history of biology, biological principles, ecology, economic zoology, zoogeography, breeding habits, animal behavior. Not open to students who have credit in Botany 130.
Spring (2)

### 131. Field Zoology

Designed to give a working knowledge of the more common animals in the Southern California fauna; field trips emphasizing both observational methods in the study of behavior and habitat relations, and collecting techniques; laboratory to include identification of species, preparation of animal for exhibition and study; lectures on taxonomy, adaptations and ecological relationships. Prerequisites: Course in biology in high school or college, or permission of the instructor.
Summer (4)

### 140. Histology

A study of the microscopic structures and differentiation of tissues and organs of the vertebrates, especially mammals. One lecture and 6 hours of laboratory per week. Prerequisites: Zoology 1A-1B, or Biology 10A-10B; recommended Zoology 100.
Fall (3)

### 155. Genetics

An introductory course to the principles of heredity and cytogenetics, including the genetics of man, other animals, and plants. Designed primarily for science majors. Two lectures per week. Not open to students who have taken Zoology 165. Prerequisite: Biology 10A-10B, Zoology 1A-1B, or Botany 2A-2B. Not open to students who have credit in Botany 155.
Spring (2)

### 165. Human Heredity

Presentation of selected principles of heredity as related primarily to human inheritance. Designed primarily for non-science majors. Two lectures per week. Not open to students who have taken Zoology 155, Genetics (formerly 114A).
Fall (2)

### 199. Special Study

Work other than is outlined in the above courses. Admission only by consent of the instructor with whom the work is to be done. Credit and hours to be arranged in each case. Open to students who have completed at least 15 units of Zoology with a grade of A or B.
Fall or Spring (1 or 2)

## Graduate Courses

### 00. Seminar

To be conducted by the various members of the staff, with adaptation to the eeds of the class and its background. Especial emphasis will be placed on current oncepts in the various fields of Biology including problems of migration, distribution, peciation, evolution. Required of all graduate students. Prerequisite: Graduate tanding.

Fall (2)

### 02. Hydrobiology

A course in aquatic ecology with special emphasis on fresh water but with refer- nce to marine biology. Prerequisite: Graduate standing.

(2)

### 13. Advanced Studies in Ornithology

Lectures and seminar on advanced problems of morphology, distribution, behavior nd classification of birds. Prerequisite: Graduate standing.

(2)

# PROVISIONAL CURRICULUM

This curriculum is for the purpose of assisting provisional students in attainin regular status in a curriculum which leads to the A.B. Degree. Students in the provisional program are given close supervision in selection of courses and are place in classes specially designed to aid in adjustment to the college program.

Reclassification to regular status may be obtained upon the completion of a least 24 units of work of "C" grade with an over-all grade point average of 1.0, o upon recommendation of a reclassification committee. Reclassification must ordinaril take place within the first two years of college work. Students having provisiona status are permitted a maximum of five semesters of attendance.

The courses in the provisional curriculum are open only to students in provisional status. Provisional students in their first college year must select thre courses each semester from the list of subjects in the provisional curriculum. All othe courses selected to complete the student's program may be chosen from the regula schedule of courses or from additional courses in the provisional curriculum with th approval of the adviser.

## A SUGGESTED PROGRAM FOR PROVISIONAL STUDENTS

### First Year

| | *Units* | |
|---|---|---|
| | *1st Sem.* | *2d Sem* |
| * English 41, English Composition, and 42, Freshman Literature | 3 | 3 |
| Physical Science 40, Man and His Physical World, or equivalent (see lower division requirements, page 17) | – | 3 |
| Biology 40, Man and His Biological World, or equivalent (see lower division requirements, page 18) | 3 | – |
| Social Science 40, Contemporary Problems | 3 | – |
| Sociology 45, Marriage and the Family | – | 3 |
| Health Education 21, Principles of Healthful Living | – | 2 |
| Psychology 40, Psychology and Life | 3 | – |
| Physical Education (activity courses) | ½ | ½ |
| Elective | 3 | 4 |
| | 15½ | 15½ |

### Second Year

Student should consult with adviser concerning lower division preparation fo the major and completion of lower division requirements.

| | | |
|---|---|---|
| English 45, Biography, 46, Contemporary Literature, or 47, Periodical Literature | 3 | – |
| Social Science Elective | 3 | – |
| Social Science 45, American Democracy | – | 3 |
| Elective | 9 | 12 |
| Physical Education (activity courses) | ½ | ½ |
| | 15½ | 15½ |

---

* Students who do not pass the English A qualifying examination must registe in English 40, Pre-College English, which is a prerequisite for English 41. Credit i English 40 may be counted toward graduation as an elective but not to satisfy lowe division English requirements.

# COURSES OF INSTRUCTION

## BIOLOGY

### 40. Man and His Biological World

A survey of the general field of biology with emphasis on the role of biological science in the welfare of man and his associates, consisting of three lectures and one demonstration period per week. This course may be counted as the equivalent of Biology 1.

Fall or Spring (3)

## ECONOMICS

### 45A-45B. Business Economics

A basic course in the general principles of business economics and the application of these principles to current problems of man's economic life. An interpretation of basic economic theories to everyday vocational and business practices. Special studies made of business and industrial concerns with respect to their organization, production methods, economic policies, and types of governmental control. Students earning grades of A or B in this course may use it to satisfy the requirement of Economics 1A-1B in the commerce major. It may not be used to satisfy the economics requirement in any other field. (Not open to freshmen except by permission of the instructor.)

Year course (3-3)

## ENGLISH

### 40. Pre-College English

The elements of composition, including drill in grammar and usage; exercises in vocabulary building and fundamental reading skills; theme writing. Credit in this course is equivalent to passing the English A qualifying examination and may be counted toward graduation as an elective but not to satisfy lower division English requirements.

Fall or Spring (3)

### 41. English Composition

Composition stressing exposition. Reading from essays and articles. Prerequiites: Passing mark in the English A qualifying examination or credit in English 40. English 41 may be counted as the equivalent of English 1.

Fall or Spring (3)

### 2. Freshman Literature

Literature, mainly contemporary, is read for its thoughts and ideas, especially in relation to human problems and their solution. Practice in writing is continued. Required of all provisional students. Prerequisite: English 41. The course in English 2 may be counted as the equivalent of English 2.

Fall or Spring (3)

### 5. Sophomore English: Biography

Composition stressing personal narrative and informal essay. Reading from field f biography and memoirs. Prerequisite: English 41 and 42.

Spring (3)

### 6. Sophomore English: Contemporary Literature

Study of contemporary literature, with emphasis on various forms, such as the ovel, poetry, drama, etc., as used by the principal writers of the twentieth century world. The main objective of the course is to give students a background for the major ortion of their reading beyond college. Prerequisite: English 41 and 42.

Fall (3)

### 7. Sophomore English: Periodical Literature

Composition stressing the writing of essays and articles. Reading from current periodical literature. Prerequisite: English 41 and 42.

Fall (3)

## PHYSICAL SCIENCE

### 40. Man and His Physical World

A brief survey of the nature of the scientific method and of selected topics i physical science. Materials will be chosen from physics, chemistry, astronomy, an geology in order to give some background for an understanding of the relations c physical science to modern life. Not open to students who have had a year course i high school chemistry, physics, geology, or astronomy or a college course in any c these subjects. This course may be counted as the equivalent of Physical Science 1

Fall or Spring (3)

## PSYCHOLOGY

### 40. Psychology and Life

An elementary survey of normal adult psychology, focused upon psychologic principles in relation to life situations. Open only to students enrolled in the Pr visional curriculum. This course may be counted as the equivalent of Psychology 1.

Fall or Spring (3)

## SOCIAL SCIENCE

### 40. Contemporary Problems

A survey of the major political, social, and economic forces in modern Americ life. Chief problems are analyzed in relation to their setting, and students are giv sound methods of approach in dealing with them. This course may be counted as t equivalent of Sociology 50A.

Fall or Spring (3)

### 45. American Democracy

The structure and function of government, as it relates to individual America Special emphasis on popular participation through voting, political parties, pressu groups, and public opinion. Prerequisite: Sophomore standing.

Spring (3)

## SOCIOLOGY

### 45. Marriage and the Family

The purpose of this course is to prepare young people for successful marriage a family life. The development of the personality through family relationships, the choi of a life partner, and the social and economic factors involved in the establishment o home, are given special emphasis. The importance of the family as a unit in larger soc groupings is stressed, and both psychological and material factors which affect the w fare of family members are brought to the student's attention. Prerequisite: Psycholo 40 or sophomore standing.

Fall or Spring (3)

# DIRECTORY

(1947-48)

EPNER, WALTER R.---------------------------------------------President

A.B., 1913, M.A., 1916, Ed.D., 1937, University of Southern California. At San Diego State College since 1935.

CKLEY, JOHN WILLIAM------------------Assistant Professor of Speech Arts

A.B., 1930, University of Redlands; A.M., 1933, and two years of graduate study at the University of Southern California. At San Diego State College since 1947.

DAMS, JOHN R.-----------------------------------------Professor of English

A.B., 1920, A.M., 1922, University of Michigan; Ph.D., 1940, University of Southern California. At San Diego State College since 1928.

LCORN, MARVIN DOUGLAS----------------Associate Professor of Education

A.B., 1925, Southwestern College; A.M., 1931, Teachers College, Columbia University; Ed.D., 1942, University of Southern California. At San Diego State College since 1941.

LLISON, JOHN DONALD---------------------Assistant Professor of Commerce

B.S.C., 1932, Temple University; M.B.A., 1935, Harvard University; one year graduate study at New York University. At San Diego State College since 1947.

MSDEN, GEORGIA C.--------------------------Associate Professor of Commerce

Diploma, Gregg College, Chicago; special secretarial training in various colleges; Traveling Representative and Secretary for the Federal Board for Vocational Education, France, World War I; in charge of Stenographic Division, Department of Personnel, American Red Cross Headquarters, Paris, France, World War I; Secretary, Standard Life and Accident Insurance Company, Detroit. At San Diego State College since 1925.

PPLE, JOE ALTON------------------Principal of Campus Elementary School; Associate Professor of Education

A.B., 1928, Southeastern State College; M.A., 1929, University of Oklahoma; Ed.D., 1941, Teachers College, Columbia University. At San Diego State College since 1947.

SCHMANN, H. HOMER-----------------------Assistant Professor of Geography

B.A., 1940, M.A., 1942, University of California at Los Angeles. One-half year graduate study at University of California. At San Diego State College since **1946.**

ACON, GUINIVERE KOTTER (Mrs. George)---Associate Professor of Education

B.S., Utah Agricultural College; M.A., Stanford University. One year graduate study since 1926 at Stanford University, Teachers College of Columbia University, University of Southern California, and University of California at Los Angeles. At San Diego State College since 1928.

AIRD, OSCAR-------------------------------------------Professor of Physics

B.A., 1910, University of Wisconsin; M.A., 1924, University of California. Three years graduate study since 1924 at University of Minnesota, University of California, University of Southern California, University of Oregon. At San Diego State College since 1921.

ALL, HANNAH WHEELER--------------------------------Instructor in English

B.A., Macalester College; M.A., Wellesley College; one year graduate study at University of California. At San Diego State College since 1947.

BAKER, CLIFFORD H., JR.------------------------------Instructor in Spanish

B.A., 1933, San Diego State College; M.A., 1935, University of California. Two years graduate study since 1935 at University of California. At San Diego State College since 1937.

ARNHART, KENNETH EDWIN------------------------Professor of Sociology

A.B., 1915, Southwestern University; A.M., 1920, Southern Methodist University; Ph.D., 1924, University of Chicago. At San Diego State College since 1939.

AUM, DONALD ELWOOD-------------------------Assistant Professor of Music

B.Music, A.B., 1935, Upper Iowa University; M.A., 1946, University of Iowa. At San Diego State College since 1947.

---

On leave 1946-1948.

BEATTY, LESLIE S. (Mrs. Roger) -------------- Assistant Professor of Educatio

A.B., University of California; M.A., Claremont Colleges. Two years graduat study at University of California and San Diego State College. At San Dieg State College since 1946.

BENSON, RICHARD M. -------------------------------- Instructor in Sociolog

B.S., 1923, Oregon State College; M.A., 1925, University of Washington; Ed.D. 1931, Stanford University. At San Diego State College since 1946.

BENTON, CARL WEBBER -------------- Acting Instructor in Physical Educatio

B.S., 1948, University of California at Los Angeles. At San Diego State Colleg since 1948.

BLOCK, EDWARD A. ------------------------------ Assistant Professor of Englis

A.B., 1938, M.A., 1939, Ph.D., 1943, University of California. At San Dieg State College since 1946.

BROOKS, BAYLOR ------------------------------ Assistant Professor of Geolog

B.A., 1928, Stanford University. Two years graduate study since 1928 at University of Arizona and Stanford University. At San Diego State College sinc 1931.

BROWN, ELIZABETH McPIKE (Mrs. L. P.) --------------- Professor of Frenc

Ph.B., M.A., Ph.D., University of Chicago; one year graduate study at th Sorbonne, Paris, France; Certificat d'Etudes Françaises; Diplôme de l'Association Générale de Phonétique, Paris, France; Officer d' Académie. At Sa Diego State College since 1926.

BROWN, EUGENE P. ------------------------- Assistant Professor of Commerc

B.S., 1926, Southeastern Teachers College; B.A., 1927, M.A., 1928, Universit of Oklahoma. One year graduate study at University of Chicago, Universit of Southern California and University of Mexico. At San Diego State Colleg since 1947.

BROWN, LESLIE PARKER ------------------- Professor of Spanish and Frenc

B.A., 1912, Yale College; M.A., 1913, Harvard University; Ph.D., 1935, University of Southern California. At San Diego State College since 1922.

* BRYDEGAARD, MARGUERITE ANNA -------- Assistant Professor of Educatio

A.B., San Diego State College; M.A., Claremont Colleges. At San Diego Stat College since 1936.

BUCHANAN, DOROTHY ANNE ------------------ Assistant Professor of Englis

A.B., Smith College; M.A., Ph.D., Bryn Mawr College. At San Diego Stat College since 1947.

BURHANS, ARTHUR DANIEL ------------ Acting Assistant Professor of Physic

B.S., 1916, U. S. Naval Academy; M.S., 1923, Columbia University. At Sa Diego State College since 1947.

BURNETT, GAIL ALLEN ------------------------ Assistant Professor of Englis

A.B., Randolph-Macon Woman's College; M.A., University of California a Los Angeles; Ph.D., University of Southern California. At San Diego Stat College since 1947.

BUSH, KENT -------------------------------------- Acting Instructor in English

A.B., 1941, San Diego State College; one year graduate work, University o California at Los Angeles. At San Diego State College since 1947.

BUTTE, ROSEMARY ------------------------------ Assistant Professor of English

B.A., Scripps College; M.A., University of California at Los Angeles; thre years of graduate work at Claremont Colleges and University of Southern California. At San Diego State College since 1947.

CAMERON, ROY ERNEST ------------------------------ Professor of Economic

A.B., 1922, Ph.D., 1929, University of California. At San Diego State College since 1929.

CAMPBELL, LOIS BERYL -------------------- Assistant Professor of Education

A.B., University of California; M.A., Teachers College, Columbia University. At San Diego State College since 1947.

---

* On leave 1947-1948.

**CANADAY, DYXIE D.**---------- Instructor in English

B.S., M.A., Oklahoma A. and M. College; one year graduate study at Stanford and University of Southern California. At San Diego State College since 1946.

**CARLSON, THORSTEN ROBERT**---------- Associate Professor of Education

B.E., 1939, St. Cloud State Teachers College; M.A., 1942, Ph.D., 1946, University of Minnesota. At San Diego State College since 1948.

**CAVE, MARY F.**---------- Assistant Professor of Physical Education

B.S., University of North Dakota; one-half year's study at Bennington College. At San Diego State College since 1946.

**CHASTAIN, NANCY ANN**---------- Acting Instructor in English

B.A., San Diego State College; one year of graduate study at University of California. At San Diego State College since 1947.

**CHOPLIN, ROSA MARIA** (Mrs. Ralph)---------- Acting Instructor in Spanish

A.B., University of California at Los Angeles; one year graduate study at University of Southern California. At San Diego State College since 1948.

**COLTON, THEODORE S.**---------- Instructor in English

B.A., 1939, M.A., 1940, and two years' graduate study, University of California at Los Angeles. At San Diego State College since 1946.

**CORBETT, KATHERINE E.**---------- Associate Professor of Education

B.Pd., Michigan State College; B.S., M.A., Teachers College, Columbia University. At San Diego State College since 1921.

**CORCORAN, EUGENE F.**---------- Instructor in Mathematics

B.S., 1940, North Dakota State College. At San Diego State College since 1946.

**CORRIGAN, ROBERT FORD**---------- Assistant Professor of Speech Arts

A.B., 1939, Unversity of Michigan; M.A., 1941, University of Iowa. At San Diego State College since 1947.

**CROUCH, JAMES ENSIGN**---------- Professor of Biology

B.S., 1930, M.S., 1931, Cornell University; Ph.D., 1939, University of Southern California. At San Diego State College since 1932.

**CUNNINGHAM, CORNELIUS CARMAN**---------- Associate Professor of Speech Arts

A.B., 1915, Beloit College; M.A., 1923, Northwestern University; Ph.D., 1935, University of Iowa. At San Diego State College since 1947.

**DeLAND, EDWARD C.**---------- Acting Instructor in Physics

B.S., 1943, South Dakota School of Mines and Technology. At San Diego State College since 1946.

**DEPUTY, ERBY CHESTER**---------- Professor of Education

B.A., 1922, University of Denver; M.A., 1926, Ph.D., 1929, Columbia University. At San Diego State College since 1931.

**DEVINE, WARREN R.**---------- Acting Instructor in Physics

B.S., 1936, Massachusetts Institute of Technology. At San Diego State College since 1946.

**DICKHAUT, FLORENCE LILLIAN SMITH** (Mrs. Charles A.)
Professor of English

B.A., Northwestern University; M.A., University of Chicago. At San Diego State College since 1917.

**EAGLE, JOHN E.**---------- Assistant Professor of Mathematics

B.S., 1930, Montana State College; A.M., 1940, Ed.D., 1947, Stanford University. At San Diego State College since 1946.

**EARNEST, SUE W.** (Mrs. L. E.)---------- Assistant Professor of English

B.A., San Diego State College; M.A., Ph.D., University of Southern California. At San Diego State College since 1947.

**EMERSON, ARTHUR T.**---------- Acting Assistant Professor of Mathematics

B.S., 1916, U. S. Naval Academy; one year graduate study at Naval War College. At San Diego State College since 1947.

**ENGLANDER, HERMAN S.**---------- Acting Instructor in Mathematics

B.S., 1939, California Institute of Technology. At San Diego State College since 1947.

ESTEP, LEWIS I.------------Acting Instructor in Geology

A.B., 1940, San Diego State College. At San Diego State College since 1946.

EVANS, ROSS A.------------Instructor in Chemistry

A.B., 1937, San Diego State College; M.A., 1939, University of California at Los Angeles, and one year graduate study at University of Southern California. At San Diego State College since 1946.

GELDREICH, EDWARD W.------------Assistant Professor of Psychology

B.A., 1933, M.A., 1935, University of Cincinnati; three years graduate study at the University of Chicago. At San Diego State College since 1947.

GENTRY, ADRIAN N.------------Instructor in Biology

Sc.B., 1934, Ottawa University; M.A., 1935, University of Kansas. Three years of graduate study at University of Washington and University of California. At San Diego State College since 1946.

GIBSON, ERNEST DANA------------Associate Professor of Commerce

B.S., 1936, University of Minnesota; M.A., 1939, Colorado State College of Education; Ed.D., 1944, New York University. At San Diego State College since 1947.

GLEASON, JOHN MORTIMER------------Assistant Professor of Mathematics

B.A., 1929, University of California at Los Angeles; M.A., 1930, University of California. One and a half years graduate study since 1930 at University of Southern California, University of California at Los Angeles and Claremont Colleges. At San Diego State College since 1930.

GRAHAM, JOHN LLOYD------------Acting Instructor in Mathematics

B.S., 1934, Ashland College; M.A., 1940, Kent State University. At San Diego State College since 1947.

GRESS, IRVIN S.------------Director of Occupational Guidance and Placement;
Assistant Professor of Psychology

A.B., 1922, George Washington University; M.Ed., 1938, University of Pittsburgh. Two years graduate study at Columbia University, Pennsylvania State College and University of Pittsburgh. At San Diego State College since 1946

GULICK, SIDNEY L., JR.------------Associate Professor of English

A.B., 1923, A.M., 1925, Oberlin College; Ph.D., 1931, Yale University. At San Diego State College since 1945.

HAMMACK, EDITH CHASTAIN------------Associate Professor of Education

B.A., San Jose State College. At San Diego State College since 1911.

HAMMACK, ISABELLA STEWART------------Assistant Professor of Education

B.A., M.A., University of California. One-half year graduate study since 192 at University of California. At San Diego State College since 1936.

HARCLEROAD, FRED F., JR.------------Director of Audio-Visual Education
Assistant Professor of Education

A.B., 1939, M.A., 1942, Colorado State College of Education; Ph.D., 1947, Stanford University. At San Diego State College since 1946.

HARVEY, DOROTHY R. (Mrs. F. A.)------------Assistant Professor in Botany

B.A., San Diego State College; M.A., University of Southern California. One year graduate study since 1928 at University of Southern California and University of Chicago. At San Diego State College since 1924.

HARWOOD, ROBERT DANIEL------------Professor of Zoology

A.B., 1920, Pomona College; Ph.D., 1928, Cornell University. At San Diego State College since 1928.

HASKELL, HARRIET------------Assistant Professor of English

A.B., Mills; A.M., Bryn Mawr; Ph.D., University of Wisconsin. At San Diego State College since 1940 excepting 1943-1945.

HELLYER, C. DAVID------------Assistant Professor of Journalism

B.A., 1936, The Principia; M.S., 1938, Columbia University. At San Diego State College since 1947.

HISCOX, ETHEL M.------------Assistant Professor of Music

Graduate of Oberlin College Conservatory; B.S., Columbia University; M.A. New York University. Voice study with Lila Robeson and Herbert Witherspoon of New York Metropolitan Opera Co. At San Diego State College since 1947.

**HOUSER, LOWELL D.**——Assistant Professor of Art

Diploma, 1924, Chicago Art Institute. Five years' special study since 1924 in Mexico, Yucatan, Haiti, and New York City. At San Diego State College since 1938.

**HUNTER, JAMES J., JR.**——Director of Secondary Education; Associate Professor of Education

A.B., 1932, Cornell University; M.S., 1936, Ph.D., 1940, Syracuse University. At San Diego State College since 1946.

**JACKSON, EVERETT GEE**——Professor of Art

B.A., 1930, San Diego State College. Three years special study in Mexico. M.A., 1939, University of Southern California. At San Diego State College since 1930.

**JOHNSON, FRANK LOUIS**——Associate Professor of English

B.A., 1928, M.A., 1929, University of Minnesota; Ph.D., 1934, University of Wisconsin. At San Diego State College since 1939.

**JONES, SYBIL ELIZA**——Associate Professor of Speech Arts

B.L., M.L., University of California. Two years special study since 1907. At San Diego State College since 1925. Deceased February 23, 1948.

**JOSEPH, LIONEL**——Assistant Professor of Chemistry

B.S., 1933, St. Louis University; M.S., 1934, Ph.D., 1937, Washington University. At San Diego State College since 1947.

**KAPLAN, OSCAR J.**——Assistant Professor of Psychology

A.B., 1937, M.A., 1938, University of California at Los Angeles; Ph.D., 1940, University of California. At San Diego State College since 1946.

**KEENEY, JOSEPH SUMNER**——Professor of English

B.A., 1921, Yale College; M.A., 1928, Ph.D., 1933, University of California. At San Diego State College since 1933.

**KENNEDY, CHESTER BARRETT**——Assistant Professor of English

B.A., 1927, Chico State College; M.A., 1939, Stanford University. Three years graduate study since 1928 at Stanford University and the University of California. At San Diego State College since 1937.

**KITZINGER, ANGELA M.**——Assistant Professor of Health Education

A.B., Barnard College; M.A., Teachers College, Columbia University. Year of additional work at Central School of Hygiene and Physical Education and at Gymnastic Institute, Ollerup, Denmark. At San Diego State College since 1945.

**KUWARTH, MADGE E.**——Instructor in Education

A.B., University of Washington; A.M., Teachers College, Columbia University. At San Diego State College since 1947.

**LAURITSEN, WILLIAM H.**——Professor of Health Education

A.B., 1923, M.A., 1929, University of Nebraska; Ph.D., 1939, Ohio State University. At San Diego State College since 1947.

**LeBARRON, EVANGELINE O. (Mrs. H. E.)**——Instructor in Commerce

B.A., B.S., University of Iowa; B.A., Sioux Falls College. One year of graduate work at Claremont Colleges, University of Southern California and University of Minnesota. At San Diego State College since 1946.

**LEIB, JULIUS**——Associate Professor of Music

Three years special study at Leipzig Conservatory. At San Diego State College since 1938.

**EONARD, CHARLES B.**——Professor of History

B.A., 1921, M.A., 1922, Ph.D., 1929, University of California. At San Diego State College since 1921.

**ESLEY, LEWIS B.**——Professor of History

B.A., 1920, Stanford University; M.A., 1923, Ph.D., 1933, University of California. At San Diego State College since 1924.

**INLEY, JAMES**——Assistant Professor of Education

Ph.B., 1927, University of Chicago; M.S., 1934, Ph.D., 1938, University of Southern California. At San Diego State College since 1945.

**LIVINGSTON, GEORGE ROBERT**--------------------Professor of Mathematic

B.S., 1910, M.A., 1922, University of California. One year graduate study sinc 1922 at University of California, University of California at Los Angeles, an University of Southern California. At San Diego State College since 1921.

**LUCIO, WILLIAM HOWARD**----------------Director of Elementary Education
Associate Professor of Educatio

A.B., 1934, M.A., 1937, Ph.D., 1944, University of California. At San Dieg State College since 1939.

**MACQUARRIE, WILLIAM D.**-------------Assistant Professor of Industrial Art

B.A., 1935, San Jose State College; M.A., 1938, Stanford University. One and one-half years of graduate study at the University of Southern California. At San Diego State College since 1947.

**MADDEN, RICHARD**-----Dean of Professional Education; Professor of Educatio

B.A., 1926, Nebraska (Peru) State Teachers College; M.A., 1930, Ph.D., 1931 Columbia University. At San Diego State College since 1939.

**MARCHAND, ERNEST L.**------------------------Associate Professor of English

B.A., and M.A., 1926, University of Washington; Ph.D., 1938, University of Wisconsin. At San Diego State College since 1946.

**MATSON, STEWART W.**--------------------------Acting Instructor in Physics

B.S., 1934, University of Chicago. One year of graduate study. At San Dieg State College since 1946.

**McCLINTIC, JOSEPH O.**----------------------Associate Professor of Economics

A.B., 1924, Central College; A.M., 1927, University of Missouri; Ph.D., 1940 University of Wisconsin. At San Diego State College since 1946.

**McCOLLOM, IVAN N.**-----------------------------Director of Summer Sessions;
Associate Professor of Psychology

B.A., 1930, Central Washington College of Education; B.S., 1931, M.S., 1932, University of Oregon; Ed.D., 1940, Colorado State College of Education. At San Diego State College since 1946.

**McGAUGHEY, JANET M. (Mrs. J. R.)**-------------Assistant Professor of Musi

B.M., M.M., University of Michigan. At San Diego State College since 1947.

**MENDENHALL, MARY**------Dean of Women; Professor of Educational Guidance

B.A., University of Colorado; M.A., University of Southern California; Ph.D., Yale University. At San Diego State College since 1939.

**MERRILL, JOHN E.**-------------------------------Assistant Professor of History

A.B., 1933, Stanford University; A.M., 1934, Harvard University. Two years graduate study at Stanford University. At San Diego State College since 1946.

**MERZBACHER, CLAUDE FELL**----------------Acting Instructor of Chemistry

B.S., 1939, University of Pennsylvania. At San Diego State College since 1947.

**MESSIER, LEONARD N.**----------------------------------Instructor in French

A.B., 1935, San Diego State College; M.A., 1936, Ph.D., 1946, University of California. At San Diego State College since 1946.

**MILLER, DOROTHY A.**--------------------------Acting Instructor in Chemistry

B.S., A.B., Southeast Missouri State Teachers College; M.S., State University of Iowa. At San Diego State College since 1947.

**MILNE, DAVID S.**------------------------------Assistant Professor of Sociology

A.B., 1932, University of California at Los Angeles; M.A., 1939, University of Southern California. Two years graduate study at University of Chicago. Formerly Field Representative of California Youth Authority. At San Diego State College since 1946.

**MOE, CHESNEY R.**--------------------------------------Professor of Physics

B.A., 1929, M.A., 1931, Stanford University; Ph.D., 1941, University of Southern California. At San Diego State College since 1931.

**MOORE, EDWENA B. (Mrs. E. J.)**---------------Acting Instructor in Education

B.A., San Diego State College. At San Diego State College since 1947.

**MORITZ, CHARLES E.**---------------------------Assistant Professor of Biology

A.B., 1932, Dartmouth College; Ph.D., 1936, University of California. At San Diego State College since 1946.

**IYERS, MABEL A.**------------------------------Assistant Professor of Biology

B.A., M.A., Pomona College; Ph.D., Cornell University. Post doctoral study at University of Southern California, University of California at Los Angeles, University of Wisconsin and Claremont Colleges. At San Diego State College since 1946.

**ASATIR, ABRAHAM PHINEAS**--------------------------Professor of History

B.A., 1921, M.A., 1922, Ph.D., 1926, University of California. At San Diego State College since 1928.

**ICHOLS, AMBROSE R., JR.**------------------Associate Professor of Chemistry

B.S., 1935, University of California; Ph.D., 1939, University of Wisconsin. At San Diego State College since 1939.

**ORLAND, CALVERT E.**---------------------------------Instructor in Biology

B.A., 1931, M.S., 1933, Pomona College. One-half year graduate study at University of California and Claremont Colleges. At San Diego State College since 1947.

**LSON, ANDREW C., JR.**---------------------------------Instructor in Biology

B.A., 1939, San Diego State College; M.S., 1942, University of Idaho. One year graduate study at University of California. At San Diego State College since 1946.

**PPENHEIMER, MAX, JR.**---------------------Instructor in Foreign Languages

Bès L, 1935, University of Paris; B.A., 1941, New York University; M.A., 1942, University of California at Los Angeles; Ph.D., 1947, University of Southern California. At San Diego State College since 1947.

**SBORN, CLARENCE G.**--------------Professor of History and Political Science

B.A., 1926, M.A., 1927, Ph.D., 1935, Stanford University. At San Diego State College 1928-1929; and since 1937.

**ANOSH, ANNA M.**--------------------------------Acting Instructor in Spanish

A.B., University of Denver. One year graduate study at University of Mexico, Centro de Estudios Historicos and University of California. At San Diego State College since 1946.

**ATTERSON, LENA E.**---------------------------------------Professor of Art

A.B., B.S., Ohio University; M.A., Columbia University. One year graduate study since 1918 in Berlin, Vienna, Paris, London. At San Diego State College since 1933.

**EASE, GLENN R.**----------------------------Assistant Professor of Psychology

A.B., 1915, Albion College; M.A., 1927, Ph.D., 1928, State University of Iowa. At San Diego State College since 1947.

**EIFFER, HERBERT C., JR.**----------Dean of Student Personnel and Guidance;
Associate Professor of Psychology and Guidance

A.B., 1928, University of California at Los Angeles; M.A., 1930, Ph.D., 1939, Stanford University. At San Diego State College since 1937.

**ERRY, FAY V. (Mrs. J. M.)**-------Director of Guidance for Provisional Students;
Associate Professor of Sociology

B.A., San Diego State College; M.A., Ed.D., University of Southern California. At San Diego State College since 1936.

**ETERSON, CHARLES E.**---------Dean of Men; Professor of Physical Education

A.B., 1928, San Diego State College; M.A., 1937, Claremont Colleges. At San Diego State College since 1921.

**FAFF, PAUL LEWIS**-----------------------Associate Professor of Speech Arts

B.A., 1929, Stanford University; M.A., 1937, University of Southern California. Two years study since 1937 at University of Southern California. At San Diego State College since 1931.

**HILLIPS, GEORGE L.**--------------------------Assistant Professor of English

B.A., 1931, Dartmouth College; M.A., 1932, Harvard University; Ph.D., 1937, Boston University. At San Diego State College since 1947.

**HILLIPS, WALTER THOMAS**-------------------------Professor of Spanish

A.B., 1925, University of Washington; M.A., 1926, Stanford University; Ph.D., 1943, University of Southern California. Graduate study at National University of Mexico, Institute of French Education, Middlebury College Italian School. At San Diego State College since 1927.

POST, LAUREN CHESTER.............................Professor of Geograp

A.B., 1924, M.A., 1931, Ph.D., 1937, University of California. At San Die State College since 1937.

POVENMIRE, E. KINGSLEY..................Assistant Professor of Speech A

B.S., 1929, Ohio State University; M.F.A., 1933, Yale University. At San Die State College since 1946.

PRUGH, EARL E.......................Acting Assistant Professor of Mathemati

B.S., 1899, Ohio Wesleyan University; M.A., 1923, Columbia University. San Diego State College since 1946.

RAGEN, KATHERINE M...........................Assistant Professor of Histo

B.A., Penn College; M.A., Bryn Mawr College; Ph.D., University of Wiscons At San Diego State College since 1947.

RIDOUT, LIONEL U.........................................Instructor in Histo

A.B., 1937, San Diego State College; M.A., 1940, and one and one-half yea graduate study at University of California. At San Diego State College sin 1946.

ROBINSON, DUDLEY HUGH.............................Professor of Chemist

B.A., 1927, Louisiana State University; M.S., 1932, University of Iowa; Ph. 1942, University of Southern California. At San Diego State College since 19

ROBINSON, EVELYN L...........................Instructor in Physical Educati

B.S., Mary Washington College of the University of Virginia; M.S., Universi of Southern California. At San Diego State College since 1946.

ROGERS, SPENCER LEE...............................Professor of Anthropolo

B.A., 1927, San Diego State College; M.A., 1930, Claremont Colleges; Ph. 1937, University of Southern California. At San Diego State College since 19

ROHFLEISCH, KRAMER J...........................Associate Professor of Histo

A.B., 1933, M.A., 1935, Ph.D., 1946, University of California. At San Die State College since 1947.

ROSS, MELVYN K...................................Assistant Professor of Chemist

A.B., 1939, San Diego State College; M.S., 1942, and two years graduate stu at University of Southern California. At San Diego State College since 19

ROWE, ROBERT D.................................Associate Professor of Chemist

A.B., 1931, Engineer in Engineering Chemistry, 1932, Ph.D., 1939, Stanfo University. At San Diego State College since 1946.

RUJA, HARRY..................Assistant Professor of Philosophy and Psycholo

A.B., 1933. University of California at Los Angeles; M.A., 1934, Universi of Chicago; Ph.D., 1936, Princeton University; one year post doctoral stu at University of California at Los Angeles. At San Diego State College sin 1947.

RUOCCO, ILSE H. (Mrs. L.)..............................Associate Professor of A

B.E., University of California at Los Angeles; M.A., Columbia University. San Diego State College since 1934.

RYAN, FREDERICK L............................Associate Professor of Econom

B.S., 1916, Tufts College; Ph.D., 1930, University of California. At San Die State College since 1946.

SCHEY, OLE..............................Acting Assistant Professor of Mathemat

B.S., 1924, M.A., 1932, and one year of graduate study at the University Minnesota. At San Diego State College since 1947.

SCHMOCK, JOYCE C. (Mrs. D.)..........................Instructor in Educati

A.B., San Diego State College. At San Diego State College since 1947.

SCHUTTE, WILLIAM H.................Assistant Professor of Physical Educati

B.S., 1933, University of Idaho, M.S., 1947, University of Southern Californ At San Diego State College since 1947.

SCHWARTZ, EVA H. (Mrs. H.)....................Acting Instructor in Chemist

B.S., M.S., and one and one-half years graduate study at University of Ca fornia. At San Diego State College since 1946.

SCHWOB, MARION LYON (Mrs. W. E.) - Associate Professor of Physical Education

B.A., University of Iowa; M.S., University of Southern California. At San Diego State College since 1934.

SCOTT, FRANK L. - Assistant Professor of Physical Education

A.B., 1931, Grinnell College; M.A., 1940, University of Michigan. At San Diego State College since 1947.

SELLMAN, HUNTON D. - Professor of Speech Arts

B.S., 1922, Purdue University; M.S., 1925, University of Arizona. Three and one-half years graduate study at University of California, University of North Carolina and Yale University. At San Diego State College since 1946.

SELLWOOD, JOHN J. - Assistant Professor of Physical Education

A.B., 1941, San Diego State College; M.S., 1946, and one year graduate study at University of Southern California. At San Diego State College since 1946.

SHANNON, FLORENCE S. (Mrs. E. L.) - Assistant Professor of Physical Education

B.A., University of California; M.S., University of Southern California. At San Diego State College since 1933.

SHOUSE, CLAUDE F. - Instructor in English

A.B., 1928, Georgetown College; M.A., 1941, University of Kentucky; one year graduate study at University of Pittsburgh and University of Southern California. At San Diego State College since 1946.

SJOSTRAND, THOR H. - Acting Instructor in Engineering

B.S., 1945, University of Texas. At San Diego State College since 1947.

SMITH, CHARLES ROBERTS - Assistant Professor of Physical Education

B.A., 1931, San Diego State College; one year graduate study at University of Southern California. At San Diego State College since 1933.

SMITH, CLIFFORD EDWARD - Professor of Astronomy

B.A., 1923, Carleton College; M.A., 1926, Swarthmore College; Ph.D., 1936, University of California. At San Diego State College since 1937.

SMITH, DEANE FRANKLIN - Assistant Professor of Music

B.Mus., 1931, M.Mus., 1939, Northwestern University. At San Diego State College since 1939.

SMITH, LOUIS E., JR. - Assistant Professor of Physics

A.B., 1938, San Diego State College; Ph.D., 1945, University of Washington. At San Diego State College since 1946.

SORENSON, GEORGE N. - Assistant Professor of Art

A.B., 1937, San Diego State College; M.A., 1946, University of Southern California. At San Diego State College since 1946.

PANGLER, JOHN A. - Assistant Professor of Chemistry

A.B., 1939, Ph.D., 1942, West Virginia University. At San Diego State College since 1946.

PORTSMAN, CHARLES C. - Assistant Professor of Physical Education

B.S., 1927, North Texas State Teachers College. One and one-half years graduate study at University of Southern California. At San Diego State College since 1947.

PRINGSTON, CHRISTINE - Associate Professor of Music

B.A., B.M., University of Redlands; M.A., University of Washington. Diplomée d'execution, Conservatoire Americain, Fontainebleau, France. At San Diego State College since 1930.

TEINMETZ, HARRY CHARLES - Associate Professor of Psychology

B.A., 1924, M.A., 1927, University of California; Ph.D., 1947, Purdue University. At San Diego State College since 1930.

TONE, HAMILTON L. - Acting Assistant Professor of Engineering

B.S., 1925, U. S. Naval Academy. Two and one-half years graduate study. At San Diego State College since 1947.

TONE, JOHN PAUL - Head Librarian; Professor of Library Science

B.S., 1926, Northwest Missouri State Teachers College; B.S., 1929, M.S., 1930, University of Illinois; Ph.D., 1945, University of Chicago. At San Diego State College since 1930.

STORM, ALVENA (Mrs. Eugene) ______________ Associate Professor of Geograp

A.B., A.M., University of California. Extensive travel and study in Europ Panama and United States. At San Diego State College since 1926.

SWANN, EDWIN G., JR. ______________ Acting Instructor in Physi

A.B., 1943, San Diego State College. At San Diego State College since 194

SWIGGETT, JEAN D. ______________ Assistant Professor of A

A.B., 1934, San Diego State College; M.F.A., 1939, University of Southe California. At San Diego State College since 1946.

TALBOY, RUTH A. ______________ Assistant Professor of Home Ar

B.S., Iowa State College; M.A., Stanford University. At San Diego Sta College since 1947.

TAYLOR, MERREL A. ______________ Instructor in Biolo

A.B., 1936, Indiana University; B.S.F., 1938, M.A., 1940, University of Mic igan. At San Diego State College since 1946.

TERHUNE, JOHN A. ______________ Acting Instructor in Physi

B.S., 1916, U. S. Naval Academy; M.S., 1929, Engineering School, Harva University. At San Diego State College since 1947.

TERRY, WILLIAM L. ______________ Professor of Physical Educati

A.B., 1930, Western Kentucky State Teachers College; M.S., 1932, India University; two years additional study at University of Kentucky and U versity of Illinois. At San Diego State College since 1946.

THEOBALD, JOHN R. ______________ Associate Professor of Engli

B.A., 1925, St. Catherine's College, Oxford University; M.A., 1928, Mansfie College, Oxford University; Ph.D., 1942, University of Iowa. At San Die State College since 1946.

TIDWELL, JAMES N. ______________ Associate Professor of Engli

B.A., 1929, Simmons University; M.A., 1933, University of Oklahoma; Ph. 1947, Ohio State University. At San Diego State College since 1947.

TOLLEFSEN, DOROTHY J. ______________ Instructor in Physical Educati

A.B., and one and one-half years graduate study at University of Californi At San Diego State College since 1946.

TORBERT, FRANCES B. (Mrs. H.) ______________ Assistant Professor of Commer

A.B., Stanford University; M.A., University of Southern California. One ye graduate work at Stanford University. At San Diego State College since 19 excepting 1943-1946.

TRAIL, MABEL COY ______________ Associate Professor of Engli

B.A., Parsons College; M.A., State University of Iowa; Ph.D., University Southern California. At San Diego State College since 1935.

TUCKER, GORDON H. ______________ Associate Professor of Biolo

B.S., 1931, M.S., 1934, University of South Carolina; Ph.D., 1934, Universi of North Carolina. At San Diego State College since 1945.

TURNER, MERLE B. ______________ Acting Assistant Professor of Psycholo

B.A., 1941, Willamette University; M.A., 1947, Stanford University. At S Diego State College since 1947.

VASCHÉ, JOSEPH BURTON ______________ Assistant Professor of Educati

A.B., 1931, San Jose State College; M.A., 1935, Ed.D., 1947, Stanford Unive sity. At San Diego State College since 1947.

WALKER, HILDE KRAMER (Mrs.) ______________ Assistant Professor of Germ

B.A., M.A., Northwestern University. At San Diego State College since 19

WALLER, JOHN O. ______________ Acting Instructor in Engli

B.A., 1941, San Diego State College. One year graduate study at Universi of California at Los Angeles. At San Diego State College since 1946.

WALLING, CURTIS R. ________ Assistant Professor of Mathematics and Engineeri

B.A., 1925, E.E., 1926, Stanford University. One and a half years gradua study since 1926 at Stanford University and University of Southern Californ At San Diego State College since 1931.

WARREN, TULLY E.------Instructor in Political Science

B.A., 1938, M.A., 1939, and two years of graduate study at Stanford University. At San Diego State College since 1947.

WATENPAUGH, FRANK M.------Assistant Professor of Commerce

A.B., 1916, Pomona College; M.A., 1931, University of Southern California. Two years graduate study since 1931 at University of Southern California and University of Oregon. At San Diego State College since 1935.

WATSON, DONALD R.------Dean of General Education
Associate Professor of Physical Science

B.A., 1924, B.S., 1925, M.A., 1927, Ed.D., 1940, University of Southern California. At San Diego State College since 1939.

WHITE, ALFRED E.------Registrar; Director of Educational Research; Associate Professor of Guidance

A.B., 1922, M.A., 1923, University of California; Ed.D., 1941, Stanford University. At San Diego State College since 1946.

WILLIAMS, SAMUEL H.------Acting Assistant Professor of Engineering

B.S., 1929, Massachusetts Institute of Technology. At San Diego State College since 1947.

WOLF, ERNEST M.------Instructor in Foreign Languages

Study at the Universities of Berlin, Paris, Muenster, Cambridge and Bonn. Ph.D., 1934, University of Bonn. Post doctoral study at Universities of Cambridge, California at Los Angeles, and Southern California. At San Diego State College since 1947.

WRIGHT, WILLIAM H.------Professor of Commerce

B.S., 1917, M.A., 1928, University of California, Ph.D., 1943, University of Southern California. At San Diego State College since 1921.

## ASSISTANT INSTRUCTORS

BENNETT, RICHARD------Assistant in Geography

A.B., 1948, San Diego State College.

BYRNE, CHARLES T.------Assistant in English; Director of Public Relations

A.B., 1948, San Diego State College.

CLARK, JAMES C.------Assistant in Biology

A.B., 1948, San Diego State College

COUVRETTE, JOHN F.------Assistant in Commerce

A.B., 1948, San Diego State College.

CRAWFORD, RONALD W.------Assistant in Biology

A.B., 1948, San Diego State College.

DALBY, JOHN P.------Assistant in Music

A.B., 1948, San Diego State College.

EMERSON, LAWRENCE L., JR.------Assistant in Physical Science

B.S., 1948, New Mexico College of Agriculture and Mechanic Arts.

GRASTY, GEORGE M.------Assistant in Biology

B.A., 1927, University of Texas.

LEWIS, URBAN J.------Assistant in Chemistry

A.B., 1948, San Diego State College.

RUSK, JAMES H., JR.------Assistant in Physics

A.B., 1948, San Diego State College.

ILVERNAIL, CHESTER J.------Assistant in Astronomy

A.B., 1948, San Diego State College.

TRADEWELL, SHIRLEY M.------Assistant in Biology

A.B., 1948, San Diego State College.

## LECTURERS

ANDREWS, JULIA G. (Mrs. F. S.) ------------------------------ Lecturer in A

A.B., Northwestern University; M.A., Columbia University; two years gra uate study at Teachers College, Columbia. At San Diego State College sin 1947.

BARNES, MELVIN W. ------------------------------ Lecturer in Psycholo

A.B., 1932, Greenville College; M.S., 1934, Ph.D., 1941, University of Illino At San Diego State College since 1947.

BLAKE, DEAN ------------------------------ Lecturer in Meteorolo

Meteorologist, U. S. Weather Bureau. At San Diego State College since 192

CONSIDINE, CHARLES R. ------------------------------ Lecturer in Commer

Industrial Engineer, Public Accountant; B.S., 1940, and two and one-ha years of graduate study, University of California. At San Diego State Colle since 1946.

DIRKS, JOHN H. ------------------------------ Lecturer in A

B.A., 1937, San Diego State College. At San Diego State College since 194

FARMER, MALCOLM F. ------------------------------ Lecturer in Anthropolo

B.A., 1940, University of Arizona. Director San Diego Museum of Man. At Sa Diego State College since 1947.

GELCHER, JOSEPH ------------------------------ Lecturer in Commer

Insurance Underwriter. At San Diego State College since 1946.

GOODWIN, JOHN H. ------------------------------ Lecturer in Commer

A.B., 1920, Miami University; one and one-half years graduate study at Sa Diego State College and the University of California. At San Diego Sta College since 1947.

HUFF, GEORGE D., M.D. ------------------------------ Lecturer in Health and Hygie

Practicing Physician. At San Diego State College since 1939.

HUTTON, WILLIAM E. ------------------------------ Lecturer in Chemist

A.B., 1938, University of California; one and one-half years graduate stu at University of California and University of California at Los Angeles. San Diego State College since 1947.

JAMES, CARL E. ------------------------------ Lecturer in Chemist

A.B., 1933, San Diego State College; one year graduate study at Universi of California. At San Diego State College since 1948.

JOHNSON, ALAN W. ------------------------------ Lecturer in Psycholo

A.B., 1937, University of California at Los Angeles; M.Ed., 1941, Universi of Cincinnati; one year graduate study at Columbia University. At San Die State College since 1947.

LAMDEN, CHARLES W. ------------------------------ Lecturer in Commer

Public Accountant. A.B., 1937, M.A., 1939, and two and one-half years gradua study at University of California at Los Angeles. At San Diego State Colle since 1946.

LEE, PETER A. ------------------------------ Lecturer in Philosop

B.A., 1935, Union College, Manila, P. I.; B.D., 1936, Union Theological Sem nary, Manila, P. I.; M.A., 1939, Ph.D., 1940, Yale University. At San Die State College since 1947.

LINDSLEY, BYRON F. ------------------------------ Lecturer in Commer

A.B., 1937, San Diego State College; LL.B., 1944, Georgetown Law Schoo one year graduate study at American University Graduate School. At Sa Diego State College since 1947.

McLEES, BERTRAM, JR. ------------------------------ Lecturer in Commer

Deputy District Attorney. A.B., 1931, San Diego State College; LL.B., 193 Stanford University. At San Diego State College since 1946.

REED, GEORGE O. ------------------------------ Lecturer in Speech Ar

A.B., 1944, San Diego State College. At San Diego State College since 194

TAYLOR, BYRON M. ------------------------------ Lecturer in Physical Scien

Instructor in City Schools. A.B., 1927, Stanford University; M.A., 193 Claremont Colleges. At San Diego State College since 1946.

WILEY, JOAN G. (Mrs. J. N.) ------------------------------ Lecturer in Psychology and Sociolo

B.A., M.S.S., University of Buffalo. At San Diego State College since 194

## MEDICAL STAFF

O. S. Harbaugh, M.D. ------------------------------ Medical Examin

Louise C. Lovekin, M.D. ------------------------------ Medical Examin

Marilynn M. Fenwick, P.H.N. ------------------------------ Nur

## ADMINISTRATIVE OFFICE STAFF

| | |
|---|---|
| nne T. Brown | Admissions Secretary |
| vadne T. Deardorf | Assistant Registrar |
| ertrude K. Dickinson | Senior Account Clerk |
| hirley I. Embery | Registrar's Office |

# CALENDAR 1949-1950

## SUMMER SESSION, 1949

Term I —June 20-July 29
Term IIA—August 1-19
Term II —August 1-September 2

## FALL SEMESTER, 1949-1950

| | |
|---|---|
| August 1 | Applications for admission must be filed on or before this date. |
| August 10 or 27 | Qualifying examinations for all entering students. (August 10, 12.30-4.30 p.m.) (August 27, 8.30 a.m.-12.30 p.m.) |
| September 10 | First day of orientation program. All entering freshmen are required to be on the campus from 8.30 a.m. until 3 p.m. All other new students are strongly urged to attend. |
| September 10 | Fundamentals test (8.30 a.m. to 12 m.).<br>General culture test (1 p.m. to 4.30 p.m.). |
| September 12 | Second day of orientation program. All entering freshmen are required to be on the campus from 8.30 a.m. until 3 p.m. All other new students are strongly urged to attend. |
| September 13-14 | Registration and payment of fees. |
| September 15 | Instruction begins. Late registration fee becomes effective. |
| September 26 | Last date for late registration. |
| September 29 | Applications for admission to teacher education, Little Theatre, 12 m. |
| November 4 | Last date for withdrawal from classes. |
| November 11 | Armistice Day—holiday. |
| November 24-26 | Thanksgiving recess. |
| December 9 | Last date for filing applications for mid-year graduation. |
| December 17 | Last day before Christmas recess begins. |
| January 3 | Classwork resumes. |
| January 18-25 | Semester examinations. |
| January 25 | End of first semester. |

## SPRING SEMESTER, 1949-1950

| | |
|---|---|
| January 3 | Applications for admission must be filed on or before this date. |
| January 14 | Qualifying examinations for all entering students (8.30 a.m. to 12.30 p.m.). |
| January 31 | Orientation program. All entering freshmen are required to be on the campus from 8.30 a.m. until 3 p.m. All other new students are strongly urged to attend. |
| January 31 | Fundamentals test (8.30 a.m.-12 m.).<br>General culture test (1 p.m. to 4.30 p.m.). |
| February 1-2 | Registration and payment of fees. |
| February 3 | Instruction begins. Late registration fee becomes effective. |
| February 13 | Last date for late registration. |
| February 23 | Applications for admission to teacher education, Little Theatre, 12 m. |
| March 31 | Last date for withdrawal from classes. |
| April 3-8 | Spring recess. |
| May 30 | Memorial Day—holiday. |
| June 1-8 | Semester examinations. |
| June 8 | End of second semester. |
| June 9 | Commencement. |

## SUMMER SESSION, 1950

Term I —June 19-July 28
Term II—July 31-August 18

# FUNCTIONS OF THE STATE COLLEGES

The state colleges have three major functions, namely: (1) To help the individual student to develop a well-rounded and adjusted personality; (2) to promote civic intelligence and competence; and (3) to create supplies of trained men and women, some to serve as teachers in the elementary and secondary schools, some to fill intermediate places of leadership, and some to transfer to graduate institutions to equip themselves to extend the frontiers of knowledge and to occupy the higher positions of leadership. In terms of publicly supported higher education, the state colleges and the university together make provision for the realization of all the essential objectives of higher education in our State.

To achieve their unique purposes the state colleges have developed and are improving offerings as follows:

1. Teacher education curricula for those students who plan to teach in the elementary school, the junior high school, and in secondary schools.
2. Preprofessional curricula.
3. Curricula of varying lengths in such fields as business, industry, governmental services, homemaking, and social service.
4. General education for students who take work which leads toward the bachelor of arts degree or to the higher professions through graduate work.
5. Guidance services to assist the individual student to plan his educational program and to make his college and life adjustments.
6. Extension courses in appropriate fields.

The state colleges accept the principle that higher education should be available to all capable high school graduates. The preservation and improvement of democracy depends upon the full and unhampered development of all potential citizenship and leadership resources. In keeping with this principle the state colleges maintain flexible entrance requirements. Each applicant is treated individually in terms of his potential capacity and his potential contribution and not in terms of past academic pattern or accomplishment alone.

The state colleges purposely maintain not only flexible entrance requirements, but also, adjustive curricula, and adequate and effective guidance and counseling services to promote the personal and educational development of worthy students. The state colleges modify traditional academic restrictions and provide new curricula and services whenever such modifications and additions seem to serve the legitimate desirable needs of individuals and society.

The promotion of civic intelligence and competence is the underlying aim of all activities on state college campuses. Special emphasis centers on warm personal relationships between instructors and students, on friendly counsel in time of need, and on the day-to-day routine of living in a friendly atmosphere. Because the majority of state college students live at home, it is possible to link together the college, the home, and the community in realistic democratic relationships.

The democratic controls exercised over the state colleges make them readily and effectively responsive to individual and community needs and encourage them continuously to make significant improvements in both curriculum and personal services. The state colleges are thus laboratories in which the facts and theories developed in research, in community living, and in daily association with students are reflected in the instructional program.

The state colleges plan their program of higher education so as to provide educational services inherent in the principle of equality of opportunity.

# THE COLLEGE

## LOCATION AND ENVIRONMENT

Renowned as a winter resort with a mild but invigorating climate, San Diego has become equally famous for its cool summers. High cultural standards in art, music, literature, and science create a stimulating environment for a college. Many of these advantages are to be found in the heritage resulting from the expositions of 1915-16 and 1935-36, including the buildings themselves, which portray the best types of Spanish colonial art and architecture. Housed in these buildings are the Fine Arts Gallery, exhibits in anthropology, natural history, and American archaeology, which are in many respects unsurpassed. The outdoor organ, the Ford Bowl, and the horticultural gardens make Balboa Park, in which all these facilities are located, world renowned. The Scripps Institution of Oceanography, operated by the University of California at La Jolla, gives opportunity for important cooperation in the biological sciences.

## BUILDINGS AND EQUIPMENT

On February 1, 1931, the college was moved to the new campus, located one mile north of the city's principal east-west boulevard, El Cajon Boulevard. The buildings are of Spanish-Moorish architecture which is well suited to the landscape and climate of this region. They include the Academic Building (which houses lecture halls, classrooms and administrative offices) ; the Science Building ; the Library ; the Little Theater ; the Music Building ; the Campus Elementary School ; Scripps Cottage (a social clubhouse for women students) ; the Cafe and Book Store ; and the Physical Education Building (a structure with adequate facilities for both men and women). The gymnasium contains a very fine basketball floor with stands that will accommodate 1,500 spectators. A fine concrete stadium, constructed in a natural site, has a seating capacity that is adequate for present needs. The open air theater, seating 4,200 persons, serves as a meeting place for large groups.

## FACILITIES FOR THE EDUCATION OF TEACHERS

The college maintains a modern elementary school on the campus where it has developed an extensive program for the education of elementary school teachers. The classroom-laboratory plan which calls for the use of work-rooms, the library, and shops affords unusual opportunities for the induction of students into teaching. By arrangement with the San Diego city and county schools, directed teaching is provided in the elementary and secondary schools.

## THE FACULTY

The professional education of the faculty places the college at the 97 percentile position among teacher education institutions of the Country. For listing and further details see the directory.

## THE LIBRARY

The library facilities of this college are noteworthy for an institution of its size. The library consists of well over 110,000 books and receives more than 700 different periodicals selected to meet the requirements of a modern educational institution. Professionally trained librarians are available to render assistance to students and faculty in their reading and reference work.

The Campus Elementary School Library, representing a collection of 14,000 volumes, possesses equipment and building facilities that are unique.

## ACCREDITATION

San Diego State College is a member of the Northwest Association of Secondary and Higher Schools, the American Association of Colleges for Teacher Education, and the Western College Association.

## LIVING ACCOMMODATIONS

Living arrangements for students whose homes are not in San Diego or within commuting distance are made through the offices of the Dean of Women or the Dean of Men. Women students are urged to live in the residence hall adjoining the campus. Careful consideration is given to study conditions, healthful living, and adequate social opportunities. Room and board may be secured for approximately $275 per semester, payable in four installments. Opportunities to reduce this figure by working a few hours each week are occasionally available. Reservations should be made in advance through the Manager of Quetzal Hall, 5192 College Avenue, San Diego 5, California. Single women students under the age of 21 who find other accommodations more desirable must file with the Dean of Women a statement from the parent or guardian.

## VETERANS' EDUCATION AND HOUSING

The college has been approved by various accrediting agencies to offer courses for veterans leading toward the A.B. Degree in some 19 major fields and to the general Secondary Credential upon the completion of a graduate year. A veterans' office is maintained on the campus to facilitate registration, aid in the establishment of benefits, afford special counseling services, and serve as an information center. A joint student-faculty committee on veterans' affairs serves as a clearing house for suggestions relating to policies and procedures affecting veterans.

Through the City of San Diego, 400 family units formerly under the jurisdiction of the Federal Public Housing Authority have been made available to the college for the housing of its married veterans. These units are located some eight miles from the campus proper at Aztec Terrace, midway between Old Town and Loma Portal. Applications for housing at Aztec Terrace are made through the office of the Dean of Men.

## STUDENT LIFE

A rich field of extracurricular activities is available to the student throughout his college life. The student is urged to select these activities carefully in order that he may profit by such extra-class experiences without lowering his standards of scholarship. The *Student Handbook*, available at the time of registration, gives information concerning activities which include organizations in every department of the college, and opportunities for individual and group experience in the social, athletic, fraternal, religious and governmental life of the campus.

## STUDENT HEALTH SERVICE

The Health Department is maintained for the protection and care of student health. A complete physical examination is required of each student upon admission to college. Careful attention is given to cases undergoing remedial treatment or to cases in which a modification of study load or amount of participation in physical activities seem advisable.

A college physician and school nurse are available for consultation and emergency treatment. Students who have been absent over three days because of illness should receive clearance from the Health Office before returning to classes.

A group plan for accident insurance is in operation for students who desire to participate.

## PERSONNEL SERVICES CENTER

The college offers the services of a trained staff to students who wish help in the solution of problems which are personal, social, academic, or occupational in nature. It is a program designed to help students gain the greatest possible advantage of their college experience. Agencies and facilities cooperating in the effort to assist students include the student health service, reading and study laboratory, the speech improvement program, mathematics clinic, the placement and occupational guidance service, and a staff of personal counselors. Students who wish to take advantage of these facilities may do so through the Personnel Services Center.

## VOCATIONAL REHABILITATION SERVICE

The Bureau of Vocational Rehabilitation, California State Department of Education, offers its service to students who have an employment handicap resulting from physical disability of any kind. Included are vocational counseling, the payment of tuition and fee, and the providing of textbooks without charge to the trainee. Details of the service may be obtained from the Registrar's Office.

## SCHOLARSHIPS

A number of scholarships for both men and women has been made available through the efforts of the alumni, civic organizations, student organizations, business and professional groups and individuals, and other friends of the college. Superiority in ability and achievement, strength of character, and worthiness from the point of view of need are the standards upon which selection is based. Scholarship aid is limited for the most part to students who have completed at least one semester at the San Diego State College. Except for athletics grants-in-aid, which are initiated through the Director of Athletics, scholarship applications are made through the office of the Dean of Women.

Unless otherwise stipulated, all scholarship awards are determined and announced by the faculty Committee on Loans and Scholarships in October of the college year. Applications for scholarships for the fall semester must be filed with the office of the Dean of Women prior to October 15th. The scholarships available for 1949-50:

**ALTRUSA CLUB.** Two scholarships of $50 each are made available annually by the Altrusa Club of San Diego. Applications are considered from women students enrolled in San Diego State College who are worthy and in need.

**AMERICAN ASSOCIATION OF UNIVERSITY WOMEN.** One scholarship of $100 is given each year in June to a graduating senior who will begin work in an accredited college or university toward a higher degree or credential. The scholarship is made available by the San Diego Branch of the American Association of University Women. Interviews with representatives of that organization are required.

**AMERICAN SOCIETY OF CIVIL ENGINEERS, SAN DIEGO SECTION.** A scholarship of $75 is awarded annually through the San Diego Section of the American Society of Civil Engineers to the engineering student selected for the scholarship on a basis of character, ability, personal qualities, and financial need. Nominations are made by the Engineering Department of the College. At least sophomore status is required for nomination.

**AMERICAN SOCIETY OF CIVIL ENGINEERS.** The American Society of Civil Engineers grants a scholarship of $75 to an engineering student of sophomore standing who shows promise in the field of civil engineering.

**ANONYMOUS (B).** A scholarship of $100 is given each year to be divided among students in financial need, at the discretion of the faculty Loans and Scholarships Committee. The committee gives consideration to scholastic attainment, financial need, and character.

**ANONYMOUS (E).** A $50 scholarship, awarded each semester through the Loans and Scholarships Committee, is made available by a public spirited citizen who prefers to assist a student majoring in science.

**ART GUILD.** The Art Guild of San Diego State College awards a $25 scholarship each year to a student outstanding in the field of art.

**ASSOCIATION OF CHILD EDUCATION.** The Association of Child Education makes available each year a $50 scholarship to a student in the Kindergarten-Primary program. The award is customarily made to an upper division student showing promise in a particular field who is in need financially.

**BLUE KEY.** Two scholarships of $50 each are awarded annually by Blue Key. One of these is granted to a needy lower division student of regular standing who has actively participated in student affairs, and the second to an entering freshman who has an outstanding record of achievement in high school activities.

**CAP AND GOWN.** Two $50 scholarships are awarded annually to upper division women students who have attended San Diego State College for at least one year previous to date of making application and who have maintained at least a "B" average in scholarship for their entire college career. The scholarships are made available through the San Diego State College chapter of Cap and Gown.

**CHAMBER OF COMMERCE MUSIC SCHOLARSHIPS.** Several scholarships of $30 per semester have been made available by the San Diego Chamber of Commerce to players of the following instruments in the college band: Solo cornet, solo clarinet, first French horn, first trombone, first baritone, first Sousaphone, and first drum. Applications are filed directly with the Music Department.

**DAUGHTERS OF THE AMERICAN REVOLUTION.** Two scholarships of $25 each are presented each spring, one to a young man and the other to a young woman outstanding in citizenship and Americanism. Applicants should have at least a "B" average in scholarship, should be able to demonstrate need for financial assistance, and should have junior standing in the college when selected. The scholarships are made available through the Daughters of the American Revolution.

**DELTA SIGMA THETA (Beta Mu Chapter).** From time to time, Delta Sigma Theta awards scholarships of varying amounts to selected applicants.

**FACULTY DAMES.** Two scholarships of $50 each are given annually to deserving women students selected by the Loans and Scholarships Committee.

**FOOTLIGHTS THEATRE, INC.** On various occasions awards of $50 each are made to students for outstanding achievement in dramatic arts.

**INTERSORORITY COUNCIL.** A $50 scholarship, $25 each semester, is made available each year by the Intersorority Council of San Diego State College to the sorority woman applying with the highest grade point average. The applicant must be an upper division student carrying at least twelve units, and must have attended San Diego State College at least one year previous to the date of application.

**MARCY, MAY FINNEY.** Scholarships of varying amounts are awarded from time to time by the committee administering the May Finney Marcy Fund to selected San Diego State College students, preferably members of Cap and Gown. Inquiries concerning eligibility for these awards should be addressed to the Dean of Women.

**NATIONAL CITY ELEMENTARY TEACHERS' CLUB.** One $50 scholarship is awarded to a senior student majoring in elementary education. The recipient must have at least average grades and should preferably be a graduate of Sweetwater High School.

**NORTH PARK KIWANI-ANNES.** One scholarship of $50 a semester is awarded by the North Park Kiwani-Annes to a male student preparing for teaching. The recipient must have at least junior standing at the time of selection.

**P.E.O. (ER Chapter).** An award of $15 a month is granted by the ER Chapter of P.E.O. to a woman student enrolled in the college.

**SAN DIEGO BASEBALL CLUB.** An annual scholarship of $250, made available by the San Diego Baseball Club, is distributed to San Diego State College athletes with a principal interest in baseball. Recipients are selected by the Director of Athletics of the college.

**SAN DIEGO CITY TEACHERS ASSOCIATION.** Two scholarships of $50 each are presented each year to prospective teachers with no restrictions as to college year. Applications are made on forms supplied by the San Diego City Teachers Association and are reviewed by the association's committee on scholarships. Personal interviews are required.

**SAN DIEGO COUNTY TEACHERS ASSOCIATION.** Two $50 scholarships, made available annually by the San Diego County Teachers Association, are awarded to students in the field of elementary education. Selections are made by the faculty Loans and Scholarships Committee.

**SAN DIEGO ENGINEERS CLUB.** A scholarship of $50 is given each semester by the San Diego Engineers Club to a student majoring in engineering who shows particular ability in that field. The Loans and Scholarships Committee recommends three candidates from all students applying, which candidates in turn are interviewed by the members of the Engineers Scholarship Committee, who make the final selection.

**SKULL AND DAGGER.** Skull and Dagger of the San Diego State College awards $25 annually to each of two students judged to possess superior talent in drama. Selections are made by Skull and Dagger.

**TAU ZETA RHO ALUMNAE.** A scholarship of $50 is given annually by the alumnae chapter of the Tau Zeta Rho sorority of the San Diego State College to a nonsorority woman student enrolled in either her junior or senior year of teacher training.

**THEATRE GUILD.** One or two $25 awards are made each year by the Theatre Guild of the San Diego State College. The guild selects students outstanding in theatrical work.

**WALKER, RALF MARC.** A scholarship in the amount of $500 is made available by the Walker-Scott Corporation in memory of the late Mr. Ralf Marc Walker to a woman student majoring in merchandising or retail trade at the San Diego State College. The scholarship is presented to a girl in Walker's Hi-Debber Council each year. The total scholarship is deposited in the San Diego State College Foundation and is handed to the recipient at the rate of $50 a semester for each of the first three years and $100 a semester for the two senior semesters.

**WEINBERGER, HENRY, INTERFAITH SCHOLARSHIP.** A scholarship of $100 is awarded in April of each year to the student of any religious faith enrolled at the San Diego State College who is judged to have done the most to further interfaith ideals among the students of the college during the year of the award. This scholarship is made available by Mr. Henry Weinberger of the Lasher Lodge of B'nai B'rith.

**WOMEN'S AUXILIARY OF SAN DIEGO DENTAL SOCIETY.** An annual award of $100 is made available by the Women's Auxiliary of San Diego Dental Society to an outstanding male student in pre-dentistry.

**WOMEN'S CIVIC LEAGUE.** The Women's Civic League sponsors an annual award of $50 to a deserving woman student selected by the League.

## LOANS

Both long-term and short-term loans are available to students who have attended the San Diego State College for at least one semester and who have demonstrated ability to do satisfactory college work. Applications for loans are made to the Committee on Loans and Scholarships through the offices of the Dean of Men or Dean of Women.

# ADMISSION AND REGISTRATION

## GENERAL ADMISSION REQUIREMENTS

High school graduates and other applicants possessing equivalent preparatio may be admitted to this college upon evidence of fitness to profit by college instruction such fitness to be shown by previous scholastic records, by evidence of good mora character and personal qualifications, and by satisfactory scores on tests which th college may require. Due to crowded conditions the college probably will have to refus all qualified applicants who do not file application blanks and official transcripts prio to the dates indicated in the calendar.

## ADMISSION OF HIGH SCHOOL GRADUATES

(1) A high school transcript must be presented showing satisfactory scholarship and (2) applicants must demonstrate readiness for college instruction by making satisfactory scores on such tests as the college may designate.

**Regular status** will be granted if the student has earned A or B grades in not les than 16 semester courses during the tenth, eleventh, and twelfth grades.

**Provisional status** will be granted if the student has earned A or B grades i not less than 12 semester courses during the tenth, eleventh, and twelfth grades Individuals who fall slightly below the above standard may be admitted to provisiona status if qualifying examination scores indicate probable success in college. Transfer t regular status may be attained upon completion of 24 or more units of college worl with grade average of C or better. Full credit is allowed for all regular college worl completed.

**Adult special status** may be granted an applicant who is over 21 years of ag or is a veteran of World War II, provided that he demonstrates through qualifyin examinations satisfactory ability to do college work. Such students may be transferre to regular status upon removal of all matriculation deficiencies and after completio of 24 or more units of college work taken in residence with grade average of C o better. Full credit is allowed for all regular college work completed.

## ADMISSION BY EXAMINATION

Certificates of successful examination before the College Entrance Examination Board will be accepted when candidates cannot meet the above scholarship requirements.

## SPECIAL STUDENTS

In exceptional cases, persons over 21 years of age or veterans of World War II who do not fully meet the college entrance requirements may be admitted as special students upon presentation of evidence showing good character and ability to do satisfactory work at this college. Non-high school graduates may be required to complete, in addition to the usual requirements for the A.B. Degree, three semester units of college work for each two semester courses lacking high school graduation. College graduate students who do not qualify for admission to graduate status (see admission to graduate status) may be admitted as special graduate students.

## ADMISSION WITH ADVANCED STANDING

Credit earned in recognized institutions of collegiate grade will be evaluated and advanced standing allowed accordingly toward the graduation requirements of this institution. Applicants must show an average grade of C or better for all college work, for the last college attended, and for the last semester of attendance in order to qualify for regular status. A student who enters with advanced standing is one who has completed at least 12 units of passing work in another collegiate institution. However, no applicant may disregard his collegiate record and apply for admission only on the basis of his high school work. No credit earned after a student has accumulated 64 units of work in all types of collegiate institutions may be transferred from a junior college.

Students seeking admission with advanced standing must furnish complete transcripts for all work attempted beyond the eighth grade. If an official evaluation is desired, a deposit of $2 must accompany the application and be received together with all transcripts at least 30 days before the date of registration. At least 45 semester units must be completed before a student may apply for an evaluation.

## ADMISSION TO GRADUATE STATUS

A student who holds a bachelor's degree from an accredited institution may be admitted upon application and the filing of official transcripts of all college work. A student not meeting these requirements in full may apply for admission as a special student.

Admission to graduate courses (numbered 200 to 299) is restricted to students (1) who hold a standard bachelor's degree from an accredited institution, (2) who receive a satisfactory score on graduate entrance examinations, (3) who meet the prerequisites for specific courses, and (4) who qualify under one of the following categories:

a. Admission to candidacy for the General Secondary Credential; or
b. Maintenance of a satisfactory grade point average in all postgraduate work; or
c. The course concerned is the first course taken from those numbered 200 to 299.

## EXTENDED DAY PROGRAM

In order to meet the needs of adults in the community for certain types of college work, this institution offers late afternoon and evening classes under an extended day program. Most of these courses are on the upper division and graduate levels and all carry full college credit. Among the fields in which work is offered are: Education, commerce, personnel work, and engineering. Courses may be set up to meet the need of a particular group who desire special instruction. Requests for such courses should be made through the office of the Dean of General Education. A special bulletin describing the current offerings is issued each semester from the above office.

## AUDITORS

Properly qualified persons may apply for admission to attend classes as auditors. Such students pay the same fees as those who take equivalent work for credit.

## TESTS REQUIRED AT REGISTRATION TIME AND LATER

1. A physical examination is required of all students entering or reentering the college after an absence of one semester or more, except that students carrying 6 units or less are not required to take the physical examination. This examination is scheduled during the orientation and registration period.

2. All entering students are required to take a college aptitude test. Exceptions may be made for graduate students and for those who register for five units or less and for those registered only in Extended Day classes.

3. All entering freshmen and college transfer students who present less than a minimum of 15 units of college credit must take the regular battery of achievement and aptitude tests. The freshman English course which a student will take will be determined by results of these tests.

4. Students entering teacher education should see admission requirements outlined under Admission to Teacher Education.

## LATE REGISTRATION

Students who register after the scheduled registration days are subject to a late registration fee of $2. Students may be accepted for late registration with the approval of the Reigstrar within two weeks after scheduled registration days. Registration will be closed after that date. Students failing to complete all registration requirements within the period allowed, as announced in registration instructions, are subject to cancellation of registration.

## CHANGES IN REGISTRATION

Petitions for changes in program may be secured at the Registrar's office. A fee is charged for changes in program after registration books are filed.

# FEES AND EXPENSES

## PROBABLE EXPENSES FOR ONE SEMESTER

An estimate of the expense of attendance for one semester is given below. estimate is made as to the cost of clothing, or other personal items, since these figu vary with the demands of the individual. Laboratory fees are additional.

### A Partial Estimate of Expenses

One Semester

| | *Minimum* | *Maxim* |
|---|---|---|
| Fees and deposits | $22.50 | $30.50 |
| Books | 18.00 | 30.00 |
| Board and room | 275.00 | ---- |
| Transportation, lunches, incidentals | 20.00 | 60.00 |
| Miscellaneous | | 5.00 |

Before enrolling in college, the student should possess sufficient resources to m the minimum expenses for one semester. A limited amount of clerical work in offi and in the library may be offered from time to time but ordinarily it is not sufficien remunerative to reduce expenses materially.

## LIST OF FEES AND DEPOSITS (SUBJECT TO REVISION)

### Enrollment Fees and Deposits

(Payable at time of registration)

| | |
|---|---|
| By all students: | |
| Tuition (auditors pay same fees as other students): | |
| Regular students (carrying over 5 units) | $6. |
| Limited students (carrying 5 units or less) per unit | 2. |
| Materials and service: | |
| Regular students | 6. |
| Limited students per unit | . |
| Student activity fees (not a State Fee): | |
| Regular students | 10. |
| Limited students | 3. |
| Associated Students Group Accident Insurance | 2. |

### Miscellaneous Fees and Deposits

(Fees payable when service is rendered)

| | |
|---|---|
| Change of program | $1. |
| Failure to meet administratively required appointment or time limit | 2. |
| Evaluation of records for non-matriculated students | 2. |
| Late registration | 2. |
| Transcript of record (1st copy free) | 1. |

### Graduation Fees

| | |
|---|---|
| State teaching credentials (each credential) | $3. |
| Diploma | 1. |

The credential fee is collected through the college by cashier's check or post offi money order made payable to the State Department of Education.

# GENERAL REGULATIONS

## INFORMATION

All inquiries relative to the college should be directed to the Registrar's Office.

## NUMBERING OF COURSES

Courses numbered 1 through 99 are in the lower division; those numbered 100 through 199 are in the upper division; and those numbered 200 or over are in the graduate division. Courses numbered 300 or over are professional education courses on the graduate level.

## SCHOLARSHIP, GRADES, AND GRADE POINTS

The following grades are used in reporting the standing of students at the end of each semester: A, excellent; B, good; C, fair; D, passed; F, failed; I, incomplete; E, conditioned (may be made up to grade of D); Cr, credit (without grade); WP, withdrawal passing; and WF, withdrawal failing.

Grades of I or E must be made up by the end of the next semester; otherwise the grade of F will be recorded.

Grade points are assigned as follows: Grade A, 3 points per unit; B, 2 points per unit; C, 1 point per unit; D, no point per unit; F or WF, no point per unit. Grades of I, Cr, or WP are disregarded in computing grade points. The grade of E is treated as no point per unit until a final grade is recorded. The number of grade points a student has earned in a subject is determined by multiplying the number of points he has received by the number of units allowed. The grade point average is determined by dividing the grade points earned by the number of units attempted. A student must earn at least a C average in all work undertaken at the college to qualify for a degree or a transcript of record with recommendation to another collegiate institution. Any course may be repeated, but not for additional credit; however, only the second grade earned is considered in the student's average.

## CLASS, UNITS OF WORK, AND STUDY LIST LIMIT

Students who have completed 0 to 29 units of work are classified as freshmen; 30 to 59 units as sophomores; 60 to 89 units as juniors; and 90 or more as seniors.

A unit of credit represents 50 minutes of lecture or recitation combined with two hours of preparation per week through one semester, or three hours of laboratory or field work in the case of laboratory credit.

Students are not ordinarily permitted to enroll for more than 16 units * for credit toward graduation. A normal semester's program is 15 units.

Certain exceptions to this rule exist. If during the preceding semester the student has carried at least 12 units *: (1) If a grade point average of at least 1.5 was earned, 17 units * may be carried for credit toward graduation; and (2) if a grade point average of 2.0 (B) was earned, 18 units * may be carried.

Exceptions to these regulations may be secured only through a petition to the Scholarship Committee.

No student may register for less than 12 units (the minimum full-time load) without the approval of the Dean of Arts and Sciences or the Dean of Education.

---

* In addition to the required one-half unit physical education activity courses.

# PROBATION AND DISQUALIFICATION

## PROBATION

Any student whose scholarship record shows a cumulative deficit of 9 or more grade points below a C average for all college work undertaken will be placed on probation. Probationary status may be continued provided that the student does not increase his grade point deficiency. Probationary status will be continued until the student reduces his grade point deficiency to 8 or less.

## DISQUALIFICATION

Any student on probation whose scholarship falls below an average grade of C in any single semester is disqualified from further attendance at the college.

Any student who fails to pass two-thirds of the units attempted during any single semester is disqualified from further attendance at the college.

A disqualified student may be reinstated after an interval of one semester for reasons satisfactory to the Board of Admissions. Applications for reinstatement must be made on forms which may be obtained at the Office of the Registrar.

# WITHDRAWALS FROM CLASS

Forms for withdrawal from class may be obtained at the Registrar's Office. If a student withdraws from class during the first seven weeks of a semester, a grade of WP will be recorded upon his permanent record for each class which he has dropped. If he withdraws during the remainder of the semester, either an I or a WF will be recorded unless a grade of WP is approved by the proper dean. A grade of I automatically becomes an F unless the work is completed by the end of the next semester of attendance.

# TRANSCRIPTS OF RECORD

Students may secure upon request one transcript of record without fee. Thereafter, a fee of $1 is charged for each transcript secured upon request. Once a student has matriculated in this college, transcripts from other schools will not be returned, or copies of them made. No fees are charged for transcripts required for military purposes.

Transcripts in the possession of students are to be regarded as unofficial records.

# EVALUATIONS

An evaluation of credit for graduation should be requested by a student as soon as 45 units have been earned. Applications may be made at the Office of the Registrar. Students having met all admission requirements for the arts and sciences or teacher education curricula, who are carrying 6 units, or more, of college work in a regular semester, will not be charged the evaluation fee.

# ELIGIBILITY FOR DIRECTED TEACHING

No student shall be eligible for directed teaching (Education 116) leading to the Kindergarten-Primary, General Elementary, General Junior High, and Special Secondary Credentials who has not completed 75 units, been admitted to Teacher Education, and whose entire record, as well as for the preceding semester, does not average at least a 1.2 grade.

No student shall be eligible for directed teaching (Education 316) leading to the General Secondary Credential who has not been admitted to the teacher education program prescribed for admission to candidacy for this credential.

# THE HONORS GROUP

All students who at the end of the sophomore year have attained a grade-point average of 2.5, and such others as have attained a high average in the department in which their major is selected, and who have received the recommendation of that department and the consent of the Committee on Honors, may if they so elect, constitute an honors group, for special treatment in their major subject.

Such students, so far as the facilities of the department and the best interests of the students under its charge allow, shall be treated as befits their individual needs and as their individual capacities warrant. They shall be eligible to enroll in honors or special study courses, although credit in such courses shall be limited to 5 units a semester. They shall not be held to regular attendance in the established courses of their departments if, in the opinion of the instructor, the course requirements can be met through special assignments and examinations or by satisfactory performance in the regular examinations in the course. With the consent of the major department, requirements concerning minors and specific courses or sequences in the major may be set aside. Each honor student shall be assigned to a member of his major department for advice and direction.

Students in the honors group who fail to take advantage of the opportunities there offered may at the end of any semester be transferred by the department to the general course. Students in the general course who show unusual capacity, upon recommendation of the department and the Committee on Honors, may at the end of any semester, be transferred to the honors group if such transfer appears practicable.

Students who wish to apply for entrance into the Honors group may do so by filling out cards to be obtained from the Registrar's Office. The application should be approved by the major department and by the Honors Committee within the first week of registration. Units earned by students doing individual study under this plan will be recorded under the symbol 166 and will be subject to the formulated rules dealing with limitations of student load.

## THE DEGREE WITH HONORS AND WITH DISTINCTION

Upon recommendation of the Committee on Honors, graduation with honors shall be granted to the upper 10 percent of the graduating class. Each department shall determine which students it will recommend for distinction in the major field at graduation, and report its recommendation to the Committee on Honors for transmission to the faculty.

## EXAMINATIONS

No final examinations shall be given to individual students before the regular time. Any student who finds it impossible to take a final examination on the date scheduled must make arrangements with the instructor to have an incomplete grade reported and must take the deferred final examination not later than the end of the first semester of attendance following that in which the incomplete was given. No exception shall be made to this rule without the approval of the Dean of Arts and Sciences or the Dean of Education and the instructor concerned.

## CREDIT FOR EXTENSION COURSES

The amount of credit for extension and correspondence courses acceptable in fulfillment of the requirements for the Bachelor of Arts Degree will depend upon the nature of the courses, the quality of the work done, and the student's preparation for work in the field of the course. The college ordinarily limits credit to such courses as have been approved, and the total of such acceptable credit to 12 units. **Extension courses are not accepted for graduate credit.**

## CREDIT GRANTED FOR MILITARY SERVICE

Six units of lower division elective credit will be granted to students who have served in the armed forces of this country upon the completion of the prescribed basic training program before January 1, 1947. Documentary evidence bearing the signature of the proper commanding officer must be filed before credit will be accorded to the student.

Additional units of credit may be granted to students who can document the fact that they have completed officer's or other specialized training, and have been assigned to active military duty before January 1, 1947.

Completion of one semester's work, or 12 units, at this college after military service, is required before military credit will be granted.

# THE BACHELOR OF ARTS DEGREE

## GENERAL REQUIREMENTS FOR THE BACHELOR OF ART DEGREE IN TEACHER EDUCATION AND IN ARTS AND SCIENCES

### TYPES OF CURRICULA

San Diego State College offers two types of curricula leading to the A.B. Degre

(1) The curricula leading to the California teaching credentials,
(2) The arts and sciences curricula.

### GRADUATION REQUIREMENTS

(a) A minimum of 120 semester units of college work representing a four-ye course is required for graduation.

(b) Twenty-four units of work, ordinarily taken in the senior year, must earned at this college.

(c) At least a C average in scholarship must be maintained in all college wo attempted, in all work within the major field, and in all work taken at this colleg

(d) At least 40 units must be completed in the upper division, 30 of which mu be earned after all lower division requirements have been satisfied.

(e) Student must comply with the State requirements in United States Const tution, American history, institutions, and ideals.

(f) All major, minor, and specific curriculum requirements must be met.

## LOWER DIVISION REQUIREMENTS FOR ALL CURRICULA

| | *Uni* |
|---|---|
| Physical Education | 2 |
| Health Education 21 | 2 |
| English | 6 |
| Psychology | 3 |
| Foreign Language (not required in commerce, engineering, or in teacher education in the elementary, junior high and special secondary curricula) | 0–1 |
| Mathematics A and B, 6 units, or high school algebra and geometry | 0– |
| Social Sciences | 12 |
| Natural Sciences | 12 |
| Electives to make total of 60 units, including lower division preparation for the major and minor. | |

### EXPLANATION OF LOWER DIVISION REQUIREMENTS

**English**

The English requirement should be satisfied in either the freshman or sophomo year. Unless departmental regulations specify other courses, the student should satis this requirement by taking English 1 and either English 2 or any optional cour approved by the English Department. English majors are not required to take En lish 2. The prerequisite for English 1 is a passing mark in the English A qualifyi examination or completion of the course in English A. Credit in English A may be us toward graduation but not in satisfaction of the 6-unit lower division requirement English.

**Psychology**

The requirement in psychology should ordinarily be satisfied in the freshma year by completion of Psychology 1.

### Foreign Languages

At least 10 units in one foreign language are required in the lower division except that no language is required in commerce, engineering, or in teacher education in the elementary, junior high, and special secondary curricula. No degree credit is given for only the beginning college semester of a foreign language (except Spanish 70).

*Reduction of unit requirement.* High school work completed with grade of C or better for the final semester of a year course in foreign language may meet the foreign language requirement in part. Each year course completed in high school in any foreign language is counted in satisfaction of 3 units of this requirement. A total of 9 units so credited will satisfy in whole the foreign language requirement. If two or more years have elapsed since the completion of a high school course in any foreign language, the final year of the high school course may be repeated for college credit. Foreign language courses for which a D grade was received in the final semester of a year course in high school may also be repeated for college credit. The student should register in a college foreign language course for credit as follows:

| *Year courses completed in high school* | *If completed with grade of C or better, register as follows* | *Maximum credit allowed toward graduation* |
|---|---|---|
| 1 year | Course A, 5 units | 2 units |
| 2 years | Course B, 5 units | 4 units |
| 3 years | Course C, 3 units | 3 units |
| 4 years | Course D, 3 units | 3 units |

| *Year courses completed in high school* | *After lapse of 2 years or D grade, may register in* | *Maximum credit allowed toward graduation* |
|---|---|---|
| 1 year | Course A, 5 units | 5 units |
| 2 years | Course A, 5 units | 2 units |
| 3 years | Course B, 5 units | 4 units |
| 4 years | Course C, 3 units | 3 units |

### Social Sciences

Twelve units, at least 8 of which are in the lower division, selected from two or more of the following fields in social science are required: anthropology, economics, geography (except 1, 3 and 4), history, political science, social science, and sociology. Eight of the 12 units must be in the lower division. (Note: Courses in commerce, home economics, library science, philosophy, or psychology may not be used in satisfaction of this 12-unit social science requirement.)

*Reduction of unit requirement.* Two high school semester courses in the fields of history, political science, sociology, and economics taken in the senior year with grades of B or better may be used to reduce the 12 unit social science requirement to 9 units.

### Natural Sciences

Twelve units, at least 8 of which are in the lower division, selected from courses representing each of the following groups, are required:

*(a) Life sciences.* Courses must be selected from one of the following fields: bacteriology, biology, botany, physiology, or zoology. This requirement may be satisfied by completion of a year course in high school or by a semester course in college (recommended: Biology 1). If laboratory credit is desired, select from life science courses listed in section (c) below.

*(b) Physical sciences.* Courses must be selected from the following fields: astronomy, chemistry, Geography 1 or 3 (but not both), geology, physical science, or physics. A semester course in college in any one of these subjects will satisfy this requirement. This requirement may also be satisfied by completion of a year course in high school chemistry or physics. (Students who expect to satisfy this requirement by a physical science course in college should register for the following: those who have not completed a year course in high school in either physics or astronomy, should take Physical Science 1A; those who have not completed a year course in high school in either chemistry or geology should take Physical Science 1B.) If laboratory credit is desired, select from physical science courses listed in section (c) below.

*(c) Laboratory course in natural sciences.* This requirement may be satisfied by completion of a year course in high school with grade of C or better for the final semester of the junior or senior year in one of the following fields: botany, chemistry, physics, or zoology. The laboratory requirement may be satisfied by one of the following college courses:

*Life Sciences*

Bacteriology 1
Biology 10A and 10B
Botany 2A or 2B
Physiology 1C
Zoology 1A or 1B

*Physical Sciences*

Chemistry 1A or 1B
Chemistry 2A and 2B
Geology 1A and 1B
Physics 1A and 1B or 1C and 1D
  or 4A and 4B or 4B and 4C
Physics 2A, 2B, 3A, and 3B
Astronomy 1 and 9 and 10

*Reduction of unit requirements.* The 12 unit natural science requirement may be reduced to 9 units by completion of a high school year course in biology, botany, chemistry, physics, physiology, or zoology taken in the senior year with grade of B or better for the final semester.

### Mathematics

Mathematics A (elementary algebra) and Mathematics B (plane geometry) are required. This requirement may be satisfied by completion of a year course in high school in algebra and a year course in plane geometry with grade of C or better for the final semester of each course. College credit will be granted for completion of Mathematics A or B unless the corresponding high school course was completed with grade of C or better in which case the repeated course will be classified as a "refresher" course carrying no college credit. Students having one semester high school credit in trigonometry, intermediate algebra or solid geometry may repeat the corresponding course in college for 1½ units of college credit.

### Lower Division Preparation for the Major and Minor

For description of requirements for majors and minors in teacher education, see section entitled: Upper Division Requirements for the Bachelor of Arts Degree in Teacher Education.

For description of requirements for majors and minors in arts and sciences, see section entitled: Upper Division Requirements for the Bachelor of Arts Degree in Arts and Sciences. Specific requirements for each major and minor are listed in connection with the description of courses in each major field. See section entitled: Announcement of Courses.

# UPPER DIVISION REQUIREMENTS FOR THE BACHELOR OF ARTS DEGREE IN ARTS AND SCIENCES

## MAJORS IN ARTS AND SCIENCES

The arts and sciences curricula lead to the Bachelor of Arts Degree with majors in **art, chemistry, commerce, economics, engineering, English, French, geography, history, life science, mathematics, music, physics, political science, psychology, sociology, Spanish, speech arts, and zoology** and qualify for graduate work in these fields in recognized American colleges and universities. Completion of the requirements of these curricula also enables the graduate to satisfy undergraduate requirements for the general secondary credential which, with graduate work, will enable the holder to teach in a senior high school or junior college.

## MINORS IN ARTS AND SCIENCES

Minors must be established in one of the following fields: **anthropology, art, botany, chemistry, commerce, comparative literature, economics, education, engineering, English, French, geography, geology, health education, history, home economics, journalism, life science, mathematics, music, philosophy, physical education, physics, political science, psychology, recreation, sociology, Spanish, speech arts, and zoology.**

## UPPER DIVISION REQUIREMENTS

### Preparation for Upper Division

Students must complete the lower division requirements for all curricula. In addition, lower division requirements for the major and minor must be completed. Refer to the section of this bulletin entitled: Announcement of Courses, and to the outlines of curricula in the section entitled: Preprofessional and Vocational Curricula.

### Minimum Units and Credit Limitations

Major and minor work are required as follows:

| | *Units* |
|---|---|
| Minor (minimum in upper division courses) | 9 |
| Major (upper division courses) | 24 |

At least 40 units in upper division courses must be completed, 30 of which must be earned after all lower division requirements have been satisfied. If a student is approaching upper division standing, he may carry sufficient lower division units to complete the required minimum of 60 units and carry upper division units for the remainder of his study load. Students with sophomore standing may carry upper division courses for upper division credit provided that they have the written approval of the chairman of the department and the Dean of Arts and Sciences or Dean of Education.

## MAJORS AND MINORS

### Majors

The specific requirements for each major are listed at the beginning of each departmental division among the description of courses. (See Announcement of Courses.) The student is advised to choose his major as early in his college course as practicable so that he may be able to plan his work according to the major requirements. Failure to meet the lower division requirements of the major department before the junior year may make it impossible to satisfy the upper division requirements within the normal period of two years. In addition to departmental majors, the following majors are also offered:

**The General Major:** The general major of 36 upper division units must be chosen from three fields with not more than 15 units nor fewer than 6 to 9 units from any one field. A minimum of a year course in each field must be completed in the lower division as foundation for upper division work in the general major. A minor is not required; however, 4 additional upper division elective units must be completed to meet the minimum requirement of 40 upper division units for graduation.

The general major is planned for students who are preparing for home arts, law, journalism, library work, public administration, social work, theology, recreation, or for any other vocation requiring a background of general training. The program of the student should be planned in consultation with the Dean of Arts and Sciences and approved, revised, or rejected by the chairmen of the departments represented in the major.

**Life Science Major:** Lower division requirements: Zoology 1A-1B or Biology 10A-10B; Zoology 20; Botany 2A-2B; Chemistry 1A-1B or 2A-2B; Physics 2A-2B-3A-3B. Recommended: Geology 1A, Astronomy 1. Upper division requirements: A minimum of 24 upper division units in zoology and botany of which 6 units may be from a related field. The plan for this major must be with the approval of the Chairman of the Division of Life Sciences.

### Minors

A minor consists of at least 15 units of work completed in one of the above fields of study. At least nine of these units must be earned in upper division courses. The entire requirement for a minor may be met with upper division courses provided these courses have no lower division prerequisites. Prerequisites for each course are listed among the course descriptions. (See section on Announcement of Courses.)

In addition to the departmental minors listed above, the following minors are offered:

**Minor in Life Science:** Lower division requirements: Biology 10A-10B or equivalent; Zoology 20; Chemistry 2A-2B or 1A. Recommended: Astronomy, geology, physics. Upper division requirements: At least 9 upper division units in zoology and botany to be selected with the approval of the Chairman of the Division of Life Sciences.

**Minor in Recreation:** Students must show credit for 4 semesters of physical education activity courses and in addition a minimum of 6 lower division units to include Physical Education 51, 53, and electives chosen from Art 61B or fields of dance, drama, or music. Upper division courses must include a minimum of 9 units, including Physical Education 165, 170, and 199. Consultation with the Chairman of the Division of Health, Physical Education, and Recreation is advised.

## EXAMINATION REQUIREMENTS IN THE UNITED STATES CONSTITUTION AND AMERICAN HISTORY, INSTITUTIONS, AND IDEALS

Each student of a state college to qualify for graduation shall demonstrate competence in the United States Constitution and American history, institutions and ideals, by passing satisfactorily a comprehensive examination on these fields prepared and administered by the college. Students transferring from other institutions of collegiate grade who have already met this requirement may have this examination waived, except that candidates for a teaching credential must meet the United States Constitution requirement by examination or by completion of a course covering the Constitution in a California institution of collegiate grade. The examination ordinarily should be taken in the junior year.

This graduation requirement may be fulfilled by any one of the following alternatives:

1. Passing satisfactorily comprehensive examinations in both United States Constitution and American history, institutions and ideals.
2. Completion of History 17A and 17B, or History 171A and 171B, or History 172A and 172B, or Political Science 139A and 139B.
3. Completion of Political Science 71A and 71B, or Political Science 101, plus satisfactory completion of an examination in American history, institutions and ideals.
4. Completion of History 8A and 8B, or History 173A and 173B, or History 179A and 179B, plus satisfactory completion of an examination on the United States Constitution or the substitutes for that examination enumerated in item 3.
5. Completion of comparable courses in other institutions of collegiate grade, except that candidates for the A.B. Degree and a teaching credential must have completed the course covering the United States Constitution in a California institution of collegiate grade.

## PROFESSIONAL, PREPROFESSIONAL, AND VOCATIONAL CURRICULA

For description of professional curricula in education, see section entitled: Professional Curricula in Education; for preprofessional and vocational curricula, see section entitled: Preprofessional and Vocational Curricula.

# UPPER DIVISION REQUIREMENTS FOR THE BACHELOR OF ARTS DEGREE IN TEACHER EDUCATION

## TEACHING CREDENTIALS

San Diego State College is authorized by the State of California to recommend students for the teaching credentials listed below. To be recommended, students must complete, or have completed, the A.B. Degree in one of the curricula offered for teachers.

| *The credential* | *Subjects and grades for which it is valid* |
|---|---|
| General Elementary | All grades through the eighth. |
| Kindergarten-Primary | Kindergarten through third. |
| General Junior High (Must be taken with another credential) | All subjects in grades seven, eight and nine in all elementary or secondary schools. |
| General Secondary | All subjects in the public schools in grade 7 and above. |
| Health and Development | Authorizes to serve as supervisor of health in the capacity of a school physician, school nurse, school oculist, school optometrist, school otologist, school audiometrist, school dentist, school chiropodist, or school dental hygienist. |
| Special Secondary in Art | Art in all grades of the public schools. |
| Special Secondary in Business Education | Business education subjects in all grades of the public schools. |
| Special Secondary in Music | Music in all grades of the public schools. |
| Special Secondary in Physical Education | Physical education in all grades of the public schools. |
| Special Secondary in Speech Arts | Speech in all grades of the public schools. |
| Special Secondary in Correction of Speech Defects | Correction of speech defects in all grades of the public schools. |
| Special Secondary for teaching the Mentally Retarded Child | To teach mentally retarded children in elementary and secondary schools. |
| School Psychometrist | To serve as assistant to the school psychologist. |
| Administration in Elementary Education | Authorizes for certificate to serve as superintendent, deputy superintendent, assistant superintendent, principal, vice principal, and supervisor of instruction in elementary schools. |
| Supervision in Elementary Education | Authorizes for certificate to supervise instruction in elementary schools. |
| Administration in Secondary Education | Authorizes for certificate to serve as superintendent, deputy superintendent, assistant superintendent, principal, vice principal, and supervisor of instruction in secondary schools. |
| Supervision in Secondary Education | Authorizes for certificate to supervise instruction in secondary schools. |
| Special Subject Supervision | Supervision in the special subject in all grades. |

## COMBINATION OF CREDENTIALS

Students who seek more than one teaching credential must complete in full the curriculum for each, with only such exceptions as are indicated in the statement of requirements.

A combination of the elementary school credential and the junior high school credential may be secured by completing the requirements for the elementary school credential and the following additional requirements:

(a) A teaching major.
(b) Education 100B in the major field.
(c) Three units of directed teaching, or equivalent, in a junior high school.
(d) Education 115B.

A combination of the junior high school credential and a special secondary credential may be secured by completing the requirements for the special secondary credential and the following additional requirements:

(a) A junior high school teaching major, excluding the special secondary credential majors.
(b) Education 100B in the junior high school teaching major.
(c) Three units of student teaching in the junior high school teaching major.

## EXAMINATION REQUIREMENTS IN THE UNITED STATES CONSTITUTION, AMERICAN HISTORY, INSTITUTIONS, AND IDEALS

This requirement is the same as that for the degree in arts and sciences. For specific explanation, refer to the section entitled: Upper Division Requirements for the Bachelor of Arts Degree in Arts and Sciences.

## UPPER DIVISION REQUIREMENTS

### Preparation for Upper Division

Students in teacher education curricula must complete the lower division requirements for all curricula as indicated in the section entitled: General Requirements for the Bachelor of Arts Degree in Teacher Education and in Arts and Sciences. Additional pattern requirements are outlined under each specific curriculum on the following pages.

### Minimum Units and Credit Limitations

A minimum of 40 units in upper division courses must be completed, 30 units of which must be earned after all lower division requirements have been satisfied. If a student is approaching upper division standing, he may carry sufficient lower division units to complete the required minimum of 60 units and carry upper division units for the remainder of his study load. Students with sophomore standing may carry upper division courses for upper division credit provided that they have the written approval of the chairman of the department and the Dean of Education.

A maximum of 40 units of credit in any one subject matter field or in education courses may be applied toward the requirements of the A.B. Degree.

### Preparation for Graduate Work

Students who take the A.B. Degree with a special credential and who contemplate doing graduate work for a master's degree in an academic field or for the general secondary credential, will find it advantageous to use their electives to provide a foundation for that work.

## MAJORS AND MINORS

All teaching curricula require one major and one minor.

### Major and Minor for the Elementary Credential

**Education** shall be the major for the kindergarten-primary and general elementary school credentials. Its requirements are outlined under those curricula. It is recommended that the minor for these credentials be chosen from the academic fields of **English, foreign languages, mathematics, science or social science.** The minor in social science must include 6 upper division units in history or in geography and 3 units selected from anthropology, economics, geography, history, political science, or sociology. The minor in English must include three units in American Literature. A second minor, though not required, may be chosen from one of these fields or from art, home economics, industrial arts, music, physical education or speech arts. Students taking an elementary credential in combination with a special secondary credential may use the special major for their minor in elementary education.

### Teaching Major for Junior High School and Special Secondary School Credentials

A teaching major for the junior high school credential consists of a minimum of 24 units of which a minimum of 18 units must be in the upper division. An average of C in scholarship is required in all upper division courses in the field of the teaching major. Teaching majors may be established in the following fields: **English, foreign languages, general science, mathematics, and social science.** A teaching major in the special secondary credential curricula of art, business education, music, physical education, and speech arts ranges from 24 to 40 units, depending upon the curriculum; these may not be used for a junior high school credential major. Refer to the following pages for outlines of requirements for these credentials.

*A Teaching Major in English* shall include English 1; 6A; 56A-56B or 60A-60B; and 18 units of upper division work. This credit must include 3 units in American Literature and 3 units in Shakespeare. Recommended: English 192.

*A Teaching Major in General Science* shall include a minimum of 24 units, not less than 18 of which are upper division, including a college year course in a biological science, a year course in high school or college physics and a concentration of 12 units, at least 6 of which are upper division, in one major subject (botany, chemistry, physics, zoology). See definition of teaching majors.

*A Teaching Major in Social Science* shall include a minimum of 24 units, not less than 18 of which are upper division. There shall be a concentration of 12 units, at least 6 of which are upper division, in one major subject (anthropology, economics, geography, history, political science, sociology). A year course in American History must be included. See definition for teaching majors for the junior high school credential.

### Teaching Minor for Junior High and Special Secondary Credentials

A teaching minor consists of 15 units in a given field, of which 9 or more must be in upper division courses. Teaching minors may be established in the following ields: **art, business education, English, foreign languages, general science, health education, home economics, industrial arts, mathematics, music, social science, physical education, recreation, and speech arts.** (See requirement above for elementary school credentials.)

*A Teaching Minor in English:* Candidates for the teaching minor in English must nclude English 1; 6A; and 9 elective units in upper division English. This credit must nclude 3 units in American Literature, taken either in lower division or in upper ivision. Credit in journalism and speech arts may not be used to fulfill the requirements for the English minor.

*A Teaching Minor in Health Education* shall include: Physical Education 51, Home Arts 61A, and Health Education 65 in the lower division; Health Education 52, 153, Physical Education 199 or equivalent in the upper division. For physical ducation majors, Health Education is allowed only as a second minor area.

*A Teaching Minor in Home Economics* shall include: Home Economics 5, or 62, and 11 in the lower division; Home Economics 101, 105, and 150, in the upper division. hree units of electives may be chosen from Home Economics 1, 62, 108, or 170.

*A Teaching Minor in Industrial Arts:* This minor shall consist of 15 units in ndustrial arts, 9 units of which must be from courses carrying upper division credit. ourses must be selected with approval of the Industrial Arts representative.

*A Teaching Minor in Music:* Candidates for the teaching minor in music a required to take music aptitude tests at the time the minor is chosen and to enroll i at least one music activity each semester. In special cases this requirement may b waived by permission of the faculty of the Music Department.

Applicants for music minors must maintain a grade average of C in all musi courses. All students must show credit for Music 1A or clear this requirement b examination. Music 7A is required of all candidates for the elementary credentia In the lower division, with the proper regard for course sequences, 6 units may chosen from the following courses: Music, 1A-1B-1C-1D, 2A, 3A, 4A, 4B, 5A, 5 6A, 16, 17, 18, Aesthetics 1A, 1B. Nine units of upper division music are require not more than two of which may be selected for credit from the activity courses (Trebl Clef, orchestra, etc.).

*A Teaching Minor in Physical Education:* Men must show credit for: fou semesters of physical education activity courses, Physical Education 51, 53 and 72 i the lower division; Education 100B-PE, Physical Education 170, 190 and at least tw units in an upper division Professional Activity course approved by the department.

Women must show credit for: four semesters of physical education activit courses, Physical Education 53, and 3½ units of electives in the lower division; nin units chosen from Physical Education 153, 156A-156B, 161, 164 and 170 in the uppe division.

*A Teaching Minor in Recreation:* A teaching minor in recreation shall includ 4 semesters of physical education activity courses and in addition Physical Educatio 51, 53, 165, 170 and electives selected from Art 61B or from the fields of dance, dram or music. The upper division must include Physical Education 199, Special Study i Physical Education or Recreation, to meet the individual needs of the student; to b planned in consultation with the Chairman of the Division of Health, Physical Edu cation, and Recreation. Physical Education majors may use this as a second mino only.

*A Teaching Minor in Social Science:* A teaching minor in social science mus include the general education lower division requirement and in addition a minimu of 9 units of upper division social science courses, selected from anthropology, ec nomics, geography, history, political science, or sociology, 6 units of which must consis of a year course sequence. Six units in American History or 3 units in American Hi tory and 3 units in Political Science must be included.

### Teaching Majors for General Secondary Credential

Teaching majors may be established in the following fields: **art, business edu cation, chemistry, economics, English, history, life science, mathematics, musi physical science, physics, romance languages, social science, Spanish, and speec arts; also psychology as a nonteaching major with two teaching minors.** In mos fields, 12 semester units are required in the lower division and 24 semester units i the upper division. Some departments permit 6 units of these 24 upper division unit to be selected from related fields with the approval of the departmental representativ In addition to these undergraduate requirements, 2 to 5 semester units of graduat work are required in the major field during the postgraduate year. For the program for each department, refer to the section entitled: Curricula Leading to the Gener Secondary School Credential. This section also explains the requirements for admissio to candidacy for the General Secondary Credential. Candidates for the General Secon ary Credential should consult with the Director of Secondary Education.

### Teaching Minors for the General Secondary Credential

Teaching minors may be established in the following fields: **art, business edu cation, chemistry, economics, English, French, health education, history, hom economics, industrial arts, life science, mathematics, music, physical educatio for men, physical education for women, physics, recreation, Spanish, and speec arts.** In most fields, 6 semester units are required in the lower division and 9 semeste units in the upper division for the A.B. Degree. This credential requires enough addi tional units to make a minimum of 21 semester units to be completed by the date o recommendation for the credential. For the programs for each department, refer to th section entitled: Curricula Leading to the General Secondary School Credential.

## ADMISSION TO TEACHER EDUCATION

Students who expect to become teachers should apply for admission to teacher education during the first semester of the sophomore year. Students entering the college at the end of the sophomore year will apply at the beginning of the junior year. No courses in education may be taken until admission is granted; any exception to this rule must have the approval of the Dean of Education. *Admission to the college* does not guarantee that the student will be admitted to teacher education. The following requirements must be met for admission to teacher education curricula:

1. A satisfactory score on a college aptitude test taken at the college.
2. Evidence of competence in the use of the English language and of satisfactory ability in arithmetic, handwriting, reading, and spelling indicated by having passed the Fundamentals Test. (See college calendar for dates of test which should be taken in the second semester of the *freshman year.*)
3. Assurance of correct speech habits and voice control by having satisfactorily completed a course in corrective speech or by having passed a speech test given by the college.
4. Assurance of physical fitness.
5. If the student is to be a candidate for the general secondary credential or one of the special secondary credentials, he must furnish a recommendation from the chairman of that department stating that the student has ability and shows promise of teaching success in his field and that the department looks with favor upon his application.
6. The completion of the first two years or more of a given curriculum, or its equivalent, and of subsequent work with a grade point average of 1.2 or better for all credentials except the general junior high school or the general secondary, for which shall be required a grade point average of 1.5 or better in all work and 1.75 in the major field.
7. If the student is a candidate for any credential on the secondary school level (general junior high school, special secondary, or general secondary), he must have a satisfactory score on a General Culture Test.
8. If the student is a candidate for the General Secondary credential he must have a tentative program approved by the authorized departmental representative of his major field, minor field, and the education department.
9. All applicants need to be approved by an interviewing committee of the college faculty. In its evaluation the committee will consider the following factors established by the State Board of Education: intelligence, scholarship, professional aptitude, personality and character, speech and language usage, and many-sided interests.

### Transfer Students

Students who have completed two or more semesters of work in another college, upon transferring to San Diego State College, should make application for admission to teacher education as soon as they enroll in the college. Transfer students should take the necessary tests for admission to teacher education given during the orientation period. (See college calendar for dates.)

### Transfer Students With Emergency Credentials in Elementary Education

Certain adaptations in the education courses have been made to meet the needs of experienced teachers who hold an emergency credential in elementary education. See the Director of Elementary Education for details.

### Advanced Standing in Teacher Education

A minimum of 6 units in education courses is required for graduation from this college. The college also requires that the student file with the Registrar written evidence from employers of satisfactory teaching experience in a public school.

After an interval of 5 years, courses in education are reevaluated and subject to deduction in credit, in light of such new requirements as may have been put into effect and changes in educational procedures. Students formerly in attendance will not be considered to be working in the curriculum until an evaluation and statement of credit has been secured from the Registrar's office. All courses taken either at this college or elsewhere must be approved by an official adviser in order to be credited oward meeting degree requirements.

### Admission to Graduate Courses (200-299)

For requirements for admission to 200-299 courses, refer to the section entitled: Admission and Registration.

# PROFESSIONAL CURRICULA IN EDUCATION

Professional curricula in education, requiring from four to five years to co plete, lead to the teaching credentials.

All candidates in teacher education curricula should observe carefully the requi ments for admission to teacher education and be prepared to meet them at the end the sophomore year. Students in other colleges who contemplate transferring to S Diego State College should arrange their programs so as to meet the requirements their particular curriculum as early as possible. See college calendar for dates wh the Fundamentals Test will be given. Refer to the section entitled: Admission Teacher Education.

## CURRICULA LEADING TO THE GENERAL ELEMENTARY, KINDERGARTEN-PRIMARY, OR GENERAL JUNIOR HIGH SCHOOL CREDENTIAL

### A.B. DEGREE WITH GENERAL ELEMENTARY OR KINDERGARTEN-PRIMARY CREDENTIAL

One teaching minor is required. Refer to the section entitled: Upper Divisi Requirements for the Bachelor of Arts Degree in Teacher Education.

### Freshman Year

| | *Units for General Elem.* | *Units fo Kdg.- Primar* |
|---|---|---|
| *First Semester* | | |
| Art 6A, Design | 2 | 2 |
| English 1, Freshman Composition | 3 | 3 |
| Health Education 21, Principles of Healthful Living | 2 | 2 |
| Physical Education (activity course) | ½ | ½ |
| Physical Science 1A, Introduction (If year-course in high school physics completed, substitute another science) | 3 | 3 |
| Electives (Advisable to start social science or other lower division requirements; also minor. See page 17) | 6 | 6 |
| *Second Semester* | | |
| Art 6B, Design | 2 | 2 |
| English 2, Freshman Literature or optional course | 3 | 3 |
| Physical Education (activity course) | ½ | ½ |
| Physical Science 1B, Introduction (If year-course in high school chemistry completed, substitute another science) | 3 | 3 |
| Psychology 1, General | 3 | 3 |
| Electives (Continue social science, other lower division requirements, or minor) | 3–5 | 3–5 |
| | 31–33 | |

### Sophomore Year

| | *Units for General Elem.* | *Units for Kdg.-Primary* |
|---|---|---|
| *First Semester* | | |

### Junior Year

Students transferring from another curriculum in lower division or from another college or junior college may interchange this semester with semester II of the senior year. (Forty units of upper division work are needed.) The Education Department will probably find it necessary to ask some students who have met all requirements to defer entering practicum until the second semester of the junior year in order to equate class size. Those who defer entering the practicum should use this semester to

1. Complete lower division requirements in art, music, Physical Education 53, natural science, social science and others as needed.
2. Complete minor requirements.
3. Meet requirement for American History and U. S. Constitution.
4. Elect Education 102A or 102B if needed to complete program. Permission to enter these courses must be secured from the instructor.

| | | | |
|---|---|---|---|
| *First Semester* | | | |
| Education 102A, Measurement and Evaluation in Elementary Education or Education 102B, Child Growth and Development | | 3 | 3 |
| Health Education 151, Health Education for Teachers (taken with practicum) | | 2 | 2 |

## A.B. DEGREE WITH SPECIAL SECONDARY CREDENTIAL IN MUSI

Students intending to become applicants for this credential must show evider of musical ability before entering the course. They must be able to play artistica upon the piano, music of the grade of the simpler *Songs Without Words* of Mendelsso or else possess a corresponding degree of proficiency in voice or an orchestral instr ment. No credit is given to music majors for the basic courses of Music 1A a Music 7A, but if a deficiency exists in the field of general musicianship, the stude will be required to take either or both of these courses without credit.

All music majors are required to enroll in one musical activity each semest Activities should be included from *both* instrumental and choral groups. In spec cases this requirement may be waived by petition to the Music Department. All s dents are required to pass examinations in applied music in order to recei credit. No credit is allowed to majors in voice or orchestral instruments for any wo in piano which is below the level of artistic hymn playing.

Applicants for the Special Secondary Credential in Music must maintain a gra average of C or better in music courses.

This course leads to the A.B. Degree with a Special Secondary Credential Music which will authorize the holder to teach music in the elementary, junior a senior high schools of the State.

A maximum of 40 units in Music may be used toward the A.B. Degree. Of the 40 units a maximum of 3 may come from the field of musical activities: band, cho chorus, glee clubs and orchestra.

General Language "B" is advised as an elective.

## A.B. DEGREE WITH SPECIAL SECONDARY CREDENTIAL IN SPEECH ARTS

The following program when satisfactorily completed will lead to the A.B Degree with Special Secondary Credential in Speech Arts.

### Lower Division

| | Unit |
|---|---|
| Social Science | 9–1 |
| Natural Science | 9–1 |
| English 1, Freshman Composition, and 2, Freshman Literature or optional course | 6 |
| Psychology 1, General | 3 |
| Health Education 21, Principles of Healthful Living | 2 |
| Physical Education (activity courses) | 2 |
| Speech Arts 2A, 2B, 11A, 11B, 60A, 60B, 81 | 6 |
| Speech Arts 55A-55B or 56A-56B or 55A-56A or 55A-56B or 82, 83 | 6 |
| Speech Arts 1, 61A,B,C,D, or 81 | 3 |
| Speech Arts electives | 5 |
| Minor | 6 |
| Electives | 0–3 |
| | 60 |

### Upper Division

| | *Units* |
|---|---|
| peech Arts 150 and 176 or 179A | 6 |
| peech Arts electives, selected from Speech Arts 108, 140A, 155, 159A, 161, 182, 191, 192A or 192B | 6 |
| peech Arts electives | 6 |
| pper Division electives selected from upper division English Literature | 6 |
| inor | 9 |
| ealth Education 151, Health Education for Teachers | 2 |
| ducation: | |
| 115B, Secondary Education | 3 |
| 102C, Growth and Development of the Adolescent | 3 |
| 102D, Measurement and Evaluation in Secondary Education | 2 |
| 130, Educational Psychology | 2 |
| 100B-SA, Methods in Speech Arts and methods in the minor subject | 3 |
| 115A, History and Philosophy of Education | 2 |
| 116, Directed Teaching | 6 |
| lectives | 4 |
| | 60 |

### Summary

| | |
|---|---|
| ocial Science | 9–12 |
| atural Science | 9–12 |
| nglish 1 and 2 | 6 |
| sychology 1 | 3 |
| ealth Education 21 and 151 | 4 |
| hysical Education | 2 |
| peech Arts, major | 38 |
| pper division English Literature | 6 |
| ducation 100B-SA, 102C, 102D, 115A, 115B, 116, 130 | 21 |
| inor | 15 |
| lectives | 0–6 |
| | 120 |

## HEALTH AND DEVELOPMENTAL CREDENTIAL

Requirements for this credential include:

1. Possession of a valid license issued by the official California state board or gency in charge of his profession in California.

2. Two years of successful experience in the special service to be named in the redential, except for the school nurse.

3. For school nurse only: the completion of six semester hours of work, includ- g courses in:

A. Educational Psychology (Education 130)
B. Administration of the School Health Program (Health Education 153)
C. Social case work, or rural education or child hygiene.

Pattern to be approved by adviser appointed by the Dean of Education.

## SPECIAL SECONDARY CREDENTIAL IN CORRECTION OF SPEECH DEFECTS

This credential is granted only to students who can verify two years of successf teaching experience or four semester hours of superior student teaching completed an approved teacher education institution and who hold a valid California teache certificate, credential, or life diploma of elementary or secondary school grade. Su students must show credit in the following subjects:

### Lower Division

| | *Uni* |
|---|---|
| Psychology 1, General | 3 |
| Speech Arts 2A, Fundamentals of Public Speaking, or equivalent | 3 |
| Speech Arts 11A or 11B, Interpretation | 3 |
| Speech Arts electives | 6 |

### Upper Division

| | |
|---|---|
| Speech Arts 150, Phonetics | 3 |
| Speech Arts 221, Articulatory Problems of Speech or Education 176, Problems of Speech Correction and Articulation | 3 |
| Speech Arts 179A-179B or Education 179A-179B, Nervous Speech Disorders | 6 |
| Psychology 131, Psychological Foundations of Personality | 2 |

## SPECIAL SECONDARY CREDENTIAL FOR TEACHING THE MENTALLY RETARDED CHILD

An applicant for the special secondary credential for teaching the mentall retarded child must have completed the following requirements:

1. A four year college course with a bachelor's degree.

2. Possession of a valid general elementary credential.

3. As part of, or in addition to, the courses taken for the general elementar credential, the applicant must have completed 18 semester units of professional trainin distributed approximately as follows and approved by the credential adviser:

   A. Six units selected from the following: Education 102B or Educatio 102C; Psychology 12, Psychology 131 or 132; Psychology 150 or 15
   B. Nine units selected from the following: Art 61A or 161A; Educatio 181, Education 182, and Education 183; and Education 232.
   C. Three units of Education 116 (directed teaching of the mentall retarded).

4. The 18-unit requirement will be reduced 4 units for each year of verifie successful experience in teaching special classes for mentally retarded children, th total not to exceed 12 units.

5. At least 6 semester units of the 18 required must have been completed withi 5 years of the time application is made for the credential.

6. Twelve units of work must have been completed at this college.

## SCHOOL PSYCHOMETRIST CREDENTIAL

An applicant for the school psychometrist credential must have completed th following requirements:

1. Possession of a California general teaching credential (General Elementar Junior High School, or General Secondary) or a four-year college course with bachelor's degree.

2. As a part of the undergraduate or graduate program the applicant must hav completed 18 semester units of training distributed approximately as follows an approved by the credential adviser:

   A. Six units selected from the following: Education 102A or Educatio 102D; Education 102B or Education 102C; and Education 130.
   B. Six units as follows: Education 181 and Psychology 151.
   C. Six units as follows: Psychology 105A and Psychology 105B.

# CURRICULA LEADING TO THE GENERAL SECONDARY SCHOOL CREDENTIAL

## INFORMATION CONCERNING THE GENERAL SECONDARY SCHOOL CREDENTIAL

A candidate for this credential must complete the requirements for the bachelor's degree from an accredited institution with a major and a minor commonly taught in the secondary schools of California. Admission to candidacy for this credential should be sought during the second semester of the sophomore year or upon admission to San Diego State College with advanced or graduate status. For admission requirements, refer to the section entitled: Admission to Teacher Education.

Students desiring a major in art, business education, music, physical education or speech arts should complete the requirements for the Special Secondary Credential in the respective area desired, then continue with the graduate program. For further details regarding these majors, refer to the section entitled: Majors and Minors for the General Secondary Credential.

Students desiring one of the other areas as a major for which San Diego State College is authorized should complete a program leading to the A.B. Degree at the end of four years and the General Secondary Credential upon completion of the graduate year requirements outlined on the following pages. For a list of majors and minors, refer to the section entitled: Upper Division Requirements for the Bachelor of Arts Degree in Teacher Education.

Any person desiring this credential should consult with the Director of Secondary Education during his first semester of attendance at San Diego State College.

## RECOMMENDED PROGRAM FOR THE GENERAL SECONDARY SCHOOL CREDENTIAL

The following courses should be completed before receiving the bachelor's degree (in the order listed):

| | *Units* |
|---|---|
| Education 115B, Principles of Secondary Education | 3 |
| Education 102C, Growth and Development of the Adolescent | 3 |
| Education 102D, Measurement and Evaluation in Secondary Education | 2 |
| Education 130, Educational Psychology | 2 |
| Health Education 151, Health Education for Teachers | 2 |

The graduate work must consist of a minimum of 24 semester units of upper division or graduate work including the following specific requirements:

1. At least 12 semester units must be completed at San Diego State College.
2. At least one course of graduate level work (200 number) in the major field.
3. Enough units to complete a 21 semester unit minor. Refer to the section entitled: Majors and Minors for the General Secondary Credential.
4. Professional Education—completion of the courses listed above and the following:

| | |
|---|---|
| Education 100B, Methods of Teaching (in the major and minor subjects) (available Fall Semester only) | 3 |
| Education 115A, History and Philosophy of Education | 2 |
| Education 201, Curricular Problems of the Secondary School | 3 |
| Education 202, Guidance Problems of the Secondary School | 3 |
| Education 316, Directed Teaching (or equivalent) | 6 |

## MAJORS AND MINORS FOR THE GENERAL SECONDARY CREDENTIAL

The following pages outline tentative programs for the majors and minors for which San Diego State College is authorized to recommend for the General Secondary Credential.

### Major in Art

The requirements for the A.B. Degree and the Special Secondary Credential in Art should be completed simultaneously. (Students transferring from another institution with the A.B. Degree and a major in art should consult with the departmental representative for special program planning.) Refer to the section entitled: A.B. Degree with Special Secondary Credential in Art. After the above requirements have been met, and the candidate has been accepted by the art staff for graduate work in art, the candidate for the General Secondary Credential shall complete a graduate year including the following courses in his major:

| *Graduate Year* | *Units* |
|---|---|
| Art 200A-200B, Special Problems in Art | 4 |

### Minor in Art

A minimum of 21 semester units, of which at least 9 units shall be upper division or graduate courses, must be completed.

*Lower Division*

| | |
|---|---|
| Art A-B, Drawing and Composition | 2–4 |
| Art 6A-6B, Design | 4 |
| Art elective (Art 14A, Lettering, recommended) | 0–2 |
| Aesthetics 50, Appreciation and History of Art | 2 |
| Aesthetics 5, Art Orientation, or Art 51, Survey of Mexican Art | 2 |

*Upper Division*

| | |
|---|---|
| Upper division electives in Art | 9 |
| Aesthetics 150, Appreciation and History of Art | 2 |

### Major in Business Education

The requirements for the A.B. Degree and the Special Secondary Credential in Business Education must be completed simultaneously. Refer to the section entitled: A.B. Degree with Special Secondary Credential in Business Education. After the above requirements have been met, the candidate for the General Secondary Credential shall complete a graduate year including the following courses in his major:

*Graduate Year*

Select four units from the following:

| | |
|---|---|
| Commerce 203, Secretarial Administration | 2 |
| Commerce 213, Problems in Business Education | 2 |
| Commerce 223, Problems in Merchandising | 2 |
| Commerce 233, Administration and Supervision of Business Education | 2 |
| Commerce 260, Advanced Problem Analysis (Accounting) | 2 |

### Minor in Business Education

A minimum of 21 semester units, of which at least 9 units shall be upper division or graduate courses, must be completed.

This minor is not approved as part of the requirements for the A.B. Degree unless the degree and a credential are awarded simultaneously. It is recommended as a second minor area only.

*Lower Division*

| | |
|---|---|
| Commerce 14A-14B, Principles of Accounting | 6 |
| Economics 1A-1B, Principles of Economics | 6 |

*Upper Division*

| | |
|---|---|
| Upper division commerce courses selected with approval of the departmental representative | 9 |

### Major in Chemistry

*Lower Division*

| | *Units* |
|---|---|
| Chemistry 1A-1B, General | 10 |
| Chemistry 5, Quantitative Analysis | 3 |
| Mathematics 7A-7B, Mathematical Analysis, or 3A-3B, Plane Analytic Geometry and First Course in Calculus, and 4A-4B, Second and Third Course in Calculus | 6–12 |
| Physics 2A-2B, General, and 3A-3B, Physcial Measurements (or 1A-1B-1C-1D, or 4A-4B-4C, Principles) | 8–12 |

*Upper Division*

| | |
|---|---|
| Chemistry 101, 102, 103, Organic Chemistry | 10 |
| Chemistry 105, Advanced Quantitative Analysis | 3 |
| Chemistry 110A-110B, Physical Chemistry | 6 |
| Electives in upper division chemistry, or electives in a related field approved by the departmental representative | 5 |

*Graduate Year*

| | |
|---|---|
| Chemistry 200, Seminars | 4 |

### Minor in Chemistry

A minimum of 21 semester units, of which at least 9 units shall be upper division or graduate courses, must be completed.

*Lower Division*

| | |
|---|---|
| Chemistry 1A-1B, General | 10 |
| Chemistry 5, Quantitative Analysis | 3 |
| Physics 2A-2B, General, and 3A-3B, Physical Measurements (or 1A-1B-1C-1D, or 4A-4B-4C, Principles) | 8–12 |

*Upper Division*

| | |
|---|---|
| Chemistry 101, Organic | 4 |
| Electives in upper division chemistry selected with approval of departmental representative | 5 |

### Major in Economics

*Lower Division*

| | |
|---|---|
| Economics 1A-1B, Principles of Economics | 6 |
| Lower division year course in history, political science or sociology | 6 |

*Upper Division*

| | |
|---|---|
| Economics 100A-100B, Modern Economic Thought | 6 |
| Economics electives, including a maximum of 6 units in a related field approved by the departmental representative | 18 |

*Graduate Year*

| | |
|---|---|
| Economics 200A-200B, Seminar in Modern Economic Thought | 4 |

### Minor in Economics

A minimum of 21 semester units, of which at least 9 units shall be upper division or graduate courses, must be completed.

*Lower Division*

| | |
|---|---|
| Economics 1A-1B, Principles of Economics | 6 |
| A year course in another social science area | 6 |

*Upper Division*

| | |
|---|---|
| Economics 100A, Modern Economic Thought | 3 |
| Upper division economics courses selected under the supervision of the departmental representative | 6 |

### Major in English

| | Unit |
|---|---|
| *Lower Division* | |
| English 1, Freshman Composition | 3 |
| English 6A-6B, The Study of Literature | 6 |
| English 56A-56B, Survey of English Literature or 60A-60B, Literature and Personality | 6 |
| *Upper Division* | |
| Upper Division English courses selected under the supervision of the departmental representative | 24 |
| *Graduate Year* | |
| One of the following seminars | 2 |
| English 201, Shakespeare<br>English 202, Mark Twain<br>English 221, Regionalism in American Literature<br>English 222, Utopias | |
| English 192, The English Language (if not taken as an undergraduate) or 191, 195, or an additional seminar from the foregoing list | 2–3 |

### Minor in English

A minimum of 21 semester units, of which at least 9 units shall be upper division or graduate courses, must be completed.

| | |
|---|---|
| *Lower Division* | |
| Lower division English courses to be selected under supervision of departmental representative | 12 |
| *Upper Division* | |
| Upper division English courses to be selected under the supervision of the departmental representative | 9 |

### Minor in French

A minimum of 21 semester units, of which at least 9 units shall be upper division or graduate courses, must be completed.

| | |
|---|---|
| *Lower Division* | |
| French A, B, C, D or equivalent | 15–16 |
| History 4A-4B, History of Modern Europe, or equivalent | 6 |
| *Upper Division* | |
| French 101A-101B, Conversation and Composition | 6 |
| French Literature (select one course) | 3 |

### Minor in Health Education for Men or Women

A minimum of 21 semester units, of which at least 9 units shall be upper division or graduate courses, must be completed.

Students majoring in physical education may use this only as a second minor. Students contemplating advanced degree work should plan to complete an academic minor as well as this minor.

| | |
|---|---|
| *Lower Division* | |
| Physical Education 51, First Aid and Safety Education | 2 |
| Home Arts 61A, Nutrition | 2 |
| Health Education 65, Community Health | 3 |
| *Upper Division* | |
| Health Education 152, Health Education Programs | 3 |
| Health Education 153, Administration of School Health Program | 3 |
| Health Education 199, Special Study in Health | 1–3 |

### Major in History

| | |
|---|---|
| *Lower Division* | |
| History 4A-4B, History of Modern Europe, or 8A-8B, History of the Americas, or 9A-9B, History of the Pacific Ocean Area | 6 |
| Political Science 1A-1B, Comparative Government, or Political Science 71A-71B, American Government and Politics, or Economics 1A-1B, Principles | 6 |

Two of the above history courses are recommended for students planning to major in history, and it is suggested that History 4A-4B be included as one of the courses.

| *Upper Division* | *Units* |
|---|---|
| History 199, Special Course for Advanced Students | 2 |
| United States History course | 3–6 |
| Select from three of the following areas with approval of departmental representative | 16–19 |
| 1. Ancient and Medieval | |
| 2. Modern European | |
| 3. Latin America | |
| 4. Pacific Area and Far East | |
| *Graduate Year* | |
| History 270A-270B, Seminar | 2–2 |

### Minor in History

A minimum of 21 semester units, of which at least 9 units shall be upper division or graduate courses, must be completed. A year course in United States History must be included.

| *Lower Division* | |
|---|---|
| History 4A-4B, History of Modern Europe, or 8A-8B, History of the Americas, or 9A-9B, History of the Pacific Ocean Area | 6 |
| Electives chosen from anthropology, economics, geography (except Geography 1, 3, 4), political science, sociology | 6 |
| *Upper Division* | |
| Upper Division History selected with approved of departmental representative | 9 |

### Minor in Home Economics

A minimum of 21 semester units, of which at least 9 units shall be upper division, must be completed. Candidates selecting this minor must have their programs approved by the departmental representative.

| *Lower Division* | |
|---|---|
| Home Economics 5, Food Preparation | 3 |
| Home Economics 11, Clothing Design | 3 |
| Electives in Home Economics | 0–3 |
| *Upper Division* | |
| Home Economics 101, Clothing Selection | 3 |
| Home Economics 105, Family Meals | 3 |
| Home Economics 150, Home Management | 3 |
| Home Economics 170, Child Care and Development | 3 |
| Electives in Home Economics | 0–3 |

### Minor in Industrial Arts

A minimum of 21 semester units, of which at least 9 shall be upper division courses, must be completed. The candidate must demonstrate competence in mechanical drawing. All candidates selecting this minor must have their programs approved by the departmental representative.

| *Lower Division* | | |
|---|---|---|
| Industrial Arts 2, Mechanical Drawing | | 2 |
| Select at least two courses from the following: | | 6 |
| Industrial Arts 41, Elements of Metalworking | 3 | |
| Industrial Arts 51, Elements of Woodworking | 3 | |
| Industrial Arts 61, Elements of Electricity | 3 | |
| *Upper Division* | | |
| Industrial Arts 121, Advanced Mechanical Drawing | | 3 |
| Select at least two courses from the following: | | 4 |
| Industrial Arts 141, Advanced Metalworking | 2 | |
| Industrial Arts 151A, Furniture Making | 2 | |
| Industrial Arts 161, Advanced Applied Electricity | 2 | |
| Electives from Industrial Arts courses selected with approval of departmental representative to complete requirement | | 6–8 |

### Major in Life Science

Un

*Lower Division*

Zoology 1A-1B, General 8
Botany 2A-2B, General 8
Zoology 20, Human Anatomy and Physiology 3
Chemistry 1A-1B, General, or 2A-2B, Fundamentals 6–
Physics 2A-2B, General, and 3A-3B, Physical Measurements 8
Geology 1A, Physical, and Astronomy 1, Descriptive, recommended.

*Upper Division*

Upper division Zoology and Botany, of which 6 units may be from a related field with the approval of the departmental representative 24

*Graduate Year*

Zoology 200, Seminar 2
Zoology 202, Hydrobiology, or Zoology 213, Advanced Studies in Ornithology 2

### Minor in Life Science

A minimum of 21 semester units, of which at least 9 units shall be upper division or graduate courses, must be completed.

*Lower Division*

Biology 10A-10B, General Biology, or Zoology 1A-1B, General Zoology 6–
Botany 2A-2B, General Botany 8
Chemistry 1A, General, or 2A-2B, Fundamentals 5–

*Upper Division*

Upper division courses in Zoology and Botany to be selected with approval of the departmental representative 9

### Major in Mathematics

*Lower Division*

Mathematics 3A, Plane Analytical Geometry 3
Mathematics 3B, First Course in Calculus 3
Mathematics 4A, Second Course in Calculus 3
Additional mathematics or work in related areas 3

*Courses in related areas:* Astronomy 1, Descriptive Astronomy; Commerce 2, Mathematics of Finance; Engineering 1A, Plane Surveying; Engineering 21, Descriptive Geometry; Physics 1A or 4A, Mechanics of Solids; Physics 2A, General.

*Upper Division*

At least one course in Algebra (Mathematics 102 or 111) 3
At least one course in Geometry (Mathematics 101, 105, 106) 3
History of Mathematics (Mathematics 104) 3
Third Course in Calculus (Unless Mathematics 4B in lower division) (Mathematics 117) 3
Probability and Statistics (Mathematics 140) 3
Additional upper division units, 6 of which may be in related areas 9

*Graduate Year*

Four units selected from the following:
Mathematics 201, Secondary Geometry from an Advanced Point of View 2
Mathematics 202, Secondary Algebra from an Advanced Point of View 2
Mathematics 206, History of Mathematics 2

### Minor in Mathematics

A minimum of 21 semester units, of which at least 9 units shall be upper divisio or graduate courses, must be completed.

*Lower Division*

**Pattern I**

Mathematics 7A-7B, Elementary Mathematical Analysis 6
Two courses selected from courses in related areas 6
(See above under teaching major in mathematics)

**or Pattern II**

| | *Units* |
|---|---|
| Mathematics D, Trigonometry (or high school equivalent for which pattern credit may be allowed) | 3 |
| Mathematics 3A, Plane Analytic Geometry | 3 |
| Mathematics 3B, First Course in Calculus | 3 |
| One course selected from courses in related areas (See above under teaching major in mathematics) | 3 |

*Upper Division*

| | |
|---|---|
| Upper division units in mathematics selected with the approval of the departmental representative | 9 |

One course in each of the areas, algebra, geometry, and history of mathematics, is desirable.

### Major in Music

The requirements for the A.B. Degree and the Special Secondary Credential in Music should be completed simultaneously. Students transferring from another institution with the A.B. degree and a major in Music should consult with the departmental representative for special program planning. Refer to page 33 for the recommended program for the Special Secondary Credential in Music. After the above requirements have been met, the candidate for the General Secondary Credential shall complete a graduate year including 4 units selected from the following courses in his major:

*Graduate Year*

Four units selected from the following:

| | |
|---|---|
| Music 200A-200B, Special Problems in Music | 2–2 |
| Music 203, Musicology | 2 |
| Music 206, Composition | 2 |

### Minor in Music

A minimum of 21 semester units, of which at least 9 units shall be upper division or graduate courses, must be completed.

*Lower Division*

| | |
|---|---|
| Music 1A or equivalent, and 1B, Musicianship | 2–5 |
| Music 4A-4B, Elementary Harmony | 6 |
| Aesthetics 1A-1B, Survey of Music | 4 |
| Music activities selected from Music 11, 12, 13, 15, 20, 26, 30 | 0–2 |

*Upper Division*

Select 9 units with approval of departmental representative from:

| | |
|---|---|
| Aesthetics 102A-102B, Music History | 4 |
| Aesthetics 100, Great Music | 3 |
| Music 105A-105B, Advanced Harmony and Composition | 6 |
| Music 106, Counterpoint | 2 |
| Music 107, Form and Analysis | 2 |
| Music 119A, Instrumental Conducting | 1 |
| Music 120A, Vocal Conducting | 1 |
| Music 121A-121B, Instrumentation and Arranging | 4 |
| Music 117A-117B, Advanced Individual Study of Voice | 2 |
| Music 118A-118B, Advanced Individual Study of Piano or Organ | 2 |

### Major in Physical Education for Men

The requirements for the A.B. Degree and the Special Secondary Credential in Physical Education must be completed simultaneously. Refer to page 35 for the recommended program for the Special Secondary Credential in Physical Education. After the above requirements have been met, the candidate for the General Secondary Credential shall complete a graduate year including the following courses in his major:

Select two courses from the following:

| | |
|---|---|
| Physical Education 200, Evaluation Procedures in Health, Physical Education and Recreation | 2 |
| Physical Education 201, Developmental Physical Education | 2 |
| Health Education 202, Problems in Health Education | 2 |
| Physical Education 203, Problems in Physical Education | 2 |
| Physical Education 204, Problems in Recreation | 2 |

### Minor in Physical Education for Men

A minimum of 21 semester units, of which at least 9 units shall be upper division or graduate courses, must be completed.

A student contemplating advanced degree work should plan to complete an academic minor as well as this minor.

| | Units |
|---|---|
| *Lower Division* | |
| Physical Education 51, First Aid and Safety Education | 2 |
| Physical Education 53, Physical Education in the Elementary Schools | 2 |
| Physical Education 72, Introduction | 2 |
| *Upper Division* | |
| Professional Activity courses selected with approval of departmental representative | 4 |
| Physical Education 190, Administration of Physical Education in Secondary Schools | 3 |
| Physical Education 170, Recreational Leadership | 2 |

### Major in Physical Education for Women

The requirements for the A.B. Degree and the Special Secondary Credential in Physical Education must be completed simultaneously. Refer to page 36 for the recommended program for the Special Secondary Credential in Physical Education. After the above requirements have beeen met, the candidate for the General Secondary Credential shall complete a fifth year (refer to page 25) including the following courses in his major:

*Graduate Year*

Select two courses from the following:

| | |
|---|---|
| Physical Education 200, Evaluation Procedures in Health, Physical Education, and Recreation | 2 |
| Physical Education 201, Developmental Physical Education | 2 |
| Health Education 202, Problems in Health Education | 2 |
| Physical Education 203, Problems in Physical Education | 2 |
| Physical Education 204, Problems in Recreation | 2 |

### Minor in Physical Education for Women

A minimum of 21 semester units, of which at least 9 units shall be upper division or graduate courses, must be completed.

A student contemplating advanced degree work should plan to complete an academic minor as well as this minor.

| | |
|---|---|
| *Lower Division* | |
| Physical Education 1A, Fundamental Skills | ½ |
| Physical Education 1B, Folk Dancing | ½ |
| Physical Education 1C, Rhythmic Skills | ½ |
| Physical Education 1D, Team Sports | ½ |
| Physical Education 53, Physical Education in Elementary Schools | 2½ |
| Physical Education electives | 1½ |
| *Upper Division* | |
| Physical Education 156A-156B, Sports Methods | 4 |
| Physical Education 161, Folk Dancing Materials and Advanced Techniques | 2 |
| Electives selected from Physical Education 153, 170, 164A-164B | 3 |

### Major in Physical Sciences

This teaching major may be used as a major for the A.B. Degree if the lower and upper division requirements listed below are completed and the student has been admitted to candidacy for the General Secondary Credential and has completed at least nine units of professional courses in education by the date of degree candidacy.

*Lower Division*

| | *Units* |
|---|---|
| Chemistry 1A-1B, General Chemistry | 10 |
| Physics 1A-1B-1C-1D or 4A-4B-4C, Principles (or 2A-2B, General, and 3A-3B, Physical Measurements) | 8–12 |
| Mathematics 3A, Plane Analytic Geometry, 3B, First Course in Calculus, 4A, Second Course in Calculus (recommended 4B, Third Course in Calculus) | 9–12 |
| Biology 1, Survey | 3 |

*Upper Division*

| | |
|---|---|
| Twenty-four units in chemistry and physics, with a minimum of 9 units in each of these two departments. Six units may be selected from related fields with approval of the departmental representative | 24 |

*Graduate Year*

Select 4 units from the following:

| | |
|---|---|
| Chemistry 200, Seminar | 2–4 |
| Physics 200, Seminar | 2–4 |

**ajor in Physics**

*Lower Division*

| | |
|---|---|
| Physics 1A-1B-1C-1D or 4A-4B-4C, Principles, or equivalent | 12 |
| Chemistry 1A-1B, General | 10 |
| Mathematics 3A-3B, Plane Analytic Geometry and First Course in Calculus | 6 |
| Mathematics 4A-4B, Second and Third Course in Calculus | 6 |

*Upper Division*

| | |
|---|---|
| Physics 105A-B, Analytical Mechanics | 6 |
| Physics 110A, Principles of Electrostatics and Electromagnetism | 3 |
| Physics 102, Electronics, or 110B, Electromagnetism | 3 |
| Electives from upper division physics, with a maximum of 6 units selected from related areas upon approval of departmental representative | 12 |

*Graduate Year*

Select 4 units from the following:

| | |
|---|---|
| Physics 200, Seminars (both semesters) | 2–2 |

**inor in Physics**

A minimum of 21 semester units, of which at least 9 units shall be upper vision or graduate courses, must be completed.

*Lower Division*

| | |
|---|---|
| Physics 1A-1B-1C-1D or 4A-4B-4C, Principles, or equivalent | 12 |
| Chemistry 1A-1B, General | 10 |
| Mathematics 3A, Plane Analytic Geometry, 3B, First Course in Calculus, 4A-4B, Second and Third Course in Calculus | 12 |

*Upper Division*

| | |
|---|---|
| Upper division courses to be selected with approval of departmental representative | 9 |

**ajor in Psychology**

This major can be used for a General Secondary Credential only if the candidate mpletes *two* teaching minors.

*wer Division*

| | |
|---|---|
| Psychology 1, General | 3 |
| Psychology 10, Advanced General | 3 |
| Psychology 11, Applied, or 12, Mental Hygiene | 3 |

| *Upper Division* | *Un* |
|---|---|
| Psychology 104A, Statistical Methods | 3 |
| Psychology 105B, Psychological Testing (Individual) | 3 |
| Psychology 131, Psychological Foundations of Personality | 2 |
| Psychology 132, Problems of Personality Adjustment | 2 |
| Psychology 151, Introduction to Clinical Appraisal | 3 |
| Psychology 160A, Experimental Psychology | 3 |
| Electives to be selected with approval of the departmental representative | 8 |
| *Graduate Year* | |
| Psychology 200, Seminar in Psychology | 2 |
| Education 230, Guidance Problems in the Secondary School | 3 |

### Minor in Recreation for Men or Women

A minimum of 21 semester units, of which at least 9 units shall be upper division or graduate courses, must be completed.

Students majoring in Physical Education may use this only as a second minor. Students contemplating advanced degree work should plan to complete an academic minor as well as this minor.

| | |
|---|---|
| *Lower Division* | |
| Physical Education 51, First Aid and Safety Education | 2 |
| Physical Education 53, Physical Education in Elementary Schools | 2 |
| Electives selected from Art 61B, Crafts, or from the fields of dance, drama or music | 2 |
| *Upper Division* | |
| Physical Education 165, Administration of Community Recreation | 3 |
| Physical Education 170, Recreational Leadership | 3 |
| Physical Education 199, Special Study in Physical Education or Recreation | 1– |

### Major in Romance Languages

| | |
|---|---|
| *Lower Division* | |
| Spanish A-B, C-D, or the equivalent | 16 |
| French A-B, C-D, or the equivalent | 16 |
| History 4A-4B, or 8A-8B | 6 |
| *Upper Division* | |
| Spanish 101A-101B, Conversation and Composition | 6 |
| French 101A-101B, Conversation and Composition | 6 |
| Spanish 199 of French 199, Comprehensive Reading and Survey Course | 3 |
| Courses in Spanish literature, French literature or Spanish-American litature, selected with the approval of the departmental representative | 9 |
| *Graduate Year* | |
| Spanish 201, Old Spanish | 2 |
| Spanish 202, Seminar in Spanish-American Literature | 2 |

### Major in Social Sciences

This teaching major may be used as a major for the A.B. Degree if the lower and upper division requirements listed below are completed and the student has been admitted to candidacy for the General Secondary Credential and has completed at least 9 units of professional courses in education by the date of degree candidacy.

*Lower Division*

A student must complete a minimum of 6 units in each of at least 3 fields he may select from the departments named below:

Economics
Geography
History
Political Science
Sociology and/or anthropology

*Upper Division*

A student must complete a minimum of 30 units with the approval of the departmental representative as follows:

| | Units |
|---|---|
| 1. A minimum of 12 units from any field named above | 12 |
| 2. A minimum of 6 units from each of two fields named above, excluding the field selected for the major upper division concentration | 12 |
| 3. Electives from social science fields | 6 |

*Graduate Year*

| | |
|---|---|
| Post-bachelor work selected with approval of the departmental representative | 4 |

### Major in Spanish

*Lower Division*

| | |
|---|---|
| Spanish A-B, C-D, or the equivalent | 16 |
| French A-B, or German A-B, or Latin A-B | 10 |
| History 4A-4B, or 8A-8B | 6 |

*Upper Division*

| | |
|---|---|
| Spanish 101A-101B, Conversation and Composition | 6 |
| Spanish 199, Comprehensive Reading and Survey | 3 |
| Upper division courses in Spanish or Spanish-American literature with a maximum of 6 units which may be selected from related fields with the approval of the departmental representative | 9–15 |

*Graduate Year*

| | |
|---|---|
| Spanish 201, Old Spanish | 2 |
| Spanish 202, Seminar in Spanish-American Literature | 2 |

### Minor in Spanish

A minimum of 21 semester units, of which at least 9 units be upper division r graduate courses, must be completed.

*Lower Division*

| | |
|---|---|
| Spanish, A, B, C, D or equivalent | 15–16 |
| History 4A-4B, History of Modern Europe, or 8A-8B, History of the Americas, or equivalent | 6 |

*Upper Division*

| | |
|---|---|
| Spanish 101A-101B, Conversation and Composition | 6 |
| Spanish Literature (select one course) | 3 |

### Major in Speech Arts

*Lower Division*

| | |
|---|---|
| Speech Arts 1, Voice and Diction, or 2A, Fundamentals of Public Speaking, or 2B, Extemporaneous Speaking, or 11A, Interpretation | 3 |
| Speech Arts 55A-55B, Elementary Acting, or 81, Survey of Radio, and 82, Radio Announcing, or 83, Radio Acting and Directing | 6 |

*Upper Division*

| | |
|---|---|
| Speech Arts 150, Phonetics | 3 |
| Speech Arts 154A-154B, History of the Theatre, or 155, Advanced Acting, and any first semester upper division course, or 140A-140B, Stage Design, or 179A-179B, Nervous Speech Disorders, or 192A-192B, Advanced Public Speaking | 6 |
| Speech Arts 179A-179B, Nervous Speech Disorders, or 159A-159B, Stage Direction, or two courses selected from the following: 181, Radio Sales and Advertising, 182, Advanced Radio Production, 183, Radio News Writing and Broadcasting, 184, Radio Writing, or 191, Organized Discussion | 6 |
| Speech Arts 108, Advanced Interpretation, or 118A or 118B, playwriting, or 145, Stage Lighting, or 152, Stage Costume, or 154A or 154B, History of the Theatre, or 162, Advanced Argumentation, or 176, Problems of Speech Correction and Articulation | 3 |
| A maximum of 6 units may be selected from related fields with approval of departmental representative | 0-6 |

*Graduate Year*

| Select four units from the following courses: | Un |
|---|---|
| Speech Arts 260, Seminar in Interpretation | 2 |
| Speech Arts 221, Seminar in Articulatory Problems in Speech | 2 |
| Speech Arts 245, Seminar in Technical Practice | 2 |
| Speech Arts 259, Seminar in Stage Direction | 2 |
| Speech Arts 200, Seminar in History of Oratory | 2 |

## Minor in Speech Arts

A minimum of 21 semester units, of which at least 9 units shall be upper division or graduate courses, must be completed.

*Lower Division*

| | |
|---|---|
| Speech Arts 2A-2B, Fundamentals of Public Speaking and Extemporaneous Speaking; or 55A-55B, Elementary Acting; or 56A-56B, Dramatic Production; or 55A, Elementary Acting, and 2A, Fundamentals of Public Speaking, or 2B, Extemporaneous Speaking; or 55A, Elementary Acting, and 11A or 11B, Interpretation, or 1, Voice and Diction; or 81, Survey of Radio | 12 |

*Upper Division*

| | |
|---|---|
| Upper division Speech Arts electives selected with the approval of departmental representative | 9 |

# CURRICULA LEADING TO CREDENTIALS IN ADMINISTRATION AND SUPERVISION

## CURRICULA LEADING TO CREDENTIALS IN ELEMENTARY SCHOOL ADMINISTRATION AND SUPERVISION

In addition to the general requirements of the State of California for all degrees, he candidate shall meet the following requirements:

(a) Possess a valid General Elementary Credential.
(b) Present written evidence of two years of successful teaching experience in the elementary schools.
(c) Complete 30 semester units for the Administration Credential (24 units for the Supervision Credential) of upper division or graduate work in addition to the holding of the General Elementary Credential. These units shall include specific courses designed by the State Department of Education and the college.
(d) Maintain a grade point average of 1.75 in work taken subsequent to receipt of the General Elementary Credential.
(e) Complete a minimum of 15 units of work in residence at San Diego State College.
(f) Make formal application to the Director of Elementary Education.
(g) Earn the recommendation of the Department of Education.

Students applying for the Elementary Administration or Supervision Credentials hould register with the office of the Dean of Education and confer with the Director f Elementary Education concerning the courses which may be offered in satisfaction of he requirements. Outlines of pattern requirements for either the Elementary Superision or Administration Credentials may be obtained by writing the Director of Elenentary Education.

## SPECIAL SUBJECT SUPERVISION CREDENTIAL

This credential is available for persons who wish to supervise in a special subect area. Those desiring this credential should see the Dean of Education.

## CURRICULA LEADING TO CREDENTIALS IN SECONDARY SCHOOL ADMINISTRATION AND SUPERVISION

In addition to the general requirements of the State of California for all degrees, he candidate shall meet the following requirements:

(a) Possess a valid General Secondary Credential.
(b) Present written evidence of two years of successful teaching experience.
(c) Complete 18 semester units for the Administration Credential (15 semester units for the Supervision Credential) of upper division or graduate work after holding a valid General Secondary Credential. These units must include a specific pattern of courses designed by the State Department of Education and the college.
(d) Maintain a grade point average of 1.75 on units under (c).
(e) Complete a minimum of 12 units of work in residence at San Diego State College after holding the General Secondary Credential.
(f) Make formal application to the Director of Secondary Education.
(g) Earn the recommendation of the Department of Education.

Students applying for the Secondary Administration or Supervision Credentials hould register with the office of the Dean of Education and confer with the Director f Secondary Education concerning the courses which may be offered in satisfaction of he requirements. Outlines of pattern requirements for either the Secondary Superviion or Administration Credentials may be obtained by writing the Director of Secndary Education.

# THE BACHELOR OF EDUCATION DEGRE AND THE GENERAL ELEMENTARY CREDENTIAL

## ELIGIBILITY FOR CANDIDACY

Teachers holding the Provisional General Elementary School Credential eligible for candidacy for the Bachelor of Education Degree. The purpose of this deg is to increase the professional competence of teachers who do not hold a bachelo degree. The educational program of each applicant shall be determined on the ba of his previous preparation and of the services he is to render. In the period of p fessional preparation the applicant shall be guided into those learning experien designed to meet his cultural and professional needs.

## MINIMUM REQUIREMENTS

An applicant for the general elementary credential and the Bachelor of Edu tion Degree shall comply with the procedures for application and with the requireme for personal qualifications and general training and shall have completed a progr including the following minimum requirements:

- a. A four-year college course of 120 semester units, or the equivalent.
- b. Eighteen semester units, or the equivalent, of professional work in educati constituting an organized program designed to prepare candidates in t following areas:
    - (1) The evolution of educational thought and practice as to the function the school in a democratic society, with emphasis on the elementa school.
    - (2) The nature of individual growth and development; the psychologi aspects of learning; child study, with emphasis on directed observation children; mental hygiene and personality development; parent edu tion; guidance practices.
    - (3) The selection and arrangement of learning experiences, instructio materials, learning methods and appraisal techniques related to statutory requirements for teaching, including reading, writing, spelli language study, arithmetic, geography, history of the United States a of California, civics including the Constitution of the United Stat music, art, physical education, healthful living, morals and manne safety education, and fire prevention.
    - (4) The use of audio-visual aids in instruction.
- c. Directed teaching in the elementary school, eight semester units, or t equivalent, under the supervision of superior teachers in actual classroo situations of the elementary school level.
- d. Sixty-one semester units or the equivalent in basic subject fields, distribut approximately as follows:
    - (1) *Social Studies.* Twelve semester units, or the equivalent, with empha upon current economic, political, and social problems and world histo and geography, sociology and anthropology. The legal requirement United States Constitution and American history, institutions, a ideals shall be included in the social studies program.
    - (2) *Science.* Twelve semester units, or the equivalent, in the fields physical and biological science, with emphasis upon the study and u of the environment.

(3) *English,* including speech. Twelve semester units, or the equivalent, including oral and written expression, world literature, children's literature, dramatics, detection and correction of speech defects, and the use of books and libraries.

(4) *Mathematics.* Three semester units, or the equivalent, including subject matter and techniques essential in the teaching of mathematics in the elementary school.

(5) *Health and Hygiene.* Three semester units, or the equivalent, including personal hygiene, subject matter and techniques essential in health education to elementary school pupils.

(6) *Physical Education.* Three semester units, or the equivalent, including subject matter and techniques essential in the teaching of physical education to elementary school pupils.

(7) *Music.* Eight semester units, or the equivalent, including content and techniques appropriate for the elementary school.

(8) *Art.* Eight semester units, or the equivalent, in graphic art and industrial arts applicable to learning experiences appropriate for elementary school children.

e. The remaining units necessary to complete the requirements for the Bachelor of Education degree shall be distributed among those offerings of the institution that best serve the cultural and professional needs of the candidate.

## EVALUATION OF TEACHING EXPERIENCE AND SUBJECT MATTER FIELDS

a. A candidate with two or more years' teaching experience may be awarded a maximum of 8 semester units of credit, or the equivalent, in directed teaching provided he demonstrates satisfactory skill to a representative of the institution under whose direction he is completing his degree program, or provided other conditions set by the institution to insure classroom skill are met. This credit shall not be applied until the candidate has completed at least 112 semester units, or the equivalent, of his program.

b. Credit toward the B. Ed. degree may be secured by passing comprehensive examinations in the fields of study mentioned in paragraphs (b) and (d) above.

## INSTITUTION AND RESIDENCE REQUIREMENTS

a. A minimum of 30 semester units, or the equivalent, must be secured from the college conferring the degree.

b. At least 12 semester units, or the equivalent, must be earned in campus residence course work at the college conferring the degree and must be secured after completion of at least 90 semester units, or the equivalent.

c. A maximum of 30 units may be secured by examination.

# THE BACHELOR OF SCIENCE DEGREE

The Bachelor of Science Degree will be offered in certain curricula to be designated at a later date. Students interested in this degree should obtain supplementary information from the Office of the Registrar.

# PREPROFESSIONAL AND VOCATIONAI CURRICULA

Preprofessional and vocational curricula, ranging in length from two to f years of collegiate work, are offered. Curricular outlines of preprofessional stu which are presented on the following pages, meet the typical requirements for adr sion to professional schools. Students expecting to complete their professional train at other institutions should modify the suggested outlines of study to meet the requ ments of the professional schools of their choice. Curricular outlines for comp training leading to vocations are also presented on the following pages.

Curricular outlines are presented for agriculture, commerce, dentistry, educat engineering, home arts, inter-American relations, journalism, law, life science oc pations, medicine, nursing, optometry, pharmacy, recreation, and veterinary scie Students desiring to modify these curricular outlines in terms of liberal arts ma should consult the advisers in the respective curricula.

## PRE-AGRICULTURAL CURRICULA

The high school program should include the following subjects: element algebra, 1 unit; plane geometry, 1 unit; intermediate algebra, 1 unit; trigonome ½ unit; chemistry, 1 unit; physics, 1 unit; mechanical drawing, 1 unit; fore language, 3 units in one language.

Students should ascertain the lower division requirements of the agricultu college they expect to enter.

### CURRICULUM IN PLANT SCIENCE

| Freshman Year | Units<br>1st Sem. | 2<br>Se |
|---|---|---|
| Physical Education (activity courses) | ½ | |
| Health Education 21, Principles of Healthful Living | 2 | - |
| Chemistry 1A-1B, General | 5 | 5 |
| Botany 2A-2B, General | 4 | 4 |
| Physics 2A-2B, General | 3 | 3 |
| English 1, Freshman Composition | - | 3 |
| Elective | 2 | 1 |
| | 16½ | 16 |

| Sophomore Year | 1st Sem. | Se |
|---|---|---|
| Physical Education (activity courses) | ½ | |
| Economics 1A-1B, Principles | 3 | 3 |
| English 2, Freshman Literature, or optional course | - | 3 |
| Chemistry 101, Elementary Organic, and 102, Laboratory | 4 | 3 |
| Geology 1A, Physical, or 2A, General | 3 | - |
| Bacteriology 1, General | - | 4 |
| Zoology 1A, General | 4 | - |
| Psychology 1, General | - | 3 |
| Elective | 2 | - |
| | 16½ | 16 |

## CURRICULUM IN ANIMAL SCIENCE

| Freshman Year | Units 1st Sem. | Units 2d Sem. |
|---|---|---|
| Physical Education (activity courses) | ½ | ½ |
| Chemistry 1A-1B, General | 5 | 5 |
| Zoology 1A-1B, General | 4 | 4 |
| Physics 2A-2B, General | 3 | 3 |
| English 1, Freshman Composition, and 2, Freshman Literature, or optional course | 3 | 3 |
| | 15½ | 15½ |

| Sophomore Year | | |
|---|---|---|
| Physical Education (activity courses) | ½ | ½ |
| Health Education 21, Principles of Healthful Living | 2 | – |
| Psychology 1, General | 3 | – |
| Economics 1A-1B, Principles | 3 | 3 |
| Bacteriology 1, General | – | 4 |
| Botany 2A, General | 4 | – |
| Chemistry 101, Elementary Organic, and 102, Laboratory | 4 | 3 |
| Zoology 100, Embryology | – | 3 |
| Zoology 20, Human Anatomy and Physiology, or 8, Human Anatomy | – | 3 |
| | 16½ | 16½ |

## COMMERCE CURRICULUM

The first two years of the curriculum are introductory. During this period the student acquires a basis for further study and an understanding of the place that business fills in modern economic life. The choice of the major field should be made at the beginning of the junior year. The student then follows a program of studies that is designed to provide a vocational ability in at least one particular area: (A) Accounting; (B) Banking and Finance; (C) Business Administration; (D) Marketing; or (E) Secretarial.

| Lower Division | | Units |
|---|---|---|
| Physical Education (activity courses) | | 2 |
| English 8, Business English, and 2, Freshman Literature, or optional course | | 6 |
| Health Education 21, Principles of Healthful Living | | 2 |
| Psychology 1, General | | 3 |
| Natural Sciences (including Geography 1, Elements) | | 9–12 |
| History, Political Science, or Sociology | | 3–6 |
| Geography 10, Economic (not required in the Marketing field) | | 3 |
| Economics 1A-1B, Principles | | 6 |
| Commerce 2, Mathematics of Finance (not required in the Marketing or Secretarial fields) | | 3 |
| Commerce 14A-14B, Principles of Accounting (students in Secretarial field take 16A-16B instead) | | 6 |
| Commerce 18A-18B, Commercial Law | | 6 |
| Electives | | 0–8 |
| Marketing subfield must include: | | |
| Commerce 20, Consumer Economics | 3 | |
| Commerce 24, Merchandising | 3 | |
| Commerce 25, Salesmanship | 3 | |
| Commerce 27, Advertising Principles | 3 | |
| Art 7, Line, Color, Display | 2 | |
| Secretarial subfield must include: | | |
| Commerce A, Business Mathematics | 1 | |
| Commerce 1A-1B, Typewriting | 6 | |
| Commerce 5A-5B, Shorthand | 10 | |
| (Students knowing typewriting or shorthand must take placement examinations in these subjects before enrolling in 1A-1B or 5A-5B. It is recommended that shorthand be taken in the junior year.) | | |
| | | 60 |

| **Upper Division** | *Un* |
|---|---|
| Minor (in addition to courses applied toward the major) | 9 |
| Major | 24– |

For (A) *Accounting;* (B) *Banking and Finance;* (C) *Business Administration;* and (D) *Marketing,* the following courses must be included: Economics 111, Economic History of the United States, or 170, Government and Business, or Commerce 123, Marketing Principles; Economics 140, Statistical Methods; Commerce 121, Business Administration; and 15 uints selected from one of the following groups:

A. *Accounting:* Commerce 160A-160B, 161A-161B, 162, 164A-164B, 165A-165B.
B. *Banking and Finance:* Commerce 133, 134, 137; Economics 131, 135, 142.
C. *Business Administration:* Commerce 123, 125, 126, 127A, 133, 134, 137, 153, 184; Economics 128, 142, 150, 170.
D. *Marketing:* Commerce 123, 124, (students who wish to specialize in insurance may elect 127B, 128A, 128B), 137, 153, 184, 185, 186, 187A, 187B, 188, 189; Home Economics 160A, 160B.

For (E) *Secretarial:* Major: 25 units to include the following courses: Commerce 103A-103B, Office Management, 113A-113B, Secretarial Office Practice, 123, Marketing Principles, 153, Personnel Administration, and 164A, Income Tax Procedure. Directed electives: an additional 9 units selected from Commerce 121, 186, 188, Economics 111, 135, 142, 150, or 170, with approval of departmental representative.

| | |
|---|---|
| Electives (to include minimum 40 upper division unit requirement) | 17– |
| | 6 |

## PRE-DENTAL CURRICULUM

Candidates for a degree in dentistry should ascertain the entrance requiremen of the dental college to which they expect to transfer and should make whatev changes in the following typical requirements that may seem desirable in satisfyi the requirements of the specific dental college.

The high school program should include the following subjects: elementa algebra, 1 unit; plane geometry, 1 unit; chemistry, 1 unit; physics, 1 unit; forei language, 3 units in one language; mechanical drawing, 1 unit.

| **Freshman Year** | *Units*<br>*1st Sem.* | *2d*<br>*Se* |
|---|---|---|
| Physical Education (activity courses) | ½ | |
| Health Education 21, Principles of Healthful Living | 2 | – |
| Chemistry 1A-1B, General | 5 | 5 |
| Physics 2A-2B, General | 3 | 3 |
| Physics 3A-3B, Physical Measurements | 1 | 1 |
| English 1, Freshman Composition, and 2, Freshman Literature, or optional course | 3 | 3 |
| Psychology 1, General | – | 3 |
| Elective | 0–2 | 0– |
| | 16½ | 16 |

| **Sophomore Year** | | |
|---|---|---|
| Physical Education (activity courses) | ½ | |
| Chemistry 101, Elementary Organic, and 102, Laboratory | 4 | 3 |
| Zoology 1A-1B, General | 4 | 4 |
| Mathematics C, Intermediate Algebra, and D, Trigonometry | 3 | 3 |
| Social Science (year course selected from Anthropology 1A-1B, General; Economics 1A-1B, Principles; History 4A-4B, Modern Europe, or 8A-8B, the Americas, or 17A-17B, American Civilization; Political Science 1A-1B, Introduction to Government | 3 | 3 |
| Electives (a course in public speaking is recommended) | 2 | 3 |
| | 16½ | 16½ |

The following courses are suggested for a third year in preparation for dentistry or those who fail to receive an acceptance from a dental college after completing the rescribed 60 units.

| Junior Year | Units 1st Sem. | Units 2d Sem. |
|---|---|---|
| hemistry 5, Quantitative Analysis | 3 | – |
| oology 106, Comparative Anatomy of the Vertebrates | 4 | – |
| oology 100, Embryology | – | 4 |
| rt 119A, Ceramics (see prerequisite) | 2 | – |
| sychology 11, Applied | – | 3 |
| dditional Year Course in Social Science | 3 | 3 |
| lectives | 4 | 6 |
|  | 16 | 16 |

The curriculum for Dental Hygiene is essentially the same as the above for preentistry.

## ENGINEERING CURRICULUM

In recent years the engineering profession has become so complex and diversified hat an almost endless number of specialties has arisen. Many engineering colleges nd universities have attempted to encompass these specialties with the addition of ore and more specialized courses to their curricula. This has resulted in two things, he gradual crowding out of nearly all nontechnical courses, and an increase in the umber of units required for graduation to approximately the equivalent of another ear's work. This has produced graduates who are expert technicians but who lack he broad education essential to the understanding of modern society.

It is recognized that all successful engineers must have a thorough grounding the fundamental sciences and mathematics on which technology depends. Also they ust have a broad general education in order that they may intelligently apply their echnical skills and knowledge to the problems of society.

The engineering program at San Diego State College is designed to give the tudent a sound training in the fundamentals of engineering with a minimum of pecialization and at the same time the broad training and experiences which contitute a liberal education. The Bachelor of Arts Degree is offered at present in Engieering; however, the Bachelor of Science Degree will soon become an optional degree. tudents interested in the Bachelor of Science Degree should consult with the Chairan of the Department concerning further details.

### FIELDS OF SPECIALIZATION

In the freshman and sophomore years all students majoring in engineering are xpected to take the courses listed below. In the junior and senior years optional prorams are available which provide limited specialization in *aeronautical, chemical, vil, electrical, electronic or mechanical engineering*, or *engineering physics* or *engieering economics*. Normally, students are expected to elect one of these basic options. n certain cases equivalent programs may be worked out which will better suit the eeds of the individual student.

It should be noted that the engineering major allows considerable latitude in e choice of electives in the junior and senior years. Students are encouraged to hoose electives which suit their particular needs in broadening their training in the eld of general education. The choice of electives must follow a logical plan approved y the faculty adviser.

### MINOR FIELD

Students majoring in engineering must elect a *minor* in one of the following elds: *Chemistry, economics, mathematics*, or *physics*. The upper division economics d mathematics courses included in the curriculum may be used in partial fulfillment the requirements for the minor in those fields. Engineering 102A-102B may be subituted for Physics 105A-105B in partial fulfillment of the requirement for a physics inor.

### PREPARATION FOR TRANSFER

Students may stay at San Diego State College for less than four years and then mplete their training for professional engineering at some other engineering school. such cases the curriculum for the first two years will be essentially the same as that given below, but the student should plan his work carefully with the help of a facul adviser to insure satisfaction of all requirements.

## HIGH SCHOOL PREPARATION

The high school program should include the following subjects: Elementa algebra, 1 unit; plane geometry, 1 unit; intermediate algebra, 1 unit; solid geometr ½ unit; trigonometry, ½ unit; chemistry, 1 unit; physics, 1 unit; mechanical dra ing, 1 unit.

### Lower Division

Courses must be included to satisfy all college requirements for the A.B. Degre except the foreign language requirement. See section entitled: Lower Division Requir ments for All Curricula.

|---|---|---|
| *Freshman Year* | | |
| Math. 3A-3B, Analytic Geometry and First Course in Calculus | 3 | 3 |
| Physics 1A-1B, Mechanics of Solids, Fluids, Heat and Sound, or 4A, Mechanics, beginning in second semester of freshman year | 0–3 | 3– |
| Chemistry 1A-1B, General Chemistry | 5 | 5 |
| English 1, Freshman Composition | 3 | – |
| Health Education 21, Principles of Healthful Living | 2 | – |
| Biology 1, Survey of Biology (unless taken in high school) | – | 3 |
| Physical Education (activity courses) | ½ | |
| Electives | 0–3 | 1– |
| | 16½ | 16 |
| *Sophomore Year* | | |
| Math. 4A-4B, Second and Third Courses in Calculus | 3 | 3 |
| Physics 1C-1D, Electricity and Magnetism, Light and Atomic Physics, or 4B, Electricity, and 4C, Heat, Sound, and Light | 3–4 | 3–4 |
| Economics 1A-1B, Principles of Economics | 3 | 3 |
| Engineering 21, Descriptive Geometry | 3 | – |
| Physical Education (activity courses) | ½ | ½ |
| Other courses to complete lower division preparation, including Psychology 1, English, and Social Science (see section entitled: Lower Division Requirements for All Curricula.) | 3–4 | 6–7 |
| | 16½ | 16½ |

One of the following groups of courses is required, dependent upon the field specialization desired in the upper division:

| | Unit |
|---|---|
| For Civil Engineering | |
| Engineering 1A-1B, Plane Surveying | 6 |
| Astronomy 3, Surveyor's Course in Practical Astronomy | 3 |
| For Mechanical, Electrical and Aeronautical Engineering | |
| Engineering 1A, Plane Surveying | 3 |
| Engineering 22, Machine Drawing | 3 |
| Elective | 3 |
| For Chemical Engineering | |
| Chemistry 5, Quantitative Analysis | 3 |
| Chemistry 101, Organic Chemistry | 4 |
| Elective | 2 |
| For Engineering Economics | |
| Commerce 14A-14B, Principles of Accounting | 6 |
| Elective | 3 |
| For Engineering Physics | |
| Engineering 22, Machine Drawing (recommended) | 3 |
| Elective | 6 |

Students should, if possible, complete all of the college lower division requirements in the sophomore year. Any not completed then must be completed in th junior year.

### Upper Division

All upper division requirements for the A.B. Degree must be met. These include:

Examination in American History and U. S. Constitution.

Completion of a minimum of 24 upper division units for the major.

Completion of a minimum of 9 upper division units for the minor in one of the ollowing fields: Chemistry, economics, mathematics, or physics.

The courses required for the engineering major include a core group plus those equired for each field of specialization. These are indicated below.

The choice of a field of specialization and the choice of electives must be approved y the engineering department. Students normally will submit master plans of their pper division program for departmental approval at the beginning of the junior year. ny subsequent deviation from this plan must be approved by the department.

### equired for All General Engineering Students

| *unior Year* | *Units* |
|---|---|
| Engineering 102A-102B, Analytical Mechanics | 6 |
| Engineering 100A-100B, Elements of Electrical Engineering | 6 |
| Engineering 140, Strength of Materials | 3 |

| *enior Year* | |
|---|---|
| Engineering 128, Applied Engineering Thermodynamics | 3 |
| Engineering 105, Hydraulics | 3 |
| Engineering 199, Senior Report | 2 |

### dditional Requirements for Various Fields of Specialization

*Aeronautical Engineering*

| *Junior Year* | |
|---|---|
| Engineering 122, Machine Design | 3 |
| Engineering 141, Materials of Engineering Laboratory | 2 |
| Mathematics 118 or 119 or 124 | 3 |
| Economics 131 or 150 or 170 | 3 |
| Electives | 4 |

| *Senior Year* | |
|---|---|
| Engineering 156, Aerodynamics | 3 |
| Engineering 142, Stress Analysis | 3 |
| Engineering 129, Heat Power Laboratory | 2 |
| Economics 131 or 150 or 170 | 3 |
| Electives | 11 |

*Chemical Engineering*

| *Junior Year* | |
|---|---|
| Chemistry 102, Organic Chemistry Laboratory | 3 |
| Engineering 141, Materials of Engineering Laboratory | 2 |
| Mathematics 118 or 119 or 124 | 3 |
| Economics 131 or 150 or 170 | 3 |
| Electives | 4 |

| *Senior Year* | |
|---|---|
| Chemistry 110A-110B, Physical Chemistry | 6 |
| Chemistry 144A-144B, Chemical Engineering | 6 |
| Economics 131 or 150 or 170 | 3 |
| Electives | 7 |

*Civil Engineering*

| *Junior Year* | |
|---|---|
| Engineering 130, Route and Construction Surveying | 3 |
| Engineering 141, Materials of Engineering Laboratory | 2 |
| Mathematics 118 or 119 or 124 | 3 |
| Economics 131 or 150 or 170 | 3 |
| Electives | 4 |

*Senior Year*

| | Un |
|---|---|
| Engineering 131, Advanced Surveying | 3 |
| Engineering 106, Hydraulics Laboratory | 2 |
| Economics 131 or 150 or 170 | 3 |
| Electives | 14 |

*Electrical Engineering*

*Junior Year*

| | |
|---|---|
| Engineering 101A-101B, Electrical Engineering Laboratory | 4 |
| Mathematics 118 or 119 or 124 | 3 |
| Economics 131 or 150 or 170 | 3 |
| Electives | 5 |

*Senior Year*

| | |
|---|---|
| Physics 107, Electrical Measurements | 2 |
| Physics 102, Electronics | 3 |
| Economics 131 or 150 or 170 | 3 |
| Electives | 14 |

*Mechanical Engineering*

*Junior Year*

| | |
|---|---|
| Engineering 122, Machine Design | 3 |
| Engineering 141, Materials of Engineering Laboratory | 2 |
| Mathematics 118 or 119 or 124 | 3 |
| Economics 131 or 150 or 170 | 3 |
| Electives | 4 |

*Senior Year*

| | |
|---|---|
| Engineering 129, Heat Power Laboratory | 2 |
| Engineering 106, Hydraulics Laboratory | 2 |
| Engineering 145, Internal Combustion Engines | 3 |
| Economics 131 or 150 or 170 | 3 |
| Electives | 12 |

*Engineering Economics*

*Junior Year*

| | |
|---|---|
| Commerce 121, Business Administration | 3 |
| Economics 133, Corporation Finance | 3 |
| Commerce 18A, Commercial Law | 3 |
| Economics 140, Statistics | 3 |
| Elective | 3 |

*Senior Year*

| | |
|---|---|
| Economics 170, Government and Business | 3 |
| Commerce 150, Labor Problems | 3 |
| Economics 131, Public Finance | 3 |
| Electives | 13 |

*Engineering Physics*

*Junior Year*

| | |
|---|---|
| Mathematics 118 or 119 or 124 | 3 |
| Economics 131 or 150 or 170 | 3 |
| Electives | 9 |

*Senior Year*

| | |
|---|---|
| Physics 102, Electronics | 3 |
| Physics 107, Electrical Measurements | 2 |
| Physics 110A, Electricity and Electromagnetism | 3 |
| Economics 131 or 150 or 170 | 3 |
| Electives | 11 |

*Electronics Engineering*

*Junior Year*

| | *Units* |
|---|---|
| Physics 102, Basic Electronics | 3 |
| Engineering 104 or Physics 104, Communications | 2 |
| Physics 122, Electronics Laboratory | 2 |
| Mathematics 118 or 119 or 124 | 3 |
| Economics 131 or 150 or 170 | 3 |
| Elective | 1 |

*Senior Year*

| | |
|---|---|
| Engineering 124 or Physics 124, Radio Measurements | 2 |
| Engineering 150, Industrial Electronics | 2 |
| Physics 152, Advanced Electronics | 2 |
| Physics 107, Electrical Measurements | 2 |
| Economics 131 or 150 or 170 | 3 |
| Electives | 11 |

## PRE-FORESTRY CURRICULUM

Students desiring to enter professional training in forestry should ascertain the ntrance requirements of the college to which they expect to transfer and should make hatever changes in the following suggested pre-forestry courses that may seem esirable in satisfying the requirements of that college.

The high school program should include the following subjects: English, 4 units; lementary Algebra and Plane Geometry, 2 units; Intermediate Algebra, 1 unit; Solid eometry, ½ unit; Trigonometry, ½ unit; Physics, 1 unit; Chemistry, 1 unit; History, unit; Geometrical Drawing, 1 unit; foreign language, 2 to 4 units, preferably erman or French.

| **Freshman Year** | *Units*<br>*1st Sem.* | <br>*2nd Sem.* |
|---|---|---|
| hysical Education (activity courses) | ½ | ½ |
| hemistry 1A-1B, General | 5 | 5 |
| otany 2A-2B, General | 4 | 4 |
| nglish 1, Composition, and English 2, Literature | 3 | 3 |
| athematics 3A, Plane Analytic Geometry | 3 | – |
| athematics 3B, First Course in Calculus | – | 3 |
| | 15½ | 15½ |

| **Sophomore Year** | | |
|---|---|---|
| hysical Education (activity courses) | ½ | ½ |
| hysics 2A-2B, General | 3 | 3 |
| hysics 3A-3B, Physical Measurements | 1 | 1 |
| ngineering 1A-1B, Plane Surveying | 3 | 3 |
| conomics 1A-1B, Principles | 3 | 3 |
| eology 2A, General | 2 | – |
| ealth Education 21, Principles of Healthful Living | – | 2 |
| sychology 1, General | 3 | – |
| hemistry 101, Elementary Organic | – | 4 |
| | 16½ | 16½ |

## HOME ARTS CURRICULUM

The Home Arts curriculum is designed to meet the needs of those studen who wish to apply their knowledge to the various problems of home living. This curric lum is based on the *general major* in arts and sciences with a field of concentration Home Economics combined with two other fields to be selected by the student in co sultation with the Chairman of the Department of Home Economics and the De of Arts and Sciences. (For specific information on the *general major*, refer to the se tion entitled: Upper Division Requirements for the Bachelor of Arts Degree in A and Sciences.) By appropriate selection of courses, the student may prepare for t fields of journalism, radio, community recreation, home service in industry, me chandising, and several phases of social work.

The outline of courses listed below is suggested as a plan for the *general maj* with Home Economics as a field of concentration.

### Lower Division

| | *Units* | |
|---|---|---|
| *Freshman Year* | *1st Sem.* | *2d Se* |
| Physical Education (activity courses) | ½ | |
| English 1, Freshman Composition, and 2, Freshman Literature or optional course | 3 | 3 |
| Psychology 1, General | 3 | – |
| Health Education 21, Principles of Healthful Living | 2 | – |
| Chemistry 2A-2B, General | 3 | 3 |
| Art 6A, Design | 2 | – |
| Home Economics 1, Home and Family Life | – | 3 |
| Electives (See lower division requirements, page 17. Student should also see prerequisites for upper division courses for the general major) | 3 | 7 |
| | 16½ | 16 |
| *Sophomore Year* | | |
| Physical Education (activity courses) | ½ | |
| Home Economics 61A-61B, Nutrition and Laboratory | – | 3 |
| Home Economics 5, Food Preparation | 3 | – |
| Home Economics 10, Fundamentals of Clothing | – | 3 |
| Sociology 50A-50B, Introduction | 3 | 3 |
| Electives (completion of lower division requirements and prerequisites for upper division courses for the general major) | 10 | 7 |
| | 16½ | 16 |

Preparation for U. S. Constitution and American History requirement.

Suggested electives for the first two years:

- Biology 10A-10B (6), or Biology 1 (3), Zoology 20 (3)
- Physics 2A-2B (6)
- Speech Arts 2A-2B (6)
- History 17A-17B (6)
- Health Education 90 (1)
- Art 6B (2), 61B (2)

### Upper Division

Home Economics courses to satisfy the general major should be selected from th following:

| | *Unit* |
|---|---|
| Home Economics 101, Clothing Selection | 3 |
| Home Economics 105, Family Meals | 3 |
| Home Economics 108, Marriage and the Family | 3 |
| Home Economics 160A, Merchandise Analysis—Textiles | 2 |
| Home Economics 160B, Merchandise Analysis—Non-Textiles | 2 |
| Home Economics 102, Child Growth and Development | 3 |

## INTER-AMERICAN RELATIONS

The purpose of this curriculum is (1) to furnish a basis for a more intelligent and ffective understanding of the opportunities and problems of international relations in e western hemisphere; (2) to provide facilities for a basic education and training for business or professional career which involves international relations.

Competition for opportunities of service in international affairs is severe. The udent who plans a career in this field should therefore organize his electives to provide r a concentration in some area of work in which there are greater vocational opportuities. Preparation for employment as a foreign representative of an American business ganization implies concentration in economics. The student who pursues this curricum as a guide for training for the foreign service in consular, vice consular, secretarial, nd other public offices should include additional courses in foreign language, history, litical science, geography, and economics to furnish more effective preparation for e comprehensive competitive examinations required for appointment to the Service nd for entrance to the Foreign Officers Training School at Washington, D. C.

This program should be completed either with a major in economics or a general ajor. Consult the Dean of Arts and Sciences for details.

The high school program should include the following subjects: algebra, 1 unit; ane geometry, 1 unit; foreign language, 3 units in one language, preferably Spanish.

| | *Units* | |
|---|---|---|
| **Freshman Year** | *1st Sem.* | *2d Sem.* |
| hysical Education (activity courses) | ½ | ½ |
| ealth Education 21, Principles of Healthful Living | 2 | – |
| nglish 1, Freshman Composition, and 2, Freshman Literature, or optional course | 3 | 3 |
| panish | 0–5 | 0–5 |
| atural Science (see page 18) | 3–5 | 3–5 |
| istory 8A-8B, History of the Americas | 3 | 3 |
| sychology 1, General | – | 3 |
| lective | 4–8 | 0–3 |
| | 15½ | 15½ |
| **Sophomore Year** | | |
| ysical Education (activity courses) | ½ | ½ |
| dditional Natural Science (if needed to meet requirement) | 0–3 | – |
| conomics 1A-1B, Principles | 3 | 3 |
| litical Science 1A-1B, Introduction to Government, or 71A-71B, Introduction to American Government and Politics | 3 | 3 |
| eography 1, Elements of Physical Geography | 3 | – |
| ective | 0–6 | 9 |
| | 15½ | 15½ |
| **Junior Year** | | |
| onomics 195, International Economic Relations | – | 3 |
| litical Science 150A-150B, International Relations | 3 | 3 |
| story 173A-173B, The Expansion of the United States | 3 | 3 |
| anish 104A-104B, Spanish-American Literature | 3 | 3 |
| lective | 3 | 3 |
| onomics elective | 3 | – |
| amination in U. S. Constitution | | |
| | 15 | 15 |
| **Senior Year** | | |

| onomics 198, Investigation and Report (Western Hemisphere) | 3 | – |
| story 161, Mexico and the Caribbean Countries | 3 | – |
| story 162, South America Since Independence | – | 3 |
| ography 116, Geography of Latin America | – | 3 |
| ography 121, Geography of North America | 3 | – |
| ectives from economics, history, political science, or geography to complete the general major | 3 | 3 |
| ective | 3 | 3 |
| | 15 | 15 |

# PRE-JOURNALISM CURRICULUM

Students desiring to emphasize journalism in working for the A.B. Degree at th college should work toward a general major with journalism included as one of t three major fields of study. (Refer to the section entitled: Upper Division Requir ments for the Bachelor of Arts Degree in Arts and Sciences, for explanation of t general major.)

The curriculum suggested below takes cognizance of the widely held contenti that a candidate for a position in the newspaper, magazine, or publishing field shou be more than a product of vocational training. A competent journalist must bring to h work a broad educational background, with particular emphasis on the social scienc

Students interested in specialized journalism (such as a foreign correspondenc scientific, financial, or political reporting) should attempt to fit specialized courses in their curricula. Additional social science courses are recommended as electives.

Students preparing for degrees in journalism from other colleges should ascerta entrance requirements of the college to which they expect to transfer, and should mo their programs accordingly.

The following curriculum is suggested for students who have not decided up any field of specialization within journalism:

## Lower Division

| | *Units* | |
|---|---|---|
| | *1st Sem.* | *2d Se* |
| *Freshman Year* | | |
| Physical Education (activity courses) | ½ | |
| Health Education 21, Principles of Healthful Living | 2 | - |
| English 1, Freshman Composition, and 2, Freshman Literature or optional course | 3 | 3 |
| Psychology 1, General; and 10, Advanced General, or 11, Applied | 3 | 3 |
| History 4A-4B, Modern Europe, or 8A-8B, The Americas, or 17A-17B, American Civilization (this course, if elected, must be taken in the sophomore year) | 3 | 3 |
| Natural Science (see Lower Division Requirements for All Curricula) | 3 | 3 |
| Elective | - | 3 |
| | 14½ | 15 |
| *Sophomore Year* | | |
| Physical Education (activity courses) | ½ | |
| Journalism 51A, Elements | 3 | - |
| Journalism 51B, News Gathering and Reporting | - | 3 |
| Foreign Language (if not completed in high school) | 5 | 5 |
| Natural Science | 3 | 3 |
| Economics 1A-1B, Principles; or Sociology 50A-50B, Introduction and General | 3 | 3 |
| Library Science 10, Use of the Library | - | 2 |
| | 14½ | 16 |

## Upper Division

On acquiring upper division status, the student should confer with his adviser planning courses to meet his specific and specialized needs and that meet the requir ments for the A.B. Degree with a general major, including U. S. Constitution ar American history graduation requirement.

# LABORATORY TECHNICIAN—CLINICAL, MEDICAL, OR PUBLIC HEALTH

The preparation for laboratory technician in clinical, medical, or public health fields is the same, except that the license for Medical Laboratory Technician requires five years of experience as a clinical technician. For the Clinical Laboratory Technician license a six months' apprenticeship must be served in an approved laboratory.

Select courses for major and minor in consultation with adviser.

## Lower Division

| | *Units* | |
|---|---|---|
| | *1st Sem.* | *2d Sem.* |
| *Freshman Year* | | |
| Physical Education (activity courses) | ½ | ½ |
| Health Education 21, Principles of Healthful Living | – | 2 |
| Psychology 1, General | 3 | – |
| Chemistry 1A-1B, General | 5 | 5 |
| English 1, Freshman Composition, and 2, Freshman Literature | 3 | 3 |
| Zoology 1A, General | 4 | – |
| Social Science (see lower division requirements) | – | 3 |
| Elective | – | 3 |
| | 15½ | 16½ |
| *Sophomore Year* | | |
| Physical Education (activity courses) | ½ | ½ |
| Chemistry 5, Quantitative Analysis | – | 3 |
| Bacteriology 1, General | 4 | – |
| Physics 2A, General | 3 | – |
| Physics 3A, Physical Measurements | 1 | – |
| Physiology 1A, 1C, General | – | 5 |
| Foreign Language (if needed) | 5 | 5 |
| Social Science (see lower division requirements) (see also U. S. History and Constitution requirements) | 3 | 3 |
| | 16½ | 16½ |

## Upper Division

| | | |
|---|---|---|
| *Junior Year* | | |
| Chemistry 101, 102, Organic | 4 | 3 |
| Bacteriology 102, Advanced | – | 4 |
| Zoology 111, Parasitology | 4 | – |
| Electives (to include major and minor fields) | 7 | 8 |
| *Senior Year* | | |
| *Chemistry 114, 115, Biochemistry | 3 | 2 |
| *Zoology 145, Haematology | 3 | – |
| Electives to satisfy A.B. Degree requirements, including major and minor fields | 9 | 12 |
| | 15 | 14 |

* Not required for Public Health Laboratory Technician certificate.

# PRE-LEGAL CURRICULUM

*The entrance requirements of law colleges range from two years to three and fou years of pre-legal work. The lower division requirements of the arts and scienc curricula should be met in full whether the curriculum extends over a period of two three, or four years.*

The following curriculum meets the recommendations of standard American la colleges for a broad and liberal education. For the majority of pre-legal students general major with concentration in economics, political science, and history, or major-minor combination in these fields, will constitute the most effective preparatio for later professional study in law and for later activities in the field of business. (Fo description of the general major, refer to the section entitled: Upper Division Require ments for the Bachelor of Arts Degree in Arts and Sciences.)

### Lower Division

| | *Units* 1st Sem. | *Units* 2d Sem |
|---|---|---|
| *Freshman Year* | | |
| Physical Education (activity courses) | ½ | ½ |
| Health Education 21, Principles of Healthful Living | – | 2 |
| Foreign Languages (if needed to complete requirement) | 0–5 | 0–5 |
| Natural Science (see lower division requirements) | 3–6 | 3–6 |
| English 1, Freshman Composition, and English 2, Freshman Literature, or optional course | 3 | 3 |
| Commerce 14A-14B, Principles of Accounting | 3 | 3 |
| Psychology 1, General | 3 | 0–4 |
| Elective | | |
| | 15½ | 15½ |
| *Sophomore Year* | | |
| Physical Education (activity courses) | ½ | ½ |
| Additional Natural Science (if needed to meet requirement) | 3 | – |
| Economics 1A-1B, Principles of Economics | 3 | 3 |
| Philosophy 1A-1B, Introduction, or 3A-3B, History of Thought | 3 | 3 |
| Political Science 1A-1B, Introduction to Government or 71A-71B, Introduction to American Government and Politics | 3 | 3 |
| Electives | 3 | 6 |
| | 15½ | 15½ |

### Upper Division

In the junior and senior years, the student should select his concentration according to the general field of legal practice in which he will be working, with the counsel of his adviser and the departments most concerned. For example, a student expecting to work in the foreign service or international field on an administrative level would probably have his major concentration in international law. Students going into federal employment on an administrative level would need appropriate political science courses. A student expecting to become a lawyer working in the field of criminal law would include pertinent sociology courses (105, 106) in his program. For the broad field of general legal practice and its relations with the field of business, the economics area will constitute the concentration. Since this latter area is by far the larger, more students will be interested in the suggested curriculum given below. It is flexible, to be varied according to the aims of the student with the counsel of his advisers and members of the departments in which he wishes to concentrate.

| | *Units* | |
|---|---|---|
| *Junior Year* | *1st Sem.* | *2d Sem.* |
| Economics 133, Corporation Finance | - | 3 |
| Economics 150, Labor Problems | 3 | - |
| Economics Elective | - | 3 |
| History 151A-151B, History of England, or 172A-172B, Constitutional History of the United States | 3 | 3 |
| Political Science 111A-111B, Theory of the State, or 140 Principles of Public Administration, and 141, Organization and Procedure in Public Administration | 3 | 3 |
| Sociology 105, Social Pathology, and 106, Criminology and Penology | 3 | 3 |
| Electives (see upper division requirements) | 3–6 | 3–6 |
| Examination in U. S. Constitution, American history, institutions, and ideals | | |
| | 15 | 15 |

| | | |
|---|---|---|
| *Senior Year* | | |
| Economics 100A, Modern Economic Thought | 3 | - |
| Economics 170, Government and Business | 3 | - |
| Economics Elective (Economics 131 recommended) | - | 3 |
| History 111A-111B, Ancient History, or 121A-121B, Medieval History | 3 | 3 |
| Political Science 153, Principles of International Law, and 154, International Law and the Courts | 3 | 3 |
| Electives | 3 | 6 |
| | 15 | 15 |

## LIFE SCIENCE VOCATIONAL CURRICULA

Students planning to enter any of the terminal curricula listed below should nclude in their high school program the following subjects: elementary algebra, unit; plane geometry, 1 unit; chemistry, 1 unit; physics, 1 unit; French or German, units.

### Lower Division

| | *Units* | |
|---|---|---|
| *reshman Year* | *1st Sem.* | *2d Sem.* |
| English 1, Freshman Composition, and 2, Freshman Literature or optional course | 3 | 3 |
| Chemistry 1A-1B, General | 5 | 5 |
| Zoology 1A-1B, General | 4 | 4 |
| Social Science (see page 18) | 3 | 3 |
| Physical Education (activity courses) | ½ | ½ |
| | 15½ | 15½ |

| | | |
|---|---|---|
| *ophomore Year* | | |
| Botany 2A-2B, General | 4 | 4 |
| Bacteriology 1, General | 4 | - |
| Psychology 1, General | - | 3 |
| Social Science (see page 18) | 3 | 3 |
| Speech Arts 2A, Fundamentals of Public Speaking | 3 | - |
| Physical Education (activity courses) | ½ | ½ |
| Electives (complete lower division requirements) | 2 | 6 |
| | 16½ | 16½ |

Preparation for U. S. Constitution and American History graduation requirement.

### Upper Division

Work in the upper division should be planned in consultation with the Chairman the Division of Life Sciences. A terminal curriculum is offered leading to the llowing occupational fields: Entomology, fish and game, and wild life. Courses may be lected from those listed below.

## WILD LIFE, FISH AND GAME

General Entomology
Economic Entomology
Medical Entomology
Systematic Entomology
Cold Blooded Vertebrates
Parasitology
General Physiology
Ecology
Taxonomy of Plants
Microtechnique
Mammalogy
Ornithology
Economic Biology
Organic Chemistry
Statistics
Public Administration

## PRE-MEDICAL CURRICULUM

The entrance requirements of medical colleges ordinarily range from three to four years of pre-medical work. The lower division requirements of the liberal arts curricula include the general requirements of standard medical colleges and should therefore be met in full whether the curriculum extends over a period of three or of four years. All plans for pre-medical work should include an arrangement of courses to meet the requirements of the medical college which the student expects to enter.

A student who is pursuing a four-year pre-medical curriculum should major in chemistry or zoology in his junior and senior years, and must meet all upper division requirements for the A.B. Degree in the liberal arts curricula.

The high school program should include the following subjects: elementary algebra, 1 unit; plane geometry, 1 unit; chemistry, 1 unit; physics, 1 unit; French or German, 3 units. Two units of Latin are recommended.

### Lower Division

| | Units | |
|---|---|---|
| | *1st Sem.* | *2d Sem.* |
| ***Freshman Year*** | | |
| Physical Education (activity courses) | ½ | ½ |
| Health Education 21, Principles of Healthful Living | 2 | – |

## PRE-NURSING CURRICULUM

A student who plans to complete a curriculum in nursing leading to a degree and a certificate in nursing in another collegiate institution should ascertain the lower division requirements of that institution.

The high school program should include the following subjects: elementary algebra, 1 unit; plane geometry, 1 unit; chemistry, 1 unit; physics, 1 unit; French or German, 3 units; domestic science (foods), 1 unit; 2 units of Latin are recommended.

| Freshman Year | *Units* *1st Sem.* | *Units* *2d Sem.* |
|---|---|---|
| Physical Education (activity courses) | ½ | ½ |
| Health Education 21, Principles of Healthful Living | – | 2 |
| Biology A, Mathematics of Solutions and Dosage | 2 | – |
| Chemistry 2A-2B, Fundamentals | 3 | 3 |
| Home Economics 61A, Nutrition, and 61B, Nutrition Laboratory | – | 3 |
| English 1, Freshman Composition, and 2, Freshman Literature, or optional course | 3 | 3 |
| French or German (if needed to complete requirements) | 0–5 | 0–5 |
| Elective | 3–8 | 0–5 |
| | 16½ | 16½ |

| Sophomore Year | *1st Sem.* | *2d Sem.* |
|---|---|---|
| Physical Education (activity courses) | ½ | ½ |
| Psychology 1, General, and 11, Applied | 3 | 3 |
| Economics 1A-1B, Principles, or Sociology 50A, Introduction, and 50B, General | 3 | 3 |
| Bacteriology 1, General | 4 | – |
| Physiology 1A, Human Physiology, and 1C, Laboratory | – | 5 |
| Zoology 8, Human Anatomy | 3 | – |
| Elective | 3 | 5 |
| | 16½ | 16½ |

## PRE-OPTOMETRY CURRICULUM

The high school program should include the following subjects: elementary algebra, 1 unit; plane geometry, 1 unit; intermediate algebra, 1 unit; trigonometry, ½ unit; chemistry, 1 unit; physics, 1 unit; foreign language, 2 units.

The following curriculum prepares for junior standing in university schools of optometry. Student should consult the catalogue of the school to which he expects to ransfer.

| Freshman Year | *Units* *1st Sem.* | *Units* *2d Sem.* |
|---|---|---|
| Chemistry 1A-1B, General | 5 | 5 |
| English 1, Freshman Composition, and 2, Freshman Literature, or optional course | 3 | 3 |
| Speech Arts 2A, Fundamentals of Public Speaking | – | 3 |
| Foreign Language (if needed to complete requirement) | 5 | 5 |
| Physical Education (activity courses) | ½ | ½ |
| Electives (social science or other lower division requirement) | 3 | 3 |
| | 16½ | 16½ |

| | Uni | |
|---|---|---|
| **Sophomore Year** | 1st Sem. | 2 Se |
| Physics 2A-2B, General | 3 | 3 |
| Physics 3A-3B, Physical Measurements | 1 | 1 |
| Psychology 1, General | – | 3 |
| Mathematics 3A, Plane Analytic Geometry | 3 | – |
| Social Science (complete requirement) | 3 | 3 |
| Physiology 1A, Human Physiology | – | 3 |
| Physiology 1C, Human Physiology (Laboratory) | – | 2 |
| Health Education 21, Principles of Healthful Living | 2 | – |
| Chemistry 101, Elementary Organic | 4 | – |
| Physical Education (activity courses) | ½ | ½ |
| | 16½ | 15½ |

## PRE-PHARMACY CURRICULUM

The high school program should include the following subjects: elementar algebra, 1 unit; plane geometry, 1 unit; intermediate algebra, 1 unit; trigonometr ½ unit; chemistry, 1 unit; physics, 1 unit; foreign language, 2 units.

The American Association of Colleges of Pharmacy allows not more than or year of credit for work completed in an institution other than a college of pharmac Generally the first year work and part of that of the second year may be complete before transfer, the time required in the college of pharmacy cannot be reduced to les than three academic years. Students should ascertain the requirements of the colleg of pharmacy they expect to enter.

| | Units | |
|---|---|---|
| **Freshman Year** | 1st Sem. | 2d Sem |
| Physical Education (activity courses) | ½ | ½ |
| English 1, Freshman Composition, and 2, Freshman Literature, or optional course | 3 | 3 |
| Chemistry 1A-1B, General | 5 | 5 |
| Zoology 1A-1B, General | 4 | 4 |
| Botany 2A, General | 4 | – |
| Mathematics 1, College Algebra, or 3A, Plane Analytic Geometry (Prerequisite: Mathematics C and D, or two years of high school algebra and one-half year of trigonometry) | – | 3 |
| | 16½ | 15½ |

The following courses are also commonly required or recommended: (See, however, three-year rule, above.) Chemistry 5, Quantitative Analysis, 101, Elementar Organic, 102, Organic Chemistry Laboratory; Psychology 1, General; Physiology 1A Human Physiology, or Zoology 20, Human Anatomy and Physiology.

# PUBLIC ADMINISTRATION CURRICULUM

The Public Administration curriculum is an adaptation of the *general major* signed for students interested in taking the junior administrative examination for trance into local, state, or federal government service. It is also designed to prepare udents for graduate work in the field of Public Administration. Students planning enter graduate work in this field should consult with the adviser in Public Administration in planning the student program.

The outline of courses suggested below is for the purpose of guiding the student planning the *general major*. For further information on the *general major* refer the section entitled: Upper Division Requirements for the Bachelor of Arts Degree Arts and Sciences.

## Lower Division

*eshman Year*

| | *Units* *1st Sem.* | *Units* *2d Sem.* |

Suggested electives are additional Mathematics, Foreign Language, Entomolog

# ANNOUNCEMENT OF COURSES

## COURSE NUMBERS

Courses numbered from 1 to 99 are lower division (freshman or sophomore) rses; those numbered 100 to 199 are upper division (junior or senior) courses; se numbered 200 to 299 are graduate courses (see section on Admission and Regis- tion for information concerning eligibility to enroll in these courses) ; those num- ed 300 to 399 are professional education courses to be taken at the graduate level.

## CREDIT FOR UPPER DIVISION COURSES

Freshmen are not admitted to upper division courses.

A sophomore may enroll in an upper division course for lower division credit vided he has earned an average grade of not less than 1.5 in all college work ertaken, and provided he receives the instructor's permission to enroll in the course.

A second semester sophomore may enroll in an upper division course for upper sion credit without the foregoing grade limitations provided the units earned in upper division course or courses are in excess of the 60 units required in the er division.

A student with sophomore standing may carry upper division courses for upper sion credit provided that he has the written approval of the chairman of the depart- nt and the Dean of Arts and Sciences or the Dean of Education.

## UNITS

Figures in parentheses indicate the unit value of the course.

One "unit" represents 50 minutes of recitation or lecture, together with the ired preparation, or three hours laboratory work each week for a semester of weeks.

## ORDER IN WHICH COURSES ARE OFFERED

The semester in which courses are offered is designated as follows: Fall (given all only) ; Spring (given in Spring only) ; Fall or Spring (given in either Fall pring) ; Fall and Spring (a year course beginning in either the Fall or Spring) ; r Course (beginning in Fall).

Either semester of a year course may be taken first unless otherwise designated.

Although the college fully expects to carry out the arrangements planned in the of courses, it reserves the right to make changes. Classes in which the enrollment not come up to the minimum number set by the State Department of Education not be offered or may be postponed.

## PREREQUISITES

Prerequisites for courses are stated. A student should not enroll in a course for h he is not eligible.

## PROVISIONAL COURSES

Courses numbered 40 to 45 are open only to students who are in the provisional ram. Other students (those not having provisional status) are not eligible to these courses.

# AESTHETICS

## IN THE DIVISION OF FINE ARTS

### Major

A *major in arts and sciences* is not offered in aesthetics; however, certain co in this field are required as part of the majors in art and in music. For specific info tion, refer to these departments.

A *teaching major* is not offered in aesthetics; however, certain courses in field are required as part of the teaching major in art and in music for the ge secondary and the special secondary credentials in these fields. For specific informa refer to the outlines of requirements for these credentials.

### Minor

A *minor in arts and sciences* is not offered in aesthetics.

A *teaching minor* is not offered in aesthetics; however, certain courses in field are required as part of the teaching minor in art for the general secondary general junior high school, and the special secondary credentials. For specific info tion, refer to the outlines of requirements for these credentials.

### Lower Division Courses

**1A-1B. Survey of Music**

Correlation of music and other arts. Designed to stimulate enjoyment of m by developing intelligent listening. The elements of music, its structure, folk mus all countries, musical instruments, and the contributions of the best known compo with some biographical study of these men. Compositions are presented by orthoph recording and by class members. Attendance at a number of local concerts is requ No previous musical training or background is necessary. Music majors are requ to complete additional assignments for full credit.

Year course (2-2)

**5. Art Orientation**

An illustrated lecture course dealing with aesthetic meaning and its rela to the structure of art products. Designed to increase both understanding and ap ciation of the visual world in general and of the fine arts in particular.

Spring (2)

**50. Appreciation and History of Art**

A survey of art development in the painting, sculpture, architecture, and ha crafts from dawn of art to the Renaissance. Illustrated.

Fall (2)

**51. Survey of Mexican Art**

A study of Mexican and Middle American Art from earliest time to present.

Fall (2)

**52A-52B. Survey of Oriental Art**

A study of the art of the great cultures of the Orient. (52A is a prerequi for 52B.)

Fall and Spring (3-3)

### Upper Division Courses

**100. Great Music**

A listening course designed especially for the layman and concert-goer. Mas pieces of instrumental and vocal music will be performed by means of recordings by local musicians. A study of artistic trends and their effect upon musical composi and performance. Correlation of musical art and other arts. No prerequisites. credit for music majors.

Summer (3)

**2A-102B. Music History**

The various movements in the development of music as related to the other arts. e chronological development of the art of music with particular emphasis on the ger works. Considerable attention is given to the works of modern composers. Many nphonic works are studied from the orchestral scores. Music majors are required to nplete additional assignments for full credit. Prerequisite: Aesthetics 1A or 1B.

Year course (2-2)

**1. Appreciation and History of Art**

The period from the Renaissance through the modern school treated in the same nner as in Aesthetics 50.

Spring (2)

## ANTHROPOLOGY

### IN THE DIVISION OF SOCIAL SCIENCES

### Major

A *major in arts and sciences* is not offered in anthropology; however, upper ision units in anthropology may be planned under the *general major* program. Stunts wishing to use anthropology as a field of concentration in the *general major* uld include the following courses in the lower division: Anthropology 1A-1B, 2 or 3 Geography 1, 2; Geology 1A-1B; Psychology 1, 10 or 11; Sociology 50A-50B; ommended: Spanish, German, or French. The following fields of study are recomnded in the upper division in addition to anthropology with a view to later specialiion in anthropological work: for *archaeology*: art, geography, geology, and history; *physical anthropology*: psychology and zoology; for *museum work*: art, education, ology, and psychology. For further information on the *general major*, refer to the tion on Admission and Registration.

A *teaching major* is not offered in anthropology; however, it may be used as rt of the *social science major* for the general junior high school credential or the eral secondary credential. For specific information, refer to the outlines of the uirements for these credentials.

### Minor

A *minor in arts and sciences* is offered in anthropology. The minor must include at st 15 units of work in anthropology, 9 units of which must be from courses carrying per division credit.

A *teaching minor* is not offered in anthropology for the general secondary crential; however, anthropology may be used as a part of the *social science minor* for general junior high school, the special secondary, the general elementary, and the dergarten-primary credentials. For specific information, refer to the requirements the teaching minor for these credentials.

**-1B. General Anthropology**

Origin and antiquity of man. Theories of human descent. Classification of races. gin and early development of civilization.

Year course (3-3)

**Physical Anthropology**

An introduction to the studies of primatology and anthropometry. The comparae anatomy of the monkeys and great apes, the emergence of the anthropoids, the onstruction of early man from fossil evidence. The landmarks, measures and indices d in the metrical study of the living human body and skeletal material. Sexual differes and growth changes in the skull and skeleton.

Fall (3)

**Survey of Archaeology**

A review of the history of modern archeology and a discussion of its methods. The elopment of archaeological techniques in reconstructing the ancient cultures of the diterranean world. The problems of present day archaeology in the Near East, the ent and the Americas. The principles and basic techniques used in the excavation of s and the reporting of findings.

Spring (3)

**54. Social Anthropology**

An anthropological study of social institutions in primitive and civilized societi The evolution of family organization, religion, property right, and government traced elementary and advanced civilization.

Spring (3)

## Upper Division Courses

**151A. The North American Indian**

Pre-Columbian cultures of the North American Indian. The origin and migrati of New World peoples. Industries, arts, crafts, social organization, religion and ot phases of American Indian civilization.

Fall (3) (Not offered in 1949-50)

**151B. Indian Civilization of Middle America**

The development of civilization in Pre-Columbian Mexico and Central Americ Aztec, Mayan, and related cultures.

Spring (3) (Not offered in 1949-50)

**152. World Ethnography**

The cultural patterns of representative aboriginal peoples. Industries, arts, soc organization and supernaturalism considered with a view to environmental adjustme historical development and functional interrelation. Ethnological theories reviewed a applied in interpreting illustrative aboriginal societies.

Fall (3)

**153. Primitive Religion**

Beliefs and ritual of primitive man. Magic and religion. Forms of animism a polytheism. Primitive mentality and the supernatural.

Spring (3)

**161. The California Indian**

A survey of native California Indian culture with stress on the Indian groups Southern California. The industries, arts, social organization, folklore and religi will be considered as revealed through the study of living peoples and archaeologic evidences.

Offered only during summer sessions (3)

**165. Ethnology and Race Psychology**

The biological basis of race, somatic and serologic typology, racial mentality, tes and their ethnopsychological significance, abnormality in ethnic groups. Race and cu ture; ethnic aspects of demography.

Fall (3) (Not offered in 1949-50)

**172. Indian Cultures of the Southwest**

Pueblo Indian culture of the Southwestern states and its background in the art crafts, architecture and religion of the past. The culture of contemporary Puebloa villages interpreted in terms of earlier civilizations revealed through archaeolog Recent trends in archaeological research reviewed.

Offered only during summer sessions (3)

# ART
## IN THE DIVISION OF FINE ARTS

### Major

A *major in arts and sciences* is offered in art. Every student who plans to major in t, whether under the liberal arts program or the teacher training program, should com- ete the following basic courses: Aesthetics 5 or 51, and 50, Art A-B, 6A-6B, and 14A. nder the liberal arts program the student majoring in art may choose either a group courses in which the crafts are emphasized or a group of courses in which the graphic ts are emphasized. One of the following plans should be selected:

Emphasis on crafts: The student should add to the list of basic courses required all art majors the following courses: lower division: Art 6D, 7, 11A-11B, and 61B; per division: Aesthetics 150, Art 106A or B or C, 106D, 117A-117B, 119A-119B, and nits of art electives. This program points in the direction of industrial design, inte- r design, cabinet making, sculpture, weaving, textile design, ceramics, etc.

Emphasis on graphic arts: The student should add to the list of basic courses quired of all art majors the following courses: lower division: Art 15A, 16A, and 4 its of art electives; upper division: Aesthetics 150, Art 106A, 112A-112B, 115A- 5B, 116A-116B, 117A, and 6 units of art electives. This program points in the direc- n of illustration, portraiture, landscape painting, mural design, poster design, pro- ction illustration, advertising design, fashion design, etc.

A *teaching major* in art is offered for the general secondary credential and the spe- l secondary credential. Students planning to teach art in the secondary schools should d to the list of basic courses required of all art majors the following courses: lower ision: Art 61A-61B, and 6 units of art electives; upper division: Aesthetics 150, t 116A, 112A, 106A, 119A, 195, and 6 units of art electives. Speech Arts 140A should o be completed. For further information, refer to the outlines of requirements for the ecial secondary and general secondary credentials.

### Minor

A *minor in arts and sciences* is offered in art. The minor must include at least 15 its of work in art, 9 units of which must be from courses carrying upper division edit.

A *teaching minor* is offered in art for the general secondary, the general junior h school, and the special secondary credentials. Art may be offered only as a second ching minor for the general elementary and the kindergarten-primary credentials. r specific information, refer to the outlines of requirements for these credentials.

### Art Appreciation, History and Orientation

For courses in appreciation, history of art, and art orientation, see aesthetics. ny students, regardless of the field in which they may be majoring, recognize the ed for an intelligent approach to the subject of art and art appreciation. However, e to the erroneous popular feeling that art is a subject requiring "talent", these stu nts may refrain from enrolling in art courses. For students who desire a better under- nding of art, but who do not hope to acquire any of the art skills, the following rses are recommended:

| | *Units* |
|---|---|
| Aesthetics 5, Art Orientation | 2 |
| Aesthetics 50, History and Appreciation of Art | 2 |
| Aesthetics 51, Survey of Mexican Art | 2 |
| Aesthetics 52A-52B, Survey of Oriental Art | 6 |
| Art 8, Costume and Home-furnishing | 2 |

Other courses which require certain skills but which are not beyond the ability the average college student are:

| | |
|---|---|
| Art 61B, Crafts | 2 |
| Art 6A, Design | 2 |
| Art A, Drawing and Composition | 2 |
| Art 94, Costume design | 2 |

## Lower Division Courses

### A. Drawing and Composition

Problems involving perspective to develop ability to draw still life, furnitur exteriors, interiors, and the like. (High school equivalent may excuse the student fro this course.)

Fall or Spring (2)

### Art B. Drawing and Composition

Drawing of mechanical and natural forms by the use of line and value. Emphas on proportion and structure. Some quick sketching, gesture and contour drawing. Pr requisite: Art A.

Fall or Spring (2)

### 6A. Design

Fundamentals of design and composition and theory of color. Basic course used a prerequisite for all advanced work.

Fall or Spring (2)

### 6B. Design

Original work in creative design and representation with special stress on moder tendencies. Prerequisite: Art 6A.

Fall or Spring (2)

### 6D. Design

Study of the principles of design through the making of furniture. Prerequ site: 6A.

Fall or Spring (2)

### 7. Line, Color and Display

The principles of line, color and arrangement applied to store and window di play. Study and observation of windows, color and materials used in display. Buildi models and practical problems in arranging colors, textures, and forms in windo to fit different kinds of merchandise.

Fall or Spring (2)

### 8. Costume and House Furnishings

An appreciative study of modern architecture and modern house furnishing with emphasis on the spirit of gracious living and an appreciative study of the moder dress with emphasis on suitability to the figure, the personality and the occasion.

Fall or Spring (2)

### 11A. Industrial Design

Design of objects for manufacture with reference to their use, materials, a in accordance with factory practices and machine techniques. Prerequisite: Art 6 6B, A.

Fall (2)

### 11B. Advanced Industrial Design

Advanced problems with particular attention to the techniques of presentation-working drawings, renderings in perspective and scale models. Prerequisite: Art 6 6B, A, 11A.

Spring (2)

### 14A. Lettering

Fundamental art principles applied to lettering. Practice for quick, accura lettering; original problems using letters as design. Prerequisite: Art 6A.

Fall (2)

### 14B. Posters and Commercial Art

The application of lettering to posters, newspaper and magazine advertisin and other forms of commercial art. The study of composition combined with lette ing and special study of modern tendencies in publicity. Prerequisites: Art 6A, 14

Spring (2)

**5A-15B. Life Drawing**

Drawing from the nude model. Prerequisite: Art A-B.
Fall and Spring (2-2)

**5A-16B. Painting**

Semester I: Composition of still life in oil. Semester II: Landscape and more dvanced composition in oil. Prerequisite: Art A-B.
Fall and Spring (2-2)

**7A-17B. Sculpture**

Creative design in such materials as clay, wood, stone, concrete, etc. Prerequites: Art 6A-6B.
Fall and Spring (2-2)

**A. Crafts in the Elementary Schools**

A foundation course which develops unification of work of the elementary grades rough activities and experiences. These experiences grow out of environmental tivities. They include study and working of clay, lumber and tools, textiles, and rdboard construction. Prerequisite: Art 6A.
Fall or Spring (2)

**B. Crafts**

Problems involving the application of design principles to various fields—pottery, xtiles, weaving, metal work, wood-carving, and book-binding. Prerequisite: Art 6A.
Fall or Spring (2)

**A-94B. Costume Design**

Original designs of modern costumes suitable to the individual or to distinct pes; the drawing of fashion figures; the rendering of fabrics and textures. Prerequite: Art 6A.
Fall and Spring (2-2)

**A-95B. Interior Decoration** (See Art 195A-195B)

## Upper Division Courses

**6A-106B. Printmaking**

Study of print crafts which includes the making of linoleum blocks, wood engravgs, etchings and lithographs. Prerequisites: Art A, B, 6A.
Fall and Spring (2-2)

**6C. Illustration**

Same as 106A-B except that printmaking is applied to problems of book illustion. Prerequisites: Art A, B, 6A.
Spring (2)

**6D. Advanced Furniture Design**

(See Art 6D) Prerequisite: Art 6D.
Fall or Spring (2)

**2A-112B. Design and Composition**

Imaginative organization of space by means of color, dark and light, perspective, d textures of various materials. Prerequisites: Art A-B, 6A-6B.
Year course (2-2)

**5A-115B. Life Drawing and Painting**

Drawing and painting from nude and costume models. Prerequisite: Art A-B.
Fall and Spring (2-2)

**5C-115D. Advanced Life Drawing and Painting**

Painting from nude and costume models and advanced composition in oil. Portiture. Prerequisite: Art 115A-115B.
Fall and Spring (2-2)

**116A-116B. Advanced Painting**

Painting in oils from still life and landscape, stressing composition. Prerequis Art 16A or 16B.
Fall and Spring (2-2)

**117A-117B. Sculpture**

Creative design in such materials as clay, wood, stone, concrete, etc. Prere sites: Art 6A-6B and 17A or 17B.
Fall and Spring (2-2)

**119A. Ceramics**

Building of pottery on the basic techniques of coil, slab, mold making, and casting. Ceramic sculpture, glazing and kiln operations. Prerequisite: Art 6A.
Fall (2)

**119B. Ceramics**

Study of glazes and elementary clay technology. Mold making, slip casting application to individual creative problems. Prerequisite: Art 119A.
Spring (2)

**166. Special Studies**

A student with the necessary grade point average may apply for work i upper division art course and register for Art 166, Special Studies. (See page

**194A-194B. Costume Design** (For description, see Art 94A-94B)

Prerequisite: Art 6A and consent of instructor.
Fall and Spring (2-2)

**195A-195B. Interior Design**

The consideration of the house as a unit; the arrangement of garden, h floor plan, and furniture as functional and decorative problems. Prerequisite: A and 6A. 195A is a prerequisite for 195B.
Fall and Spring (2-2)

## Graduate Courses

**200A-200B. Special Problems**

A graduate course in which students may carry out projects in various fiel art under the direction of faculty members who are specialists in the field ch Students registering for this course must apply for work within a certain field discussions with the art faculty. Prerequisite: Graduate standing and conse instructor.
Fall and Spring (2-2)

# ASTRONOMY

## IN THE DIVISION OF PHYSICAL SCIENCES

### Major

A *major in arts and sciences* is not offered in astronomy. Students desiring to pre-
re for advanced work in astronomy should include the following courses: Astronomy
2, 3, 9, and 10; Mathematics 3A-3B, 4A-4B; Physics 1A-1B-1C-1D or 4A-4B-4C; a
ading knowledge of French and German.

A *teaching major* is not offered in astronomy; however, astronomy may be used
part of the general science major for the general junior high school credential. For
ecific information, refer to the outline of requirements for the general science teach-
g major for this credential.

### Minor

A *minor in arts and sciences* is not offered in astronomy.

A *teaching minor* is not offered in astronomy; however, astronomy may be used
part of the *general science minor* for the general junior high school, the special
condary, the general elementary, and the kindergarten-primary credentials. For
ecific information, refer to the requirements of the teaching minor for these
edentials.

### Lower Division Courses

**Descriptive Astronomy**

A cultural course planned to develop an appreciation of astronomy with special
phasis on the solar system. Only calculations of an elementary nature are used.
special attention is given to the methods and instruments by means of which astro-
mical knowledge has been gained. A six-inch John Byrne refractor and an eight-inch
flecting telescope are available for observation. Prerequisites: Elementary algebra
d plane geometry.

Fall and Spring (3)

**Modern Astronomy**

A study of the stellar system in the light of modern research, especially photo-
aphic and spectrographic. Prerequisite: Astronomy 1 or permission of the instructor.

Spring (3)

**Surveyor's Course in Practical Astronomy**

The principles of spherical astronomy adapted to the needs of engineering stu-
nts. Computation and observation. Two lectures and one three hour laboratory period
ch week. Prerequisite: Surveying 1A or permission of the instructor. Astronomy 1
d 9 desirable.

Spring (3)

**Practice in Observing**

A laboratory course designed particularly to go along with and to supplement
stronomy 1. The course will include constellation study, use of astronomical coordi-
tes, elementary methods of determining time and latitude, and descriptive observa-
ons of celestial objects with the six-inch telescope. One three hour evening laboratory
riod each week. Prerequisite: Astronomy 1 or registration in Astronomy 1 or permis-
on of the instructor.

Fall or Spring (1)

**Advanced Observational Astronomy**

A continuation of Astronomy 9. More advanced problems in observing will be
ken up such as the determination of azimuth by observations of Polaris, transit
servations, astronomical photography, etc. One three hour evening laboratory period
ch week. Prerequisites: Astronomy 1 and 9.

Spring (or upon demand) (1)

**12. Elementary Navigation**

A study of compass corrections, drift problems, time, line of position, use celestial coordinates, Bowditch Tables, etc. A few class hours at the close of th term are devoted to the use of tables such as Ageton, Dreisonstok and H. O. 214 for th solution of astronomical triangle. One three hour laboratory period each wee Offered if demand is sufficient. Prerequisite: Astronomy 1 or permission of instructo
Fall (3) (Offered in 1948-1949)

### Upper Division Courses

**100. Special Problems**

Admission by consent of instructor. Credit and hours to be arranged in each cas Open to students who have completed three units in astronomy.
Fall or Spring (1 or 2)

**105. Historic Development of Astronomy**

A study of the more important problems and astronomical concepts in the lig of their historical development. Particular attention is given to the biography an contributions of the more important astronomers, such as, Galileo, Kepler, Newto Herschel, Bessel, etc.
Fall (3) (Not offered 1949-50)

**107. Method of Least Squares and Computing Practices**

Fundamental principles with applications in the fields of astronomy, physic and engineering.
Spring (3) (Not offered in 1949-50)

## BACTERIOLOGY

### IN THE DIVISION OF LIFE SCIENCES

*Majors* and *Minors* are not offered in bacteriology; however, courses in this fiel may be used as part of the liberal arts major in zoology. Courses in this field ar recommended for students who are preparing to teach science in junior high schoo or life sciences in high school.

### Lower Division Courses

**1. General Bacteriology**

An introduction to bacteriology. Effects of physical and chemical agencies upo bacteria; biochemical activities of bacteria; microscopic examination and cultivatio of bacteria; the bacteria of air, water, soil, milk and dairy products, other foods industrial applications. Introduction to disease-producing bacteria. Two hours of lectur and six hours of laboratory per week. Prerequisite: Chemistry 1A or 2A.
Fall or Spring (4)

### Upper Division Courses

**101. General Bacteriology**

Lectures and laboratory work of Bacteriology 1 with additional work to be prescribed by the instructor. Prerequisite: Chemistry 1A or 2A.
Fall or Spring (4)

**102. Advanced Bacteriology**

This course deals with the cultural characteristics of the common pathogens and the serological reactions of the body to them. The course is planned primarily for those students interested in medical technology and clinical laboratory technique. Two lectures and two laboratory periods per week. Prerequisites: Bacteriology 101 and Chemistry 1A-1B or equivalent. Recommended: Organic Chemistry.
Fall (4)

**199. Special Problems**

Work other than is outlined in the regular courses. Admission only by consent of the instructor with whom the work is to be done. Credit and hours to be arranged in each case. Open to students who have completed at least 15 units of work in the life sciences (including courses in Bacteriology) with grades of A or B.
Fall or Spring (1 or 2)

## BIOLOGY

### IN THE DIVISION OF LIFE SCIENCES

#### Major

A *major in arts and sciences* is not offered in biology; however, courses in biology nay be used as part of the *life science major in arts and sciences.* Refer to the descripion of the *life science major* in the section entitled: Upper Division Requirements for he Bachelor of Arts Degree in Arts and Sciences.

A *teaching major* is not offered in biology; however, Biology 10A-10B may be ısed for the year course required in a biological science for the *general science major* or the general junior high school credential or the *physical science major* for the ;eneral secondary credential. For specific information, refer to the outlines of requirenents for these credentials.

#### Minor

A *minor* is not offered in biology; however, biology may be used as part of the *general science minor* for the general junior high school and special secondary redentials. For specific information, refer to the outlines of requirements for the eaching minor for these credentials.

#### Lower Division Courses

**A. Solutions and Dosage**

Arithmetic review with computing of dosage, percentage of solutions, apothecaries veights. Two hours per week.

Fall (2)

**. Survey of Biology**

A survey of life science, stressing the development of modern concepts in the ields of plant and animal science, bacteriology, genetics, and physiology. Emphasis s placed on the relationships of biology to modern life and the application of scientific ınalysis to every day problems. Three lectures and one hour of demonstration and liscussion per week. Not open to students with credit for Biology 40, 10A, 10B, Zoology 1A, 1B, Botany 2A, or 2B.

Fall or Spring (3)

**10A-10B. General Biology**

A year course in life science, more extensive than "Biology 1." Continues hroughout the year and includes a three-hour laboratory period, and two hours of ectures per week. Designed for those who do not expect to specialize in zoology or otany; not open to students with credit for Biology 1, 40, Zoology 1A, 1B, Botany A, or 2B. Biology 10A is a prerequisite for 10B. Students who have taken 10A-10B nay elect Zoology 1B or Botany 2A or 2B for credit.

Year course (3-3)

## BOTANY

### IN THE DIVISION OF LIFE SCIENCES

#### Major

A *major in arts and sciences* is not offered in botany; however, courses in this field nay be used as part of the *zoology major in arts and sciences*, or as part of the *life cience major in arts and sciences.* Refer to the description of the *life science major* in he section entitled: Upper Division Requirements for the Bachelor of Arts Degree in Arts and Sciences.

Students who are preparing for advanced work in botany should include the ollowing courses: Botany 2A-2B, 104; Chemistry 1A-1B, 101. Recommended: French, German, and elementary courses in other biological sciences.

A *teaching major* is not offered in botany; however, botany may be used as part of the *general science major* for the general junior high school credential or as part of the *life science major* for the general secondary credential. For specific information, efer to the outlines of requirements for these credentials.

### Minor

A *minor in arts and sciences* is offered in botany. The minor must include at lea 15 units of work in botany, 9 units of which must be from courses carrying upper div sion credit.

A *teaching minor* is not offered in botany; however, botany may be used as pa of the *general science minor* for the general junior high, the special secondary, t general elementary, and the kindergarten-primary credentials or as part of the *li science minor* for the general secondary credential. For specific information, refer the outlines of requirements for these credentials.

### Lower Division Courses

**2A-2B. General Botany**

A year course covering the fundamentals of structure and general behavior seed plants, the morphology and relationship of the lower plants, including an intr duction to classification and distribution of seed plants. Two lectures and six hours laboratory work per week. Botany 2A is a prerequisite to 2B.
Year course (4-4)

**4. California Plants**

Classification and ecology of representative orders of wild flowers, trees, an chaparral of the San Diego region, including practice in the use of keys. One lectur and three hours laboratory per week. Occasional Saturday field trips.
Spring (2)

### Upper Division Courses

**101. Plant Pathology**

A practical course dealing with the principles of disease in plants, contro measures, and quarantine procedures. Of particular interest to students of agriculture forestry and horticulture. Emphasis is placed on the determination and control measures of those pathogenic organisms which affect truck and field crops, garden an ornamental trees and shrubs and nursery stock. Two lectures and one laborator period per week. Prerequisite: Botany 2A-2B.
Fall (3)

**102. Plant Geography**

Lectures and field work on the principles of geographical distribution of plants Prerequisite: Botany 2A-2B, or 4, or equivalent.
Fall (2) (Offered in 1948-49 and alternate years)

**104. Plant Taxonomy**

Identification, classification and distribution of representative orders of flowering plants. One hour lecture and six hours per week of laboratory and field work. Prerequisites: Botany 2A-2B, or 4.
Spring (3) (Offered in 1947-48 and alternate years)

**105. Cultivated Trees and Shrubs**

Recognition of the common cultivated trees and shrubs of the San Diego region. Trips to local parks and private gardens. One lecture and three hours per week laboratory or field work.
Fall (2)

**107. Plant Physiology**

The activities of plants, including food manufacture, absorption, conduction, transpiration, respiration, growth and movement. Two lectures and two laboratory periods per week. Prerequisites: Biology 10A-10B or Botany 2A, and Chemistry 2A-2B or equivalent.
Spring (4)

**123. Economic Biology**

Study of the uses of plants and animals to man and the ways in which they injure him and his possessions. Consideration is also given to general methods of control and conservation. Prerequisite: Zoology 1A, Biology 1, or Biology 10B. Not open to students who have credit in Zoology 123.

### 4. Scientific Illustration

Drawing and photography of scientific subjects. Students are assigned indi- dual projects, following their respective inclinations. It is desirable for students ecting this course to have a definite project, or projects in mind and to confer with e instructor in advance in case specialized needs are required. Six hours of labora- ry work per week. Not open to students who have credit in Zoology 124.

Fall (2)

### 0. Readings in Biology

Reading from a suggested bibliography with informal class discussion of topics. ıbjects discussed will include history of biology, biological principles, ecology, onomic zoology, zoogeography, breeding habits, and animal behavior. Not open to udents who have credit in Zoology 130.

Spring (2)

### 5. Genetics

An introductory course to the principles of heredity and cytogenetics, including e genetics of man, other animals and plants. Designed primarily for science majors. wo lectures per week. Not open to students who have taken Zoology 155 or 165. erequisite: Biology 10A-10B, Zoology 1A-1B, or Botany 2A-2B.

Spring (2)

### 9. Special Problems

Work other than is outlined in the above courses. Admission by consent of the structor with whom the work is to be done. Credit and hours to be arranged in ch case. Open only to students who have completed at least fifteen units of Botany th a grade A or B.

Fall and Spring (1 or 2)

## CHEMISTRY

### IN THE DIVISION OF PHYSICAL SCIENCES

### Major

A *major in arts and sciences* is offered in chemistry. Two plans are provided: One students expecting to enter chemistry as professional chemists; the other for idents intending to use chemistry in a related field. In addition, varying degrees of ncentration in chemistry are available in the teaching major in physical science and the chemical engineering option of the engineering major.

A *teaching major* is offered in chemistry for the general secondary credential or part of the *general science major* for the general junior high school credential or as rt of the *physical science major* for the general secondary credential. For specific ormation, refer to the outlines of the requirements for these credentials.

### Minor

A *minor in arts and sciences* is offered in chemistry. The minor must include emistry 1A-1B plus at least 9 units of credit in upper division chemistry courses.

A *teaching minor* is offered in chemistry for the general secondary credential or part of the *general science minor* for the general junior high, the special secondary, general elementary, and the kindergarten-primary credentials. For specific infor- tion, refer to the outlines of the requirements for these credentials.

### Curricula for Chemistry Majors in Arts and Sciences

Plan A, outlined below, is recommended for all students who intend to become ofessional chemists. It follows the recommendations of the Committee on Professional aining of the American Chemical Society. It qualifies graduates for many types of sitions as chemists and provides the training required by most universities for nission to graduate work in chemistry.

Plan B is designed for students who do not intend to become professional mists, but who desire the major in chemistry as part of a general education or in paration for training in a related profession. By proper choice of electives, gradu- s can meet the requirements for admittance to medical schools. This plan is also suitable for students interested in teaching in secondary schools who desire m intensive chemical training than that required in the physical science major.

The recommended sequence of courses for each plan is presented below. courses except electives are required. The foreign language requirement may be by courses taken in high school plus an examination to demonstrate competence reading. Some variation in sequence is permissible with the consent of the fac adviser.

### Plan A
### (For chemists)

| First year | Units |
|---|---|
| Chemistry 1A-1B | 5–5 |
| † Physics 4A | 0–4 |
| Mathematics 3A-3B | 3–3 |
| English 1 and 2 | 3–3 |
| Psychology 1 | 3–0 |
| Health Education 21 | 2–0 |
| Physical Education | ½–½ |
| | 16½–15½ |

| Second year | Units |
|---|---|
| Chemistry 5 | 3–0 |
| Chemistry 101 | 0–4 |
| Physics 1C-1D or 4B-4C | 3–4 3–4 |
| Mathematics 4A-4B | 3–3 |
| German A-B | 5–5 |
| Physical Education | ½–½ |
| | 14½–15½ 15½–16½ |

| Third year | Units |
|---|---|
| Chemistry 102-103 | 3–3 |
| Chemistry 110A-110B | 3–3 |
| Chemistry 105 | 0–3 3–0 |
| Minor | 3–0 0–3 |
| Social Science | 6–6 |
| | 15–15 |

| Fourth year | Units |
|---|---|
| Chemistry 111 | 3–0 |
| Chemistry elective | 0–2 |
| Minor | 3–3 |
| Electives | 9–10 |
| | 15–15 |

### Plan B
### (For related professions)

| First year | U |
|---|---|
| Chemistry 1A-1B | 5– |
| Physics 2A-2B | 3– |
| Physics 3A-3B | 1– |
| Mathematics 7A-7B | 3– |
| English 1 and 2 | 3– |
| Physical Education | ½- |
| | 15½–1 |

| Second year | U |
|---|---|
| Chemistry 5 | 3– |
| Chemistry 101 | 0– |
| French or German A-B | 5– |
| Health Education 21 | 2– |
| Psychology 1 | 0– |
| * Elective | 6– |
| Physical Education | ½- |
| | 16½–1 |

| Third year | U |
|---|---|
| Chemistry 102-103 | 3- |
| Chemistry 110A-110B | 3- |
| Chemistry 105 | 3–0 0- |
| Minor | 0–3 3- |
| Social Science | 6- |
| | 15- |

| Fourth year | U |
|---|---|
| Chemistry elective | 3- |
| Minor | 3- |
| Electives | 9- |
| | 15- |

## Lower Division Courses

### 1A-1B. General Chemistry

The general principles of chemistry, and a description of the elements and th common compounds. Three lectures and two laboratory periods per week. The labo tory work in the second semester consists of work in qualitative analysis. Prerequisit Two years of high school mathematics. Recommended: High school chemistry, physi and additional mathematics. Chemistry 1A is a prerequisite for Chemistry 1B. O 2 units of credit per semester will be allowed to students who have credit for Chemis 2A-2B.

Year course (5-5)

---

* Should include preparation for minor.

† The physics sequence, 1A-1B-1C-1D, formerly offered, will fulfill the requi ment of Physics 4A-4B-4C for students who started physics before Septe ber, 1949.

### A-2B. Fundamentals of Chemistry

A general course for those not intending to take advanced courses in chemistry. e work in the first semester stresses inorganic chemistry and fundamental principles; at of the second semester covers an introduction to organic chemistry and biochem- ry. Emphasis is placed on applications of chemistry to everyday life. Two lectures and e laboratory period per week. Required of prenursing students and recommended for ose desiring chemistry as part of a liberal education. Not open for credit to students o have credit in Chemistry 1A-1B.

Year course (3-3)

### Elementary Quantitative Analysis

The principles of gravimetric and volumetric analysis. Discussions of the theory quantitative analysis and practice in the standardization of reagents and the analysis samples. One lecture and quiz, and two laboratory periods per week. Prerequisite: emistry 1A-1B.

Fall or Spring (3)

### 1. Elementary Organic Chemistry

An introductory study of the chemistry of carbon compounds, both aliphatic and omatic. The laboratory work illustrates properties and reactions of typical compounds d stresses development of technique. Three lectures and one laboratory period per ek. Prerequisite: Chemistry 1A-1B.

Fall or Spring (4)

### 2. Organic Chemistry Laboratory

Synthesis of typical aliphatic and aromatic compounds. Study of the theory and actice of laboratory distillation, crystallization and related operations. Approxi- tely the last third of the work covers an introduction to the systematic qualitative alysis of organic compounds by group reactions and individual tests. Three labora- y periods per week. Prerequisite: Chemistry 101.

Fall or Spring (3)

### Intermediate Organic Chemistry

A continuation of Chemistry 101. Further study of types of aliphatic and aro- tic compounds, their derivatives and interrelationship. Introduction to mechanisms organic reactions. Three lectures per week. Prerequisite: Credit or registration in emistry 102.

Spring (3)

### Advanced Quantitative Analysis

Advanced work in the theory and practice of volumetric, gravimetric, and electro- alysis. One lecture, one quiz, and two laboratory periods per week. Prerequisite: emistry 5.

Fall or Spring (3)

### A-110B. Physical Chemistry

Theoretical principles of chemistry, with emphasis on mathematical relations. e class will be divided into Sections A and B. Students with credit or registration in thematics 4B will be admitted to Section A; others to Section B. In Section B the hematical treatment of some topics will be less rigorous and discussions will include re descriptive material than in Section A. Three lectures per week, problems and orts. Prerequisites: Chemistry 1A-1B; Physics 1A-1B-1C-1D or 4A-4B-4C or 2B-3A-3B; and Mathematics 4B (or Mathematics 7B) and credit or registration hemistry 101. Chemistry 110A is a prerequisite for Chemistry 110B.

Year course (3-3)

### Physical Chemistry Laboratory

Physico-chemical apparatus and measurements. Discussion period and three lab- tory periods per week. Prerequisite: Credit or registration in Section A of Chem- y 110A.

Spring (3)

### 114. Biochemistry

The chemistry of fats, carbohydrates, proteins, vitamins, hormones and enzyme Chemotherapy, nutrition, digestion and intermediary metabolism are discussed. Thr lectures per week. Prerequisite: Chemistry 103. Recommended: Elementary biolog or zoology.

Fall (3)

### 115. Biochemistry Laboratory

Laboratory work in the synthesis, isolation and analysis of biochemical material Chemical rather than biological considerations are emphasized. Two laboratory perio per week. Prerequisites: Chemistry 5, 102, 103 and credit or registration in Chemistry 114.

Spring (2)

### 118. Colloid Chemistry

The theoretical principles of colloid chemistry and the preparation, properti and practical applications of colloids. Two lectures per week. Prerequisite: Chemistr 101, 110A and 110B.

Fall (2)

### 122. Glass Blowing

Elementary training in the manipulation of glass. Prerequisite: Chemistry 1A-1 One laboratory period per week.

Fall (1)

### 127. Advanced Inorganic Chemistry

A lecture course dealing with such topics as the physical basis of the periodi system, complex inorganic compounds, and the nature of the chemical bond. Three le tures per week. Prerequisite: Chemistry 1A-1B. Recommended Chemistry 110A-110

Spring (3)

### 144A-144B. Principles of Chemical Engineering

Industrial stoichiometry, flow of fluids, heat transfer, unit processes and types industrial equipment. Three lectures per week, problems and reports. Prerequisite Credit or registration in Chemistry 110A. Chemistry 144A is a prerequisite for Chemistry 144B.

Year course (3-3)

### 155. Instrumental Methods of Analysis

Training in the theory and manipulation of instruments used in modern chemic and physical testing laboratories. Discussions, laboratory work and field trips. Tw laboratory periods per week. Prerequisite: Chemistry 5.

Fall (2)

### 199. Special Problems

Supervised individual work in specialized branches of chemistry. Admission onl by the consent of the instructor. Hours of credit to be arranged in each case. Open onl to students who have shown ability to do A or B work in chemistry.

Fall and Spring (1-2)

## Graduate Courses

### 200. Seminar

Intensive study of some phase of advanced chemistry under the direction of member of the staff. Each student will choose a topic from one of the following field for study and will prepare and present a paper on this topic to the staff members an other seminar students.

A. Advanced Organic Chemistry
B. Chemical Kinetics
C. Chemical Thermodynamics
D. Molecular Structure
E. Electrochemistry
F. Advanced Biochemistry
G. Spectrographic Analysis

Prerequisite: Graduate standing with suitable background in chemistry and consen of the instructor. Maximum credit 4 units.

Fall and Spring (2-2)

**99. Special Problems**

Individual work on some topic in advanced chemistry and preparation of formal ritten report. Problem selected to develop familiarity with chemical literature and search techniques. Prerequisite: Graduate standing with suitable background in emistry and consent of the instructor. Maximum credit 3 units.

Fall or Spring (1-3)

## COMMERCE

### IN THE DIVISION OF SOCIAL SCIENCES

### 140. Statistical Methods

The nature and uses of statistical method in the social sciences. Practice i tabular and graphic presentation of data; analysis of frequency and time series index number construction and study of correlation techniques. Prerequisite: Mathematics A-B, and C or equivalent. Not open to students with credit for Sociology 10 or Psychology 104A or 104B.

Fall or Spring (3)

### 142. Business Cycles

Fundamental factors in business cycles are analyzed and cycle theories ar examined. Study of current business conditions begins early in the course and develop into practical application of forecasting methods to both business and other data Prerequisite: Economics 1A-1B.

Spring (3)

### 150. Labor Problems

A study of labor organizations and their policies, wages, strikes, unemployment social insurance, child labor, labor legislation, plans for industrial peace, and other labor problems.

Fall (3)

### 151. Principles of Labor Legislation

Federal, state and local laws and regulations concerning labor problems, industrial relations, and governmental policies with respect to labor; important court decisions; the make-up and functions of commissions and boards; labor union attitudes with respect to legislation and the courts.

Spring (3)

**0. Government and Business**

General survey of governmental activities affecting business; the state as an trepreneur and manager; governmental assistance to business; governmental regu- tion of business in its historical, legal and economic aspects, including recent devel- ments in the United States and abroad; proposed policies.
Fall (3)

**1. Transportation**

The development of railway transportation; railroad financing; rates and rate aking; governmental regulation; government operation of railroads during the war; cent development of motor and air transportation. Prerequisite: Economics 1A-1B.
Fall (3)

**2. Public Utilities**

The growth of public utilities in the United States; economics of public utility tes; valuation; public regulation and its legal basis; public ownership. Prerequisite: onomics 1A-1B.
Spring (3)

**5. Social Insurance**

The need for social security and attempts to meet these needs through social surance and other devices, including old age pensions, health insurance, unemploy- ent insurance, and Social Security Act. Strength and weakness of existing systems. eed for extension; proposals.
Fall (3)

**0. Principles of Foreign Trade**

National welfare and foreign trade. Principle of comparative costs, comparative vantages in various nations. Foreign exchange and the balance of payments, financing eign trade. Regulations over trade and obstructing factors. Techniques of exporting d importing. Doctrines of international trade.
Fall (3)

**5. International Economic Relations**

Important aspects of international cooperation and conflict in the economic here, conditions essential to future cooperation. The quest for foreign markets, raw terials, investment opportunities and population outlets. Commercial policies, inter- tional economic conferences and organizations. Colonial rivalries and postwar oblems.
Spring (3)

**3. Investigation and Report**

Designed to stimulate independent study and investigation; to furnish guidance the collection, organization, and presentation of factual material; to improve the hnique of term reports. For economics majors only.
Fall and Spring (3-3)

**A-199B. Special Study**

Designed exclusively for seniors with a major in economics.
Fall (1), Spring (1 or 2)

## Graduate Courses

**A-200B. Seminar in Modern Economic Thought**

A critical study of contemporary economic thought to provide a clearer under- nding of major economic problems of the day. Prerequisite: Graduate standing and nsent of the instructor.
Fall and Spring (2-2)

# EDUCATION

## IN THE DIVISION OF EDUCATION

### Major

A *major in arts and sciences* is not offered in education ; however, education i
major for the general elementary and kindergarten-primary credentials. For speci
information, refer to the requirements for these credentials.

A *teaching major* is offered in education for the general elementary and kind
garten-primary credentials.

### Minor

A *minor in arts and sciences* is offered in education. This minor consists of
minimum of 15 upper division units in education selected from Education 102A-102
102C-102D, 115A-115B with the approval of the Dean of Professional Education.

A *teaching minor* is not offered in education.

### Lower Division Courses

A. Review of Arithmetic
H. Review of Handwriting
R. Review of Reading
S. Review of Spelling

Each of the Review courses is a noncredit course designed to increase competen
in the skill subjects. Diagnosis of individual student difficulties will be made follow
by directed practice and evaluation of progress. Open only to students who do n
qualify on the respective sections of the Fundamentals Test required of all applica
to teacher education.

Fall or Spring (0)

**50. The School and Society**

A nonprofessional survey of education designed to acquaint the student with t
school as a social institution in American life. Lectures will be given by differe
instructors who will lead discussion periods on the various topics. Students majori
in education should consult the instructor.

Fall or Spring (2)

### Upper Division Courses

**100B. Methods and Materials of Instruction and Audio-visual Aids**

A series of professional courses in specific teaching fields designed to be tak
just prior to or concurrently with the first directed teaching assignment. Each cou
emphasizes the application of principles of best practice with reference to motivati
individual differences, audio-visual aids, evaluation and the achievement of an effecti
learning situation in the major and minor subject fields.

Subject fields for sections in 100B are as follows:

100B-A, Methods in Art
100B-B, Methods in Accounting
100B-BE, Objectives and Curricula in Business Education
100B-E, Methods in English
100B-L, Methods in Romance Language
100B-MA, Methods in Mathematics
100B-ME, Methods in Merchandising
100B-MU, Methods in Music
100B-PE, Methods in Phys. Ed. (Men)
100B-PE, Methods in Phys. Ed. (Women)
100B-SC, Methods in Science
100B-S, Methods in Shorthand
100B-SA, Methods in Speech Arts
100B-S.SC, Methods in Social Sci.
100B-SS, Methods in Secretarial Subjects
100B-T, Methods in Typing
Fall (3) [Major (2)] [Minor (1)]

### 2A. Measurement and Evaluation in Elementary Education

A course required of all students preparing for an elementary teaching credential. deals with the use of tests in the diagnosis and improvement of learning; con- uction of objective examinations; problems of evaluation in education; and the ments of statistical techniques.

Fall or Spring (3)

### 2B. Child Growth and Development

The course deals with a study of the mental, emotional, social, and physical elopment during childhood and early adolescence. Directed observation required. t open for credit to students who have credit for Psychology 102, 106, or Home onomics 102.

Fall or Spring (3)

### 2C. Growth and Development of the Adolescent

A course to improve understanding of the adolescent's physiological, psycho- ical, social, and emotional development. Field work with adolescent groups in the nmunity is required. To be taken during the junior year. Not open for credit to dents who have credit in Psychology 103 or 106.

Fall or Spring (3)

### 2D. Measurement and Evaluation in Secondary Education

This course deals with problems of evaluation in secondary education, construc- n of examinations, the elements of statistics, the selection and interpretation of ndardized measures. Field work required.

Fall or Spring (2)

### A. Methods in Teaching Americanization Classes

Methods used in teaching the various grade levels found in Americanization sses, beginners, intermediates, and advanced, as well as those preparing for their uralization, will be discussed. The course includes discussion of new skills and hnics, devices, and short cuts in learning to speak, read, and write English; aids in anizing and conducting classes; and in helping teachers to understand backgrounds foreign born.

Extension (2)

### A. History and Philosophy of Education

Historical backgrounds and underlying philosophies upon which the public ool system has been established. Emphasis will be placed on the meaning of educa- n, educational aims and values, and democracy and education. Prerequisite: Senior nding or the equivalent.

Fall or Spring (2)

### B. Secondary Education

This course will serve as an introduction to understanding the development of ondary education and its present status as a social institution. The topics developed l include: curriculum; teaching methods; organization and administration; guid- e; and objectives. Field work required. To be taken during the junior year.

Fall or Spring (3)

### . Directed Teaching

Systematic observation, participation and teaching under supervision in the pus elementary school, the affiliated elementary, junior high and senior high ools. During each semester of student teaching in the secondary schools a weekly ference period is required as indicated in the time schedule.

The general plan is for elementary school credential candidates to take, following education practicums, a half-day of teaching daily for one semester in the campus mentary school or in one of the affiliated elementary schools. Junior high school special secondary school credential candidates will be guided by their adviser ative to the distribution of their student teaching. For those seeking a combination credentials, the requirements for each teaching level must be satisfied. Further rmation regarding this requirement should be requested of the Dean of Professional cation when the student first registers for directed teaching.

Thirty clock hours of student teaching will usually carry one unit of credit in t course, but the final amount of credit allowed will depend upon the character a quality of the teaching done by the student. Student teaching requirements may reduced for those who furnish evidence of successful public school experience.

The maximum amount of credit allowed for student teaching is 12 units.

The universities usually reduce the amount of student teaching credit they w allow to four units. Students planning to transfer to such institutions should prepared to meet this reduction with an equal number of acceptable units in otl courses.

No grade below "C" is acceptable for credit in student teaching.

Prerequisites: Completion of 75 units of college work; admission to teach education; a C average in all college work and in the work of the preceding semeste three units of work in psychology; a minimum of one semester's work in this colle No credit will be given unless the student registers in advance for this course in t office of the Dean of Education.

Fall or Spring (a maximum of 12 units )

### 117A. Elementary Music Education

Objectives of music teaching in the elementary school. Study of the child voi Organization of song material by grades. Procedure in presenting rote songs, ear trai ing, elementary notation, music reading, and part singing. Conducting. Prerequisit Music 1A, or the equivalent. Not open to students who have had Music 7A.

Fall or Spring (2)

### 117B. Methods in Instrumental Music

A study of the theory of problems or organizing and conducting school ban and orchestras, and the selection of materials. Provides practical experience in co ducting a children's orchestra and teaching sectional groups. A study of systema planning of courses of study for pupils of various ages and abilities will be made.

Fall or Spring (2)

### 119. Art in the Elementary School

Discussion of the elements and principles of art and their place in the a expression and appreciation of the elementary school child. Lectures illustrated wi examples of children's work and opportunity given for experience with media us in elementary school problems. Not open to students taking the elementary credenti Prerequisite: Art 6A.

Fall or Spring (2)

### 122. Social Studies in the Elementary School

A study of the nature and purpose, scope, organization and instructional pr cedures in the social studies in the elementary school. Opportunity will be given f the development of curriculum units and the analysis of teaching materials. The su mer course provides observation in the demonstration school.

Fall or Spring (2)

### 123. Science in Elementary Education

A laboratory course designed to assist teachers in developing a science progra related to the elementary curriculum. Study will be made of the following topic Objectives of elementary science, the relation of science experiences to instruction units in the social sciences, the construction and use of equipment, the effective u of audio-visual aids, the use of environmental resources, and the use of texts a supplementary material. Each student in the course will participate in the preparatio demonstration, and evaluation of typical science experiments.

Fall or Spring (3)

### 125. Curriculum in Elementary Education

A systematic survey of the following elementary subject areas: The langua arts, mathematics, music, science, and the social sciences. Emphasis will be plac upon the selection of content, teaching methods, and materials as they relate to soci needs, psychological principles, and the nature of the learner.

Fall or Spring (3)

### 6. Literature in Elementary Education

An introduction to children's literature at all levels of the elementary school. nsideration will be given to the following topics: Criteria for the selection of chil- n's literature, children's reading interests, children's literature and the develop- nt of units of instruction in the social studies, the use of the verse choir, dramatic adings and similar procedures, and the use of the library. Each student in the course ll have an opportunity to read widely in the field.

Fall or Spring (3)

### Arithmetic in Elementary Education

A course for teachers of arithmetic in the elementary and junior high school. aphasis is placed upon the understanding of the systems of notation and language hniques. Opportunity will be given for the development of instructional materials d procedures.

Fall or Spring (2)

### Educational Psychology

A study of the science of human behavior as it relates to learning. Emphasis is en to the principles of learning and the nature of the learner. Some of the areas ated are the growth of meanings, thinking, memory and habit formation, motiva- n, transfer of learning, organic and environmental conditions affecting learning, lividual differences, and the theory of audio-visual-radio education. Observation and d work required. Prerequisite: Psychology 1. Not open to students with credit for ychology 130.

Fall or Spring (2)

### Reading in Elementary Education

A systematic study of the reading process. Emphasis will be placed on reading a thinking process. Consideration will be given to topics such as: Scientifically eloped procedures for determining reading readiness, beginning reading, inde- ndence in work recognition, vocabulary development, word analysis, standards of ainment, types of reading programs, and the selection, preparation and use of ding materials. Analysis will be made of individual and group learning problems oughout all levels of the elementary school.

Fall or Spring (3)

### Adult Education

A study of the aims and scope of adult education and its function as a part of public school system. Individual and group work will be emphasized. Admission permission of the instructor.

Fall or Spring (3)

### Diagnosis and Remedial Treatment of Difficulties in Reading

A study of the causes of reading difficulties and the procedures for diagnosis l remedial treatment. Students will be expected to do practical work with children o have reading difficulty. The work is designed primarily for principals, supervisors l teachers-in-service. Prerequisite: Education 102B or Education 102A, or one r of successful teaching experience.

Fall or Spring (3)

### Organization and Administration of Music Education

Theory of the general principles of music administration; correlation of music h the various subjects in the public schools; music tests; creative work.

Fall or Spring (2)

### Education Practicum (Kindergarten-Primary)

This course is a continuation of Education 148 and will accompany Education in the kindergarten. A study of the theory of early childhood education providing erience with children of nursery school and kindergarten ages. Prerequisite: Educa- n 147, 148.

Fall or Spring (4)

### 146B. Interpretation of Early Childhood Behavior

A course for kindergarten-primary teachers emphasizing the analysis and int- pretation of early childhood behavior. Emphasis will be placed on understanding a interpreting the causative factors in typical behavior of children to parents, soc workers, teachers, and others concerned with the guidance of kindergarten-prim children.

Summer (3)

### 147. Education Practicum

This course is required of all students who expect to receive a credential wh will qualify them to teach in the kindergarten or in the elementary school. Stude should take the course during the next semester after admission to Teacher Educati which is usually the first semester of the junior year. Registration is strictly limi to those who have been approved by the Committee on Admission to Teacher E cation.

The content of the Education Practicums include both classroom participati (directed teaching) and the study of the principles of education. Education Practic is a unified course which deals with the interpretation and intelligent application theory and practice in elementary education. The child and accumulated knowle are studied as one affects the other. The psychology of learning is interpreted wh the college student is immediately associated with children in the process of learni Daily classes are held in which the psychology and philosophy of education are stud and analyzed as systems of knowledge and concurrently interpreted in reference the actual teaching participation to which the student is assigned for one hour dai The course includes Reading and Elementary School Methods (3) ; Elementary Education (1) ; Elementary Music Education (1) ; Language Arts (2) ; Arithme (3). Audio-Visual-Radio Instruction is integrated with the course, equivalent to units.

The course is taught by college teachers who supervise in the Campus Elementa School, and other faculty members.

Fall or Spring (10)

### 148. Education Practicum

This course is a continuation of Education 147 and is required of all stude who are candidates for the general elementary credential or the kindergarten-prima credential. An extended analysis is made of the psychology of education in vari fields and application is made through directed teaching in grades 4 to 6. The cou includes Elementary Social Studies (1) ; Elementary Science Education (1) ; E mentary Art Education (1) ; Elementary Music Education (1) ; Education Psych ogy (learning process and theory of audio-visual education) (2) ; additional 4 un for General Elementary only: Curriculum in Elementary Education (2) ; Direc Teaching (2) ; Audio-Visual-Radio Instruction (0). Prerequisite: Education 147.

Fall or Spring (12)

### 149A. Laboratory in Elementary Education

A general course in observation and theory, including a study of arithmet reading, language, music, science, social studies, art, spelling. Students in this cou will observe in the summer demonstration school and discuss with the staff the teachi procedures.

Summer only (3)

### 149C. Laboratory in Rural Education

Observation in a one-room multigraded summer demonstration school. Stude will observe demonstrations, discuss procedures with the staff, and prepare mater for their own schools.

Summer only (6)

### 149D. Workshop in Elementary Education

A workshop laboratory experience designed to meet the needs of individual groups of teachers who desire to study selected problems in elementary educati Discussions, individual consultations, projects, expert assistance, the utilization varied library and laboratory facilities, and the observation of classroom teaching w be provided for members in attendance. Interested persons should correspond with t Director of Elementary Education, San Diego State College.

Summer (3 or 6)

### 15. Principles of Guidance

A study of the basic principles of guidance and their function in the educational cess.

Fall or Spring (3)

### 16. Guidance Conference

A series of lecture and discussion sessions centering on current problems in counsing and guidance. Designed to serve the needs of teachers, administrators, counsors, personnel workers, and others desiring to keep informed of developments in this ea. Admission upon permission of the director of this conference.

Summer only (1)

### 1. Supervision of Child Welfare and Attendance

Content includes laws relating to children, guidance principles, social case work, ency relationships, conference techniques, home visitation methods, employment ervision, attendance work, child accounting, familiarity with testing techniques.

Summer (3)

### 1. Legal Aspects of Education

A study of the school law of California, important court decisions, rulings of t California State Superintendent of Public Instruction and the Attorney General, torical and current trends, and comparative data from throughout the United tes.

Fall or Spring (3)

### 1. Audio-visual-radio Education

A study of audio-visual-radio aids as they affect learning. Analysis and development of materials of instruction and their presentation; operation of equipment.

Fall or Spring (2)

### 1BE. Audio-visual Business Education

A review of the skills and knowledges necessary to use audio-visual aids, owed by intensive study and research in the literature available and by practice h the materials and techniques that apply to business education.

Summer (3)

### 1. Problems of Speech Correction and Articulation

Analysis and discussion of the major articulatory problems as encountered in lic school work, particularly in California. Required of all students for the speech rection credential. Not open to students with credit for Speech Arts 176.

(3)

### 1. The Teaching of Lip Reading

History, theory and methods of lip reading. Aids for the classroom teacher; prom and materials of instruction for the specialized teacher. Opportunities for practice ching are offered.

(2)

### 1. Problems of the Hard of Hearing

The adjustment of the hard of hearing group with emphasis on the public school d. State and county hearing programs; technique of audiometry; use of hearing s; educational, classroom, and social problems.

(2)

### 7A-179B. Nervous Speech Disorders

Classification of speech defects and disorders. Nervous speech disorders; stamring, stuttering, hesitation, cluttering. Teacher training in corrective technique for in public schools; clinic observation. Required of candidates for the Special Secary Credential in Correction of Speech Defects. Not open to students with credit in ech Arts 179A-179B.

Year course (3-3)

### 181. Exceptional Children

A course designed to meet the needs of teachers of the mentally handicapped, b also open to all teachers interested in studying the problems of exceptional children. study will be made of mental, physical, and emotional deviates.

Fall (3)

### 182. Curriculum and Methods for Teaching Mentally Retarded Children

The course deals with the selection, organization and presentation of curricul materials for teaching mentally retarded children.

Spring (3)

### 183. Practicum for Teaching Mentally Retarded Children

Interpretation and application of educational procedures utilized in teaching t retarded learner. A demonstration class will be available for observation. Educ tion 182 must be taken prior to, or concurrently with, Education 183.

Summer only (3)

### 189. Workshop in Secondary Education

This course is designed to meet the needs of individual or groups of teachers w wish to develop or continue the study of some problem with the consultation of t College Staff and the San Diego County Curriculum Staff.

Summer (3, 6)

### 191. Driver Education

A workshop type course designed to prepare teachers of the course in high scho Enrollment by permission of the instructor.

Summer (2)

### 199. Educational Problems

A course for senior and graduate students in residence and enrolled in teach education who have shown ability to work independently on educational problems. Tl problem will be chosen after consultation with a staff member. Admission by conse of the staff. Credit and hours to be arranged.

Fall or Spring (1-6)

## Graduate Courses

For general requirements for admission to graduate courses, see statement admission to graduate status in section on Admission and Registration. In addition these general requirements, 12 units of professional education are prerequisite f enrollment in all graduate courses.

### 230. Guidance Problems in Secondary Education

Individual and group study of the theory and practice of guidance with emphas upon practical problems of the members of the class.

Fall or Spring (3)

### 232. Problems in Vocational Guidance

A course to prepare teachers for vocational guidance in the secondary school Includes occupational information, vocational aptitude measurement, and education guidance.

(3)

### 233. Guidance Counseling Techniques

A course designed for school counselors. To stress the understandings an procedures necessary for effective interviewing.

(3)

### 237. Research in Guidance Problems

Individual study by graduate students who have demonstrated exceptional abilit and a need for such work. Admission by consent of the Director of Secondary Edu cation.

Fall or Spring (1 to 3)

**1. Problems in the Teaching of Arithmetic**

A study of research and practice in the methods of teaching and in the curriculum elementary and junior high school arithmetic. Prerequisite: Education 129 or quivalent.
(3)

**2. Problems in the Teaching of Reading**

Advanced study of developmental instruction in reading. Problems to be con- dered include reading readiness, the teaching of work recognition, developmental quences in reading skills and abilities, reading in the content fields, individual dif- rences, measurement, and interests. Students will select projects or problems of mediate interest to them. Prerequisites: Education 136 and 144 or equivalents.
Fall or Spring (3)

**5. Seminar in Elementary Education**

A study of the methodology of research with particular reference to the basic search in the phychology and teaching of the elementary school subjects. Pre- quisite: 12 units in elementary education and consent of the instructor.
Fall or Spring (3)

**0. Curricular Problems in Secondary Education**

A study of the present status and development of the secondary school curriculum. mphasis will be placed upon individual study and development of solutions of problems the students. Prerequisite: Graduate standing and consent of the instructor.
Fall or Spring (3)

**2. General Education in Secondary School**

A course designed for teachers in service. A study of the function and implementa- on of general education in the secondary school.

**6. Recent Trends in Secondary Curriculum**

A survey of current practices and trends in secondary schools with special phasis on general education. There will be opportunities for individual work on lated problems of interest to members of the class.
(3)

**7. Workshop in Intercultural Education**

A cooperative workshop sponsored by the College and the San Diego City hools in which opportunity will be provided to study trends in intercultural educa- on in American schools. Major attention will be devoted to development of units of rk and curricular materials, and opportunity will be provided for participants to come acquainted with audio-visual aids and other resources in the field of intercul- ral education. Enrollment only by previous application to the Dean of Education d limited to persons who have been admitted to graduate standing.
(4)

**8. Research in Curricular Problems**

Individual study by graduate students who have demonstrated exceptional ility and a need for such work. Admission by consent of the Director of Secondary lucation.
Fall or Spring (1 to 3)

**0. Federal, State, County and City School Organization and Administration**

A study of the organization, administration and supervision of federal, state, y and county school systems. Includes school finance, housing, and business ministration.
(3)

**2. The Organization and Administration of Elementary Schools**

A study will be made of the problems of personnel, local finance, curriculum, nt, community relations, and legal aspects of elementary schools. Required as rerequisite to Education 266. Prerequisite: Teaching experience.
(3)

**263. The Organization and Administration of the Secondary School**

A course designed for persons preparing for secondary school administration Topics will cover all aspects of the duties of an administrator, including personnel finance, curriculum, equipment and supplies, public relations, transportation, an law. Prerequisite: Possession of a valid General Secondary Credential.
(3)

**264. Elementary School Supervision**

Principles and practices of supervision and methods of evaluating instruction and the curriculum in elementary education. Prerequisite: General Elementary Credential, teaching experience, and Education 262, or equivalent.
(3)

**265. Secondary School Supervision**

A course designed for those who will be responsible for the supervision and evaluation of the curriculum and teaching methods in the secondary school. Prerequisite: Possession of a valid General Secondary Credential.
(3)

**266. Field Work in Elementary School Administration and Supervision**

A first-hand study of the administration and supervision of an elementary school as required for the Elementary School Administration and Supervision Credentials Field work will be carried on by all students under the direction of a college staf member. Prerequisite: Education 262 or 264.
Fall (2)

**267. Field Work in Secondary School Administration and Supervision**

A study of practices as they are found in secondary schools relative to administration and supervision; to insure direct contact with existing programs and procedures. Prerequisite: Education 263 or 265.
(2)

**316. Directed Teaching**

Systematic observation, participation, and teaching under supervision in an affiliated high school. Thirty clock hours of student teaching will usually earn one unit of credit, but the credit finally allowed will depend upon the nature and quality of the teaching done. Any work below a C grade is unacceptable for credit in this course.

No student can enroll in this course until he has completed at least 5 units of work in education.

During the semester in which the student takes his first assignment in student teaching, he must meet with the college supervisor one hour each week for conference and discussion of problems encountered in his teaching.

Students who have had student teaching in preparation for the junior high school or special secondary credentials should confer with their departmental and educational advisers concerning partial fulfillment of this requirement as the result of having completed the student teaching required for the credentials mentioned above.
Year course (3-3)

# ENGINEERING

## IN THE DIVISION OF PHYSICAL SCIENCES

### Major

A *major in arts and sciences* is offered in engineering. Lower division require- ents. Physics 1A-1B-1C-1D, or 4A-4B-4C; Mathematics 3A-3B, 4A-4B; Chemistry -1B, Engineering 21, or their equivalent. Upper division requirements: A minimum 24 upper division units including the group required of all engineering students as itlined in the Engineering Curriculum in the section entitled: Preprofessional and ocational Curricula.

A *teaching major* is not offered in engineering.

### Minor

A *minor in arts and sciences* is offered in engineering. The minor must include at ast 15 units in engineering, 9 units of which must be from courses carrying upper vision credit. The courses selected must be a logical sequence approved by faculty lviser.

A *teaching minor* is not offered in engineering.

### Lower Division Courses

NOTE: Courses in engineering may not be used to meet any part of the lower vision natural science requirement, nor may they be used as part of a physical ience major or minor.

**-1B. Plane Surveying**

Use and adjustment of surveying instruments, computations and map-making, gether with a study of land, topographic, city and mine surveying. Two instruction riods and one three-hour period for field work and mapping each week. Prerequisites: rigonometry and Mechanical Drawing, or equivalent, and sophomore standing.

Year course (3-3)

**Mechanical Drawing**

Freehand lettering, use and care of drafting equipment, simple orthographic ojection, introduction to problems of dimensioning. Open to students lacking credit r a year course in senior high school mechanical drawing. Not open to students with edit for Industrial Arts 2.

Fall or Spring (2)

**. Descriptive Geometry**

Fundamental principles of descriptive geometry and their application to prob- ms of engineering. Lectures and drafting. Prerequisites: One year of mechanical awing, and sophomore standing.

Fall (3)

**. Machine Drawing**

Design and drawing of simple machine parts with emphasis upon the produc- on of standard drawings. Lectures and drafting. Prerequisite: Engineering 21, athematics 3A-3B.

Spring (3)

**. Materials of Construction**

Manufacturing processes, structural properties and adaptability of the principal aterials used in engineering. Lectures. Prerequisite: Sophomore standing.

Spring (2)

### Upper Division Courses

**0A-100B. Elements of Electrical Engineering**

Theory and characteristics of electrical equipment with emphasis on industrial plications.

**100A. Direct current circuits, generators and motors.** Introduction to alte nating current circuits.

**100B. Alternating current circuits, transformers, alternators, induction ar synchronous motors, conversion apparatus and transmission line**

Lectures and problems. Prerequisites: Mathematics 4A, Physics 1C or 4B or permissi of the instructor.
Year course (3-3)

**101A. Electrical Engineering Laboratory**

Laboratory determination of the characteristics of direct current machinery ar circuits, single phase alternating current circuits. One three-hour lab. and report p week. Prerequisite: Engr. 100A (may be taken concurrently).
Fall (2)

**101B. Electrical Engineering Laboratory**

Laboratory determination of the characteristics of single phase and polypha circuits, machines, and related equipment. One three-hour laboratory period and repo per week. Prerequisite: Engr. 100B (may be taken concurrently).
Spring (2)

**102A-102B. Analytical Mechanics**

Treatment of the fundamental principles of Newtonian mechanics. First seme ter: Study of the statics and kinematics of particles and rigid bodies. Second semeste Study of the dynamical principles underlying linear and rotary motion of rigid bodie with additional work in elastic and inelastic impact. Use of elementary vector analys in solving engineering applications in mechanics. Prerequisites: Physics 1A-1B 4A-4B or 2A-2B, and a working knowledge of the calculus. (Engineering 102A is prerequisite for 102B.) Students with credit in Physics 105A-105B may not recei credit in this course.
Year course (3-3)

**104. Communications**

Study of class C amplifiers, oscillators, modulators and detectors. Amplitu and frequency modulation, television systems, transmission lines, antennas and electr magnetic radiation. Students with credit for Physics 104 may not receive credit f this course. Prerequisite: Physics 102 or permission of the instructor.
Spring (3)

**105. Hydraulics**

A general course in hydraulics including the fundamental principles of hydr statics and hydrodynamics applied to the flow of water through orifices, over weir through pipes and canals. Lectures and problems. Prerequisites: Mathematics 4 Physics 1C or 4B. Recommended: Engr. 102A-102B.
Spring (3)

**106. Hydraulics Laboratory**

Laboratory determination of the characteristics of fluid flow and hydraulic equi ment. Includes flow through pipes, orifices, weirs; characteristics of various types pumps. One three-hour lab. period and report per week. Prerequisite: Engr. 105 (ma be taken concurrently).
Spring (2)

**122. Machine Design**

A study of motions, velocities, and accelerations in linkages, cams, gears, an related mechanisms. Designs of riveted and welded joints. Design of simple machin parts such as clutches, gears, and couplings. Two lectures, one three-hour draftin period per week. Prerequisite: Engineering 102A (may be taken concurrently), Eng neering 22.
Fall (3)

### 4. Radio Measurements

A laboratory course on measurements of the parameters of resonant circuits at dio frequencies. Study of the properties of oscillators, modulators, detectors and ave guides. Prerequisite: Previous or concurrent enrollment in Engineering 104. udents with credit in Physics 124 may not receive credit for this course.

Spring (2)

### 8. Applied Engineering Thermodynamics

Principles of thermodynamics. Application of principles in study of combustion ocess, boiler, steam engines, turbines, auxiliary apparatus. Prerequisites: Math A, Physics 1B or 4C.

Fall (3)

### 9. Heat Power Laboratory

Boiler testing and heat balance. Flue gas analysis, testing of steam power uipment. One three-hour lab. and report per week. Prerequisite: Engr. 128 (may taken concurrently).

Fall (2)

### 0. Route and Construction Surveying

Application of surveying to engineering problems. Reconnaissance, preliminary, cation, and maintenance surveys for highways, railroads, and airfields. Construction rveys for buildings and other structures. Earthwork computations. Two lectures d one three-hour field period per week. Prerequisites: Engr. 1B, Ast. 3.

Fall (3)

### 1. Advanced Surveying

Special problem in surveying. Methods of geodetic surveying; adjustment of servations, geodetic positions, map projections. Two lectures and one three-hour ld period per week. Prerequisites: Engr. 1B, Ast. 3, recommended Engr. 130.

Fall (3)

### 0. Strength of Materials

Elastic and ultimate strengths of materials. Analyses of types of failure. Stress alysis and deformation of simple structural and machine members. Photoelasticity. ectures and problems. Prerequisite: Engr. 102A.

Spring (3)

### 1. Materials of Engineering Laboratory

Theory and operation of testing machines and auxiliary apparatus. Standard sts to determine the significant characteristics of the commonly used engineering aterials. Heat treatment of metals. One laboratory period plus outside reading and port per week. Prerequisite: Engr. 140 (may be taken concurrently).

Spring (2)

### 2. Stress Analysis

Determination of stresses in simple framed structures such as roof trusses and ghway bridges. Aircraft structures. Effects of combined stresses. Statically indeterinate beams. Special problems. Analytical and graphical methods of solution. Lectures d problems. Prerequisites: Engr. 102A-102B, 140.

Fall (3)

### 5. Internal Combustion Engines

Application of theory of thermodynamics to internal combustion engines. Essenl features of design, operating characteristics, and application of gasoline, diesel, and s engines, and the gas turbine. Lectures and problems. Prerequisites: Physics 1B or C, Math. 4A. Recommended: Engr. 128.

Spring (3)

**150. Industrial Electronics**

The application of electron tubes in fields other than communications; consideration of high power rectification, induction and dielectric heating, measurement an control systems. Prerequisite: Physics 102.

Fall (2)

**156. Aerodynamics**

Properties of air, air flow, air foils, drag, engines and propellers, aircraft performance and stability, types of aircraft, aircraft instruments. Lectures and problems. Prerequisites: Engr. 102A-102B.

Spring (3)

**199. Senior Report**

Investigation of specific problems of advanced nature. Preparation of report. Prerequisite: Advanced senior standing.

Fall or Spring (2)

NOTE.—In laboratory courses special emphasis is placed upon the preparation o neat, concise, complete and intelligent reports.

# ENGLISH

## IN THE DIVISION OF LANGUAGES AND LITERATURE

### Major

A *major in arts and sciences* is offered in English. Lower division requirements: least 15 units of work, including English 1, 6A-6B, and 56A-56B or 60A-60B. Upper vision requirements: a minimum of 24 upper division units in English and comrative literature, selected with the approval of the departmental representative; 2 ars of lower division work in a foreign language approved by the departmental presentative or the equivalent reading knowledge determined by examination. Further ork in the language, in upper division courses, is highly recommended.

A *teaching major* is offered in English for the general secondary credential or the neral junior high school credential. For specific information, refer to the outlines of quirements for these credentials. English majors who have been admitted to candicy for the general secondary credential may satisfy the foreign language requireent by one year of lower division foreign language, or equivalent, if 9 units of prossional education units have been completed.

### Minor

A *minor in arts and sciences* is offered in English. The minor must include at least units of work in English, 9 units of which must be from courses carrying upper vision credit.

A *teaching minor* is offered in English for the general secondary, the general nior high school, the special secondary, the general elementary, and the kindergartenimary credential. For specific information, refer to the outlines of requirements for ese credentials.

### Comparative Literature

For courses in world literature, giving credit toward the English major or minor toward the Comparative Literature minor, see Comparative Literature, page 95.

### Lower Division Courses

**English Fundamentals**

The elements of composition, including drill in grammar and usage; exercises in cabulary building and in fundamental reading skills; theme writing. Credit in this urse is equivalent to passing the English A examination and may be counted toward aduation as an elective but not to satisfy lower division English requirements in any rriculum.
Fall or Spring (2)

**Reading Laboratory**

A semi-tutorial service offered by the English Department to those wishing to prove reading ability. Open to all students at any level of college work. Consult partment chairman.
Fall or Spring (0)

**Writing Laboratory**

A semi-tutorial service offered by the English Department to those wishing sistance in writing projects, either remedial or advanced. Open to students at any vel of college work. Consult department chairman.
Fall or Spring (0)

**Freshman Composition**

Study and practice in the expression of ideas and factual materials; principles of ganization and of effective style, with emphasis on exposition. Prerequisite: Satisfacry English A examination or credit in English A.
Fall or Spring (3)

**Freshman Literature**

A course designed to develop college reading skills through practice in the analysis materials at varying levels of difficulty. Emphasis on the student's problems in reading rapidly and accurately mature books in literature, history, psychology, science, ilosophy, etc. Prerequisite: English 1 or 8.
Fall or Spring (3)

### 6A-6B. The Study of Literature

A basic course in the techniques of reading imaginative literature with sympath insight, and vividness. Methods of developing the informed and trained attention requ site to comprehension and appreciation of literary works, motion pictures, and radi presentations. Plays, stories, and poems contemporary or universal in appeal constitut the readings. Required of English majors; open to other students as an elective. Englis 6A is a prerequisite for 6B.
Fall and Spring (3-3)

### 8. English in Business

Theory and practice of business correspondence. Business letters as applied t salesmanship; problems in writing credit and collection letters, applications fo employment, adjustment letters, and sales letters. Prerequisite: English A or equiva lent, as indicated by Subject A Examination, or record from college and by test to b given by Commerce Department. This course is planned for students in the accountin and secretarial fields; units obtained in it cannot be used to meet English require ments in other fields.
Fall or Spring (3)

### 10. Recreational Reading

Development of personal tastes for leisure-time reading through lectures and writ ten reports. May be taken a second time with new materials.
Fall or Spring (1)

### 50A-50B. Survey of American Literature

Semester I: Major American writers from the beginning to 1860. Semester II American literature from 1860 to the present.
Year course (3-3)

### 56A-56B. Survey of English Literature

The study of some important works of English literature from the Anglo-Saxo period through the Victorian age, with emphasis upon the literary history of eac period.
Year course (3-3)

### 60A-60B. Literature and Personality

This course is devoted to the close study of a limited number of the great creator of English and American literature. Its object is to study, in several representativ great writers, the way in which a trained attention to masterpieces reveals to us th statement and resolution of the great issues of life, both in the individual self and i the cultural world. From such a study the goal of the course is to derive, fro markedly different specific works, orderly and generalized methods for the interpretation of great literature.
Year course (3-3)

### 61. Sophomore Composition

An elective course designed to give further training to the student who wishes practice in writing beyond the freshman level. Prerequisites: English 1 and English 2, or equivalent.
Fall (3)

### 62. The Short Story

A practical course in writing, including a study of short story techniques and purposes, and the writing of complete short stories. Prerequisites: English 1 and English 2, or equivalent.
Spring (3)

### 63. Foundations of the Language

A study of the important features of English grammatical structure, with emphasis on present-day usage. Designed to make more significant the native language through a study of the elements which compose it.
Spring (3)

## Upper Division Courses

### . Creative Writing

A writing workshop in which students are given opportunity to criticize each er's work. Emphasis on narrative and description, but freedom to pursue whatever iting forms may interest the student most. May be taken a second time with new terial.
Fall (3)

### . Recreational Reading

An advanced course in the group reading of modern drama, poetry and fiction.
Fall or Spring (1)

### . American English

The development of American English; regional and cultural differences in pronciation, grammar, and vocabulary.
Fall (3) (Offered in 1949-1950 and alternate years)

### A-116B. The Age of Elizabeth

Semester I: Poetry and prose, exclusive of drama. Semester II: The drama to 2, excluding Shakespeare.
Year course (3-3)

### A-117B. Shakespeare

A chronological survey. The first semester gives special emphasis to the histories chronicles; the second, to tragedy and the dramatic romances.
Year course (3-3)

### A-118B. Eighteenth Century English Literature

The first semester emphasizes the social satire of Swift, Pope, Addison, Steele, yden, Gay, Prior; and also the first stirrings of the romantic revolt in a number of portant poems and prose works. The second semester is devoted to Johnson and swell and their circle and to a significant romantic literature antedating the romantic burst.
Year course (3-3)

### A-119B. Nineteenth Century English Poetry

Semester I: The culmination of the romantic movement in the poetry of Wordsrth, Coleridge, Byron, Shelley, and Keats, in relation to the thought of the revoluary period. Semester II: Tennyson and Browning with their contemporaries successors, relating English poetry to nineteenth century life and thought.
Year course (3-3)

### . The Age of Milton

A study of the literature of the earlier seventeenth century, with emphasis on son, Donne, and Milton. Consideration is given to the political, religious, and ial backgrounds of the seventeenth century.
Spring (3)

### A-126B. Nineteenth Century English Prose

Semester I: Romantic and mid-Victorian prose writers, including Coleridge, zlitt, Lamb, DeQuincey, Carlyle, Landor, Macaulay, and Mill, related to the liter-, political, and social movements of the period. Semester II: Late nineteenth ceny essays of Arnold, Thomas Huxley, Newman, Pater, Ruskin, and Stevenson. Study scientific, aesthetic, and ethical backgrounds.
Fall (3)

### . Contemporary British Literature

Selected prose and poetry of England and Ireland from 1914 to the present, luding Shaw, Yeats, Synge, Joyce, Maugham, Huxley, D. H. Lawrence, Eliot, the ford poets, and the principal authors belonging to the two wars.
Spring (3)

### 131. American Literature: 1820-1860

The study of the important romantic writers, with emphasis on the New Engla group.

Fall (3)

### 132. The Frontier and American Literature

The influence of the frontier upon American literature studied through vario regions and movements. Examinations of source materials, biographies, and repr sentative writers.

Fall or Spring (3)

### 133. American Literature: 1860-1910

The rise of realism in American literature. Influences, foreign and native, whi promoted the movement. Definition of realism. The literary creed of the realists. T romantic attack and the realist defense.

Spring (3)

### 134. American Literature: 1910 to the Present

Ideas and forms in representative poetry and prose.

Fall or Spring (3)

### 135. American Colonial and Revolutionary Literature

The Puritan system of thought and way of life, and the literary and intellectu movements of the eighteenth century, studied in the works of such representati writers as Mather, Franklin, Paine, Freneau, and Brockden Brown.

Fall (3)

### 143A-143B. The English Novel

History of the English novel from the beginnings to the present. Extensi reading of novels with reports, lectures, and discussions. The first semester covers t nineteenth century; the second semester deals with the more modern works.

Year course (3-3)

### 149. The Study of Poetry

A course proceeding from simpler to more complex poetic productions, an designed to bridge the widening chasm between the poet and the ordinary ma Emphasis on current directions in poetry, and on poetry as an oral and auditory ar

Spring (3)

### 151. Chaucer

A study of Chaucer's works, with emphasis on "The Canterbury Tales" an "Troilus and Criseyde."

Fall (3)

### 162. Magazine Fiction

Coaching in constructing and writing short stories for commercial publications Admission by consent of the instructor.

Fall (3)

### 166. Honors Course

Type I: Special study. Open to members of the Honors Group in English (se The Honors Group under General Regulations). May be repeated with differen materials. Type II: Reading and discussion devoted to analyzing literature as a expression of a cultural field and to exploring the values of literature in the studies o the life of man. Registration limited to majors and graduate students in English, an to majors in art, anthropology, economics, history, philosophy, political science, psy chology, and sociology. Admission by consent of the instructor.

Type I: Fall or Spring (3)
Type II: Year course (3-3)

### 191. Advanced Composition

A course designed for prospective teachers of secondary school English. This i not a methods course, but a content course in grammar, composition, and journalism Required of all teaching majors in English; open to other students as an elective.

Fall (3)

### The English Language

The study of the history of the English language, of its words and structure, he changes in inflections, pronunciation, vocabulary, and meaning, and of its use an instrument of communication and human living. Open only to seniors and duate students.

Spring (3)

### Literary Criticism

A historical survey of the principles and practices of literary criticism from ek times to the nineteenth century. Readings in the works of Aristotle, Horace, ginus, Sidney, Boileau, Dryden, Lessing, Sainte-Beuve, Coleridge, and Arnold. en only to senior and graduate students.

Fall (3)

### Special Problems

Students who have demonstrated ability in literary studies may enroll for work er than that outlined in the regular courses. Admission only by consent of the ructor with whom the work is to be done.

Fall or Spring (1-3)

## Graduate Courses

### Shakespeare

Bibliography, critical study, special problems, criticism. Prerequisite: Graduate ding. Recommended: At least one undergraduate course in Shakespeare.

Spring (2)

### Mark Twain

Studies in the numerous aspects of Mark Twain's work and in his significance a product of the Frontier and as a representative American voice. Prerequisite: duate standing.

Fall (2)

### Regionalism in American Literature

Bibliography, special problems, with concentration on selected regions. Preuisite: Graduate standing. Recommended: At least one undergraduate course in erican literature.

Fall (2)

### Utopias

A study of Utopian thought from a literary rather than a sociological viewpoint. parative study of the forms of the projected ideal and of the satirical dream from to through Sir Thomas More, Shakespeare, Swift, Shelley, Morris, Wells, A. xley, and others. Prerequisite: Graduate standing.

Spring (2)

# FRENCH

## IN THE DIVISION OF LANGUAGES AND LITERATURE

### Major

A *major in arts and sciences* is offered in French. Lower division requirement French A-B-C-D; German A-B or Spanish A-B or Latin A-B; History 4A-4B. Upp division requirements: A minimum of 24 upper division units, at least 21 units of whi must be in French, including French 199. The remaining 3 units may be selected fr Geography 118; History 143, 121; or Comparative Literature 118, 155, or 158, in co sultation with the Chairman of the Department. An average of C grade or better required in upper division major courses.

A *teaching major* is offered in French for the general junior high school crede tial. For specific information, refer to requirements for this credential.

### Minor

A *minor in arts and sciences* is offered in French. The minor must include at lea 15 units of work in French, 9 units of which must be from courses carrying upper di sion credit.

A *teaching minor* is offered in French for the general secondary, the gener junior high school, the special secondary, the general elementary, and the kindergarte primary credential. For specific information, refer to the outlines of requirements f these credentials.

### Lower Division Courses

**A-B. Elementary**

Intensive study of French grammar and syntax; daily written work discuss in class; class drill in conversational idiom and pronunciation; reading with or discussion and résumés; dictation; introduction to contemporary prose writer Credit not given for French A unless followed by French B. Students who have h one year of French in high school should register for French A for which only 2 uni will be allowed. Those who have had two years of French in high school shou register for French B for which only four units will be allowed. For specific inform tion, refer to page 17. French A, or its equivalent, is a prerequisite for French B.

Year course (5-5)

**C-D. Intermediate Reading**

Reading and composition; study of standard prose as a basis for class wor collateral reading with résumés and written reports; dictation. Prerequisite for C French B or three years of high school French. Prerequisite for D: French C or fou years of high school French.

Year course (3-3)

**SC. Scientific Reading**

Reading taken from the fields of chemistry, physics, medicine, zoology, biolog etc. Outside readings of books and periodicals, with written reports. Prerequisite French B or equivalent.

Fall (2)

### Upper Division Courses

**101A-101B. Conversation and Composition**

Translation into French from moderately difficult English prose. Outside readin of modern French prose, with written reports in French monthly. Readings and ora discussions in French of various facets of French life and culture.

Prerequisite: French D, or its equivalent, with grade of C.

Year course (3-3) (Offered in 1950-51)

**105A-105B. Modern French Drama**

Plays of Victor Hugo, de Vigny, de Musset, Scribe, Augier, Dumas fils, Pailleron Brieux, Hervieu, Maeterlinck, Rostand, and others read and discussed as to subjec matter and technique. Outside reading and reports. Prerequisite: French D, or it equivalent, with grade of C.

Year course (3-3)

### A-107B. Eighteenth Century Literature

The works of Montesquieu, Voltaire, Rousseau, the Encyclopédistes, and others. requisite: French D, or its equivalent, with a grade of C.

Year course (3-3) (Offered in 1952-53)

### A-110B. Modern French Novel

The French novel from Victor Hugo to the present day, including such authors Hugo, Dumas, Stendhal, Balzac, Flaubert, Loti, Anatole France, Bourget, Bor-ux, Bazin, Barrès, Romain Rolland, A. Gide, Marcel Proust, and others. Class ding, outside reading, and reports. Prerequisite: French D, or its equivalent, with de of C.

Year course (3-3) (Offered in 1951-52)

### A-111B. Seventeenth Century Dramatic Literature

Reading in class of plays of Molière, Corneille, and Racine. Outside readings lectures on the background of the seventeenth century in France. Prerequisite: nch D or its equivalent, with a grade of C.

Year course (3-3) (Offered in 1950-51)

### . Comprehensive Reading and Survey Course

Designed to fill up the gaps in the reading done in courses. Class meeting once eek for guidance, reports, and quizzes. Required of all seniors majoring in French.

Spring (3)

## GENERAL LANGUAGE

### IN THE DIVISION OF LANGUAGES AND LITERATURE

*Major* and *minor* work are not offered in general language.

### Lower Division Course

### Latin and Greek Word Derivation

A general and elementary course in philology. A study of Latin and Greek roots ost frequent occurrence in English, and of the English words derived from them.

Fall (3)

### Pronunciation of French, Italian and German

A course designed especially for the use of singers, radio announcers, etc. No equisite. This course may be taken for one, two or three units of credit depending the individual student's need. Credit in this course does not count toward the 10 foreign language requirement.

Spring (1-3)

# GEOGRAPHY

## IN THE DIVISION OF SOCIAL SCIENCES

### Major

A *major in arts and sciences* is offered in geography. Lower division requiremen Geography 1, 2; Geology 1A-1B. Recommended: A reading knowledge of Fre or German. Upper division requirements: a minimum of 24 upper division units geography, or 18 units in geography and 6 units selected from related fields w approval of the departmental representative.

A *teaching major* is not offered in geography; however, courses in geogra may be used as part of the *social science major* for the general junior high sch credential or the general secondary credential. For specific information, refer to outlines for requirements for these credentials.

### Minor

A *minor in arts and sciences* is offered in geography. The minor must include least 15 units of work in geography, 9 units of which must be from courses carry upper division credit.

A *teaching minor* is not offered in geography for the general secondary credenti however, it may be used as a part of the *social science minor* for the general jun high school, the special secondary, the general elementary, and the kindergarten- mary credentials. For specific information, refer to requirements for these credentia

### Lower Division Courses

NOTE: Geography 1, 3, or 4 may not be used to meet any part of the 12-u social science requirement. Geography 1 or 3 (but not both) may be used to meet p of the 12-unit natural science requirement.

**1. Introduction to Geography: Physical Elements**

The nature of maps, weather and climates of the world; natural vegetatic land forms and their associated soils, with reference to their climatic relationshi the seas and their coasts. One field trip. This course is classified as a natural scien (See lower division requirements.)

Fall or Spring (3)

**2. Introduction to Geography: Natural and Cultural Regions**

The regional differentiation of the world by human activity; areal bases economy and nationality. Prerequisite: Geography 1.

Fall or Spring (3)

**3. Elementary Meteorology**

An elementary study of the earth's atmosphere and changes in it which produ our weather and influence human affairs. Special attention given to local conditio instruments, and records. Aeronautical meteorology stressed in the fall semest This course is classified as a natural science. (See lower division requirements.)

Fall or Spring (3)

**4. Map Reading and Map Interpretation**

Representation of geographic data by means of maps. Interpretation of proj tions, scales, symbols, land forms, and culture from topographic maps; measureme of cultural data on maps. This course may not be counted toward lower division soc science requirement.

Fall (2)

**10. Economic Geography**

Beginning course in economic geography designed for commerce and econon majors. Prerequisite: Geography 1.

Fall or Spring (3)

### Upper Division Courses

**112. Geography of California**

The physiographic regions of California and the cultural landscapes develop by the successive cultural groups. Prerequisite: Geography 1 or consent of instruct

Spring (3)

### 1. Climatology

A survey of the principal classifications of climates of the world; regional racteristics of climate; relations to soils, vegetation, and human activities. Prequisite: Geography 1 or consent of instructor.

Fall (3)

### 1. Geography of Latin America

The natural regions of Latin America; their occupational condition and historical lution. Prerequisite: Geography 1 or consent of instructor.

Fall (3)

### 1. Geography of Northern and Eastern Europe

A study of the cultural development of the countries of northern and eastern ope in relation to physical background and historical evolution. Prerequisite: graphy 1 or consent of instructor.

Fall (3)

### 1 Geography of the Mediterranean Area

A study of the cultural development of the countries of Southern Europe, Western a, and North Africa in relation to physical background and resources. Prerequisite: graphy 1 or consent of instructor.

Spring (3)

### Geography of South America

A study of the physical regions and human geography of South America, including a review of the history of colonization and the exploitation of resources. Prereqte: Geography 1 or consent of instructor.

Fall (3)

### Geography of Middle America

A study of the physical and human geography of Mexico, Central America, the islands of the Caribbean, including a review of the history of colonization the exploitation of resources. Prerequisite: Geography 1 or consent of instructor.

Spring (3)

### Geography of North America

The natural regions of North America, their formation and economic and orical development. Prerequisite: Geography 1 or consent of instructor.

Spring (3)

### Geography of Asia

The cultural regions of Asia, their physical environment, and historical developt. Prerequisite: Geography 1 or consent of instructor.

Fall (3)

### Geography of the San Diego Area

Directed individual urban and rural field work in the San Diego area; the ping of a small area and making its geographic interpretations. Prerequisites: graphy 1 and 2 or consent of instructor.

Spring (3)

### Advanced Economic Geography

A survey of the raw materials of world trade; their production and distribution elated to major geographic regions of the world. Prerequisite: Geography 1 or ent of instructor.

Fall (3)

### Conservation of Natural Resources

Nature and extent of mineral, soil, water, forest, and wild life resources and conservation; with particular emphasis on the United States, against a general ground of world resources. Conservation philosophies and practices, and their raphic bases. Prerequisite: Geography 1 or consent of instructor.

Spring (3)

### Honors Course

To be arranged after consultation with the chairman of the department. (See 15)

Fall or Spring (Credit to be arranged)

# GEOLOGY

## IN THE DIVISION OF PHYSICAL SCIENCES

### Major

A *major in arts and sciences* is not offered in geology. Students preparing for la professional training in geology should plan on completing Chemistry 1A-1B; Phys 1A-1B-1C-1D or 4A-4B-4C; Mathematics 3A-3B; Engineering 1A-1B, 21A; a Geology 1A-1B, 21A-21B.

A *teaching major* is not offered in geology; however, courses in this field may used as part of the *general science major* for the general junior high school credenti For specific information, refer to the outline of requirements for this credential.

### Minor

A *minor in arts and sciences* is offered in geology. The minor must include at le 15 units of work in geology, 9 units of which must be from courses carrying upper di sion credit.

A *teaching minor* is not offered in geology; however, courses in this field may used as part of the *general science minor* for the general junior high school, the spec secondary, the general elementary, and the kindergarten-primary credentials. F specific information, refer to the outlines of requirements for these credentials.

### Lower Division Courses

**1A. Physical**

The composition, origin, and distribution of earth materials, and their mod cation through mechanical and chemical process of change. Three lectures and o three-hour laboratory period weekly with related field study during the semester. (N open to students who have had Geology 2A except for one unit upon the completion the laboratory section.)

Fall (4)

**1B. Historical**

Theories of earth origin, and the evolutionary history of the earth as trac through rock and fossil records. Consideration of the Paleontologic Sequence. Thr lectures and one three-hour laboratory period weekly, with arrangement for field stu and conference during the semester. Prerequisite: Geology 1A or equivalent.

Spring (4)

**2A. General**

Similar to Geology 1A but without laboratory. Emphasis upon origin a development of earth's surface features. Open to all students except those alrea presenting credit in Geology 1A. Two lectures and one demonstration and discussi hour weekly.

Fall (3)

**2B. Physiography of United States**

A study of the land forms of the United States and their physiographic history illustrative of universal geologic conditions. Two lectures and one discussion ho weekly. Prerequisite: Geology 1A or 2A.

Spring (3)

**21A-21B. Mineralogy**

Study of the common minerals and rocks. Use of the blowpipe, simple chemic reagents, and the petrographic microscope, but with emphasis upon sight determinatio Prerequisite: Geology 1A and high school chemistry, or equivalents.

Year course (3-3)

### Upper Division Courses

**100. Structural Geology**

The evolution and description of the structural and topographical features of t earth. Faulting, folding, and orogenic forces with practical illustrations from t North American Continent and California geologic conditions. Lectures, discussion and occasional field trips. Prerequisite: Geology 1A-1B or 2A-2B.

Fall (3)

### Museum Work

Selection and preparation of materials for the college museum collections. phasis upon creation of self instructive displays for use on the elementary and ondary as well as the collegiate level. Prerequisite: Geology 1A-1B, and consent of instructor.

Fall or Spring (1 to 2)

### Geology of California

Directed reading and group discussion of California geologic literature. Designed acquaint the student not only with the important structural and geomorphic units the State but with the variety of important source materials of geologic literature well. Use of bibliographies, state and federal surveys, research publications, etc. requisite: Geology 1A-1B, and consent of the instructor.

Spring (2)

### Field Geology

Field instruction in geologic methods. Reconnaissance of adjacent unmapped as with preparation of a geologic map and accompanying report. Work accomhed primarily on week-ends with minimum classroom activity during the week organizational details. Prerequisite: Geology 1A-1B, and consent of the instructor.

Fall or Spring (1 to 4)

### Special Study

Individual work in field, library, laboratory, or museum under staff supervision. n only to qualified students upon consultation.

Fall or Spring (1 or 2)

# GERMAN

## IN THE DIVISION OF LANGUAGES AND LITERATURE

*Major* and *minor* work are not offered in German; however, students desiring to carry advanced work in German should consult with the Chairman of the Department of Foreign Languages.

### Lower Division Courses

**A-B. Elementary**

Pronunciation, reading and grammar, with practice in simple conversation, narration and description, both oral and written. Credit not given for German A unless followed by German B. Students who have had one year of German in high school should register for German A for which only two units will be allowed. Those who have had two years of German in high school should register for German B for which only four units will be allowed. For specific information, refer to the section entitled: Lower Division Requirements for All Curricula. German A, or its equivalent, is a prerequisite for German B.

Year course (5-5)

**C-D. Intermediate Review and Reading**

Reading and composition; study of standard prose as basis for class work; collateral reading with written reports; German conversation, with the texts read as a basis; dictation. Prerequisite: German B or three years of high school German, or its equivalent. Students with credit for four years high school German, or its equivalent, should enter German D.

Year course (3-3)

**SC-SD. Scientific Reading**

First semester, readings in scientific reader on chemistry, physics, etc.; occasional written reports on scientific subjects read outside of class; sight reading. Second semester, readings in special scientific or technical works; weekly written reports required; sight reading. Prerequisite for SC: German B with a grade of C or three years of high school German; for SD: German SC, German C, with a grade of C, or four years of high school German.

Year course (3-3) (Not offered in 1949-50)

### Upper Division

**101A-101B. Advanced Conversation and Composition**

Translation into German of moderately difficult English prose. Free composition in German, written and oral. Outside reading of modern German plays and prose, dealing with various aspects of German life and culture, with written reports and oral discussions in German. Oral and written practice in conversational German. Prerequisite: German D, or equivalent, with grade of C.

Year course (3-3) (Not offered in 1949-50)

# HEALTH EDUCATION
## IN THE DIVISION OF HEALTH, PHYSICAL EDUCATION, AND RECREATION

*Major* work is not offered in health education.

### Minor

A *minor in arts and sciences* is offered in health education. The minor must include least 15 units of work, 9 units of which must be from courses carrying upper division dit. The minor must include the following courses: Physical Education 51, Home nomics 61A, Health Education 65, 152, 153, and 199.

A *teaching minor* is offered in health education for the general secondary, the eral junior high school, and the special secondary credentials. Physical education jors may use health education as a second teaching minor only. For specific infortion, refer to the outlines of requirements for these credentials.

### Lower Division Courses

**Principles of Healthful Living**

A course concerned with the personal health problems of college students; igned to provide scientific health information; promote wholesome attitudes and ctices relating to healthful living. Required of all freshmen.

Fall or Spring (2)

**Community Health**

A study of community health problems; the role of the citizen, the public and vate (or voluntary) agencies in promoting and protecting the health of the comnity. Prerequisite: Health Education 21. Required of physical education major dents.

Fall (3)

**Physiology of Reproduction**

A course consisting of a series of lectures and discussions dealing with normal abnormal physiology and anatomy of reproduction; facts and frauds in sex iene, and related topics. Prerequisite: Health Education 21.

Fall or Spring (1)

### Upper Division Courses

**Health Education for Teachers**

A course for teacher education students designed to develop a teacher awareness pupil health needs. The elements of the health education program are considered, hasizing the responsibility of the teacher in health guidance; observation of school dren; techniques and procedures for screening defects; promoting health instruc; and providing a safe, sanitary, healthful school environment. A study of the munity agencies promoting the health and welfare of the school child.

Fall or Spring (2)

**Health Education Programs**

The construction of the health education program including objectives, scope and ence of instruction, teaching methods, source materials and evaluation procedures; practice in building functional instructional units. Prerequisite: Health Educa 151.

Fall (3)

**Administration of School Health Program**

The principles, policies and practices in organizing and conducting the school th program as an integral part of the total school and community program. A study he administrative aspects of the divisions of the school health program; health ruction, health service (including health guidance), healthful school living, and tionship to physical education and recreation. Partially fulfills Health and Develop t Credential requirement for nurses.

Spring (3)

**199. Special Study in Health**

An opportunity is presented for extensive review of pertinent literature, i vidual research, and advanced study of problems in the profession. Credit will ra from 1 to 3 units according to the type and amount of work. Prerequisite: Appro of the Chairman of the Division.

Fall or Spring (1 to 3)

### Graduate Courses

**202. Problems in Health Education**

A survey of current problems facing the Health Education profession is stu through a review of the literature, discussion of trends, observation of school situati together with the analysis and evaluation of actual problems. Written reports required. Prerequisite: Graduate standing.

Fall or Spring (2)

# HISTORY

## IN THE DIVISION OF SOCIAL SCIENCES

### Major

A *major in arts and sciences* is offered in history. Lower division preparation for major : History 4A-4B, or 8A-8B, or 9A-9B, and either Political Science 1A-1B, or A-71B, or Economics 1A-1B. Two of the above history courses are recommended for dents planning to major in history, and it is suggested that History 4A-4B be luded as one of them. No freshman shall enroll in more than one lower division urse in history during any one semester without the permission of the department. per division requirements : a minimum of 24 upper division units in history, includ- History 199, and a minimum of a year of concentration in each of three of the lowing fields : (a) Ancient and Medieval ; (b) Modern Europe ; (c) United States ; ) Latin America ; (e) Pacific Area and the Far East. These courses must be selected der the guidance of the chairman of the department. A reading knowledge of one eign language is strongly recommended.

A *teaching major* is offered in history for the general secondary credential. History y also be used as part of the *social science major* for the general junior high school dential or the general secondary credential. For specific information, refer to the tlines of requirements for these credentials.

### Minor

A *minor in arts and sciences* is offered in history. The minor includes from 15 to 18 its of work in history, 9 units of which must be from courses carrying upper division dit including a year course.

A *teaching minor* is offered in history for the general secondary credential or as rt of the *social science minor* for the general junior high school, the special secondary, general elementary, and the kindergarten-primary credentials. For specific infor- tion, refer to the outlines of requirements for these credentials.

### Explanation of Courses

NOTE : History 17A-17B does not count toward credit for a major or minor history.

Any history course, with the exception of History 270A-270B, may be taken her semester, the A part not being a prerequisite to the B part.

### Lower Division Courses

**-4B. History of Modern Europe**

A survey of European society, institutions and politics from about 1500 to the sent. Fall semester : 1500-1799. Spring semester : 1799 to the present.

Year course (3-3)

**-8B. History of the Americas**

Survey of the history of the western hemisphere from its discovery to the present e.

Year course (3-3)

**-9B. History of the Pacific Ocean Area**

A general survey of the history and civilization of the peoples of the Pacific, with cial emphasis upon exploration, trade, international rivalries, and social evolution the island areas.

Year course (3-3)

**A-17B. History of American Civilization**

Survey of the political and social development of the United States, with emphasis on the rise of American civilization and ideals.

NOTE : This course is not open to freshmen.

Year course (3-3)

### Upper Division Courses

**A-111B. Ancient History**

Fall semester : Greek history to the Roman conquest. Spring semester : Roman tory to the fourth century A.D.

Year course (3-3)

**121A-121B. Medieval History**

Survey of the main events of European social, cultural, religious, political a economic history, between 500 and 1300 A.D.

Year course (3-3)

**131A-131B. Renaissance, Reformation and Counter-reformation**

A history of personalities and events connected with the social, political, cultur economic and religious change between 1300 and 1600.

Year course (3-3)

**141. Europe in the Seventeenth and Eighteenth Centuries**

European thought, politics and international relations from the Thirty Yea War and Louis XIV to the Seven Years' War.

Fall (3)

**142. The French Revolution and Napoleonic Era**

Study of conditions in France prior to 1789, the Revolution, 1789-1799, the orga ization of France and Europe under Napoleon, character of his empire, and the rec ganization of Europe at the Congress of Vienna.

Spring (3)

**143A-143B. Europe in the Nineteenth Century**

Reaction in Europe, the development of nationalism, the impact of industrialis and the background of World War I. Covers period 1815-1914.

Year course (3-3)

**144A-144B. Europe and the World Wars**

Developments in Europe from 1914 to the present. Fall semester: 1914-193 Spring semester: 1939 to present.

Year course (3-3)

**151A-151B. History of England**

A survey of political and constitutional development in England since 1066; t transition from medieval England to modern; Tudor despotism; struggle for sel government under the Stuarts; rise and development of present-day political and soci institutions. This course is designed for pre-legal students, majors in English, and as background for American history.

Year course (3-3)

**156A-156B. History of British Expansion**

A study of the growth, development, and break-up of the older overseas empire the beginnings of the newer empire after 1783; the rise, federation, and imperial rel tions of the British Commonwealth of Nations; the crown colony system; India unde British rule; British expansion in Africa and the Pacific; development of the Britis mandates. History 156B is not open to students with credit for Political Science 160.

Year course (3-3)

**161. Mexico and Caribbean Countries**

Special attention to relations between the United States and these countries, an to recent developments in Mexico.

Fall (3)

**162. South America Since Independence**

Republics of South America. Development of nationality, struggles for politica stability, exploitation, diplomatic and commercial relations with the United States, an other international problems of South America. Survey of present-day conditions.

Spring (3)

**171A-171B. The Rise of the American Nation**

Semester I: Lectures and readings on English colonization in North America, th development of colonial institutions and political customs, and areas of internationa conflict during the eighteenth century. Semester II: The revolutionary movement an the establishment of the government under the Constitution of 1787 to the close of th War of 1812.

Year course (3-3)

### 2A-172B. Constitutional History of the United States

Colonial governments, formation of the national Constitution, historical development of constitutional government, and significant phases of American constitutional w. Not open to students with credit for Political Science 139A and 139B.
Year course (3-3)

### 3A-173B. The Expansion of the United States

Lectures and readings on Jacksonian democracy, territorial expansion and the exican War, the slavery controversy, Civil War and Reconstruction, and attention to e growth and progress of the United States to the close of the nineteenth century.
Year course (3-3)

### 5. The United States in the Twentieth Century

The rise of the United States to the position of a world power; social and economic problems posed by the machine age; political action and adjustment, actual and oposed, intended as solutions for these problems.
Spring (3)

### 6A-176B. History of American Foreign Policy

Lectures and readings in the field of American foreign relations since 1776, with ecial emphasis, in the second semester, upon affairs since 1900. A general survey urse. Not open to students with credit for Political Science 158A-158B.
Year course (3-3)

### 9A-179B. Intellectual History of the American People

A study of the ebb and flow of ideas in the United States since the founding of e English colonies, with special attention devoted to social and political thought.
Year course (3-3)

### 1A-181B. History of the West

The American frontier: Expansion, exploration, settlement and building of the w states, with emphasis upon frontier problems of defense, communications, finance, c.; the development of cultural institutions. A critical examination of the causes, fects and results of the frontier experiences of the American people. Second semester als chiefly with the Far West and its political influence upon the American people. rontier influences on American ideals and politics.
Year course (3-3)

### 9. History of California

The economic, social, intellectual, and political development of California from e earliest times. Emphasis will be on the founding of California, international ruggles for California; American conquest and Gold Rush Era; development of lifornia as a state.
Fall or Spring (3)

### 1A-191B. History of the Far East

Particular emphasis during the first semester upon the history, both internal d international, of the Far East through the nineteenth century. The second semester ill be devoted to a consideration of developments in the twentieth century.
Year course (3-3)

### 2. Modern Russia

A general survey of Russian history, with emphasis upon the period since Peter e Great; the relations between the Russian Empire and its national minorities; arist experiments in political and social reform; the rise and spread of revolutionary cialism; the collapse of the Russian Empire; the development of the U. S. S. R.
Spring (3)

### 3. History of China

A survey of Chinese history and institutions from antiquity to the present.
Fall (3)

### 194. History of Japan

A general survey of the political, economic and social development from t foundation of the empire to contemporary times. Special attention will be given religions, phliosophy, literature and the arts.

Fall (3)

### 199. Special Course for Advanced Students

Required of all students with a history major in liberal arts and those worki toward a General Secondary credential with a history major. To be attended duri the senior year.

Spring (2)

## Graduate Course

### 270A-270B. Seminar

Required of all candidates for a General Secondary credential with history the major. Special emphasis upon the application of research in American history teaching in junior high school, high school, and junior college. History 270A is a pr requisite to 270B. Prerequisite: Restricted to students having completed sixteen eighteen units in upper division history including History 199, or with the conse of the instructor.

Year course (2-2)

# HOME ECONOMICS

## IN THE DIVISION OF SOCIAL SCIENCES

### Major

A *major in arts and sciences* is not offered in home economics; however, students ny elect a *general major* with the field of concentration in home economics. For specific formation on the home arts curriculum, refer to the Home Arts Curriculum in the tion entitled: Preprofessional and Vocational Curricula, and for further information the general major, refer to the section entitled: Upper Division Requirements for the chelor of Arts Degree in Arts and Sciences.

A *teaching major* is not offered in home economics.

### Minor

A *minor in arts and sciences* is offered in home economics. The minor must include least 15 units of work in home economics, 9 units of which must be from courses rrying upper division credit.

A *teaching minor* is offered in home economics for the general secondary, general nior high, and special secondary credentials. Home economics may also be used as second minor for the general elementary credential. For specific information, refer the outline of requirements for these credentials.

### Lower Division Courses

NOTE: Courses in home economics may not be used to meet any part of the unit social science requirement, nor may they be used as part of a social science jor or minor.

**Home and Family Life**

Consideration of necessary preparation for marriage, family budgets and money nagement; recreation, entertaining and social usage; finding a home, its furnishings d equipment with consideration of arrangement and care; child care, proper training d guidance. Open to men and women.
Fall or Spring (3)

**Food Preparation**

Principles of food selection, preparation and service with consideration of thetic and nutritional values. Experience in food preparation and meal service. e lecture and two three-hour laboratories per week.
Fall (3)

**Fundamentals of Clothing**

Selection of clothing with self-analysis as a basis; wardrobe planning and buying cedures. A study of commercial patterns and principles of garment construction. o three-hour laboratories and lecture per week.
Fall (3)

**Clothing Design**

Selection and construction of children's and adults' garments; care, repair and ke-over problems of clothing. One lecture and two three-hour laboratories per week. requisite: Home Economics 10 or equivalent.
Spring (3)

**Household Equipment**

The selection and utilization of household equipment and storage space.
Fall (2)

**Nutrition**

Practical problems of nutrition including food requirements, food selection, and l habits. For men and women. One two-hour lecture per week.
Spring (2)

### 61B. Nutrition Laboratory

Nutrition principles applied to food preparation, meal preparation, and spe diets. One three-hour laboratory per week.
Spring (1)

### 62. Food and Nutrition

Selection, purchase, and service of meals with a consideration of nutritio needs of family groups, food habits and social customs. One two-hour lecture one three-hour laboratory per week. Open to all students except prenursing stude
Spring (3)

## Upper Division Courses

### 100. Advanced Clothing Design

Design and construction of tailored silk and wool garments, informal and for type dresses. Costume assembling. One lecture and two three-hour laboratories week. Prerequisite: Home Economics 11 or equivalent.
Spring (3)

### 101. Clothing Selection

Aims to develop taste in dress through a better understanding of the relation art principles, psychology, fashion trends, personality and physical characteristics individuals. History of costume is studied briefly as an aid in understanding recurr cycles in fashion. A consideration of buymanship information necessary in wardr selection to insure satisfaction and economy.
Spring (3)

### 102. Child Growth and Development

This course deals with a study of the mental, emotional, social, and physi development during childhood and early adolescence. Directed observation requir Not open to students who have credit for Psychology 102, 106, or Education 102B
Fall or Spring (3)

### 105. Family Meals

This course deals with the planning, preparing, and serving of attractive, w balanced meals for different income levels, and for various occasions. The student have responsibility for menu making, food purchasing, and meal management. T three-hour laboratories, one hour lecture per week.
Fall (3)

### 108. Marriage and the Family

Preparation for marriage. Prediction scales for evaluating success or fail in marriage. Parent-child relationships; factors in successful and unsuccessful m riages; higher education and the birth rate; married women in industry and prof sions; desertion and divorce. Not open to students who have credit for Sociolo 45, 55, or 108.
Fall or Spring (3)

### 150. Home Management

Integration of the learning activity around a living situation. Management money, time and energy in the home. Principles underlying the most efficient ma agement of an average home will be put into practice. Three lectures per week.
Fall or Spring (3)

### 160A. Merchandise Analysis—Textiles

Properties, uses, selection and care of textile fibers and fabrics. The aim is develop judgment in the evaluation involved in the selection of textiles.
Fall (2)

### 160B. Merchandise Analysis—Nontextiles

Properties, uses, selection and care of metals, glass, rubber, fur, enamels a plastics.
Spring (2)

**1. General Textiles**

Factors involved in fundamental weaves, fabrics, color, and finishes with reference to selection of fabrics for home decoration and clothing. Relationships to durality and cost are emphasized. Open to all students except merchandising majors.
Spring (2)

**0. Child Care and Development**

A study of the prenatal and pre-school periods of child development. Directed servation and participation in the nursery school.
Spring (3)

# INDUSTRIAL ARTS

## IN THE DIVISION OF PHYSICAL SCIENCES

### Major

*Major* and *minor* work in industrial arts are not offered in the arts and sciences ricula. Courses are divided into two groups: (1) those leading to Professional Eduion for teachers; and (2) those designed for General Education. Students desiring ctical training in shopwork on an elective basis should make their course selections m general education shop courses. Special emphasis is given to individual interests l objectives on a general shop basis.

### Minor

A *teaching minor* in industrial arts is offered for the general junior high, special ondary, and general secondary credentials. Industrial arts may also be used as a ond minor for the general elementary credential. For specific information, refer to l outline of requirements for these credentials.

### Lower Division Courses

NOTE: Courses in industrial arts may not be used to meet any part of the 12-unit sical science requirement, nor may they be used as part of a major in the physical nces.

**eneral Shop Theory and Practice**

A study of shop practices in the processing and fabrication of various engineering erials. Students investigate standard tools and equipment used in modern techogy and learn how to obtain data from tables and formulas necessary to successful p work.
Fall (3)

**Mechanical Drawing**

Freehand lettering, use and care of drafting equipment, simple orthographic jection, introduction to problems of dimensioning. Not open to students who have lit for a year course in senior high school mechanical drawing or to students who e credit for Engineering 2.
Fall or Spring (2)

**1 Introductory General Shop**

A general introductory shop course covering the areas of wood, machine and h metal, sheet metal, foundry, forge, welding, and electricity. Basic elements of above areas will be mastered during the first half of the semester with special ideration given to individual interests and needs during the second half.
Fall (3)

**2 Intermediate General Shop**

Shop training in any two of the following fields: woodworking, metalworking, ding, forging and machining. Work will be largely on an individual project basis emphasis on acquiring skills which have value in a liberal education.
Spring (2)

**41. Elements of Metalworking**

Training in the use of hand tools commonly used in metalworking. Discussio and demonstration of the principles and techniques of metalworking. Required of candidates for teaching credentials in industrial arts.

Spring (3)

**51. Elements of Woodworking**

Training in the use of hand tools commonly used in woodworking. Discussio and demonstration of the principles and techniques of woodworking. Required o candidates for teaching credentials in industrial arts.

Spring (3)

**61. Elements of Electricity**

Elementary electricity as related to the home and industry; includes the stud of basic principles of electricity and application to household appliances and relate projects.

Fall (3)

## Upper Division Courses

**121. Advanced Mechanical Drawing**

Lettering, orthographic and isometric projection of machines and machine parts dimensioning, working drawings, and reproduction. Prerequisite: Industrial Arts or equivalent. Not open to students with credit for Engineering 22.

Spring (3)

**141. Advanced Metalworking**

Plumbing and pipefitting including threading, cutting, and installation of pipe and fittings. Household maintenance. Sheet metal development and fabrication. Prerequisite: Industrial Arts 41.

Fall (2)

**143A. Machine Shop Practice**

The use and care of common machine tools. Lathe work stressed. Prerequisite Industrial Arts 41.

Fall (3)

**143B. Machine Shop Practice**

Shaper and milling machine work with advanced lathe work. Prerequisite Industrial Arts 143A.

Spring (3)

**146. Forging and Welding**

Elementary and fundamental principles of forging and welding; including oxyacetylene and electric welding. Prerequisite: Industrial Arts 41.

Spring (2)

**151A. Furniture Making**

Designing and constructing furniture. Prequisite: Industrial Arts 51.

Fall (2)

**151B. Furniture and Cabinet Making**

Advanced problems in woodwork. Mill cabinet work and original furniture desig and construction. Prerequisite: Industrial Arts 151A

Spring (2)

**161. Advanced Applied Electricity**

Study and analysis of commonly used electrical equipment. Prerequisite: Industrial Arts 61

Spring (2)

**190. Experimental Shop**

Individual shop work on complex projects on an experimental basis.

Spring (2)

# JOURNALISM

## IN THE DIVISION OF LANGUAGES AND LITERATURE

### Major

A *major in arts and sciences* is not offered in journalism. Students desiring major rk in journalism at this college should plan for a *general major* with the field of con- ctration in journalism. For specific information regarding this plan, refer to the cur- rulum in pre-journalism in the section entitled: Pre-professional and Vocational rricula, and to the description for the general major in the section entitled: Upper vision Requirements for the Bachelor of Arts Degree in Arts and Sciences.

### Minor

A *minor in arts and sciences* is offered in journalism. The minor must include at st 15 units of work in journalism, 9 units of which must be from courses carrying per division credit.

**A *teaching minor* is not offered in journalism.**

### Lower Division Courses

**A. Elements of Journalism**

Theory of news writing; introduction to the newspaper as an institution in dern society. Prerequisite: Sophomore standing and grade of B in Freshman com- ition, or consent of instructor.

Fall (3)

**3. News Gathering and Reporting**

Practice in writing news copy, both for class criticism and for publication in *e Aztec*. Prerequisite: Grade of C or better in Journalism 51A.

Spring (3)

**Special Projects**

Special work in journalism by arrangement with instructor. Work on *The Aztec*, rbook and other publications, with consent of instructor. (NOTE: A maximum of nits of Special Projects courses may be credited toward satisfaction of General jor or Journalism Minor requirements. The number of such units taken as elective dit is not limited except at the instructor's discretion.)

Fall and Spring (1-3)

### Upper Division Courses

**A. Magazine Article Writing**

The technique of the magazine article; article types; research techniques. Pre- uisites: Junior standing, with average grade of B in all previous composition and rnalism courses, *plus* permission of instructor.

Fall (3)

**B. Magazine Article Marketing**

Market analysis; slanting; the business of writing. Production of at least two -length magazine articles, and marketing of same, required during the course. Pre- uisite: Journalism 101A with grade of C or better.

Spring (3)

**Advanced Editing and Reporting Techniques**

Editing copy, writing headlines, making up pages, handling telegraph copy. ctice in specialized forms of journalistic writing. Prerequisite: Journalism -51B.

Fall (3)

**City and County Newspaper Practice**

A special course in applied journalism during which students work on nearby y and weekly newspapers by special arrangement with editors. Prerequisite: Jour- sm 51A and 51B with grade of B, *plus* permission of instructor.

Fall or Spring (1-3)

**Special Projects**

Special work in journalism by arrangement with instructor. Work on *The Aztec*, book and other publications, with consent of instructor. (See "Note" under Jour. above.)

Fall or Spring (1-3)

# LATIN

## IN THE DIVISION OF LANGUAGES AND LITERATURE

*Major* and *minor* work are not offered in Latin.

### Lower Division Courses

**A-B. Elementary**

Thorough study of Latin grammar with daily written exercises and the translation of selected passages from Caesar, Cicero, and Pliny. The importance of thes authors and their culture to western civilization will be considered. Students who hav had one year of Latin in high school should register for Latin A for which only 2 unit will be allowed. Those who have had two years of Latin in high school should registe for Latin B for which only 4 units will be allowed. For specific information, refer t page 17. Latin A, or its equivalent, is a prerequisite for Latin B.

Year course (5-5)

**C-D. Intermediate**

Survey of Latin poetry with chief emphasis upon Vergil's *Aeneid.* Selection will be read from Catullus, Horace, Ovid, and others. Parallel European poetry will b considered. Latin B or equivalent is a prerequisite for Latin C. Latin C or equivalent i a prerequisite for Latin D.

Year course (3-3) (Not offered in 1949-50)

# LIBRARY SCIENCE

## IN THE DIVISION OF SOCIAL SCIENCES

*Major* and *minor* work are not offered in library science.

### Lower Division Courses

NOTE: Library science may not be used to satisfy any part of the 12-uni social science requirement, nor may it be used as part of a social science major o minor.

**10. Use of the Library**

The chief object is to give a working knowledge of some of the resources of th library which every teacher and student should understand—the decimal classification, the card catalog, periodical indexes, and the most important reference books together with some instruction in the preparation of bibliographies. The course wil be a requirement of those students added to the library's staff of student assistants although it will not prepare the student to become a librarian.

Fall or Spring (2)

# MATHEMATICS

## IN THE DIVISION OF PHYSICAL SCIENCES

### Major

A *major in arts and sciences* is offered in mathematics. Lower division requirements: Mathematics 3A-3B, 4A. Recommended: Two or more of the following: Astronomy 1; Economics 1A-1B; Commerce 2, Engineering 1A, 21; French A-B; German A-B; Physics 1A-1B or 4A-4B or 2A-2B-3A-3B. Upper division requirements: a minimum of 24 upper division units in mathematics, or 18 units in mathematics and 6 units selected from the following with approval of the Chairman of the Department: Astronomy 107; Chemistry 110A-110B, 144; Physics 105A-105B, 112; or other courses approved by the Chairman of the Department.

A *teaching major* is offered in mathematics for the general junior high school credential and for the general secondary credential. For specific information, refer tc the outline of requirements for these credentials.

### Minor

A *minor in arts and sciences* is offered in mathematics. The minor must include at t 15 units of work in mathematics, 9 units of which must be from courses carrying er division credit.

A *teaching minor* is offered in mathematics for the general secondary, the general ior high school, the special secondary, the general elementary, and the kindergarten- nary credentials. For specific information, refer to the outlines of requirements for se credentials.

### Lower Division Courses

NOTE: Courses in mathematics may not be used to meet any part of the 12-unit ral science requirement.

**Basic Mathematics**

Fundamentals of algebra and arithmetic with applications to everyday problems. students who have had less than two years of high school mathematics or who re or need mathematics training in this area.

**Basic Mathematics**

Fundamentals of geometry including applications to everyday problems. For ents who have less than two years of high school mathematics or for students who re or need work in this area.

**Intermediate Algebra**

The course begins with an extensive review of elementary algebra. Topics red include quadratic equations, simultaneous equations, ratio and proportion, ation, arithmetic and geometric progressions, bionominal expansion and logarithms. equivalent to the second year-course in high school algebra. Prerequisites: Ele- tary algebra and geometry or Mathematics A-B.

Fall and Spring (3)

**Trigonometry**

Roughly equivalent to the high school course in plane trigonometry but with more tion than is often given to those aspects needed in analytic geometry and calculus. equisites: Intermediate algebra, Mathematics C.

Fall and Spring (3)

**Solid Geometry**

A course in solid geometry with much attention to the calculation of surfaces and mes for the simpler solids and for certain others used in industry. Prerequisites: rmediate algebra, Mathematics C.

Fall (2)

**Slide Rule**

Theory and use of the slide rule. Practice in performing the fundamental opera- of arithmetic. Some attention is given to more involved computations. Pre- isites: Trigonometry, Math. D.

Fall and Spring (1)

**College Algebra**

Review of algebra and trigonometry. New material includes identities, graphs, ion of algebraic and trigonometric equations, determinants, and mathematical s. Prerequisites: Two years of algebra and trigonometry.

Fall and Spring (3)

**Plane Analytic Geometry**

Equations and loci, conic sections, coordinate transformations, Cartesian and coordinates, and parametric representation. Prerequisites: Algebra, plane etry, intermediate algebra, and plane trigonometry, with a high degree of pro- cy, or a satisfactory grade in Mathematics 1, College Algebra. In order to mine the degree of proficiency, examinations in intermediate algebra and plane ometry will be given during the first week of the semester. Students falling below equired standard will be assigned to Mathematics 1.

Fall and Spring (3)

### 3B. First Course in Calculus

Introduction to differential and integral calculus, with applications to problem involving variable rates and summations. Prerequisite: Mathematics 3A.
Spring (3)

### 4A. Second Course in Calculus

Differentiation, integration, infinite series, and a brief treatment of solid analyti geometry. Prerequisite: Mathematics 3B. Solid geometry is recommended.
Fall (3)

### 4B. Third Course in Calculus

Partial differentiation, successive integration, and applications. Prerequisite Mathematics 4A.
Spring (3)

### 7A-7B. Mathematical Analysis

Designed for students who do not intend to prepare for a professional career i physical science or in engineering but who desire or need one year of college mathematics. Consideration is given to the processes and applications of algebra, trigonometry, and differential and integral calculus. Prerequisites: High school algebr and plane geometry. 7A is a prerequisite to 7B. Students with credit for Math 1 o 3A will not receive credit for 7A. Students with credit for Math 3B will not receiv credit for 7B.
Year course (3-3)

## Upper Division Courses

### 104. History of Mathematics

History of mathematics down to early modern times. Prerequisite: Mathematic 3A-3B or 7B.
Spring (3) (Offered in 1949-50 and alternate years)

### 105. College Geometry

A continuation of the geometry of the high school with emphasis on moder topics. Prerequisite: Mathematics 3B or 7B.
Fall (3) (Offered 1950-51 and alternate years)

### 106. Projective Geometry

Concurrence of lines, collinearity of points and other properties of figures no altered by projections; construction and study of ellipses, hyperbolas and parabolas b means of projections. Prerequisite: Mathematics 3A-3B or 7B.
Fall (3) (Offered in 1949-50 and alternate years)

### 111. Theory of Algebraic Equations

Determinants, complex numbers, and theory of algebraic equations. Prerequisites: Mathematics 3A and 3B or 7B.
Spring (3) (Offered in 1950-51 and alternate years)

### 112. Analytic Geometry of Space

The coordinate systems in space; lines, planes, and quadric surfaces; applications. Prerequisite: Mathematics 4A.
Spring (3) (Offered in 1950-51 and alternate years)

### 117. Intermediate Calculus

Essentially the same as Mathematics 4B with additional special work for advanced students. Prerequisite: Mathematics 4A. Credit not allowed for both 4B and 117.
Spring (3)

### 118. Advanced Mathematics for Engineering Students

Hyperbolic, elliptic, Bessel and gamma functions; line integrals; Fourier series, etc. Applications. Prerequisites: Mathematics 4A-4B. (4B concurrently if desired).
Fall (3)

**9. Differential Equations**

Ordinary differential equations of first and second order, with applications. Pre-
quisite: Mathematics 4A-4B (4B concurrently if desired).
Spring (3)

**1. Advanced Calculus**

Review of fundamental aspect of calculus, partial differentiation, multiple inte-
als and change of variable, series, line and surface integrals, Stokes' and Green's
orems, Beta and Gamma functions. Prerequisite: Mathematics 118 or 119.

**1. Vector Analysis**

Theory and applications to engineering problems. Prerequisites: Mathematics
-4B (4B concurrently if desired).
Fall (3)

**0. Probability and Statistics**

Statistical theory and method from the mathematical standpoint; applications in
ial and natural science. Prerequisite: Mathematics 4A or 7B.
Spring (3) (Offered in 1950-51 and alternate years)

**0. Special Study**

Study of materials mainly supplementary to the courses listed above. Prerequi-
: Average grade of B or better in at least 12 units beginning with Mathematics 3A.
Fall and Spring (1 or 2, each semester)

### Graduate Courses

**. Concepts of Geometry From an Advanced Point of View**

A course covering fundamental concepts of geometry and processes of mathemat-
l thinking in this area. Recommended for candidates for the general secondary cre-
tial.
(2)

**. Concepts of Algebra From an Advanced Point of View**

A course covering fundamental concepts of algebra and processes of mathematical
nking in this area. Recommended for candidates for the general secondary creden-
.
(2)

**. Advanced Work in the History of Mathematics**

Intensive study of specific phases of the history of mathematics with attention
mplications for teaching mathematics. Prerequisite: Mathematics 104.

## MUSIC

### IN THE DIVISION OF FINE ARTS

### Major

A *major in arts and sciences* is offered in music. Lower division requirements:
sic 1B-1C-1D, 4A-4B, 4 units of applied music (study of piano, voice, or orchestral
rument); Aesthetics 1A-1B. Upper division requirements: a minimum of 24 upper
sion units in music selected from the following: Music 105A-105B, 106, 107, 119A,
A, 121A-121B, 128; 4 units of applied music, Aesthetics 102A-102B, and 4 units
usic activity (Music 109, 110, 111, 112, 113, 114, 115, 125, 126, or 130). As labora-
work, each music major is required to carry one music activity per semester. It is
mmended that both vocal and instrumental activities be included at some time
ng the college course. At least a C average in upper division music courses
ecessary.

At least two months before graduation, each senior music major will present a
tal before the music faculty. At this time, the faculty will select those students who
to be granted the privilege of a public recital.

A *teaching major* is offered in music for the general secondary credential and the
ial secondary credential in music. For specific information, refer to the outlines of
irements for these credentials.

### Minor

A *minor in arts and sciences* is offered in music. The minor must include at least 1 units of work in music, 9 units of which must be from courses carrying upper divisio credit.

A *teaching minor* is offered in music for the general secondary, the general junio high school, and the special secondary credentials. It may be offered only as a secon teaching minor for the general elementary and the kindergarten-primary credentials For specific information, refer to the outlines of the requirements for these credentials

### Lower Division Courses

(Descriptions of courses in the field of music appreciation and history of musi are listed under *aesthetics.*)

**1A. Musicianship—Fundamentals of Music**

The elements of music; scale construction; elementary music theory; drill i music reading both with syllables and with words; ear training, elementary musi dictation. Basic course for all general elementary credential students. Music major receive no credit toward graduation. All music majors are required to register for Section 1, only.
Fall or Spring (3)

**1B. Musicianship—Music Reading and Ear Training**

Tonal and rhythmic dictation; rhythmic writing; sight singing. Basic course for majors and minors. Prerequisite: Music 1A.
Fall or Spring (2)

**1C-1D. Musicianship—Advanced Music Reading and Ear Training**

Tonal work in minor keys; modal scales; dissonant triads and seventh chords; interval feeling in all chords; rhythmic progression and elementary forms; rhythmic, melodic and harmonic dictation. Prerequisite: Music 1B. 1C is a prerequisite for 1D.
Year course (2-2)

**2A. String Instruments**

Beginner's class in violin, viola, 'cello and string bass. Required of all music majors working for a Special Secondary credential unless this orchestral section is the major or minor field.
Fall or Spring (1)

**3A. Woodwind Instruments**

Beginner's class in oboe, clarinet, flute and bassoon. Required of all music majors working for a Special Secondary credential unless this orchestral section is the major or minor field.
Fall or Spring (1)

**4A-4B. Elementary Harmony**

Scale construction, intervals, by-tones and diatonic harmonies. Transposition and original composition in the simpler forms. Prerequisites: Music 1A-1B, or the equivalent, and at least one year of piano study. 4A is a prerequisite for 4B.
Year course (3-3)

**5A. Percussion Instruments—Drums**

Snare drum, bass drum, cymbols and small instruments of percussion group techniques from beginning work through all phases of concert and marching band requirements.
Fall or Spring (1)

**5B. Percussion Instruments—Mallet Played**

Necessary technique and applied elementary theory to prepare the student in the fundamentals of playing the Tympani, Glockieuspiel, Xylophone, Marimba, Vibraphone, Orchestra Bells and Chimes.
Fall or Spring (1)

**. Brass Instruments**

Beginner's class in trumpet, French horn, baritone, trombone and tuba. Required all music majors working for a Special Secondary credential unless this orchestral tion is the major or minor field.
Fall or Spring (1)

**. Music Materials for the Elementary School**

Study of the song material in the state music texts and in the supplementary ts. Appreciation materials applicable to the elementary school. Required course for general elementary credential students. Prerequisite: Music 1A.
Fall, Spring and Summer I, II (3)

**-B-C-D. Treble Clef Sextette**

Members selected by auditions from Treble Clef (Music 10).
Fall and Spring (½-½)

**-B-C-D. Women's Glee Club—Treble Clef**

Entrance upon examination.
Fall and Spring (½-½)

**-B-C-D. Men's Quartet**

Members selected by auditions from Men's Glee Club (Music 12).
Fall and Spring (½-½)

**-B-C-D. Men's Glee Club**

Entrance upon examination.
Fall and Spring (½-½)

**-B-C-D. Orchestra**

Permission of the conductor required for membership.
Fall and Spring (1-1)

**-B-C-D. Vocal Ensemble**

Members selected by auditions from Choral Club (Music 15).
Fall and Spring (½-½)

**-B-C-D. Choral Club**

Entrance upon examination.
Fall and Spring (½-½)

**A-16B-16C-16D. Individual Study of an Orchestral Instrument**

Fall and Spring (1-1)

**A-17B-17C-17D. Individual Study of Voice**

Fall and Spring (1-1)

**A-18B-18C-18D. Individual Study of Piano or Organ**

Prerequisite: The ability to play artistically hymns and folk songs of the type nd in the Golden Book of Favorite Songs.
Fall and Spring (1-1)

**-B-C-D. Chorus**

Open to anyone interested in singing standard choral works. No examination uired. No public performances.
Fall and Spring (½-½)

**. Beginning Instrumental Ensemble**

Open to all instrumental students. Group playing of simple orchestral and band es. Prerequisite: Music 2A, 3A, 6A, or equivalencies, one or more.
Fall or Spring (½)

---

* See explanation below for conditions under which credit may be given for music ly under private instructors.

### 24B. Intermediate Instrumental Ensemble

Construction of group performance of orchestral and band scores of mor advanced grade. Material covered will prepare the student for minor parts in eithe concert orchestra or symphonic band. Prerequisites: Music 24A or equivalent.
Fall or Spring (½)

### 25A-B-C-D. Marching Band

Permission of conductor required for membership.
Fall and Spring (1-1)

### 26A-B-C-D. Symphonic Band

Permission of the conductor required for membership.
Fall and Spring (1-1)

### 28A-28B. Piano

Fundamental playing and reading technics for the pianoforte. Emphasi upon playing by ear, and the development of interpretative ability. For beginners only No credit for music majors and minors.
Year course (1-1)

### 28C-28D. Continuation of First Year Piano

Study of more advanced piano literature. Considerable emphasis upon ensembl piano playing and accompanying. Prerequisites: Music 28A-28B, and consent o instructor. No credit for music majors. Credit will be given to music minors. 28C i a prerequisite for 28D.
Year course (1-1)

### 29A-29B. Class Voice

A class for beginners in the vocal field taking up the problems of breath control tone placement, articulation and enunciation. Frequent performance before clas required. Limited to 15. 29A or equivalent is a prerequisite for 29B.
Year course (1-1)

### 29C-29D. Continuation of First Year Voice

Study of more advanced songs with attention being given to interpretation, a well as continued work on tone, articulation and placement. Frequent performanc before class required. Limited to 15. 29C or equivalent is a prerequisite for 29D.
Year course (1-1)

### 30A-30B. Chamber Music

String and woodwind ensembles. The consent of the instructor necessary fo admission to class.
Year course (1-1)

## Upper Division Courses

(For description of courses in the field of music appreciation and history o music, see *aesthetics*).

### 105A-105B. Advanced Harmony and Composition

Study of the possible types of modulation and chromatic harmonies: continuatio of harmonic analysis and original composition. Prerequisite: Music 4A-4B. 105A is a prerequisite for 105B.
Year course (3-3)

### 106. Counterpoint

Study of the five species of counterpoint with much practice in writing in such forms. Application of contrapuntal style to modern composition. Prerequisite: Music 4A-4B.
Fall (2)

### 107. Form and Analysis

Aural and visual analysis of music forms through a consideration of structure, harmonic content, and style. Prerequisite: Music 105A-105B.
Spring (2)

**9A-B-C-D. Treble Clef Sextette**

Members selected by auditions from Treble Clef (Music 110).
Fall and Spring (½-½)

**0A-B-C-D. Women's Glee Club—Treble Clef**

Entrance upon examination. A maximum of 2 units in glee club may be counted ward the A.B. Degree.
Fall and Spring (½-½)

**1A-B-C-D. Men's Quartet**

Members selected by auditions from Men's Glee Club (Music 112).
Fall and Spring (½-½)

**2A-B-C-D. Men's Glee Club**

Entrance upon examination. A maximum of 2 units in glee club may be counted ward the A.B. Degree.
Fall and Spring (½-½)

**3A-B-C-D. Orchestra**

Permission of the conductor required for membership. A maximum of 4 units orchestra may be counted toward the A.B. Degree.
Fall and Spring (½-½)

**4A-B-C-D. Vocal Ensemble**

Members selected by auditions from Choral Club (Music 115).
Fall and Spring (½-½)

**5A-B-C-D. Choral Club**

Entrance upon examination. A maximum of 2 units in choral club may be unted toward the A.B. Degree.
Fall and Spring (½-½)

**16A-B-C-D. Advanced Individual Study of an Orchestral Instrument**

Fall and Spring (1-1)

**17A-B-C-D. Advanced Individual Study of Voice**

Fall and Spring (1-1)

**18A-B-C-D. Advanced Individual Study of Piano or Organ**

Fall or Spring (1-1)

**9A. Instrumental Conducting**

Conducting and reading of orchestral scores.
Fall or Spring (1)

**0A. Vocal Conducting**

The theory of vocal conducting together with practical experience gained from ecting the college chorus. Prerequisite: Upper division music major or minor.
Fall or Spring (1)

**1A-121B. Instrumentation and Arranging**

Arranging of music for full orchestra. Selected works of pupils to be performed by ndard orchestras. 121A is a prerequisite for 121B.
Year course (2-2)

**4A. Beginning Instrumental Ensemble**

Open to all instrumental students. Group playing of simple orchestral and band res. Prerequisite: Music 2A, 3A, 6A, or equivalencies, one or more.
Fall or Spring (½)

**4B. Intermediate Instrumental Ensemble**

Continuation of group performance of orchestral and band scores of more vanced grade. Material covered will prepare the student for minor parts in either ncert orchestra or symphonic band. Prerequisites: Music 24A or 124A, or equivalent.
Fall or Spring (½)

---

* See explanation below for conditions under which credit may be given for music ıdy under private instructors.

**125A-B-C-D. Marching Band**

Permission of conductor required for membership.
Fall and Spring (1-1)

**126A-B-C-D. Symphonic Band**

Permission of the conductor required for membership. A maximum of 4 unit in band may be counted toward the A.B. Degree.
Fall and Spring (1-1)

**128. Methods in Teaching Piano**

Teaching of beginning intermediate and beginning piano. Survey of material available for child and adult classes. Special consideration of the problems of the adul beginner. Supervised teaching of beginning students in individual lessons and in clas groups.
Summer (3)

**130A-130B. Chamber Music**

String quintet and woodwind ensembles only. Permission of the instructor necessary for class membership.
Year course (1-1)

## Graduate Courses

**200A-200B. Special Problems in Music**

A graduate course in which students may carry out projects in various fields of music under the direction of faculty members who are specialists in the field chosen. Students registering for this course must apply for work within a certain field after conference with the music faculty. Prerequisite: Graduate standing.
Fall and Spring (2-2)

**Music 203. Musicology**

Survey of bibliography and methods of research in music history and literature. Emphasis upon inter-relationship of musical developments and trends in other arts. Completion of an acceptable thesis in fields of investigation chosen by the student. Prerequisites: Aesthetics 102A-102B, graduate standing and consent of the instructor. Advanced courses in Harmony, Composition, and Form and Analysis are desirable.
Fall (2)

**Music 206. Composition**

Music composition in the larger forms. Students will be required to submit a complete work in one of the larger musical forms as thesis in the course. Prerequisites: Music 105A-105B, 106A, 107A, 121A, graduate standing and consent of the instructor.
Spring (2)

## CONDITIONS UNDER WHICH CREDIT MAY BE GIVEN FOR MUSIC STUDY UNDER PRIVATE INSTRUCTORS

Credit may be allowed for private instruction in music under the following conditions:

1. The applicant for such credit must be a regularly enrolled student in the music department of the college.

2. The instructor giving such private work must be approved by the Music Department. All private work and the names of all such teachers must be registered in the office of the music department chairman at the beginning of the semester.

3. In the case of first semester private study, a placement examination conducted by the music department faculty at the beginning of the semester will show the status of the student at the beginning of his work.

4. Evidence that the standards of the Music Department have been met will be shown by an examination conducted by the music department faculty at the end of the semester.

5. Ten clock-hours of lessons, and 100 hours of practice per semester are required for one unit of credit.

# PHILOSOPHY

## IN THE DIVISION OF SOCIAL SCIENCES

*Major* work is not offered in philosophy.

### Minor

A *minor in arts and sciences* is offered in philosophy. The minor must include at st 15 units of work in philosophy, 9 units of which must be from courses carrying per division credit.

A *teaching minor* is not offered in philosophy.

### Lower Division Courses

NOTE: Courses in philosophy may not be used to meet any part of the 12-unit cial science requirement, nor may they be used as part of a social science major or inor.

**-1B. Introduction to Philosophy**

An exploration of the major problems of philosophy and some significant proaches to their solution. The treatment is primarily critical and analytic rather an historical. Through free class discussion, each student is encouraged to develop r himself a world-view which to him will seem most congenial and logical. Prerequsite: 1A is prerequisite for 1B.

Fall and Spring (3-3)

**-3B. History of Philosophy**

A historical account of the development of the major concepts of philosophers the western tradition. Relations of philosophy to science, art, religion, and social d political conditions. 3A covers the ancient and medieval periods, 3B the modern. is not prerequisite for 3B.

Year course (3-3)

**. Logic**

Logic and language. The logic of argument and proof. Analysis of fallacies. Applition of formal principles to scientific and everyday thinking.

Spring (3)

### Upper Division Courses

**1. Contemporary Philosophy**

The major philosophical issues, movements, and figures in American and Euroan philosophy of the twentieth century. Prerequisite: 3 units selected from Philosoy 1A, 1B, 3A, or 3B.

Spring (3)

**1A-111B. Theory of the State**

The nature of the state, its organization and activities, and its relation to the lividual and to other states. Special attention is given to recent developments in the ld of political thought. Not open to students with credit in Political Science 111A-1B.

Year course (3-3)

**0. Ethics**

The search for the Good Life. The principal theories of ethical obligation, the urces of moral authority, and the various views regarding the nature of the "highest od" and the related goals of intelligent living.

Fall (3)

**136. Philosophy of Art**

A study of the nature of esthetic experience, both in itself and in relation to the rest of human experience. Particular effort is made to disentangle man's esthetic attitude and activity (whether in the field of art, nature or daily life) from those experiences and evaluations with which the esthetic is frequently confused. The principal theories of art, both traditional and contemporary, are studied at length—both in relation to actual artistic production and to art's role in society.
Spring (3)

**137. Philosophy of Science**

A critical examination of the basic concepts and methods underlying contemporary scientific thought. Nature of scientific knowledge, conceptions of nature, natural law, relation of the scientific interest to other interests, and contributions of the special sciences to a view of the universe as a whole. Prerequisite: 3 lower division units in philosophy.
Fall (3)

# PHYSICAL EDUCATION

## IN THE DIVISION OF HEALTH, PHYSICAL EDUCATION AND RECREATION

### Major

A *major in arts and sciences* is not offered in physical education.

A *general major* is offered in the field of recreation. For specific requirements, refer to the outline for the curriculum in recreation in the section on Preprofessional and Vocational Curricula, and for further information on the general major to the section on Upper Division Requirements for the Bachelor of Arts Degree in Arts and Sciences.

A *teaching major* is offered in physical education for the general secondary and the special secondary credentials. Refer to the outlines of requirements for these credentials.

### Minor

A *minor in arts and sciences* is offered in physical education or in recreation. The plan for these minors must be approved by the departmental representative. A minor consists of at least 15 units of work in one field, 9 units of which must be from courses carrying upper division credit. For further information on the minor in recreation, refer to the section entitled: Upper Division Requirements for the Bachelor of Arts Degree in Arts and Sciences.

A *teaching minor* is offered in physical education for the general secondary, the general junior high school, and the special secondary credentials. It may be offered only as a second teaching minor for the general elementary and the kindergarten-primary credentials. For specific information, refer to the outlines of requirements for these credentials.

A *teaching minor in recreation* is offered only as a second minor for students majoring in physical education. Non-physical education majors may select recreation as a teaching minor for the general junior high school or the special secondary credential. For specific information, refer to the outlines of requirements for these credentials.

### MEN'S DEPARTMENT

Candidates for a teaching credential in physical education should refer to the section on Admission to Teacher Education, and to the curriculum outline entitled: A.B. Degree with Special Secondary Credential in Physical Education.

With the exceptions listed, all lower division students must elect one or more courses each semester. Two units of activity credit must be offered for graduation. Exceptions: (a) veterans of World War II; (b) students over 25 years of age. Students carrying fewer than 12 units during any semester may postpone taking physical education, but not be exempted therefrom. No permanent excuses from required activity courses will be granted. The college physician, in conjunction with the chairman of the department, will consider stringent cases on an individual basis and recommend.

A medical examination is given each student when entering and recommendation nade as to type of activity most beneficial. Developmental physical education classes care for special needs are offered. The content of the required courses is planned give each student an opportunity to participate in many activities of carry-over ue, developmental nature, and recreational interest. An opportunity is afforded students to participate in competitive sports and intramural programs.

Freshmen are required to choose from courses numbered 1-10. Sophomores and per division students may choose from all courses offered. An activity course may taken for credit once only. The complete uniform will be furnished by the student.

## Lower Division Courses

### ACTIVITY COURSES

**-1B-1C-1D. Developmental Physical Education**
Fall and Spring (½-½-½-½)

**Basketball**
Fall and Spring (½)

**Boxing**
Fall and Spring (½)

**Gymnastics**
Fall and Spring (½)

**Soccer**
Fall (½)

**Softball**
Spring (½)

**Touch Football**
Fall (½)

**Track and Field**
Spring (½)

**9. Volleyball**
Fall and Spring (½)

**10. Wrestling**
Fall and Spring (½)

**13. Archery**
Fall and Spring (½)

**14. Badminton**
Fall and Spring (½)

**15. Fencing**
Fall and Spring (½)

**16. Golf**
Spring (½)

**17. Handball**
Fall and Spring (½)

**18. Tennis**
Fall and Spring (½)

### INTERCOLLEGIATE SPORTS

**Baseball**
Spring (½)

**Basketball**
Fall (½)

**Cross Country**
Fall (½)

**Football**
Fall (½)

**Golf**
Spring (½)

**30. Gymnastics**
Spring (½)

**34. Tennis**
Spring (½)

**35. Track**
Spring (½)

**36. Wrestling**
Spring (½)

## WOMEN'S DEPARTMENT

Candidates for a teaching credential in physical education should refer to the ion on Admission to Teacher Education, and to the curriculum outline entitled: . Degree with Special Secondary Credential in Physical Education.

With the exceptions listed, all lower division students must elect one or more rses each semester. Two units of activity credit must be offered for graduation. eptions: (a) veterans of World War II; (b) students over 25 years of age. dents carrying fewer than 12 units during any semester may postpone taking sical education, but not be exempted therefrom. No permanent excuses from required vity courses will be granted. The college physician, in conjunction with the chair- of the department, will consider stringent cases on an individual basis and mmend.

A medical examination is given each student when entering and recommendation nade as to type of activity most beneficial. Developmental physical education ses to care for special needs are offered. The content of the required courses is ned to give each student an opportunity to participate in many activities of y-over value, developmental nature, and recreational interest.

Freshmen are required to choose from courses numbered 1-10. Sophomores may se from all courses offered. An activity course may be taken for credit once . The complete uniform will be furnished by the student.

The individual activities, tennis, golf, archery, badminton, and dancing a offered through the year. Candidates for the special secondary credential in physic education must select one as a major activity and two others as minors. Skills in th activities must be maintained as prerequisite to the senior course, Physical Edu cation 185.

### Lower Division

### ACTIVITY COURSES

**1A-1B. Fundamental Skills**

Practice in efficient fundamental body movements.
Fall and Spring (½-½)

**2A-2B. Folk Dancing** (Men and Women)

(2A is a prerequisite for 2B)
Fall and Spring (½-½)

**3A-3B. Modern Dance**

Practice in dance techniques and rhythms.
(3A is a prerequisite for 3B)
Fall and Spring (½-½)

### TEAM SPORTS

**4. Fieldball, Soccer, Speedball**

Fall or Spring (½)

**5. Softball, Volleyball, Hockey**

Fall or Spring (½)

**6. Basketball**

Fall or Spring (½)

**11A-11B. Ballroom Dancing** (Men and Women)

(11A is a prerequisite for 11B)
Fall and Spring (½-½)

**12A-12B. Advanced Modern Dance** (Men and Women)

Laboratory experiments in advanced choregraphy and percussion accompan ment. Prerequisites: 3A and 3B.
Year course (1-1)

**13A-13B. Archery**

Fall and Spring (½-½)

**14A-14B. Badminton**

Fall and Spring (½-½)

**16A-16B. Golf**

Fall and Spring (½-½)

**18A-18B-18C. Tennis** (Beginning, intermediate, advanced)

(18A is a prerequisite for 18B; 18B is a prerequisite for 18C)
Fall and Spring (½-½-½)

**20A. Swimming** (Nonswimmers only)

Fall and Spring (½)

**20B. Swimming** (Intermediate)

Fall and Spring (½)

**21. Life Saving**

Learning of safety in and on the water and the ability to assist or rescue a perso in danger of drowning. Course content qualifies for the American Red Cross Lif Saving Certificate.
Fall and Spring (½)

## PROFESSIONAL THEORY COURSES

### Men and Women
### Lower Division Courses

**Professional Activities** (Men)

This course presents an opportunity for majors to develop the skills and tech- ues of the dance as well as other phases of the activity program. Organization and sentation of materials are emphasized.

Fall (2)

**Professional Activities** (Men)

Emphasis is placed on acquiring the skills, teaching techniques, and development nowledge and interests in the combative activities, tumbling, apparatus, and stunts.

Spring (2)

**First Aid and Safety Education**

The accepted procedure in meeting the emergencies which arise daily in any of many places where the physical education teacher is called on for first aid. Attention given to the prevention and minimizing of common accidents. Course contents lifies for American Red Cross Certificate.

Fall or Spring (2)

**Physical Education in the Elementary School**

The content of the State program in physical education for the elementary school ns the basis of the course. Candidates for the Elementary Credential are required ake the course section which includes two lectures and two laboratory periods per k.

Fall or Spring (2½)

Candidates for the Special Secondary Credential in physical education may take course section which includes two lectures without laboratory periods.

Fall (2)

**Introduction to Physical Education**

The history and principles of physical education and sports movements of the t. The aims and objectives of the modern school program are studied and an effort nade to give the student a basic philosophy or a background for his professional ning. Required of all physical education majors and minors.

For Men: Fall (2)
For Women: Spring (2)

### Upper Division Courses

**Professional Activities: Team Sports** (Men)

The skills, rules, teaching techniques, officiating, and organization of materials in n sports as soccer, touch football, softball, hockey, basketball, and others are hasized.

Fall (2)

**Professional Activities: Individual Sports** (Men)

The skills, rules, teaching techniques, officiating, and organization of materials in n sports as handball, tennis, badminton, archery, golf, and others are emphasized.

Fall (2)

**Professional Activities: Coaching Baseball and Track** (Men)

Organization of practice sessions, drills for developing fundamental drills and ial abilities. Problems of scheduling, handling teams and game strategy are taken Rules, sessions, and officiating techniques are given attention.

Spring (2)

**Professional Activities: Coaching Football and Basketball** (Men)

Organization of practice sessions, drills for developing fundamental skills and ial abilities. Problems of scheduling, handling teams, and game strategy are taken Rules, sessions, and officiating techniques are given attention.

Fall (2)

### 155. Applied Anatomy and Kinesiology

Anatomical and kinesiological analysis of human structure and movement Application of analysis relative to mechanical principles as influenced by efficienc factors of body functions. Prerequisite: Zoology 8 or 20.

Fall (3)

### 156A-156B. Sports Methods (Women)

Analysis of skills in basketball, hockey, soccer, speedball, volleyball, and softball methods of presenting sports to large groups; study of rules and officiating. Prerequisites: Physical Education 4, 5, and 6.

Fall and Spring (2-2)

### 160. Teaching of Body Mechanics (Women)

A study of efficient use of the body in daily living; evaluation and classification o exercises, methods, and practice in planning and presenting material.

Fall (2)

### 161. Folk Dancing Materials and Advanced Techniques (Women)

A study of folk customs, festivals, and costumes. Selection of dance material for various age groups. Practice in advanced techniques. Prerequisite: Physica Education 2A.

Fall (2)

### 164A-164B. Methods in Modern Dance

Methods in the teaching of modern dance techniques and choreography. Selectio of materials and course planning for the secondary school. Prerequisite: Physica Education 12A-12B.

### 165. Administration of Community Recreation

An introductory course in the principles of organization and promotion of leisur time and recreation activities. Content consists of a study of recreation leadership, th growth of the recreation movement, the operation of areas and facilities, program o activities, features, services, organization and administration problems. A require course for Recreation minors.

Fall (3)

### 168. Physiology of Exercise

A non-laboratory course emphasizing the relation of physiology to muscula exercise in physical activities. Prerequisites: Physiology 1A and Zoology 8 o equivalent.

Spring (3)

### 170. Recreational Leadership

A study of the practical application of the activities adapted to group recreatio programs. Activities include arts and crafts, special athletic events, drama, dancing music, hobbies, camping and hiking, socials, games and contests and stunts. Thi course is presented through lectures, discussions, field trips and actual class participation in the above activities. Required of all Physical Education majors, Physica Education and Recreation minors.

Spring (3)

### 177. Individual Program Adaptation

The adaptation of programs to the capacities and physical needs of individuals including analysis and evaluation of aims, techniques and procedures in developmental preventive and corrective measures. Special problems, such as survey of the situation recognition of divergencies, selecting and assigning of students, instructional problems motivation, follow-up, teacher limitations and public relations are considered. Prerequisites: P.E. 155 and senior standing.

Spring (3)

### 185. Techniques of Individual Sports (Women)

A course summarizing rules and teaching methods and testing individual playing techniques and knowledge in tennis, archery, badminton, and swimming. Prerequisite Senior standing.

Fall (1)

### Administration of Physical Education in the Secondary School

Consideration of the problems and practices in the organization and administra-
n of the secondary school activity program. Study and selection and adaptation of
ivities, examination, and grouping of pupils, use and evaluation of tests. Selection
l maintenance of equipment and facilities. Women must take this course only when
ered in the women's department.

For Women: Fall (3)
For Men: Spring (3)

### Special Study in Physical Education or Recreation

An opportunity is presented for extensive review of pertinent literature, indi-
ual research and advanced study of problems in the profession. Credit will range
m 1 to 3 units according to the caliber of work. Prerequisite: Approval of the
airman of the Division.

Fall or Spring (1 to 3)

## Graduate Courses

### Evaluation Procedures in Health, Physical Education and Recreation

A study of tests and measurements in the profession with practice in their use,
istruction and interpretation of results. Prerequisite: Graduate standing.

Spring (2) (Offered in 1948-1949)

### Developmental Physical Education

Intensive study of postural divergencies, lack of physical development, and
thods of correcting such conditions through exercise are studied. Practice in making
ysical examinations, constructing individual exercise programs, teaching remedial
rcises, as well as ethical procedures and limitations are considered. Prerequisite:
plied Anatomy and Kinesiology and graduate standing.

Fall (2)

### Problems in Physical Education

A survey of current problems facing the Physical Education profession is studied
ough a review of the literature, discussion of trends, observation of school situa-
ns together with the analysis and evaluation of actual problems. Written reports are
uired. Prerequisite: Graduate standing.

Summer 1949 (2)

### Problems in Recreation

A survey of current problems facing the Recreation profession is studied through
eview of the literature, discussion of trends, observation of school situations together
h the analysis and evaluation of actual problems. Written reports are required.
rerequisite: Graduate standing.

Summer 1949 (2)

# PHYSICAL SCIENCE

## IN THE DIVISION OF PHYSICAL SCIENCES

*Major* and *minor* work are not offered in physical science.

## Lower Division Courses

### Introduction to Physical Science

A survey course dealing with the nature of man's physical universe. Emphasis
l be upon materials chosen from topics in astronomy and physics to show the
ure and development of the scientific method and man's use of energy. Not open
students who have had a high school course in physics with grades of A or B or who
e credit for a college course in physics or astronomy or Physical Science 40. May
taken with or without plans to continue with 1B.

Fall and summer (3)

### Introduction to Physical Science

A continuation of Physical Science 1A. Emphasis will be upon units chosen
n geology and chemistry to show the origins of natural materials and their use
man in the modern world. Not open to students who have had a high school course
chemistry with grades of A or B or who have credit for a college course in either
mistry or geology. May be taken with or without credit in Physical Science 1A.

Spring (3)

# PHYSICS

## IN THE DIVISION OF PHYSICAL SCIENCES

### Major

A *major in arts and sciences* is offered in physics. Lower division requirements Physics 1A-1B-1C-1D or 4A-4B-4C; Mathematics 3A-3B, 4A-4B; Chemistry 1A-1B o their equivalents. Recommended: A reading knowledge of French or German. Uppe division requirements: A minimum of 24 upper division units in physics includin Physics 105A-105B, 110A, 3 units chosen from 102 or 110B, and 199 (2 units). Six o the 24 units may be selected from a related field with approval of the Chairman of th Department.

A *teaching major* is offered in physics for the general secondary credential or a part of the *general science* major for the general junior high school credential or as par of the *physical science major* for the general secondary credential. For specific informa tion, refer to the outlines of requirements for these credentials.

### Minor

A *minor in arts and sciences* is offered in physics. The minor must include at leas 15 units of work in physics, 9 units of which must be from courses carrying upper divi sion credit.

A *teaching minor* is offered in physics for the general secondary credential or a part of the *general science minor* for the general junior high, the special secondary the general elementary, and the kindergarten-primary credentials. For specific infor mation, refer to the outlines of requirements for these credentials.

### Lower Division Courses

Note: A maximum of 12 units of lower division physics credit may be applie toward the A.B. degree.

**1A-1B-1C-1D. Principles of Physics**

A four semester course developing the fundamental ideas which underlie th subject of physics, with applications in the discussion of practical problems. Thi course is designed for students in the various fields of science and engineering wh desire a thorough background of the elementary principles. Prerequisites: Concurren or previous registration in Mathematics 3A. Physics 1A is a prerequisite to Physic 1B, 1C or 1D. Students are expected to take the courses in the following sequenc and deviations from this may be made only with the permission of the instructor Each course provides two lectures and one three-hour laboratory period per week. Thi sequence of courses will be discontinued after the Spring semester, 1950. (See Physic 4A-4B-4C)

**1A. Mechanics of Solids**
Fall, spring, summer (3)

**1B. Mechanics of Fluids, Heat and Sound**
Spring, summer (3)

**1C. Electricity and Magnetism**
Fall (3)

**1D. Light and Atomic Physics**
Spring, summer (3)

**2A-2B. General Physics**

A year course covering the elementary principles of physics. This course is primarily for liberal arts and certain pre-professional students who do not desire an intensive preparation in the field. Lectures, demonstrations and discussions. First semester: Properties of matter, mechanics and heat. Second semester: Electricity and magnetism, sound and light. Prerequisite for 2A: Two years of high school mathematics. Prerequisite for 2B: Physics 2A.

Year course (3-3)

### -3B. Physical Measurements

A year course in laboratory physics designed to accompany Physics 2A-2B. rst semester: Properties of matter, mechanics and heat. Second semester: Electricity d magnetism, sound and light. One three-hour laboratory period per week.

Prerequisite for 3A: Concurrent or previous registration in Physics 2A. Pre- uisite for 3B: Concurrent or previous registration in Physics 2B.

Year course (1-1)

### -4B-4C. Principles of Physics

A three semester course developing the fundamental principles which underlie subject of physics, with applications in the discussion of practical problems. This irse is designed for students who desire a thorough background in introductory ysics. Each course provides three lectures and one three-hour laboratory per week.

#### 4A. Mechanics

The mechanics of solids and fluids. Prerequisites: Credit in Mathematics 3A, or concurrent registration with permission of the Chairman of the Department of Physics. Not open to first semester freshmen.

Fall or Spring (4) (Beginning Fall 1949)

#### 4B. Electricity

Magnetism, electricity and elementary electronics. Prerequisite: Physics 4A.

Fall or Spring (4) (Beginning Spring 1950)

#### 4C. Heat, Sound and Light

Heat and elementary thermodynamics, sound and light. Prerequisite: Physics 4B.

Fall or Spring (4) (Beginning Fall 1950)

## Upper Division Courses

### Basic Electronics

Principles of electron tubes and resistance loaded amplifiers. Negative feedback its application to regulated power supplies, cathode followers and direct coupled plifiers. Study of Class A and Class B power amplifiers. Prerequisites: Physics 1C B and Mathematics 4A.

Fall (3).

### Communications

Study of Class C amplifiers, oscillators, modulators and detectors. Amplitude frequency modulation, television systems. Transmission lines, antennas and electro- netic radiation. Students with credit for Engineering 104 may not receive credit for course. Prerequisite: Physics 102 or permission of the instructor.

Spring (3)

### A-105B. Analytical Mechanics

Treatment of the fundamental principles of Newtonian mechanics. First semes- Study of the statics and kinematics of particles and rigid bodies. Second ester: Study of the dynamical principles underlying linear and rotary motion of l bodies, with additional work in vibration and impact. Use of elementary vector lysis in solving of physical applications in mechanics. Students with credit in ineering 102A-102B may not receive credit for this course. Prerequisites: Physics 1B or 2A-2B or 4A; and a working knowledge of the calculus. Physics 105A is pre- uisite for Physics 105B.

Year course (3-3)

### Optics

A study of reflection, refraction and dispersion of light, with applications to cal instruments, followed by a survey of phenomena indicative of the physical ire of light, including interference, diffraction, polarization and spectral radiation. equisite: Physics 1D or 2B-3B or 4C.

Fall (3) (Offered in 1950-51 and alternate years)

### 107. Electrical Measurements

The theory and use of electrical measurements, including measurements of cu rent, voltage, power, resistance, capacitance, inductance, and the parameters resonant circuits. One hour of lecture and three hours of laboratory work per wee Prerequisites: Physics 1C or 2B-3B or 4B and a working knowledge of the calculus.
Spring (2)

### 108. Atomic Particles

A study of the experimental evidence for the existence of the elemental physic particles and their properties and of the physical concepts to which this experiment evidence has led. Prerequisites: Physics 1C or 2B-3B or 4B.
Spring (3)

### 110A. Principles of Electronic Circuits

Elements of the mathematical theory of steady and quasi-steady electric an magnetic fields with applications. Prerequisites: Physics 1C or 2B-3B or 4B and working knowledge of the calculus.
Fall (3)

### 110B. Electromagnetism

Extension of the material covered in Physics 110A, including alternating an transient current phenomena and electromagnetic radiation. Prerequisite: Physic 110A.
Spring (3) (Offered in 1950-51 and alternate years)

### 112. Heat and Themodynamics

A study of the thermal properties of matter with an introduction into the kineti theory of gases and the laws of thermodynamics. Prerequisites: Eight units in physic and a working knowledge of the calculus.
Fall (3) (Offered in 1949-50 and alternate years)

### 114. Acoustics

A study of wave motion and its applications to the production, transmission an reception of sound. Material in architectural acoustics, speech and hearing, and acoustical instruments is presented. Prerequisites: Physics 1C or 2B-3B or 4C.
Spring (3) (Offered in 1949-50 and alternate years)

### 122. Electronics Laboratory

An experimental study of electron tubes and their associated circuits. Study o the cathode ray oscilloscope, vacuum tube voltmeter, characteristics of power supplies, amplifiers and filter systems. One hour of lecture and three hours of laboratory work per week. Prerequisite: Previous or concurrent registration in Physics 102, o permission of the instructor.
Fall (2)

### 124. Radio Measurements

A laboratory course in measurements of the parameters of resonant circuits a radio frequencies. Study of the properties of oscillators, modulators, detectors and wave guides. Students with credit in Engineering 124 may not receive credit for this course. Prerequisite: Previous or concurrent registration in Physics 104.
Spring (2)

### 126. Optical Measurements

An experimental study of lenses, optical systems and instruments, including the study of the wave character of light and the measurement of the wave length of light. One hour of lecture and three hours of laboratory work per week. Prerequisite: Previous or concurrent registration in Physics 106, or permission of the instructor.
Fall (2) (Offered in 1950-51 and alternate years)

### 128. Experimental Atomic Physics

Laboratory measurements in the fundamental properties of atomic particles. Prerequisite: Previous or concurrent registration in Physics 108 or permission of the instructor.
Spring (2) (Offered in 1950-51 and alternate years)

### 2. Heat and Pyrometry Laboratory

Laboratory work selected from experiments in thermal expansion, specific heat, at of combustion, radiation, calibration and use of various temperature measuring ices. One hour of lecture and three hours of laboratory work per week. Prerequisite: evious or concurrent registration in Physics 112 or permission of the instructor.

Fall (2) (Offered in 1949-50 and alternate years)

### . Acoustical Measurements

Experimental study of wave motion, velocity of sound in various media, diffrac-n, refraction and reflection of sound, microphone and loudspeaker characteristics. e hour of lecture and three hours of laboratory work per week. Prerequisite: Previ- or concurrent registration in Physics 114 or permission of the instructor.

Spring (2) (Offered in 1949-50 and alternate years)

### . Vacuum Tubes

A study of the internal behavior of electron tubes with an introduction to electron ics; consideration of special tubes used in physics and engineering. Prerequisite: ysics 102.

Spring (2)

### . Honors Course

An individual study arrangement for students admitted to the Honors Group. ollment through the Department Chairman, subject to the approval by the Com-tee on Honors. For requirements for admission to this group, refer to The Honors up in the section on General Regulations.

Fall or Spring (Credit to be arranged)

### Special Study

Reading and laboratory work on a special problem in physics selected by the lent. Each student will be assigned a member of the staff who will supervise his k. All candidates for the A.B. Degree in physics are required to enroll for two s of this course during the upper division work. Credit, hours and topics to be nged in each case.

Fall and Spring (1 or 2—1 or 2)

## Graduate Courses

### Seminar

An intensive study of some phase of advanced physics under the immediate direc- of a member of the staff. Each student will choose a problem from one of the fol-ng fields for study and will prepare and present a paper to the combined staff and tudents enrolled in this course.

A. Mathematical Physics.
B. Theoretical Mechanics.
C. Kinetic Theory of Gases.
D. Advanced Acoustics.
E. Advanced Electronics and Electricity.
F. Electromagnetic Radiation.
G. Atomic Physics.

Prerequisite: Graduate standing.
Fall and Spring (2-2)

### Special Study

Independent theoretical and experimental investigation of some topic in physics en by the student. Each student taking work in this course will be required to write per reporting his results. A member of the staff will be assigned to supervise the . Prerequisite: Graduate standing.

Fall and Spring (1 or 2—1 or 2)

# PHYSIOLOGY

## IN THE DIVISION OF LIFE SCIENCES

*Major* and *minor* work are not offered in physiology. Courses in physiology, however, may be used as part of the major in zoology and are recommended as part of the lower division requirements for the major in psychology. For specific information, refer to these departments.

### Lower Division Courses

**1A. Human Physiology**

A lecture course considering the functions of the human body, and including a brief reveiw of the microscopic and gross anatomy of the structures discussed. Prerequisites: Elementary chemistry and high school or college biology or zoology. Three hours of lecture per week. Credit reduced to 2 units, for students having credit for Zoology 20.

Spring (3)

**1C. Human Physiology**

A study of the human functions through laboratory experiments and demonstrations. Prerequisites: Physiology 1A completed or in progress. Six hours of laboratory per week.

Spring (2)

### Upper Division Courses

**101. General Physiology**

Fundamentals of plant and animal functions. Two lectures and two laboratory periods per week. Prerequisites: Biology 10A-10B or Zoology 1A-1B and Chemistry 1A-1B or Chemistry 2A-2B.

Spring (4)

# POLITICAL SCIENCE

## IN THE DIVISION OF SOCIAL SCIENCES

### Major

A *major in arts and sciences* is offered in political science. This major consists of 36 units of work in political science and closely related work chosen from the fields of economics, geography, history, philosophy, psychology, and sociology. Under the direction of the Chairman of the Department, the 36 units will be distributed as follows:

(a) Required courses: Political Science 1A-1B and 71A-71B (one year-course of which should be taken in the lower division) and Political Science 199.

(b) Eighteen upper division units in political science distributed among two of the following groups: Group I: theory and government—courses numbered 100-139; Group II: administration—courses numbered 140-149; Group III: international affairs—courses numbered 150-179.

(c) Six units of upper division work selected from the related fields listed above, this work to be chosen under the direction of the Chairman of the Department and to be outside the field of the student's minor.

Students majoring in political science are advised to become as familiar as possible with the related fields listed above. Majors should have a reading knowledge of at least one foreign language.

A *teaching major* is not offered in political science; however, courses in political science may be used as part of the *social science major* for the general junior high school credential or the general secondary credential. For specific information, refer to the outlines of requirements for these credentials.

### Minor

A *minor in arts and sciences* is offered in political science. The minor consists of 15 units of work, 9 units of which must be from courses carrying upper division credit.

A *teaching minor* is not offered in political science for the general secondary credential; however, courses in political science may be used as part of the *social science minor* for the general junior high school, the special secondary, the general elementary, and the kindergarten-primary credentials. Refer to the outlines of requirements for these credentials.

## Lower Division Courses

### A. Introduction to Government

Theories and principles of government, with special attention to the problems reated by modern industrialism and population pressures.
Fall (3)

### B. Introduction to Government

A comparative survey of selected foreign governments: their constitutional priniples, political institutions, and governmental problems.
Spring (3)

### 1A-71B. Introduction to American Government and Politics

Semester I: Governmental organization in the United States; the federal ystem; the organization, powers and functions of the legislative, executive and idicial branches of the government; the relations between federal, state and local nits of government.

Semester II: Expansion of governmental functions and the development of eans of democratic control; an examination of the increased use of government as n instrument of social control; the history, motivation, methods and control of olitical parties; nominations, elections and minority groups; pressure politics.
NOTE: Not open to freshmen.
Year course (3-3)

## Upper Division Courses

### 01. American Institutions

A study of the principles of the Constitution of the United States of America, nd a survey of the political and social institutions which have developed under the onstitution.
Fall (3)

### 05. American Political Theory

A survey of the development of American ideas concerning political authority om the period of colonial foundation to the present time.
Fall (3)

### 1A-111B. Theory of the State

The nature of the state, its organization and activities, and its relation to the dividual and to other states. Special attention is given to recent developments in the ld of political thought. Not open to students with credit in Philosophy 111A-111B.
Year course (3-3)

### 0. Political Parties

A critical analysis of the political party as a part of the process of government; rty organization and activities; nominating and campaign methods; theories and nctions of the party system; party responsibility. Special emphasis will be placed on the function of the two-party system in American government.
Fall (3)

### 1. Basic Factors in American Politics

An analysis of American political, legal, economic, and social factors in their lation to our political system and the public interest.
Spring (3)

### 2. Propaganda and Public Opinion

A study of the forces which mold the American public mind, the practice of opaganda, a description and analysis of public relations, pressure groups and their ect in American public life.
Spring (3)

### 9A-139B. American Constitutional Development

A study of the work of the Convention of 1787 and of significant phases of nerican constitutional law. (Formerly Political Science 175A-175B.) Not open to idents with credit for History 172A-172B.
Year course (3-3)

### 140. Principles of Public Administration

A study of the function of administration in the government of the Unite States: administration in a federal state; relations between administration and th legislative and judicial branches of government; bureaucracy; administrative "legislation" and "adjudication"; administration and democratic controls. (Formerl Political Science 143A.)

Fall (3)

### 141. Organization and Procedure in Public Administration

An introduction to management in the administration of public affairs: detaile examination of the forms and purposes of administrative organization; types o government agencies, their purposes and effectiveness; internal management an control; interagency relationships; personnel administration; budgets and auditin as administrative control devices; methods of administrative action. (Formerl Political Science 143B.)

Spring (3)

### 142. State Government

A study of the political structure and its operation used in the carrying on of th functions exercised by the states; state-federal relations; state-local governmen relations; particular emphasis on California government.

Fall or Spring (3)

### 143. Municipal and County Government

A study of the organization and its operation used to carry into effect the functions assigned to local governmental units; particular emphasis upon local government in California.

Fall or Spring (3)

### 144. Introduction to Public Personnel Administration

An introduction to the field, giving general coverage of the problems involved i recruitment, placement, supervision, etc. of public employees. Prerequisite: Permission of instructor.

Fall (2)

### 145. Public Personnel Management

An advanced course involving detailed examination of management of personnel i public service. Prerequisite: permission of instructor.

Spring (2)

### 150A-150B. International Relations

An historical and analytical consideration of the basic factors—historic, geographic, economic, ideologic, and strategic—which underly and condition the moder conflict between the "sovereign state" and the "community of nations." Fall semester Origins and development through the nineteeenth century. Spring semester: Twentiet century experimentation and conflict.

Year course (3-3)

### 151SP. The Contemporary World

A series of lectures by members of the faculty on selected problems of the curren international scene. Reports required of students enrolled for credit.

Spring (1)

### 152. International Organization

A critical analysis of the organization by which the international communit seeks to provide for the exercise of legislative, administrative and judicial function on the international level: Diplomatic and consular corps; conferences; administration through commissions and unions; amicable procedures for settlement of disputes; The League of Nations-United Nations experiment. (Formerly part of Politica Science 141A-141B.)

Spring (3)

**53. Principles of International Law**

The function of law in the international community. The historical development f the ideas and rules of international law and their place in the modern diplomatic nd legal structure. (Formerly part of Political Science 133A-133B.)
Fall (3)

**54. International Law and the Courts**

A case study of the application of the rules of international law in national nd international courts. (Formerly part of Political Science 133A-133B.)
Spring (3)

**58A-158B. American Foreign Policy**

Lectures and reading in the field of American foreign relations since 1776, with pecial emphasis, in the second semester, upon affairs since 1900. A general survey ourse. (Formerly Political Science 176A-176B.) Not open to students with credit or History 176A-176B.
Year course (3-3)

**60. Government of the British Dominions**

Development of the new British Empire and imperial relations of the self-overning dominions; government of Canada, Australia, New Zealand, and South frica; conditioning historical, economic and racial factors. Not open to students with redit for History 156B.
Spring (3)

**98. Special Studies in Government**

Directed study and research in the field of government. Admission by permission f the instructor.
Fall or Spring (2-6)

**99. Special Studies in Political Science**

Directed study in research techniques in the field of political science. Limited to olitical Science majors.
Fall or Spring (2)

# PSYCHOLOGY

## IN THE DIVISION OF SOCIAL SCIENCES

### Major

A *major in arts and sciences* is offered in psychology. Lower division requirements: Psychology 1, 10, and 11 or 12; 6 units in biology, zoology, or physiology; 6 units philosophy, anthropology, or sociology. Recommended: Mathematics C. Upper division requirements: a minimum of 24 upper division units in psychology including sychology 104A and 160A.

A *teaching major* is offered in psychology for the general secondary credential. efer to the outline of requirements for this credential.

### Minor

A *minor in arts and sciences* is offered in psychology. The minor must include at ast 15 units of work in psychology, 9 units of which must be from courses carrying pper division credit.

A *teaching minor* is not offered in psychology.

### Lower Division Courses

NOTE: Courses in psychology may not be used to meet any part of the 12-unit cial science requirement, nor may they be used as part of a social science major minor.

### 1. General

An elementary survey of normal adult psychology, descriptive and organizational the subjective and objective aspects of behavior. Furnishes basis for all other course in psychology and is prerequisite therefor.

Fall or Spring (3)

### 10. Advanced General Psychology

A comprehensive treatment of the fundamentals of psychology as the science o behavior and experience through a historical and an experimental approach. Require of all majors. Prerequisite: Psychology 1.

Fall or Spring (3)

### 11. Applied Psychology

A survey of the fields in which the basic principles of psychology may be applied An introduction to an interpretation of statistical data and its utilization in th application of psychological principles to problems of daily living. Required of al nonmajors who plan to take upper division courses in psychology. Prerequisite Psychology 1.

Fall or Spring (3)

### 12. Mental Hygiene

An examination and interpretation of the factors which go into the making o the person as he adapts himself to the social world about him. The development of th normal personality. Prerequisite: Psychology 1.

Fall or Spring (3)

## Upper Division Courses

### 104A. Statistical Methods in Psychology

An introduction to the use of quantitative methods in psychology, with emphasis upon measures of central tendency and variability, graphic methods and percentiles, linear correlation, and the applications of the normal probability curve. Prerequisite: Psychology 10, 11, or 12. Not open to students with credit for Economics 140 or Sociology 103.

Fall or Spring (3)

### 104B. Advanced Statistics

A further study of quantitative methods in psychology with particular emphasis on methods of correlation, chi-square, and contingency, and an introduction to the analysis of variance. Prerequisites: Mathematics C and Psychology 104A, or permission of the instructor.

Spring (3)

### 105A. Psychological Testing (Group)

A critical review of the principal intelligence, personality, aptitude and vocational interest tests, with emphasis upon problems of measurement in the various fields. Attention is given to procedures used in test construction and administration. Prerequisite: Psychology 11 or Psychology 104A.

Fall (3)

### 105B. Psychological Testing (Individual)

A course offering instruction in the principles of individual testing and practice in the administration of the Stanford-Binet, Wechsler-Bellevue and the more widely used individual mechanical aptitude tests. Prerequisite: Psychology 105A or Psychology 104A and consent of instructor.

Spring (3)

### 106. Developmental Psychology

A study of the psychological development of the normal individual from conception through childhood, adolescence, maturity, and old age. Stress is laid upon the interdependence of the various periods of the individual's life. Prerequisite: Psychology 1. Not open to students with credit for Psychology 102 or 103, or Education 102B or 102C, or Home Economics 102.

Fall or Spring (3)

### 21. Personnel and Industrial Psychology

Psychological principles applied to problems of selection and assignment of ndustrial personnel, employee training, and fatigue. Prerequisite: Psychology 104A, r Economics 140, or Sociology 103.

Fall or Spring (3)

### 22. Measurement of Public Opinion and Attitude

A survey of the history, methods, and problems of public opinion and attitude neasurement. Emphasis will be placed upon the polling of consumers and voters. In rder to give students experience in field work, they will be asked to serve as interiewers in several community investigations. Prerequisite: Psychology 11 or 104A, r Economics 140, or Sociology 103.

Spring (3)

### 30. Educational Psychology

A study of the science of human behavior as it relates to learning. Emphasis is iven to the principles of learning and maturation of the organism. Special aspects reated are the growth of meanings, thinking, memory and habit formation, motivaion, transfer of learning, organic and environmental conditions affecting learning, ndividual differences, and the theory of audio-visual education. Not open to students ith credit in Education 130. Prerequisite: Psychology 1.

Fall or Spring (2)

### 31. Psychological Foundations of Personality

The nature of the human organism, its interaction with social and material timuli in the environment, and the resultant changes in the development of the personality. Methods of studying and evaluating personality. A study of concepts that are asic in the development of a genuine mental hygiene. Course designed for persons ngaged in social work or similar professions. Prerequisite: One full year of psychology r equivalent.

Fall (2)

### 32. Problems of Personality Adjustment

A study of the application of the fundamental principles of personality to probems of adaptation. Included will be such topics as the mental hygiene of the infant, the hild, and the adolescent, and mental hygiene in relation to school, home, marriage, eligion, vocational selection and occupational adjustment, and the adjustment probems of war veterans. Prerequisite: Psychology 131 or permission of instructor.

Spring (2)

### 40. Physiological Psychology

Topics covered include the history of physiological psychology, neurophysiology ith emphasis upon integrative activities, receptor and effector processes, and the fects of hormones and narcotics upon behavior. Prerequisite: Psychology 10, 11 or 12 nd Physiology, Biology or Zoology.

Spring (3)

### 45. Social Psychology

Personality as it develops in relation to social environment. Suggestion, imitation, adership, the crowd, public opinion, social control, prejudice, propaganda, sex differnces, race differences, etc. Prerequisites: Psychology 11 or 104A.

Fall (3)

### 50. Abnormal Psychology

The relation of psychology to the psychoneuroses and insanity; the appearance abnormal traits in incipient stages of mental disturbances. Methods of diagnosis nd early treatment. Prerequisites: Psychology 10, 11, or 12 and Physiology, Biology Zoology.

Fall or Spring (3)

### 151. Introduction to Clinical Appraisal

A study of diagnostic devices in psychology, tests of clinical significance, ratings interviewing for securing information, projective and case study analyses; problem of insight, rapport, empathy, and prediction of individual behavior. Prerequisites Psychology 105A, 105B, 140, or 150.
Fall (3)

### 152. Introduction to Methods of Counseling

An introduction to problems and methods of counseling and adjustment. Th utilization of psychological principles and techniques in dealing with various types o guidance situations. Prerequisite: Psychology 151 or consent of instructor.
Spring (3)

### 160A-160B. Experimental Psychology

An experimental approach to the fundamental principles of psychology. The firs term deals with the fields of memory and learning, including conditioning, problem solving, and thinking. The second term deals with the sensory and motor processes including such topics as errors of perception, work and fatigue. Two laboratory sessions and one hour of lecture each week. Laboratory work includes group and individua experiments, demonstrations of classical experiments, and extensive readings. Prerequisites: Psychology 10 and 104A. Either semester course may be taken independentl of the other.
Fall and Spring (3-3)

### 166. Honors Course

A special study arrangement for students admitted to the Honors Group. Enrollment through the Department Chairman, subject to approval by the Committee o Honors. (See The Honors Group under General Regulations.)
Fall or Spring (Credit to be arranged)

### 170. Comparative Psychology

A study of the behavior of animals with a view to gaining a better understanding of human behavior. An analysis of the leading experimental work on sensory discrimination, learning, and intelligence of each animal group, from amoeba to man Prerequisites: Psychology 1 and 10.
(3)

### 199. Individual Studies in Psychology

Limited to students in the senior year. Permission to enroll must be obtained from a member of the staff. Credit limited to three units.
Fall or Spring (1-3)

## Graduate Courses

### 200. Seminar

The application of the findings of recent published research. Each student will select a problem for intensive study and discussion. Enrollment limited to graduate students who are candidates for the General Secondary School Credential with a major in Psychology.
Spring (2)

# SOCIOLOGY

## IN THE DIVISION OF SOCIAL SCIENCES

### Major

A *major in arts and sciences* is offered in sociology. Lower division requirements: Sociology 50A-50B. Upper division requirements: a minimum of 24 upper division units in sociology, including Sociology 103, 105, 108 and 152.

A *teaching major* is not offered in sociology; however, courses in sociology may be used as part of the *social science major* for the general junior high school credential or the general secondary credential. For specific information, refer to the outlines of requirements for these credentials.

### Minor

A *minor in arts and sciences* is offered in sociology. The minor must include at least 15 units of work in sociology, 9 units of which must be from courses carrying upper division credit.

A *teaching minor* is not offered in sociology for the general secondary credential; however, courses in sociology may be used as part of the *social science minor* for the general junior high school, the special secondary, the general elementary, and the kindergarten-primary credentials. For specific information, refer to the outlines of requirements for these credentials.

### Lower Division Courses

**50A. Introduction to Sociology**

A study of modern social problems recognizing the geographic, economic, psychological, and sociological factors involved. Emphasis is on a scientific method of approach. An evaluation of various causes and solutions of problems is made. A prerequisite for upper division courses in sociology. Sophomore standing required. Not open to students who have credit for Social Science 40.
Fall or Spring (3)

**50B. General Sociology**

The development and use of the concepts of sociological analysis, such as human nature, the effects of isolation and social contacts upon the development of personality; social interaction; social processes; social forces; social control; collective behavior; and social progress. A prerequisite for upper division courses in sociology. Sophomore standing required.
Fall or Spring (3)

### Upper Division Courses

**03. Elementary Social Statistics**

Analysis and presentation of elementary material in the fields of sociology and social work. Tabular and graphic presentation, analysis of frequency distributions, trends, simple correlation, sampling and reliability techniques. Prerequisites: Mathematics A-B and Sociology 50A-50B. Mathematics C or 7A recommended. This course s a prerequisite for most upper division sociology courses. Not open to students who have credit for Economics 140 or Psychology 104A or 104B.
Fall or Spring (3)

**05. Social Pathology**

A study of the alleged abnormal phenomena in society; family disorganization nd personal demoralization; pathology of individual and group relationships and of conomic, social, and cultural relationships. Prerequisite: Sociology 50A-50B.
Spring (3)

**06. Criminology and Penology**

The extent and characteristics of crime; consideration of physical, mental, economic, and sociological causes of crime; study of methods of penal discipline, prison abor, parole, and probation; programs of prevention. Prerequiste: Sociology 50A-50B.
Fall (3)

**107. Juvenile Delinquency**

A study of the causative factors of antisocial behavior from the viewpoints o economics, psychology and sociology. Particular emphasis will be placed upon the influence of the school, home and neighborhood. Protective and remedial measures such a the Visiting Teacher, Juvenile Court, Probation, Parole and Reformatories will b studied. Prerequisite: Sociology 50A-50B.

Spring (3)

**108. Marriage and the Family**

Preparation for marriage. Prediction scales for evaluating success or failure i marriage. Parent-child relationships; factors in successful and unsuccessful marriages higher education and the birth rate; married women in industry and professions; desertion and divorce. Not open to students who have credit for Sociology 45 or 55, or Hom Economics 108. Prerequisite: 60 units of credit.

Fall or Spring (3)

**109. Fields of Social Work**

A survey of the nature of social work and the various kinds of social work whic are found in the modern urban life. The student is familiarized with the various socia agencies in the community, their problems and methods of work, by readings and fiel trips. Volunteer social work in some social agency recommended. Prerequisites: Sociology 50A-50B and 103.

Spring (3)

**110. Race Relations**

A study of the Negro, Oriental, and other minority groups in the United States A study of mental capacities, education, cultural achievement, family life, delinquency and other social factors of each group. Race prejudice, racial consciousness, theories o racial superiority and inferiority will be considered. Prerequisite: Sociology 50A-50B

Fall (3)

**115. Population Problems**

Problems of population increase, migration, shifts in composition of population relative to age, sex, and racial distribution. Population practices and theories. Biological and geographical aspects of population problems. International population movements. Prerequisite: Sociology 50A-50B and 103.

Spring (3)

**152. History of Social Thought**

The origin and development of social theory in Europe and America; consideration of the fields and specialization and research in contemporary American sociology. Prerequisite: Sociology 50A-50B.

Spring (3)

**195. Community Welfare Organization**

An analysis of the structure and process of community organization for social welfare as well as the functional relationships between public and private welfare agencies. Field work will be required to study some of the social agencies of San Diego. Prerequisite: Sociology 50A-50B and Sociology 103.

Spring (3) (Offered in 1949-50 and alternate years)

**197. Urban Sociology**

A study of the structure and function of the modern city; types of neighborhoods; forms of recreation; social forces in a metropolitan area; types of urban personalities and groups; rural-urban conflicts of culture. Practical field studies required. Prerequisite: Sociology 50A-50B and 103.

Fall (3)

# SPANISH

## IN THE DIVISION OF LANGUAGE AND LITERATURE

### Major

A *major in arts and sciences* is offered in Spanish. Lower division requirements: Spanish A-B-C-D; French A-B or German A-B or Latin A-B; History 4A-4B or 8A-8B. Upper division requirements: a minimum of 24 upper division units, at least 21 units of which must be in Spanish, including Spanish 199. The remaining 3 units may be selected from Geography 116, 118; History 161, 162; or Comparative Literature 155 or 158 in consultation with the departmental representative. An average grade of C or better in upper division major courses is required.

A *teaching major* is offered in Spanish for the general junior high school credential. For specific information, refer to the outline of requirements for this credential.

### Minor

A *minor in arts and sciences* is offered in Spanish. The minor must include at least 15 units of work in Spanish, 9 units of which must be from courses carrying upper division credit.

A *teaching minor* is offered in Spanish for the general secondary, the general junior high school, the special secondary, the general elementary, and the kindergarten-primary credential. For specific information, refer to the outlines of requirements for these credentials.

### Lower Division Courses

**A-B. Elementary**

Intensive study of Spanish grammar and syntax, with daily written work; class drill in conversational idiom and pronunciation; reading with oral discussion and résumés; dictation; introduction to contemporary prose writers. Credit not given for Spanish A unless followed by Spanish B. Students who have had one year of Spanish in high school should register for Spanish A for which only two units will be allowed. Those who have had two years of Spanish in high school should register for Spanish B for which only four units will be allowed. For specific information, refer to page 17. Spanish A, or its equivalent, is a prerequisite to Spanish B.

Year course (5-5)

**C-D. Intermediate Spanish**

Reading and composition: study of standard prose as basis for class work; collateral reading in prose and drama, with written reports in Spanish; dictation. Class work conducted mainly in Spanish. Individual conferences. Prerequisite for C: Spanish B or three years of high school Spanish. Prerequisite for D: Spanish C or four years of high school Spanish.

Year course (3-3)

**50. Spanish Commercial Correspondence**

A one-semester intermediate course in Spanish composition, directed along the ine of commercial correspondence. A practical course, with translation of business etters, and supplementary reading in Spanish on commercial subjects. Prerequisite: Three years of high school Spanish, or completion of Spanish B. This course may substitute for Spanish C in the C-D sequence.

Fall (3)

**70. Spanish for Elementary-School Teachers**

Elementary Spanish to meet the needs of elementary-school teachers. Emphasis on the oral aspects of the language with reading centering around Mexico. Open only to students enrolled in the general elementary school curriculum. Prerequisite: Two years of high school Spanish or one year of college Spanish or permission of instructor.

Spring (3)

## Upper Division Courses

### 101A-101B. Conversation and Composition

Translation into Spanish of moderately difficult English prose passages. Free composition in Spanish. Outside reading of modern Spanish plays, with written reports in Spanish. Oral practice in colloquial Spanish with extensive use of phonograph recordings. Prerequisite: Spanish D, or its equivalent, with grade of C.

Year course (3-3)

### 102A-102B. Introduction to Spanish Classics

Reading from several types of classical literature. Lazarillo de Tormes and other novels of Roguery; selections from Don Quixote, and the Cien Mejores Poesias Castellanas; one drama each from the works of Lope de Vega, Calderon, Alarcon, and Moreto; collateral reading and reports. Prerequisite: A grade of C in Spanish D or permission from the instructor.

Year course (3-3)

### 104A-104B. Spanish-American Literature

Reading from representative Spanish-American authors during the colonial revolutionary and modern periods. Lectures, class reading, collateral reading and reports. Prerequisite: A grade of C in Spanish D or permission from the instructor. Students who do not read Spanish may take this course for credit in comparative literature, doing the required reading in English translation.

Year course (3-3) (Offered in 1950-51)

### 105A-105B. Modern Spanish Drama

The development of the drama of Spain from the beginning of the nineteenth century to the present time. Prerequisite: A grade of C in Spanish D or permission from the instructor.

Year course (3-3) (Offered in 1950-1951)

### 110A-110B. Novel and Short Story in Spain

The development of the novel and short story in Spain from 1830 to the present time. Prerequisite: A grade of C in Spanish D or permission from the instructor.

Year course (3-3) (Offered in 1951-52)

### 199. Comprehensive Reading and Survey Course

Designed to fill up the gaps in the reading done in courses. Class meeting once a week for guidance, reports, and quizzes. Required of all seniors majoring in Spanish.

Spring (3)

## Graduate Courses

### Spanish 201. Old Spanish

A study of the language and literature of Spain from the 12th to the 15th centuries. Prerequisite: Graduate standing and permission of instructor.

Fall (2)

### Spanish 202. Seminar in Spanish-American Literature

Intensive investigation of some phase of Spanish-American literature. A single country, an author, or some special problem will be studied and reported upon. Prerequisite: Graduate standing and permission of instructor.

Spring (2)

# SPEECH ARTS

## IN THE DIVISION OF LANGUAGE AND LITERATURE

### Major

A *major in arts and sciences* is offered in speech. Lower division requirements: A minimum of 15 units of lower division courses in speech arts, specializing in the field of dramatic art, radio, public speaking or a guided combination of the three. Upper division requirements: a minimum of 24 upper division units including Speech Arts 150; 6 units selected from 155, 140A-140B, 179A-179B, 192A-192B (the first semesters of any of these courses may be combined); 6 units selected from 181, 182, 183 or 184, 159A-159B, 161 and 191, or combinations of the first semesters of any of these courses; 6 units selected from 152, 154A, 154B, 108, 118A, 176, 192A, 192B.

A *teaching major* is offered in speech for the general secondary and the special secondary credentials. For specific information, refer to the outlines of requirements for these credentials.

### Minor

A *minor in arts and sciences* is offered in speech. The minor must include at least 15 units of work in speech arts, 9 units of which must be from courses carrying upper division credit.

A *teaching minor* is offered in speech for the general secondary, the general junior high school, and the special secondary credentials. It may be offered only as a second teaching minor for the general elementary and the kindergarten-primary credentials. For specific information, refer to the outlines of requirements for these credentials.

### Lower Division Courses

**1. Voice and Diction**

Exercises and drills to improve the quality, flexibility and effectiveness of the speaking voice leading to good usage in standard American speech. Preparatory to further courses in public speaking and dramatic art.

Spring (3)

**2A. Fundamentals of Public Speaking**

Training in fundamental processes of oral expression; method of obtaining and rganizing material; outlining principles of attention and delivery; extemporaneous speaking and open forum debating; practice in construction and delivery of type forms f speech.

Fall or Spring (3)

**2B. Extemporaneous Speaking (or Forum Speaking)**

Practice in extemporaneous speaking on subjects of current interest, both national nd local, with stress laid on the organization and delivery of content material. Forum iscussion will provide speakers with the opportunity of assembling facts quickly to eet such questions as any audience situation might demand.

Fall or Spring (3)

**11A. Interpretation**

Application of the principles involved in "making words come alive": response o thought and mood, sensory association, emphasis, climax. Practice selections in oetry and prose.

Fall or Spring (3)

**11B. Interpretation**

Application of techniques of interpretation to poetry of various types: ballads, des, sonnets, dramatic monologues, free verse. Prerequisite: 11A, or equivalent.

Fall or Spring (3)

**0. Remedial Speech**

Corrective laboratory training prescribed on the basis of vocalization tests made n recording machine. Required of education majors who fail to meet speech requirements tests. Private assistance given to stutterers and lispers.

Fall or Spring (1)

**55A-55B. Elementary Acting**

The fundamentals of voice and pantomime applied to the problems of characterization in group scenes in modern plays. The aims of this course include the discovery and development of talent and the understanding of the problems of the actor for directors and teachers. Acting experience is available in workshop productions and also in the major productions of the department. (Speech Arts 55A prerequisite for Speech Arts 55B).

Year course (3-3)

**56A-56B. Dramatic Production**

A general survey of the process of play production for lower division students planned to introduce them to the whole organization of the college and school theater, with particular emphasis on back-stage methods and practice, including stagecraft and elementary lighting. Technical crews for the departmental productions are taken from this class. (56A is a prerequisite for 56B.)

Year course (3-3)

**60A-60B. Argumentation and Debate**

Obtaining and organizing of evidence and the construction and use of the brief; study and discussion of current issues; the presentation of formal and informal debates. Attention to intramural and intercollegiate debating.

Year course (3-3)

**61A-61B-61C-61D. Intercollegiate Debate**

Fall or Spring (1-1-1-1)

**63A-63B-63C-63D. Verse Choir**

Participation in verse speaking chorus to develop quality, range of tone, and ability in dramatic visualization of poetry.

Fall or Spring (1-1-1-1)

**81. Survey of Radio**

A course presenting the background, theory, and fundamentals of radio broadcasting. The subject material includes history of broadcasting; types of radio programs; broadcast operation.

Fall or Spring (3)

**82. Radio Announcing**

The fundamentals of radio announcing. Class time will be divided between lecture and laboratory practice of announcing styles. Voice training for radio will be stressed. Prerequisite: Speech Arts 81.

Fall or Spring (3)

**83. Radio Acting and Directing**

For students interested in the production of dramatic radio programs. Lecture and laboratory for radio techniques in characterization. The use of sound effects and music cues and bridges will be considered. Emphasis will be on production analysis. Actors for Radio Guild productions will be taken from this class. Prerequisite: Speech Arts 81.

Spring (3)

## Upper Division Courses

**108. Advanced Interpretation**

Analysis of techniques of literary composition as guides to oral interpretation. Achievements of the creative artist as they affect the interpretative artist. Prerequisite: 11A or 11B or permission of instructor.

Fall or Spring (3)

**118A-118B. Playwriting**

The first semester of this course deals with the one-act play, its problems and technique. A number of one-act plays are analyzed and creative writing in this medium is encouraged. Plays written by the students are read and discussed in class during their period of development. Students will have an opportunity to see their plays produced. The second semester continues with analyses of long plays and assumes that the students are planning a continuous program of writing. (118A is a prerequisite for 118B or permission of instructor.)

Year course (3-3)

### 140A-140B. Stage Design

The application of the principles of design, color and perspective to the design f settings for the production of period and modern plays. Students will learn to make ketches and models and paint the scenery for the departmental productions. Prerequiite: 56A-56B or equivalent.
Year course (3-3)

### 145. Stage Lighting

A course for directors, designers and technicians in school and community theaers concerning the principles and practice of light, color, lighting instruments, and ontrol equipment, including the design and planning of lighting of plays. Students will erve as light crews for departmental production.
Spring (3)

### 50. Phonetics

Auditory and kinesthetic analysis of the sounds of the English language. Valuble as a corrective course in pronunciation and articulation. Required of speech majors nd those seeking the Speech Correction Credential.
Fall (3)

### 52. Stage Costume

Principles of design of stage costume. Consideration of materials, color, and dyeng. Study of history of costume of important periods. Projects in design of costumes or plays of various periods.
Fall (2)

### 54A-154B. History of the Theater

A study of the theater from primitive times to the present. Special attention will e given to the theater as a mirror of the social and cultural background of the various ountries and periods in which it is studied. Carries aesthetics credit. (Speech Arts 54B may be taken without 154A.)
Year course (3-3)

### 55. Advanced Acting

Problems in characterization: acting styles of the Elizabethan and Eighteenth entury periods. Prerequisite: 55A-55B or the equivalent.
Fall (3)

### 56. Advanced Dramatic Production

Problems and projects in scenery and lighting in connection with the workshop nd major productions of the department.
Offered in summer session only (3)

### 59A-159B. Stage Direction

This course is planned for prospective directors of plays in schools, colleges and mmunity theaters. Through lectures, discussions, and exercise projects the student ill become acquainted with the principles, procedure and methods of stage direction. ach student will be required to direct several short plays during the year (159A is a erequisite for 159B.)
Year course (3-3)

### 1A-161B-161C-161D. Advanced Intercollegiate Debate

Fall and Spring (1-1-1-1)

### 2. Advanced Argumentation

Presents a further and more detailed study in the preparation of briefs and the ganizing of evidence; opportunity for participation in intramural debates, interllegiate debate, and community speaking activity. Prerequisite: 2A or 2B.
Fall (3)

### 3A-163B-163C-163D. Advanced Verse Choir

Participation in verse speaking chorus to develop quality, range of tone, and ility in dramatic visualization of poetry.
Fall and Spring (1-1-1-1)

**176. Problems of Speech Correction and Articulation**

Analysis and discussion of the major articulatory problems as encountered in public school work, particularly in California. Required of all students for the speech correction credential. Not open to students with credit for Education 176.

Spring (3)

**179A-179B. Nervous Speech Disorders**

Clinical survey of newest methods of speech correction with special emphasis given to stammering. Required course for Special Corrective Credential. Not open to students with credit in Educ. 179A-179B. (Speech Arts 179A is a prerequisite for 179B.)

Year course (3-3)

**181. Radio Sales and Advertising**

A study of advertising trends in radio advertising; time buying, audience surveys, and program types in relation to products to be advertised via radio broadcasting. Includes publicity and promotion of radio programming organization of a radio station; relationship between the business and entertainment factors of radio broadcasting. Open to students with consent of instructor.

Fall or Spring (3)

**182. Advanced Radio Production**

Advanced radio production techniques. Students are responsible for the execution of Radio Guild productions. Projects in program types include the use of sound and music. Material includes production analyses and script editing. Prerequisite: Speech Arts 83.

Spring (in alternate years) (3)

**184. Radio Writing**

Includes original half-hour scripts, play or novel adaptations for radio, and the documentary program. Study of pacing and timing, the use of sound and music for bridges and cues, and radio format. Plays written by students are read and discussed during their development; the better plays to be produced by the Radio Guild for broadcast. Open to students with consent of instructor.

Spring (3)

**191. Organized Discussion**

Consideration of the symposium, the panel, the open forum, the business session, and varieties of conference speaking. Emphasis upon organization and presentation. Attention to parliamentary procedure for informal groups. Prerequisite: Speech Arts 60 or equivalent.

Spring (3)

**192A-192B. Advanced Public Speaking**

Careful attention given to the preparation and delivery of longer speeches, using as models classics in the field of oratory. Prerequisite: 2A or 2B.

Year course (3-3) (Not offered 1948-1949)

**199. Special Problems in Speech and Dramatic Art**

Fall or Spring (1-3)

## Graduate Courses

**200. Seminar in History of Oratory**

An advanced course for those already familiar with the techniques and theories of public speaking and debate. A history of public address from the time of Greece up to the present, organized around the theories of representative orators and their relationships to the social environment. Prerequisite: Graduate standing.

Spring (2) (Offered in 1949-1950)

**221. Articulatory Problems of Speech**

Analysis and discussion of articulatory problems as encountered in public school work, particularly in California. Required of all students for the speech correction credential. Prerequisite: Speech Arts 150 and graduate standing.

Fall (2)

### 45. Seminar in Technical Practice

Advanced technical projects in planning school theaters and their mechanical quipment, lighting control and lighting instruments and the design of lighting layouts r elaborate plays will be assigned, executed and discussed. Prerequisite: Graduate tanding.

(2)

### 59. Seminar in Stage Direction

An advanced course for those who are ready to direct full-length plays and to onsider the problems of handling various styles and types of drama in the great periods f dramatic literature for modern production. For graduates with experience in direct- g plays. Prerequisite: Graduate standing.

Fall (2) (Offered 1949-1950)

### 60. Seminar in Oral Interpretation

Application of the aesthetic discipline to the oral reading of masterpieces of poetry nd prose. Projects will include analysis of thought and emotional content and aesthetic rm, including unity and harmony, variety and contrast, balance and proportion, ythm, and the interpretation to an audience of the results of the study. Prerequisite: raduate standing.

(2)

# ZOOLOGY

## IN THE DIVISION OF LIFE SCIENCES

### Major

A *major in arts and sciences* is offered in zoology. Lower division requirements Zoology 1A-1B; Chemistry 1A-1B or 2A-2B. Recommended: German or French; Bot any 2A-2B, 4. Upper division requirements: a minimum of 24 upper division units, a least 18 units of which must be in zoology and 6 units of which may be in relate courses in botany, chemistry, physics, physiology, or bacteriology selected with approva of the departmental representative.

A *teaching major* is not offered in zoology; however, courses in zoology may b used as part of the *life science major* for the general secondary credential or as part o the *general science major* for the general junior high school credential. For specifi information, refer to the outlines of requirements for these credentials.

### Minor

A *minor in arts and sciences* is offered in zoology. The minor must include at leas 15 units of work in zoology, 9 units of which must be from courses carrying uppe division credit.

A *teaching minor* is not offered in zoology; however, it may be used as part of th *teaching minor in life science* for the general secondary credential, or as part of th *teaching minor in general science* for the general junior high school, the special secondary, the general elementary, and the kindergarten-primary credentials. For specifi information, refer to the outlines of requirements for these credentials.

### Lower Division Courses

**1A-1B. General Zoology**

An introduction to animal biology dealing with structures, functions, evolution o animal life. Designed primarily for those who expect to do advanced work in the department. Two lectures and 6 hours of laboratory work each week. Students who have credi for Biology 10B do not receive credit for Zoology 1A but may for Zoology 1B. Prerequisite for Zoology 1B: Biology 10B or Zoology 1A.

Year course (4-4)

**8. Human Anatomy**

A study of human structure through the use of models, prepared dissections an microscope slides. Prerequisite: high school biology, Biology 10A, 1, or Zoology 1A Two hours of lecture and three hours of laboratory per week. Required of prenursin students. Credit reduced to 2 units if student has credit for Zoology 20.

Fall (3)

**20. Human Anatomy and Physiology**

An elementary course in human anatomy and physiology. Prerequisite: Hig school biology, or Biology 1 or 10A or Zoology 1A. Lectures three hours per week Credit reduced to 2 units if student has credit for Zoology 8 or Physiology 1A.

Fall and Spring (3)

### Upper Division Courses

**100. Embryology**

The development of vertebrates as illustrated by the frog, chick, and pig. Si hours of laboratory and two hours of lecture and quiz per week. Prerequisite: Zoolog 1B or Biology 10B.

Fall or Spring (4)

**101. General Physiology**

Fundamentals of plant and animal functions. Two lectures and two laborator periods per week. Prerequisites: Biology 10A-10B or Zoology 1A-1B, Chemistry 1A-1 or Chemistry 2A-2B.

Spring (4)

**104. Microtechnique**

Introduction to methods of preparation of tissues for microscopic study. Six hour of laboratory and one hour of lecture per week. Prerequisite: One year college chemistr and Zoology 1A-1B, Botany 2A-2B or Biology 10A-10B.

Fall or Spring (3)

### 6. Comparative Anatomy of the Vertebrates

Dissection, study and comparison of organ systems of typical vertebrates. Two urs per week of lecture and six hours of laboratory. Prerequisite: Zoology 1B or ology 10B.

Fall (4)

### 1. Parasitology

A study of animal parasites with special reference to those of man. Laboratory rk includes the identification of the important parasites of man and the collection d preservation of available local forms. Two hours of lecture and six hours of oratory per week. Prerequisite: Biology 10A-10B or Zoology 1A-1B.

Fall (4)

### 2. Marine Invertebrates

Identification and study of behavior and life histories of invertebrates of the San ego region. Frequent collecting trips to the beaches required. Prerequisite: Zoology or Biology 10B. Two hours of lecture and six hours of laboratory or field work r week.

Fall (4)

### 3A. Mammalogy

Lectures on classification, adaptations, and ecological relationships of mammals. boratory and frequent field trips to familiarize the student with the local mam- ls, taxonomic procedures and field techniques. One lecture and six hours of laboratory r week. Prerequisites: Zoology 1A or Biology 10B.

Spring (3)

### 3B. Ornithology

The study and identification of birds, especially those of the Pacific Coast and San Diego region. One hour of lecture and six hours per week of laboratory, or d excursions. Prerequisite: Zoology 1B or Biology 10B.

Spring (3)

### 4. Evolution

The development of theories of evolution. Two lectures per week.

Spring (2)

### 5. Cold-blooded Vertebrates

The classification, natural history and distribution of fishes, amphibians, and tiles with special reference to the local fauna. Practice in the techniques of collec- n and the use of keys for identification. Frequent field trips. One lecture and two oratory periods per week. Prerequisites: Zoology 1B or Biology 10B.

Spring (3)

### 1. General Entomology

The classification, life history, structure, and physiology of insects. Prereq- ite: Zoology 1A or Biology 10B. Two hours of lecture and three hours of laboratory week.

Fall (3)

### 2. Systematic Entomology

Classification of insects with especial emphasis on a group of insects of the dent's choice. To be taken with or to follow 121. May be repeated for credit but h a total of not more than 3 units. Three to six hours of laboratory work each ek.

Spring (1 or 2)

### 3. Economic Biology

Study of the uses of plants and animals to man and the ways in which they ure him and his possessions. Consideration is also given to general methods of trol and conservation. Prerequisite: Zoology 1A, Biology 1, or Biology 10B. Not n to students who have credit in Botany 123.

Fall (2)

### 124. Scientific Illustration

Drawing or photography of scientific subjects. Students are assigned individual projects, following their respective inclinations. It is desirable for students electing this course to have a definite project, or projects in mind and to confer with the instructor in advance in case specialized needs are required. Six hours of laboratory work per week. Not open to students who have credit in Botany 124.

Fall (2) (Not offered 1949-50)

### 125. Economic Entomology

A course designed primarily for students of agriculture, horticulture, and their specialized fields, but also of use and value to those majoring in the biological sciences Emphasis is placed on determination and control of insects affecting plants and their products. Quarantine measures are also studied. Two lectures and one laboratory period per week. Prerequisites: Zoology 1A or Biology 10B.

Spring (3)

### 126. Medical Entomology

The role of insects and other arthropods in transmission and causation of human diseases. Three hours of laboratory and two hours of lecture per week. Prerequisite: Zoology 1A or Biology 10B.

Fall (3)

### 130. Readings in Biology

Reading from a suggested bibliography with informal class discussion of topics. Subjects discussed will include history of biology, biological principles, ecology, economic zoology, zoogeography, breeding habits, animal behavior. Not open to students who have credit in Botany 130.

Spring (2)

### 131. Field Zoology

Designed to give a working knowledge of the more common animals in the Southern California fauna; field trips emphasizing both observational methods in the study of behavior and habitat relations, and collecting techniques; laboratory to include identification of species, preparation of animal for exhibition and study; lectures on taxonomy, adaptations and ecological relationships. Prerequisites: Course in biology in high school or college, or permission of the instructor.

Summer (4)

### 140. Histology

A study of the microscopic structures and differentiation of tissues and organs of the vertebrates, especially mammals. One lecture and 6 hours of laboratory per week Prerequisites: Zoology 1A-1B, or Biology 10A-10B; recommended Zoology 100.

Fall (3)

### 145. Hematology

Microscopic and chemical examination of blood. One lecture and two laboratory periods per week. Prerequisite: Chemistry 102.

Fall (3)

### 155. Genetics

An introductory course to the principles of heredity and cytogenetics, including the genetics of man, other animals, and plants. Designed primarily for science majors Two lectures per week. Not open to students who have taken Zoology 165. Prerequisite: Biology 10A-10B, Zoology 1A-1B, or Botany 2A-2B. Not open to students who have credit in Botany 155.

Spring (2)

### 165. Human Heredity

Presentation of selected principles of heredity as related primarily to human inheritance. Designed primarily for non-science majors. Two lectures per week. Not open to students who have taken Zoology 155, Genetics (formerly 114A).

Fall (2)

**199. Special Study**

Work other than is outlined in the above courses. Admission only by consent of the instructor with whom the work is to be done. Credit and hours to be arranged in each case. Open to students who have completed at least 15 units of Zoology with a grade of A or B.

Fall or Spring (1 or 2)

## Graduate Courses

**200. Seminar**

To be conducted by the various members of the staff, with adaptation to the needs of the class and its background. Especial emphasis will be placed on current concepts in the various fields of Biology including problems of migration, distribution, speciation, evolution. Required of all graduate students. Prerequisite: Graduate standing.

Fall (3)

**202. Hydrobiology**

A course in aquatic ecology with special emphasis on fresh water but with reference to marine biology. Prerequisite: Graduate standing.

(2)

**213. Advanced Studies in Ornithology**

Lectures and seminar on advanced problems of morphology, distribution, behavior and classification of birds. Prerequisite: Graduate standing.

(2)

# PROVISIONAL CURRICULUM

This curriculum is for the purpose of assisting provisional students in attainin regular status in a curriculum which leads to the A.B. Degree. Students in the provisional program are given close supervision in selection of courses and are place in classes specially designed to aid in adjustment to the college program.

Reclassification to regular status may be obtained upon the completion of a least 24 units of work of "C" grade with an over-all grade point average of 1.0, o upon recommendation of a reclassification committee. Reclassification must ordinaril take place within the first two years of college work.

The courses in the provisional curriculum are open only to students in provisional status. Provisional students in their first college year must select thre courses each semester from the list of subjects in the provisional curriculum. All othe courses selected to complete the student's program may be chosen from the regula schedule of courses or from additional courses in the provisional curriculum with th approval of the adviser.

## A SUGGESTED PROGRAM FOR PROVISIONAL STUDENTS

### First Year

| | *Units* | |
|---|---|---|
| | *1st Sem.* | *2d Sem* |
| * English 41, English Composition, and 42, Freshman Literature | 3 | 3 |
| Physical Science 40, Man and His Physical World, or equivalent (see lower division requirements.) | – | 3 |
| Biology 40, Man and His Biological World, or equivalent (see lower division requirements.) | 3 | – |
| Social Science 40, Contemporary Problems | 3 | – |
| Sociology 45, Marriage and the Family | – | 3 |
| Health Education 21, Principles of Healthful Living | – | 2 |
| Psychology 40, Psychology and Life | 3 | – |
| Physical Education (activity courses) | ½ | ½ |
| Elective | 3 | 4 |
| | 15½ | 15½ |

### Second Year

Student should consult with adviser concerning lower division preparation for the major and completion of lower division requirements.

| | | |
|---|---|---|
| Social Science Elective | 3 | – |
| Social Science 45, American Democracy | – | 3 |
| Elective | 12 | 12 |
| Physical Education (activity courses) | ½ | ½ |
| | 15½ | 15½ |

* Students who do not pass the English A qualifying examination must register in English 40, Pre-College English, which is a prerequisite for English 41. Credit in English 40 may be counted toward graduation as an elective but not to satisfy lower division English requirements.

## COURSES OF INSTRUCTION

### BIOLOGY

**40. Man and His Biological World**

A survey of the general field of biology with emphasis on the role of biological science in the welfare of man and his associates, consisting of three lectures and one demonstration period per week. This course may be counted as the equivalent of Biology 1.

Fall or Spring (3)

## ENGLISH

### 40. Pre-College English

The elements of composition, including drill in grammar and usage; exercises in ocabulary building and fundamental reading skills; theme writing. Credit in this ourse is equivalent to passing the English A qualifying examination and may be ounted toward graduation as an elective but not to satisfy lower division English equirements.

Fall or Spring (2)

### 41. English Composition

Composition stressing exposition. Reading from essays and articles. Prerequisites: Passing mark in the English A qualifying examination or credit in English 40. English 41 may be counted as the equivalent of English 1.

Fall or Spring (3)

### 42. Freshman Literature

Literature, mainly contemporary, is read for its thoughts and ideas, especially n relation to human problems and their solution. Practice in writing is continued. Required of all provisional students. Prerequisite: English 41. The course in English 42 may be counted as the equivalent of English 2.

Fall or Spring (3)

## PHYSICAL SCIENCE

### 40. Man and His Physical World

A brief survey of the nature of the scientific method and of selected topics in hysical science. Materials will be chosen from physics, chemistry, astronomy, and eology in order to give some background for an understanding of the relations of hysical science to modern life. Not open to students who have had a year course in igh school chemistry, physics, geology, or astronomy or a college course in any of hese subjects. This course may be counted as the equivalent of Physical Science 1A.

Fall or Spring (3)

## PSYCHOLOGY

### 0. Psychology and Life

An elementary survey of normal adult psychology, focused upon psychological rinciples in relation to life situations. Open only to students enrolled in the Proisional curriculum. This course may be counted as the equivalent of Psychology 1.

Fall or Spring (3)

## SOCIAL SCIENCE

### 0. Contemporary Problems

A survey of the major political, social, and economic forces in modern American fe. Chief problems are analyzed in relation to their setting, and students are given ound methods of approach in dealing with them. This course may be counted as the quivalent of Sociology 50A.

Fall or Spring (3)

### 5. American Democracy

The structure and function of government, as it relates to individual Americans. pecial emphasis on popular participation through voting, political parties, pressure roups, and public opinion. Prerequisite: Sophomore standing.

Spring (3)

## SOCIOLOGY

### 5. Marriage and the Family

The purpose of this course is to prepare young people for successful marriage and mily life. The development of personality through family relationships, the selection f a life partner, and the social, psychological, and economic factors involved in the stablishment of a home, are given special emphasis.

Fall or Spring (3)

# DIRECTORY

## (1948-49)

HEPNER, WALTER R.----------President

A.B., 1913, M.A., 1916, Ed.D., 1937, University of Southern California. Appointed 1935.

ACKLEY, JOHN WILLIAM----------Assistant Professor of Speech Arts

A.B., 1930, University of Redlands; A.M., 1933, and two years of graduate study at the University of Southern California. Appointed 1947.

ADAMS, JOHN R.----------Professor of English

A.B., 1920, A.M., 1922, University of Michigan; Ph.D., 1940, University of Southern California. Appointed 1928.

ALCORN, MARVIN DOUGLAS----------Associate Professor of Education

A.B., 1925, Southwestern College; A.M., 1931, Teachers College, Columbia University; Ed.D., 1942, University of Southern California. Appointed 1941.

ALLISON, JOHN DONALD----------Assistant Professor of Commerce

B.S.C., 1932, Temple University; M.B.A., 1935, Harvard University; one year graduate study at New York University. Appointed 1947.

AMSDEN, GEORGIA C.----------Associate Professor of Commerce

Diploma, Gregg College, Chicago; special secretarial training in various colleges; Traveling Representative and Secretary for the Federal Board for Vocational Education, France, World War I; in charge of Stenographic Division, Department of Personnel, American Red Cross Headquarters, Paris, France, World War I; Secretary, Standard Life and Accident Insurance Company, Detroit. Appointed 1925.

APPLE, JOE ALTON----------Associate Professor of Education

A.B., 1928, Southeastern State College; M.A., 1929, University of Oklahoma; Ed.D., 1941, Teachers College, Columbia University. Appointed 1947.

BACON, GUINIVERE KOTTER (Mrs. George)----------Associate Professor of Education

B.S., Utah Agricultural College; M.A., Stanford University. One year graduate study since 1926 at Stanford University, Teachers College of Columbia University, University of Southern California, and University of California at Los Angeles. Appointed 1928.

BAIRD, OSCAR----------Professor of Physics

B.A., 1910, University of Wisconsin; M.A., 1924, University of California. Three years graduate study since 1924 at University of Minnesota, University of California, University of Southern California, University of Oregon. Appointed 1921.

BAKER, CLIFFORD H., JR.----------Instructor in Spanish

B.A., 1933, San Diego State College; M.A., 1935, University of California. Two years graduate study since 1935 at University of California. Appointed 1937.

BALL, HANNAH WHEELER----------Instructor in English

B.A., Macalester College; M.A., Wellesley College; one year graduate study at University of California. Appointed 1947.

BARNHART, KENNETH EDWIN----------Professor of Sociology

A.B., 1915, Southwestern University; A.M., 1920, Southern Methodist University; Ph.D., 1924, University of Chicago. Appointed 1939.

BAUM, DONALD ELWOOD----------Assistant Professor of Music

B.Music, A.B., 1935, Upper Iowa University; M.A., 1946, University of Iowa. Appointed 1947.

BENSON, RICHARD M.----------Instructor in Sociology

B.S., 1923, Oregon State College; M.A., 1925, University of Washington; Ed.D., 1931, Stanford University. Appointed 1946.

BENTON, CARL WEBBER----------Acting Instructor in Physical Education

B.S., 1948, University of California at Los Angeles. Appointed 1948.

BLOCK, EDWARD A.----------Assistant Professor of English

A.B., 1938, M.A., 1939, Ph.D., 1943, University of California. Appointed 1946.

BROOKS, BAYLOR----------Assistant Professor of Geology

B.A., 1928, Stanford University. Two years graduate study since 1928 at University of Arizona and Stanford University. Appointed 1931.

BROWN, ELIZABETH McPIKE (Mrs. L. P.)---------------Professor of French

Ph.B., M.A., Ph.D., University of Chicago; one year graduate study at the Sorbonne, Paris, France; Certificat d'Etudes Françaises; Diplôme de l'Association Générale de Phonétique, Paris, France; Officier d' Académie. Appointed 1926.

BROWN, EUGENE P.---------------------------Assistant Professor of Commerce

B.S., 1926, Southeastern Teachers College; B.A., 1927, M.A., 1928, University of Oklahoma. One year graduate study at University of Chicago, University of Southern California and University of Mexico. Appointed 1947.

BROWN, LESLIE PARKER--------------------Professor of Spanish and French

B.A., 1912, Yale College; M.A., 1913, Harvard University; Ph.D., 1935, University of Southern California. Appointed 1922.

BRUNER, WILLIAM S.---------------------------Assistant Professor of English

B.S., 1925, University of Virginia; M.A., 1940, Claremont College. Appointed 1948.

BRYDEGAARD, MARGUERITE ANNA-------Associate Professor of Education

A.B., San Diego State College; M.A., Claremont Colleges. Appointed 1936.

BURNETT, GAIL ALLEN--------------------------Assistant Professor of English

A.B., Randolph-Macon Woman's College; M.A., University of California at Los Angeles; Ph.D., University of Southern California. Appointed 1947.

BUSH, KENT--------------------------------------Acting Instructor in English

A.B., 1941, San Diego State College; one year graduate work, University of California at Los Angeles. Appointed 1947.

CAMERON, ROY ERNEST------------------------------Professor of Economics

A.B., 1922, Ph.D., 1929, University of California. Appointed 1929.

CAMPBELL, LOIS BERYL---------------------Assistant Professor of Education

A.B., University of California; M.A., Teachers College, Columbia University. Appointed 1947.

CARLSON, HILDING B.-----------------------Associate Professor of Psychology

Ph.B., 1930, M.S., 1932, Ph.D., 1937, University of Chicago. Appointed 1948.

CARLSON, THORSTEN ROBERT------Principal of Campus Laboratory School;
Associate Professor of Education

B.E., 1939, St. Cloud State Teachers College; M.A., 1942, Ph.D., 1946, University of Minnesota. Appointed 1948.

CAVE, MARY F.-----------------------Assistant Professor of Physical Education

B.S., University of North Dakota; one-half year's study at Bennington College. Appointed 1946.

CHOPLIN, ROSA MARIA (Mrs. Ralph)------------Acting Instructor in Spanish

A.B., University of California at Los Angeles; one year graduate study at University of Southern California. Appointed 1948.

COLTON, THEODORE S.-----------------------------------Instructor in English

B.A., 1939, M.A., 1940, and two years' graduate study, University of California at Los Angeles. Appointed 1946.

CORBETT, KATHERINE E.------------------Associate Professor of Education

B.Pd., Michigan State College; B.S., M.A., Teachers College, Columbia University. Appointed 1921.

CORCORAN, EUGENE F.---------------------Acting Instructor in Mathematics

B.S., 1940, North Dakota State College. Appointed 1946.

CORRIGAN, ROBERT FORD-----------------Assistant Professor of Speech Arts

A.B., 1939, University of Michigan; M.A., 1941, University of Iowa. Appointed 1947.

CROUCH, JAMES ENSIGN-------------------------------Professor of Biology

B.S., 1930, M.S., 1931, Cornell University; Ph.D., 1939, University of Southern California. Appointed 1932.

CUNNINGHAM, CORNELIUS CARMAN------Associate Professor of Speech Arts

A.B., 1915, Beloit College; M.A., 1923, Northwestern University; Ph.D., 1935, University of Iowa. Appointed 1947.

DEHNEL, PAUL A.------Acting Instructor in Biology

B.A., 1943, San Diego State College; M.A., 1948, University of California. Appointed 1948.

DEPUTY, ERBY CHESTER------Professor of Education

B.A., 1922, University of Denver; M.A., 1926, Ph.D., 1929, Columbia University. Appointed 1931.

DICKHAUT, FLORENCE LILLIAN SMITH (Mrs. Charles A.)
Professor of English

B.A., Northwestern University; M.A., University of Chicago. Appointed 1917.

EAGLE, JOHN E.------Assistant Professor of Mathematics

B.S., 1930, Montana State College; A.M., 1940, Ed.D., 1947, Stanford University. Appointed 1946.

EARNEST, SUE W. (Mrs. L. E.)------Assistant Professor of Speech Arts

B.A., San Diego State College; M.A., Ph.D., University of Southern California. Appointed 1947.

ENGLANDER, HERMAN S.------Acting Instructor in Mathematics

B.S., 1939, California Institute of Technology. Appointed 1947.

ESTEP, LEWIS I.------Acting Instructor in Geology

A.B., 1940, San Diego State College. Appointed 1946.

EVANS, ROSS A.------Assistant Professor of Chemistry

A.B., 1937, San Diego State College; M.A., 1939, University of California at Los Angeles; one year of graduate study at the University of Southern California. Appointed 1946. Resigned Feb. 1949.

FELTON, JOHN R.------Assistant Professor of Economics

B.A., 1939, M.A., 1941, and one and one-half years of graduate study at the University of California. Appointed 1948.

GELDREICH, EDWARD W.------Assistant Professor of Psychology

B.A., 1933, M.A., 1935, University of Cincinnati; three years graduate study at the University of Chicago. Appointed 1947.

GENTRY, ADRIAN N.------Instructor in Biology

Sc.B., 1934, Ottawa University; M.A., 1935, University of Kansas. Three years of graduate study at University of Washington and University of California. Appointed 1946.

GIBSON, ERNEST DANA------Associate Professor of Commerce

B.S., 1936, University of Minnesota; M.A., 1939, Colorado State College of Education; Ed.D., 1944, New York University. Appointed 1947.

GJERDE, CLAYTON M.------Assistant Professor of Education

B.A., 1935, Augsburg College; M.A., 1944, and two years of graduate study at the University of Minnesota. Appointed 1948.

GLEASON, JOHN MORTIMER------Assistant Professor of Mathematics

B.A., 1929, University of California at Los Angeles; M.A., 1930, University of California. One and a half years graduate study since 1930 at University of Southern California, University of California at Los Angeles and Claremont Colleges. Appointed 1930.

GRAHAM, JOHN LLOYD------Acting Instructor in Mathematics

B.S., 1934, Ashland College; M.A., 1940, Kent State University. Appointed 1947.

GRESS, IRVIN S.------Director of Occupational Guidance and Placement;
Assistant Professor of Psychology

A.B., 1922, George Washington University; M.Ed., 1938, University of Pittsburgh. Two years graduate study at Columbia University, Pennsylvania State College and University of Pittsburgh. Appointed 1946.

GULICK, SIDNEY L., JR.------Associate Professor of English

A.B., 1923, A.M., 1925, Oberlin College; Ph.D., 1931, Yale University. Appointed 1945.

HALE, PHILIP------------------------Acting Associate Professor of Engineering
S.B.C.E., 1923, Carnegie Institute of Technology; two years of graduate study at Carnegie Institute of Technology and University of California. Appointed 1948.

HAMMACK, EDITH CHASTAIN---------------**Associate Professor of Education**
B.A., San Jose State College. Appointed 1911.

HAMMACK, ISABELLA STEWART-----------Associate Professor of Education
B.A., M.A., University of California. One-half year graduate study since 1929 at University of California. Appointed 1936.

HARCLEROAD, FRED F., JR.--------------**Director of Audio-Visual Education; Assistant Professor of Education**
A.B., 1939, M.A., 1942, Colorado State College of Education; Ph.D., 1947, Stanford University. Appointed 1946.

HARRINGTON, NEIL J.------------------------Acting Instructor in Chemistry
B.S., 1939, Monmouth College; one year of graduate study at DePaul University and Northwestern University. Appointed 1948.

HARVEY, DOROTHY R. (Mrs. F. A.)-------------**Assistant Professor in Botany**
B.A., San Diego State College; M.A., University of Southern California. One year graduate study since 1928 at University of Southern California and University of Chicago. Appointed 1924.

HARWOOD, ROBERT DANIEL--------------------------**Professor of Zoology**
A.B., 1920, Pomona College; Ph.D., 1928, Cornell University. Appointed 1928.

HASKELL, HARRIET---------------------------Assistant Professor of English
A.B., Mills; A.M., Bryn Mawr; Ph.D., University of Wisconsin. At San Diego State College since 1940, excepting 1943-1945.

HELLYER, C. DAVID-------------------------Assistant Professor of Journalism
B.A., 1936, The Principia; M.S., 1938, Columbia University. Appointed 1947.

HISCOX, ETHEL M.-------------------------------**Assistant Professor of Music**
Graduate of Oberlin College Conservatory; B.S., Columbia University; M.A., New York University. Voice study with Lila Robeson and Herbert Witherspoon of New York Metropolitan Opera Co. Appointed 1947.

HOUSEMAN, RICHARD A.--------------------Associate Professor of Education
B.S., 1936, Central Michigan College of Education; M.A., 1945, Ed.D., 1946, Teachers College, Columbia University. Appointed 1948.

HOUSER, LOWELL D.--------------------------------**Assistant Professor of Art**
Diploma, 1924, Chicago Art Institute. Five years' special study since 1924 in Mexico, Yucatan, Haiti, and New York City. Appointed 1938.

HUNTER, JAMES J., JR.---------------------**Director of Secondary Education;** Professor of Education
A.B., 1932, Cornell University; M.S., 1936, Ph.D., 1940, Syracuse University. Appointed 1946.

SENSEE, ROBERT W.------------------------Assistant Professor of Chemistry
B.A., 1941, Reed College; M.A., 1943, Ph.D., 1947, Oregon State College. Appointed 1948.

ACKSON, EVERETT GEE----------------------------------**Professor of Art**
B.A., 1930, San Diego State College. Three years special study in Mexico. M.A., 1939, University of Southern California. Appointed 1930.

OHNSON, FRANK LOUIS----------------------**Associate Professor of English**
B.A., 1928, M.A., 1929, University of Minnesota; Ph.D., 1934, University of Wisconsin. Appointed 1939.

ONES, KENNETH K., JR.---------------------------Instructor in Speech Arts
B.S., 1942, Northwestern University; M.A., 1948, Stanford University. Appointed 1948.

OSEPH, LIONEL------------------------------**Assistant Professor of Chemistry**
B.S., 1933, St. Louis University; M.S., 1934, Ph.D., 1937, Washington University. Appointed 1947.

KALBFELL, DAVID C.-------------------------Assistant Professor of Physics

A.B., 1934, University of California at Los Angeles; M.A., 1936, Ph.D., 1939, University of California. Appointed 1948.

KAPLAN, OSCAR J.---------------------------Assistant Professor of Psychology

A.B., 1937, M.A., 1938, University of California at Los Angeles; Ph.D., 1940, University of California. Appointed 1946.

KASCH, FREDERICK W.--------------Assistant Professor of Physical Education

B.S., 1935, M.S., 1937, University of Illinois; one-half year of graduate study at New York University. Appointed 1948.

KEENEY, JOSEPH SUMNER-----------------------------Professor of English

B.A., 1921, Yale College; M.A., 1928, Ph.D., 1933, University of California. Appointed 1933.

KENNEDY, CHESTER BARRETT---------------Assistant Professor of English

B.A., 1927, Chico State College; M.A., 1939, Stanford University. Three years graduate study since 1928 at Stanford University and the University of California. Appointed 1937.

KITZINGER, ANGELA M.--------------Assistant Professor of Health Education

A.B., Barnard College; M.A., Teachers College, Columbia University. Year of additional work at Central School of Hygiene and Physical Education and at Folk High School, Ollerup, Denmark. Appointed 1945.

KLAPP, ORRIN E.-----------------------------Assistant Professor of Sociology

M.A., 1940, Ph.D., 1947, University of Chicago. Appointed 1948.

KUWARTH, MADGE E.--------------------------------Instructor in Education

A.B., University of Washington; A.M., Teachers College, Columbia University. Appointed 1947.

LAMDEN, CHARLES W.----------------------Associate Professor of Commerce

A.B., 1937, M.A., 1939, University of California at Los Angeles; Ph.D., 1948, University of California. Appointed 1946.

LAURITSEN, WILLIAM H.----------------------Professor of Health Education

A.B., 1923, M.A., 1929, University of Nebraska; Ph.D., 1939, Ohio State University. Appointed 1947.

LEIB, JULIUS------------------------------------Associate Professor of Music

Three years special study at Leipzig Conservatory. Appointed 1938.

LEIFFER, DONALD B.----------------------------Professor of Political Science

A.B., 1930, University of California at Los Angeles; M.A., 1932, Ph.D., 1939, Harvard University. Appointed 1948.

LEMME, MAURICE M.--------------------Associate Professor of Mathematics

A.B., 1926, Oakland City College, Indiana; A.M., 1928, Indiana University; Ph.D., 1947, Purdue University. Appointed 1948.

LEONARD, CHARLES B.--------------------------------Professor of History

B.A., 1921, M.A., 1922, Ph.D., 1929, University of California. Appointed 1921.

LESLEY, LEWIS B.----------------------------------------Professor of History

B.A., 1920, Stanford University; M.A., 1923, Ph.D., 1933, University of California. Appointed 1924.

LINLEY, JAMES------------------------------Assistant Professor of Education

Ph.B., 1927, University of Chicago; M.S., 1934, Ph.D., 1938, University of Southern California. Appointed 1945.

LIVINGSTON, GEORGE ROBERT--------------------Professor of Mathematics

B.S., 1910, M.A., 1922, University of California. One year graduate study since 1922 at University of California, University of California at Los Angeles, and University of Southern California. Appointed 1921.

LOCKMAN, EVELYN----------------Assistant Professor of Physical Education

B.A., Vanderbilt University; M.A., George Peabody College; one year of graduate study at the University of Wisconsin and New York University. Appointed 1948.

LORBER, NANCY CHASTAIN (Mrs. J.)............Acting Instructor in English

B.A., San Diego State College; one year graduate study at University of California. Appointed 1947.

LUCIO, WILLIAM HOWARD................Director of Elementary Education; Associate Professor of Education

A.B., 1934, M.A., 1937, Ph.D., 1944, University of California. Appointed 1939.

MACQUARRIE, WILLIAM D..............Assistant Professor of Industrial Arts

B.A., 1935, San Jose State College; M.A., 1938, Stanford University. One and one-half years of graduate study at the University of Southern California. Appointed 1947.

MADDEN, RICHARD................Dean of Education; Professor of Education

B.A., 1926, Nebraska (Peru) State Teachers College; M.A., 1930, Ph.D., 1931, Columbia University. Appointed 1939.

MARCHAND, ERNEST L.........................Associate Professor of English

B.A., and M.A., 1926, University of Washington; Ph.D., 1938, University of Wisconsin. Appointed 1946.

McBLAIR, WILLIAM............................Acting Instructor in Biology

B.A., 1947, San Diego State College; one-half year of graduate work at the University of California. Appointed 1948.

McCLINTIC, JOSEPH O.......................Associate Professor of Economics

A.B., 1924, Central College; A.M., 1927, University of Missouri; Ph.D., 1940, University of Wisconsin. Appointed 1946.

McCOLLOM, IVAN N..............................Director of Summer Sessions; Associate Professor of Psychology

B.A., 1930, Central Washington College of Education; B.S., 1931, M.S., 1932, University of Oregon; Ed.D., 1940, Colorado State College of Education. Appointed 1946.

McGAUGHEY, JANET M. (Mrs. J. R.).............Assistant Professor of Music

B.M., M.M., University of Michigan. Appointed 1947.

MENDENHALL, MARY..............Dean of Women; Professor of Philosophy

B.A., University of Colorado; M.A., University of Southern California; Ph.D., Yale University. Appointed 1939.

MERRILL, JOHN E...............................Assistant Professor of History

A.B., 1933, Stanford University; A.M., 1934, Harvard University. Two years graduate study at Stanford University. Appointed 1946.

MERZBACHER, CLAUDE FELL.......................Instructor in Chemistry

B.S., 1939, University of Pennsylvania. Appointed 1947.

MESSIER, LEONARD N.........................Assistant Professor of French

A.B., 1935, San Diego State College; M.A., 1936, Ph.D., 1946, University of California. Appointed 1946.

MILLER, DOROTHY A..........................Acting Instructor in Chemistry

B.S., A.B., Southeast Missouri State Teachers College; M.S., State University of Iowa. Appointed 1947.

MILNE, DAVID S..............................Assistant Professor of Sociology

A.B., 1932, University of California at Los Angeles; M.A., 1939, University of Southern California; Ph.D., 1948, University of Chicago. Appointed 1946.

MOE, CHESNEY R.........................................Professor of Physics

B.A., 1929, M.A., 1931, Stanford University; Ph.D., 1941, University of Southern California. Appointed 1931.

MOORE, EDWENA B. (Mrs. E. J.).....................Instructor in Education

B.A., San Diego State College. Appointed 1947.

MORITZ, CHARLES E...........................Assistant Professor of Biology

A.B., 1932, Dartmouth College; Ph.D., 1936, University of California. Appointed 1946.

MYERS, MABEL A. ---------- Assistant Professor of Biology

B.A., M.A., Pomona College; Ph.D., Cornell University. Post doctoral study at University of Southern California, University of California at Los Angeles, University of Wisconsin and Claremont Colleges. Appointed 1946.

NASATIR, ABRAHAM PHINEAS ---------- Professor of History

B.A., 1921, M.A., 1922, Ph.D., 1926, University of California. Appointed 1928.

NICHOLS, AMBROSE R., JR. ---------- Associate Professor of Chemistry

B.S., 1935, University of California; Ph.D., 1939, University of Wisconsin. Appointed 1939.

NORLAND, CALVERT E. ---------- Instructor in Biology

B.A., 1931, Pomona College; M.S., 1933, University of California. One and one-half years graduate study at University of California; one and one-half years graduate study at Claremont Colleges. Appointed 1947.

OLSON, ANDREW C., JR. ---------- Instructor in Biology

B.A., 1939, San Diego State College; M.S., 1942, University of Idaho. One year graduate study at University of California. Appointed 1946.

OPPENHEIMER, MAX, JR. ---------- Instructor in Foreign Languages

B.ès L, 1935, University of Paris; B.A., 1941, New York University; M.A., 1942, University of California at Los Angeles; Ph.D., 1947, University of Southern California. Appointed 1947.

OSBORN, CLARENCE G. ---------- Professor of History and Political Science

B.A., 1926, M.A., 1927, Ph.D., 1935, Stanford University. At San Diego State College 1928-1929, and since 1937.

PATTERSON, LENA E. ---------- Professor of Art

A.B., B.S., Ohio University; M.A., Columbia University. One year graduate study since 1918 in Berlin, Vienna, Paris, London. At San Diego State College since 1933. Deceased January 10, 1949.

PEASE, GLENN R. ---------- Acting Assistant Professor of Psychology

A.B., 1915, Albion College; M.A., 1927, Ph.D., 1928, State University of Iowa. Appointed 1947.

PEIFFER, HERBERT C., JR. ---------- Dean of Students;
Professor of Psychology and Guidance

A.B., 1928, University of California at Los Angeles; M.A., 1930, Ph.D., 1939, Stanford University. Appointed 1937.

PERRY, FAY V. (Mrs. J. M.) ---------- Director of Guidance for Provisional Students;
Associate Professor of Sociology

B.A., San Diego State College; M.A., Ed.D., University of Southern California. Appointed 1936.

PETERSON, CHARLES E. ---------- Dean of Men; Professor of Physical Education

A.B., 1928, San Diego State College; M.A., 1937, Claremont Colleges. Appointed 1921.

PFAFF, PAUL LEWIS ---------- Associate Professor of Speech Arts

B.A., 1929, Stanford University; M.A., 1937, University of Southern California. Two years study since 1937 at University of Southern California. Appointed 1931.

PHILLIPS, GEORGE L. ---------- Assistant Professor of English

B.A., 1931, Dartmouth College; M.A., 1932, Harvard University; Ph.D., 1937, Boston University. Appointed 1947.

PHILLIPS, WALTER THOMAS ---------- Professor of Spanish

A.B., 1925, University of Washington; M.A., 1926, Stanford University; Ph.D., 1943, University of Southern California. Graduate study at National University of Mexico, Institute of French Education, Middlebury College Italian School. Appointed 1927.

POST, LAUREN CHESTER ---------- Professor of Geography

A.B., 1924, M.A., 1931, Ph.D., 1937, University of California. Appointed 1937.

POVENMIRE, E. KINGSLEY ---------- Assistant Professor of Speech Arts

B.S., 1929, Ohio State University; M.F.A., 1933, Yale University. Appointed 1946.

**RESTON, DUDLEY A.**------------------------Assistant Professor of Biology

B.S., 1933, Washington State College; M.S., 1940, Ph.D., 1947, University of Minnesota. Appointed 1948.

**RUGH, EARL E.**--------------------**Acting Assistant Professor of Mathematics**

B.S., 1899, Ohio Wesleyan University; M.A., 1923, Columbia University. Appointed 1946.

**AGEN, KATHERINE M.**----------------------**Assistant Professor of History**

B.A., Penn College; M.A., Bryn Mawr College; Ph.D., University of Wisconsin. Appointed 1947.

ENSHAW, MORTON J.----------------Coordinator, Personnel Services Center;
Assistant Professor of Psychology

A.B., 1938, M.A., 1940, Colorado State College of Education; Ph.D., 1945, Stanford University. Appointed 1948.

ICHARDSON, M. BRUCE--------------------------Lecturer in Engineering

A.B., 1927, Aeronautical Engineer, 1928, Stanford University. Appointed 1948.

ICHARDSON, ROBERT W.------------------------Professor of Geography

A.B., 1930, Ph.D., 1943, University of California. At San Diego State College 1939-1942 and since 1948.

**IDOUT, LIONEL U.**-----------------------------------**Instructor in History**

A.B., 1937, San Diego State College; M.A., 1940, and one and one-half years graduate study at University of California. Appointed 1946.

**OBINSON, DUDLEY HUGH**-------------------------**Professor of Chemistry**

B.A., 1927, Louisiana State University; M.S., 1932, University of Iowa; Ph.D., 1942, University of Southern California. Appointed 1928.

**OBINSON, EVELYN L.**----------------------**Instructor in Physical Education**

B.S., Mary Washington College of the University of Virginia; M.S., University of Southern California. Appointed 1946.

**OGERS, SPENCER LEE**-------------------------**Professor of Anthropology**

B.A., 1927, San Diego State College; M.A., 1930, Claremont Colleges; Ph.D., 1937, University of Southern California. Appointed 1930.

OHFLEISCH, KRAMER J.---------------------Associate Professor of History

A.B., 1933, M.A., 1935, Ph.D., 1946, University of California. Appointed 1947.

OSS, MELVYN K.--------------------------Assistant Professor of Chemistry

A.B., 1939, San Diego State College; M.S., 1942, and two years graduate study at University of Southern California. Appointed 1939.

OWE, ROBERT D.--------------------------Associate Professor of Chemistry

A.B., 1931, Engineer in Engineering Chemistry, 1932, Ph.D., 1939, Stanford University. Appointed 1946.

UJA, HARRY---------------Assistant Professor of Philosophy and Psychology

A.B., 1933. University of California at Los Angeles; M.A., 1934, University of Chicago; Ph.D., 1936, Princeton University; one year post doctoral study at University of California at Los Angeles. Appointed 1947.

UOCCO, ILSE H. (Mrs. L.)------------------------Associate Professor of Art

B.E., University of California at Los Angeles; M.A., Columbia University. Appointed 1934.

AN, FREDERICK L.----------------------Associate Professor of Economics

B.S., 1916, Tufts College; Ph.D., 1930, University of California. Appointed 1946.

HEY, OLE------------------------Acting Assistant Professor of Mathematics

B.S., 1924, M.A., 1932, and one year of graduate study at the University of Minnesota. Appointed 1947.

HMOCK, JOYCE C. (Mrs. D.)----------------------Instructor in Education

A.B., San Diego State College. Appointed 1947.

HOELLER, WILBUR C.-------------------------Instructor in Engineering

B.S.C.E., 1945, M.S.C.E., 1948, University of Texas. Appointed 1948.

SCHRUPP, MANFRED H.--------------------Assistant Professor of Education

B.S., 1935, M.Ed., 1941, and one and one-half years of graduate study at the University of Minnesota. Appointed 1948.

SCHUNERT, JIM R.----------------------------Assistant Professor of Education

B.S., 1934, M.A., 1941, and one year of graduate study at the University of Minnesota. Appointed 1948.

SCHUTTE, WILLIAM H.--------------Assistant Professor of Physical Education

B.S., 1933, University of Idaho, M.S., 1947, University of Southern California. Appointed 1947.

SCHWARTZ, EVA H. (Mrs. H.)-----------------Acting Instructor in Chemistry

B.S., M.S., and one and one-half years graduate study at University of California. Appointed 1946.

SCHWOB, MARION LYON (Mrs. W. E.)-Associate Professor of Physical Education

B.A., University of Iowa; M.S., University of Southern California. Appointed 1934.

SCOTT, FRANK L.---------------------Assistant Professor of Physical Education

A.B., 1931, Grinnell College; M.A., 1940, University of Michigan. Appointed 1947.

SELLMAN, HUNTON D.--------------------------------Professor of Speech Arts

B.S., 1922, Purdue University; M.S., 1925, University of Arizona. Three and one-half years graduate study at University of California, University of North Carolina and Yale University. Appointed 1946.

SHANNON, FLORENCE S. (Mrs. E. L.)------------------Assistant Professor o
Physical Education

B.A., University of California; M.S., University of Southern California Appointed 1933.

SHIELDS, ALLAN E.-------------------------Assistant Professor of Philosoph

A.B., 1941, University of California; M.A., 1947, and one year additiona graduate study at University of Southern California. Appointed February, 1949

SHIELDS, KARENA P.--------------------Acting Assistant Professor of Englis

A.B. and one year of graduate study at the University of Southern California Appointed 1948.

SHOUSE, CLAUDE F.-------------------------------------Instructor in Englis

A.B., 1928, Georgetown College; M.A., 1941, University of Kentucky; one an one-half year graduate study at University of Pittsburgh and University o Southern California. Appointed 1946.

SILVERNAIL, CHESTER J.---------------------------Instructor in Astronom

A.B., 1948, San Diego State College. Appointed 1948.

SION, ESTHER B. (Mrs. Peter)------------------------Acting Instructor in Ar

B.F.A. and M.F.A., University of Southern California. Appointed February 1949.

SMITH, CHARLES ROBERTS---------Assistant Professor of Physical Educatio

B.A., 1931, San Diego State College; M.S., 1949, University of Southern California. Appointed 1933.

SMITH, CLIFFORD EDWARD--------------------------Professor of Astronom

B.A., 1923, Carleton College; M.A., 1926, Swarthmore College; Ph.D., 1936 University of California. Appointed 1937.

SMITH, DEANE FRANKLIN---------------------Associate Professor of Musi

B.Mus., 1931, M.Mus., 1939, Northwestern University. Appointed 1939.

SMITH, LOUIS E., JR.----------------------------Assistant Professor of Physic

A.B., 1938, San Diego State College; Ph.D., 1945, University of Washington Appointed 1946.

SORENSON, GEORGE N.-----------------------------Assistant Professor of Ar

A.B., 1937, San Diego State College; M.A., 1946, University of Southern California. Appointed 1946.

SPANGLER, JOHN A.------Assistant Professor of Chemistry

A.B., 1939, Ph.D., 1942, West Virginia University. Appointed 1946.

SPORTSMAN, CHARLES C.------Assistant Professor of Physical Education

B.S., 1927, North Texas State Teachers College; M.S., 1947, University of Southern California. Appointed 1947.

SPRINGSTON, CHRISTINE------Associate Professor of Music

B.A., B.M., University of Redlands; M.A., University of Washington. Diplomée d'execution, Conservatoire Americain, Fontainebleau, France. Appointed 1930.

STEINMETZ, HARRY CHARLES------Associate Professor of Psychology

B.A., 1924, M.A., 1927, University of California; Ph.D., 1947, Purdue University. Appointed 1930.

STONE, HAMILTON L.------Acting Assistant Professor of Engineering

B.S., 1925, U. S. Naval Academy. Two and one-half years graduate study. Appointed 1947.

STONE, JOHN PAUL------Head Librarian; Professor of Library Science

B.S., 1926, Northwest Missouri State Teachers College; B.S., 1929, M.S., 1930, University of Illinois; Ph.D., 1945, University of Chicago. Appointed 1930.

STORM, ALVENA (Mrs. Eugene)------Associate Professor of Geography

A.B., A.M., University of California. Extensive travel and study in Europe, Panama and United States. Appointed 1926.

STRAUB, LURA LYNN------Assistant Professor of Commerce

B.A., Jamestown College; M.C.S., Indiana University. Appointed 1948.

SWIGGETT, JEAN D.------Assistant Professor of Art

A.B., 1934, San Diego State College; M.F.A., 1939, University of Southern California. Appointed 1946.

TALBOY, RUTH A.------Assistant Professor of Home Arts

B.S., Iowa State College; M.A., Stanford University. Appointed 1947.

TAYLOR, MERREL A.------Instructor in Biology

A.B., 1936, Indiana University; B.S.F., 1938, M.A., 1940, University of Michigan. Appointed 1946.

TERHUNE, JOHN A.------Lecturer in Physics

B.S., 1916, U. S. Naval Academy; M.S., 1929, Engineering School, Harvard University. Appointed 1946.

TERRY, WILLIAM L.------Lecturer in Physical Education

A.B., 1930, Western Kentucky State College; M.S., 1932, Indiana University; two years of additional study at University of Kentucky and University of Illinois. Appointed 1946.

THEOBALD, JOHN R.------Associate Professor of English

B.A., 1925, St. Catherine's College, Oxford University; M.A., 1928, Mansfield College, Oxford University; Ph.D., 1942, University of Iowa. Appointed 1946.

TIDWELL, JAMES N.------Associate Professor of English

B.A., 1929, Simmons University; M.A., 1933, University of Oklahoma; Ph.D., 1947, Ohio State University. Appointed 1947.

TOLLEFSEN, DOROTHY J.------Instructor in Physical Education

A.B., M.A., University of California. Appointed 1946.

TORBERT, FRANCES B. (Mrs. H.)------Assistant Professor of Commerce

A.B., Stanford University; M.A., University of Southern California. One year graduate work at Stanford University. At San Diego State College since 1937 excepting 1943-1946.

TRAIL, MABEL COY------Associate Professor of English

B.A., Parsons College; M.A., State University of Iowa; Ph.D., University of Southern California. Appointed 1935.

TUCKER, GORDON H.------Associate Professor of Biology

B.S., 1931, M.S., 1934, University of South Carolina; Ph.D., 1934, University of North Carolina. Appointed 1945.

WALKER, HILDE KRAMER (Mrs.)--------------Assistant Professor of German

B.A., M.A., Northwestern University. Appointed 1931.

WALLING, CURTIS R.--------------Associate Professor of Engineering

B.A., 1925, E.E., 1926, Stanford University. One and one-half years of graduate study since 1926 at Stanford University and the University of Southern California. Appointed 1931.

WARREN, TULLY E.--------------Acting Instructor in Political Science

B.A., 1938, M.A., 1939, and two years of graduate study at Stanford University. Appointed 1947.

WATENPAUGH, FRANK M.--------------Associate Professor of Commerce

A.B., 1916, Pomona College; M.A., 1931, University of Southern California. Two years graduate study since 1931 at University of Southern California and University of Oregon. Appointed 1935.

WATSON, DONALD R.--------------Dean of Arts and Sciences
Professor of Physical Science

B.A., 1924, B.S., 1925, M.A., 1927, Ed.D., 1940, University of Southern California. Appointed 1939.

WEST, EDNA A.--------------Assistant Professor of Commerce

B.A., Santa Barbara State College; M.A., Claremont Colleges. Appointed 1948.

WHITE, ALFRED E.--------------Registrar; Director of Educational Research;
Associate Professor of Guidance

A.B., 1922, M.A., 1923, University of California; Ed.D., 1941, Stanford University. Appointed 1946.

WOLF, ERNEST M.--------------Instructor in Foreign Languages

Study at the Universities of Berlin, Paris, Muenster, Cambridge and Bonn. Ph.D., 1934, University of Bonn. Post doctoral study at Universities of Cambridge, California at Los Angeles, and Southern California. Appointed 1947.

WRIGHT, WILLIAM H.--------------Professor of Commerce

B.S., 1917, M.A., 1928, University of California, Ph.D., 1943, University of Southern California. Appointed 1921.

ZIEGENFUSS, GEORGE--------------Assistant Professor of Physical Education

B.A., 1940, University of Washington; M.A., 1947, and one year of graduate study at Teachers College, Columbia. Appointed 1948.

## ASSISTANT INSTRUCTORS

BYRNE, CHARLES T.--------------Assistant in Journalism

A.B., 1948, San Diego State College.

CRAWFORD, RONALD M.--------------Assistant in Biology

A.B., 1948, San Diego State College.

DRESCHER, ROBERT C.--------------Assistant in Chemistry

A.B., 1948, San Diego State College.

FLEMING, GEORGE M.--------------Assistant in Education

A.B., 1949, San Diego State College.

GRASTY, GEORGE M.--------------Assistant in Biology

A.B., 1927, University of Texas.

HAYDEN, BERNARR F.--------------Assistant in Education

A.B., 1949, San Diego State College.

HOWARD, FRANCIS J.--------------Assistant in Physics

A.B.1944, University of California at Los Angeles; one year of graduate study at Harvard, Massachusetts Institute of Technology and Scripps Institution of Oceanography.

LEWIS, WILLIAM M.--------------Assistant in Biology

A.B., 1949, San Diego State College.

MILLER, HAROLD C.--------------Assistant in Education

A.B., 1949, San Diego State College.

PUTNAM, WILLIS A., JR.--------------------Assistant in Physics
B.S., 1948, Southwestern Louisiana Institute.

RUSK, JAMES H., JR.--------------------Assistant in Physics
A.B., 1948, San Diego State College.

RUTLEDGE, CLYDE K.--------------------Assistant in Physics
A.B., 1948, San Diego State College.

## LECTURERS

ANDREWS, JULIA G. (Mrs. F. S.)--------------------Lecturer in Art
A.B., Northwestern University; M. A. Columbia University; two years graduate study at Teachers College, Columbia. At San Diego State College since 1947.

BARNES, DR. MELVIN W.--------------------Lecturer in Education
Coordinator Extension Services, San Diego City Schools, University of California and San Diego State College. At San Diego State College since 1947.

BLAKE, DEAN--------------------Lecturer in Meteorology
Meteorologist, U. S. Weather Bureau. At San Diego State College since 1927.

BURGERT, ROBERT H.--------------------Lecturer in Education
San Diego City Schools. At San Diego State College since 1948.

CHERNY, GEORGE V.--------------------Lecturer in Physical Education
Self employed. At San Diego State College since 1949.

COLLINS, MYRON D.--------------------Lecturer in Music
Professional musician. At San Diego State College since 1948.

CONSIDINE, CHARLES R.--------------------Lecturer in Commerce
Industrial Engineer; Public Accountant. At San Diego State College since 1946.

DIRKS, JOHN H.--------------------Lecturer in Art
Self employed. At San Diego State College since 1947.

GELCHER, JOSEPH--------------------Lecturer in Commerce
Insurance Underwriter. At San Diego State College since 1946.

GOODWIN, JOHN H.--------------------Lecturer in Commerce
Insurance broker. At San Diego State College since 1947.

HUFF, GEORGE D., M.D.--------------------Lecturer in Health and Hygiene
Practicing physician. At San Diego State College since 1939.

HUNTINGTON, LUCILE H. (Mrs.)--------------------Lecturer in Commerce
Self employed. At San Diego State College since 1949.

JENKINS, DR. ROBERT E.--------------------Lecturer in Education
Director of Research, San Diego City Schools. At San Diego State College since 1948.

JUSTICE, PRESTON G.--------------------Lecturer in Commerce
Preston Justice Advertising Agency. At San Diego State College since 1948.

KOEPPE, DR. CLARENCE E.--------------------Lecturer in Geography
B.S., 1914, Colgate University; A.M., 1927, Ph.D., 1929, Clark University. At San Diego State College since 1948.

LEACH, RAYMOND E.--------------------Lecturer in Biology
San Diego County Health Department. At San Diego State College since 1949.

LINDSLEY, BYRON F.--------------------Lecturer in Commerce
Attorney at law. At San Diego State College since 1947.

MARSHALL, JOHN A.--------------------Lecturer in Commerce
Divisional Merchandise Manager, Sears Roebuck & Co. At San Diego State College since 1949.

McLEES, BERTRAM ---------- Lecturer in Commerce

Deputy District Attorney. At San Diego State College since 1946.

McMAHAN, ROLAND J. ---------- Lecturer in Commerce

President, McMahan's Furniture Stores. At San Diego State College since 1948.

PANOSH, ANNA M. (Mrs. L. C.) ---------- Lecturer in Spanish

A.B., University of Denver. One year graduate study at University of Mexico, Centro de Estudios Historicos and University of California. At San Diego State College since 1946.

SMALL, DR. ARNOLD M. ---------- Lecturer in Psychology

Head of Psychological Studies Division, U. S. Navy Electronics Laboratory. At San Diego State College since 1948.

SNODGRASS, HERMAN G. ---------- Lecturer in Political Science

Civil Service Training Officer, U. S. Naval Air Station. At San Diego State College since 1948.

STANIFORTH, ROBERT O. ---------- Lecturer in Commerce

Swing & Scharnikow, Attorneys. At San Diego State College since 1948.

STEINBERG, GERTRUDE H. (Mrs. Wm.) ---------- Lecturer in Home Arts

B.S., University of Arizona; graduate study at University of Arizona and Oregon State College. At San Diego State College since 1949.

SYLVESTER, HELEN K. ---------- Lecturer in Education

Principal, Euclid School. A.B., San Diego State College.

TROGE, RALPH F. ---------- Lecturer in Education

Principal, Woodrow Wilson Junior High School. B.S., 1923, Northern Normal and Industrial School; M.A., 1930, Ed.D., 1940, University of Oregon.

VAN CLEAVE, MAURICE ---------- Lecturer in Commerce

B.S., 1919, U. S. Naval Academy. At San Diego State College since 1948.

WILEY, JOAN G. (Mrs. J. N.) ---------- Lecturer in Psychology and Sociology

B.A., M.S.S., University of Buffalo. At San Diego State College since 1947.

WOLFER, DONALD P. ---------- Lecturer in Political Science

Assistant to the City Manager of San Diego. At San Diego State College since 1948.

## MEDICAL STAFF

| | |
|---|---|
| O. S. Harbough, M.D. | Medical Examiner |
| James R. Phalen, M.D. | Medical Examiner |
| Frances E. White, M.D. | Medical Examiner |
| Marilyn M. Fenwick, P.H.N. | Nurse |

## ADMINISTRATIVE OFFICE STAFF

| | |
|---|---|
| Amelia F. Barnes | Mimeograph Office |
| Anne T. Brown | Admissions Secretary |
| Evadne Deardorf | Assistant Registrar |
| Gertrude K. Dickinson | Senior Account Clerk, Business Office |
| Jacqueline Farquhar | Registrar's Office |
| Carey D. Folger | Senior Account Clerk, Business Office |
| Lorraine Griffore | Intermediate Stenographer Clerk, Business Office |
| Genevieve M. Hamblen | Secretary, Personnel Services Center |
| Irene Janeck | Secretary, Physical Science Division |
| Constance King, B.S. | Secretary to Dean of Women |
| Fay Landweer, A.B. | Secretary to Director of Summer Sessions and Chairman of Social Science Division |
| Patricia Lindsay | Intermediate Typist Clerk, Business Office |
| Ruth E. Little, A.B. | Mimeograph Office |
| Jean F. McGhee, B.S. | Credentials Secretary |
| Miriam E. Moore, A.B. | Secretary to Dean of Arts and Sciences and Dean of Education |
| Donald G. Parker | Senior Account Clerk, Business Office |
| Marion L. Parker, M.A. | Statistician |
| Martha E. Perrill, A.B. | Recorder |
| Helen M. Perry | Registrar's Office |
| Katherine Pyle, A.B. | Secretary, Veteran's Office |
| Marjorie Rand | Intermediate Stenographer Clerk, Business Office |
| Doris L. Reese | Assistant Secretary to Dean of Arts and Sciences and Dean of Education |
| Nina M. Schnars | Junior Account Clerk, Business Office |
| Florence Schneider | PBX Operator |

# CALENDAR 1950-1951

## SUMMER SESSION, 1950

Term I —June 19-July 28
Term IIA—July 31-August 18
Term II —July 31-September 1

## FALL SEMESTER, 1950-1951

| | |
|---|---|
| July 15 | Qualifying examinations for all entering students (8.30 a.m.-12.30 p.m.). |
| August 1 | Applications for admission must be filed on or before this date. |
| August 19 | Qualifying examinations for all entering students (8.30 a.m.-12.30 p.m.). |
| August 23 | All admission requirements must be completed by this date, including receipt of official transcripts. |
| September 6, 7, 8, 11 | Orientation program. Entering freshmen are required to be on the campus daily to attend all scheduled events and keep all appointments. Other new students are required to keep all scheduled appointments and are strongly urged to attend other events. |
| September 6 | College aptitude test for transfer students registering late. (10-11.30 a.m.) |
| September 8 | Teacher training qualifying examinations for transfer students with at least sophomore standing: Fundamentals test for all teacher training candidates (8.30 a.m.-12 m.); General Culture test for candidates for secondary school credentials (1 p. m.-4.30 p.m.). |
| September 16 | Qualifying examinations for students registering late (8.30 a.m.-12.30 p.m.). |
| September 20 | College aptitude test for transfer students registering late (8.30 a.m.-10 a.m.). |
| September 12-13 | Registration and payment of fees. |
| September 14 | Instruction begins. Late registration fee becomes effective. |
| September 25 | Last date for late registration. |
| September 28 | Applications for admission to teacher education. Little Theatre, 12 m. |
| September 29 | Last date for filing application for M.A. degree. |
| November 3 | Last date for withdrawal from classes. |
| November 23-25 | Thanksgiving recess. |
| December 8 | Last date for filing applications for mid-year graduation. |
| December 16 | Last day before Christmas recess begins. |
| January 2 | Classwork resumes. |
| January 17-24 | Semester examinations. |
| January 24 | End of first semester. |

## SPRING SEMESTER, 1950-1951

| | |
|---|---|
| January 2 | Applications for admission must be filed on or before this date. |
| January 7 | Qualifying examinations for all entering students (8.30 a.m.-12.30 p.m.). |
| January 13 | All admission requirements must be completed by this date, including receipt of official transcripts. |

| | |
|---|---|
| January 27, 29, 30 | Orientation program. All entering freshmen are required to be on the campus daily to attend all scheduled events and keep all appointments. Other new students are required to keep all scheduled appointments and are strongly urged to attend other events. |
| January 27 | College aptitude test for transfer students registering late (8.30 a.m.-10 a.m.). |
| January 29 | Teacher training qualifying examinations for transfer students with at least sophomore standing: fundamentals test for all teacher training candidates (8.30 a.m.-12 m.); general culture test for candidates for secondary school credentials (1 p.m.-4.30 p.m.) |
| January 31 and February 1 | Registration and payment of fees. |
| February 2 | Instruction begins. Late registration fee becomes effective. |
| February 12 | Last date for late registration. |
| February 16 | Last date for filing application for M.A. degree. |
| February 22 | Applications for admission to teacher education, Little Theatre, 12 m. |
| March 19-24 | Spring recess. |
| March 30 | Last date for withdrawal from classes. |
| April 20 | Last date for filing application for June or summer graduation. |
| May 30 | Memorial Day—holiday. |
| May 31-June 7 | Semester examinations. |
| June 7 | End of second semester. |
| June 8 | Commencement. |

## SUMMER SESSION, 1951

Term I —June 18-July 27
Term II—July 30-August 17

# FUNCTIONS OF THE STATE COLLEGES

The state colleges have three major functions, namely: (1) To help the individual student to develop a well-rounded and adjusted personality; (2) to promote in all students civic intelligence and competence; and (3) to create supplies of trained men and women to serve as teachers and officials in the elementary and secondary schools, to fill places of leadership in business and industry, and to transfer to graduate institutions to equip themselves to extend the frontiers of knowledge and to occupy the positions of leadership in various professions. In terms of publicly supported higher education, the state colleges and the university together make provision for the realization of all the essential objectives of higher education in our State.

To achieve their unique purposes the state colleges have developed and are improving offerings as follows:

1. Teacher education curricula for those students who plan to teach, supervise, or administer in the elementary school, the junior high school, and in secondary schools.
2. Preprofessional curricula.
3. Four-year curricula in such fields as business, industry, governmental services, homemaking, and social service.
4. General education for students who take work which leads toward the bachelor's degree or to the higher professions through graduate work.
5. Guidance services to assist the individual student to plan his educational program and to make his college and life adjustments.
6. Extension courses in appropriate fields.

The democratic controls exercised over the state colleges make them readily and effectively responsive to individual and community needs and encourage them continuously to make significant improvements in both curriculum and personal services. The state colleges are thus laboratories in which the facts and theories developed in research, in community living, and in daily association with students are reflected in an instructional program designed to provide educational services inherent in the principle of equality of opportunity.

# THE COLLEGE

## LOCATION AND ENVIRONMENT

Renowned as a winter resort with a mild but invigorating climate, San Diego has become equally famous for its cool summers. High cultural standards in art, music, literature, and science create a stimulating environment for a college. Many of these advantages are to be found in the heritage resulting from the expositions of 1915-16 and 1935-36, including the buildings themselves, which portray the best types of Spanish colonial art and architecture. Housed in these buildings are the Fine Arts Gallery, exhibits in anthropology, natural history, and American archaeology, which are in many respects unsurpassed. The outdoor organ, the Ford Bowl, and the horticultural gardens make Balboa Park, in which all these facilities are located, world renowned. The Scripps Institution of Oceanography, operated by the University of California at La Jolla, gives opportunity for important cooperation in the biological sciences.

## BUILDINGS AND EQUIPMENT

On February 1, 1931, the college was moved to the new campus, located one mile north of the city's principal east-west boulevard, El Cajon Boulevard. The buildings are of Spanish-Moorish architecture which is well suited to the landscape and climate of this region. They include the Academic Building (which houses lecture halls, classrooms and administrative offices) ; the Science Building; the Fine Arts Building; the Library; the Little Theater; the Music Building; the Campus Elementary School; Scripps Cottage (a social clubhouse for women students) ; the Cafe and Book Store; and the Physical Education Building (a structure with adequate facilities for both men and women). The gymnasium contains a very fine basketball floor with stands that will accommodate 1,500 spectators. A fine concrete stadium, constructed in a natural site, has a seating capacity that is adequate for present needs. The open air theater, seating 4,200 persons, serves as a meeting place for large groups.

## FACILITIES FOR THE EDUCATION OF TEACHERS

The college maintains a modern elementary school on the campus where it has developed an extensive program for the education of elementary school teachers. The classroom-laboratory plan which calls for the use of work-rooms, the library, and shops affords unusual opportunities for the induction of students into teaching. By arrangement with the San Diego city and county schools, directed teaching is provided in the elementary and secondary schools.

## THE FACULTY

The professional education of the faculty places the college at the 97 percentile position among teacher education institutions of the Country. For listing and further details see the directory.

## THE LIBRARY

The library facilities of this college are noteworthy for an institution of its size. The library consists of well over 110,000 books and receives more than 700 different periodicals selected to meet the requirements of a modern educational institution. Professionally trained librarians are available to render assistance to students and faculty in their reading and reference work.

The Campus Elementary School Library, representing a collection of 14,000 volumes, possesses equipment and building facilities that are unique.

## ACCREDITATION

San Diego State College is a member of the Northwest Association of Secondary and Higher Schools, the American Association of Colleges for Teacher Education, and the Western College Association.

## LIVING ACCOMMODATIONS

Living arrangements for students whose homes are not in San Diego or within commuting distance are made through the offices of the Dean of Women or the Dean of Men. Women students are urged to live in the residence hall adjoining the campus. Careful consideration is given to study conditions, healthful living, and adequate social opportunities. Room and board may be secured for approximately $275 per semester, payable in four installments. Opportunities to reduce this figure by working a few hours each week are occasionally available. Reservations should be made in advance through the Manager of Quetzal Hall, 5192 College Avenue, San Diego 5, California. Single women students under the age of 21 who find other accommodations more desirable must file with the Dean of Women a statement from the parent or guardian.

## VETERANS' EDUCATION AND HOUSING

The college has been approved by various accrediting agencies to offer courses for veterans leading to the baccalaureate in some 22 major fields and to the master's degree and various teaching credentials. In connection with the Personnel Services Center, a veterans' office is maintained on the campus to facilitate registration, aid in the establishment of benefits, afford special counseling services, and serve as an information center.

Through the City of San Diego, 400 family units formerly under the jurisdiction of the Federal Public Housing Authority have been made available to the college for the housing of its married veterans. These units are located some eight miles from the campus proper at Aztec Terrace, midway between Old Town and Loma Portal. Applications for housing at Aztec Terrace are made through the office of the Dean of Men.

## STUDENT LIFE

A rich field of extracurricular activities is available to the student throughout his college life. The student is urged to select these activities carefully in order that he may profit by such extra-class experiences without lowering his standards of scholarship. The *Student Handbook*, available at the time of registration, gives information concerning activities which include organizations in every department of the college, and opportunities for individual and group experience in the social, athletic, fraternal, religious and governmental life of the campus.

## STUDENT HEALTH SERVICE

The Health Department is maintained for the protection and care of student health. A complete physical examination is required of each student upon admission to college. Careful attention is given to cases undergoing remedial treatment or to cases in which a modification of study load or amount of participation in physical activities seem advisable.

A college physician and school nurse are available for consultation and emergency treatment. Students who have been absent over three days because of illness should receive clearance from the Health Office before returning to classes.

A group plan for accident insurance is in operation for students who desire to participate.

## PERSONNEL SERVICES CENTER

The college offers the services of a trained staff to students who wish help in the solution of problems which are personal, social, academic, or occupational in nature. It is a program designed to help students gain the greatest possible advantage of their college experience. Agencies and facilities cooperating in the effort to assist students include the student health service, reading and study laboratory, the speech improvement program, mathematics clinic, the placement and occupational guidance service, and a staff of personal counselors. Students who wish to take advantage of these facilities may do so through the Personnel Services Center.

## PLACEMENT OFFICE

The Placement Office provides a central source of information on placement opportunities and vocational trends. The staff assists undergraduates in finding part time employment. Full time employment for graduates or former students is facilitated through contacts with schools, businesses, and industries in this locality.

## SCHOLARSHIPS

A number of scholarships for both men and women has been made available through the efforts of the alumni, civic organizations, student organizations, business and professional groups and individuals, and other friends of the college. Superiority in ability and achievement, strength of character, and worthiness from the point of view of need are the standards upon which selection is based. Scholarship aid is limited for the most part to students who have completed at least one semester at the San Diego State College. Except for athletics grants-in-aid, which are initiated through the Director of Athletics, scholarship applications are made through the office of the Dean of Women.

Unless otherwise stipulated, all scholarship awards are determined and announced by the faculty Committee on Loans and Scholarships in October of the college year. Applications for scholarships for the fall semester must be filed with the office of the Dean of Women prior to October 15th. The scholarships available for 1950-51:

**ALPHA GAMMA DELTA.** This sorority presents a $50 award each year to the student in the sorority with the highest grade point average.

**ALTRUSA CLUB.** Two scholarships of $50 each are made available annually by the Altrusa Club of San Diego. Applications are considered from women students enrolled in San Diego State College who are worthy and in need.

**AMERICAN ASSOCIATION OF UNIVERSITY WOMEN.** One scholarship of $100 is given each year in June to a graduating senior who will begin work in an accredited college or university toward a higher degree or credential. The scholarship is made available by the San Diego Branch of the American Association of University Women. Interviews with representatives of that organization are required.

**AMERICAN SOCIETY OF CIVIL ENGINEERS, SAN DIEGO SECTION.** A scholarship of $75 is awarded annually through the San Diego Section of the American Society of Civil Engineers to the engineering student selected for the scholarship on a basis of character, ability, personal qualities, and financial need. Nominations are made by the Engineering Department of the College. At least sophomore status is required for nomination.

**ANONYMOUS (B).** A scholarship of $100 is given each year to be divided among students in financial need, at the discretion of the Committee on Loans and Scholarships. The committee gives consideration to scholastic attainment, financial need, and character.

**ANONYMOUS (E).** A $50 scholarship, awarded each semester through the Committee on Loans and Scholarships, is made available by a public spirited citizen who prefers to assist a student majoring in science.

**ASSOCIATION OF CHILD EDUCATION.** The Association of Child Education makes available each year a $50 scholarship to a student in the Kindergarten-Primary program. The award is customarily made to an upper division student showing promise in a particular field who is in need financially.

**BLUE KEY.** Two scholarships of $50 each are awarded annually by Blue Key. One of these is granted to a needy lower division student of regular standing who has actively participated in student affairs, and the second to an entering freshman who has an outstanding record of achievement in high school activities.

**CAP AND GOWN.** Two $50 scholarships are awarded annually to upper division women students who have attended San Diego State College for at least one year previous to date of making application and who have maintained at least a "B" average in scholarship for their entire college career. The scholarships are made available through the San Diego State College chapter of Cap and Gown.

**CHAMBER OF COMMERCE MUSIC SCHOLARSHIPS.** Several scholarships of $30 per semester have been made available by the San Diego Chamber of Commerce to players of the following instruments in the college band: Solo cornet, solo clarinet, first French horn, first trombone, first baritone, first Sousaphone, and first drum. Applications are filed directly with the Music Department.

**DAUGHTERS OF THE AMERICAN REVOLUTION.** Two scholarships of $25 each are presented each spring, one to a young man and the other to a young woman outstanding in citizenship and Americanism. Applicants should have at least a "B" average in scholarship, should be able to demonstrate need for financial assistance, and should have junior standing in the college when selected. The selection is made by the faculty Committee on Loans and Scholarships and presentation of awards is made at a luncheon on Flag Day, which is given by the Daughters of the American Revolution.

**FACULTY DAMES.** Two scholarships of $50 each are given annually to deserving women students selected by the Loans and Scholarships Committee.

**FLEMING, HARVEY, GOLF.** Through a trust fund set aside for awards to exceptional golf players who enroll in college, scholarships of $250 are given. This is a competitive award.

**FOOTHILL BUSINESS AND PROFESSIONAL CLUB.** Two $25 scholarships, one to a young woman and one to a young man, are given annually. Selections are made by this club from students entering state college from high school.

**FOOTLIGHTS THEATRE, INC.** Annual awards of $50 each are made to members of this Little Theatre group who do outstanding work in dramatic arts.

**FRESHMAN CLASS, 1949-1950.** Two scholarships of $50 each will be awarded in the fall of 1950, one to an entering freshman man and one to an entering freshman woman. The scholarships will be awarded to students who have demonstrated leadership in high school activities. Final selection will be made by the Committee on Loans and Scholarships.

**JONES, SYBIL ELIZA MEMORIAL.** A scholarship of $100 is awarded annually to a student in drama. Applicant must be officially enrolled in at least his fourth semester in speech and drama with participation in dramatic productions on the campus. He must have at least a "C" average in all college work. Applications are made to the Speech Arts Department for action and awards are made after approval of the faculty Committee on Loans and Scholarships.

**KAPPA BETA NU.** A $100 scholarship is offered annually to a junior or senior woman student in elementary teacher education. Applicant must be a resident of San Diego County who is in financial need. Final selection rests with a scholarship committee of Kappa Beta Nu.

**KAPPA DELTA PI.** Two $25 scholarships are awarded annually by Kappa Delta Pi of San Diego State College. Selection for awards is made by the group.

**LA MESA EVENING WOMAN'S CLUB.** One $75 scholarship is awarded by this club to a student entering San Diego State College.

**LA SOCIAS NEUVAS.** Two $50 scholarships are given annually to women students selected by this organization.

**MARCY, MAY FINNEY.** Fifty-dollar scholarships are awarded from this fund to women students in upper division. Applications are made to the Dean of Women and awards made upon recommendation of the faculty Committee on Loans and Scholarships to Mrs. Marcy and a committee of members of Cap and Gown on San Diego State College campus.

**NORTH PARK KIWANI-ANNES.** One scholarship of $50 a semester for a year is awarded annually by this group to a male student preparing for teaching. The recipient must have at least junior standing at the time and be approved by the Committee on Loans and Scholarships.

**P. E. O. (ER CHAPTER).** A sum of $15 a month is granted each year to a woman student enrolled in San Diego State College.

**P. E. O. (DM, HR, AND IZ CHAPTERS).** Scholarships ranging from $35 a semester to $50 a semester are awarded annually from these clubs. Selection is made by the chapter itself or by the Committee on Loans and Scholarships of the college.

**PANHELLENIC (S. D. S. C.).** Fifty dollars annually is given to the sorority girl who has the highest grade point average for the year.

**PI LAMBDA THETA.** An annual scholarship of $50 will be given to a senior student in education. The selection will be made by the fraternity with approval of the Committee on Loans and Scholarships.

**SAN DIEGO BASEBALL CLUB.** An annual scholarship of $250, made available by the San Diego Baseball Club, is distributed to San Diego State College athletes with a principal interest in baseball. Recipients are selected by the Director of Athletics of the college, with the approval of the Committee on Loans and Scholarships.

**SAN DIEGO BUSINESS AND PROFESSIONAL WOMEN'S CLUB.** A $50 scholarship is awarded annually to a worthy young woman attending San Diego State College and majoring in Business Administration and having at least a "C" average.

**SAN DIEGO CITY TEACHERS ASSOCIATION.** Two scholarship of $50 each are presented each year to prospective teachers with no restrictions as to college year. Applications are made on forms supplied by the San Diego City Teachers Association and are reviewed by the association's committee on scholarships. Personal interviews are required, and final selection is made by that committee.

**SAN DIEGO COUNTY TEACHERS ASSOCIATION.** From two to four $100 scholarships are made available annually by this group of teachers. Awards are made to students in the field of elementary education and final selection rests with the Committee on Loans and Scholarships.

**SAN DIEGO ENGINEERS CLUB.** A scholarship of $50 is given each semester by the San Diego Engineers Club to a student majoring in engineering who shows particular ability in that field. Three candidates from all students applying are recommended by the Committee on Loans and Scholarships. These three candidates are interviewed by the members of the Engineers Scholarship Committee, who make the final selection.

**SAN DIEGO PANHELLENIC.** Two $50 scholarships are awarded annually to two upper division women students. Applications are made through the Committee on Loans and Scholarships and selection is left to the discretion of the committee.

**STEINMAN-HILLEL.** Mr. and Mrs. Lou Steinman, members of the San Diego Lasker Lodge of the B'nai B'rith, which sponsors the Hillel organization on the San Diego State College campus, have set aside $400 for scholarships, $50 to be awarded annually for the next 8 years to a student who has done the most to further the cause of interfaith cooperation among the students of the campus. The selection of the awardee shall be made by a committee of three judges.

**STOTT, W. K.** Each June $100 will be awarded a student graduating from San Diego State College who had a major in history. The student must enroll in an accredited college or university to work for a higher degree or credential; must have completed at least two years of upper division work at San Diego State College. Applicant is selected by the Department of History and approved by the Committee on Loans and Scholarships.

**WALKER, RALF MARC.** A scholarship in the amount of $500 is made available by the Walker-Scott Corporation in memory of the late Mr. Ralf Marc Walker to a woman student majoring in merchandising or retail trade at the San Diego State College. The scholarship is presented to a girl in Walker's Hi-Debber Council each year. The total scholarship is deposited in the San Diego State College Foundation and is handed to the recipient at the rate of $50 a semester for each of the first three years and $100 a semester for the two senior semesters.

**WEINBERGER, HENRY, INTERFAITH SCHOLARSHIP.** A scholarship of $100 is awarded in April of each year to the student of any religious faith enrolled at the San Diego State College who is judged to have done the most to further interfaith ideals among the students of the college during the year of the award. This scholarship is made available by Mr. Henry Weinberger of the Lasher Lodge of B'nai B'rith.

**WOMEN'S AUXILIARY OF SAN DIEGO DENTAL SOCIETY.** An annual award of $100 is made available by the Women's Auxiliary of San Diego Dental Society to an outstanding male student in pre-dentistry.

**WOMEN'S CIVIC LEAGUE.** The Women's Civic League sponsors an annual award of $50 to a deserving woman student selected by the league.

## ADDITIONAL DONORS

Additional donors to scholarship funds or to the San Diego State College Foundation include the following:

## LOANS

Short term loans are available to students who have attended the San Diego State College for at least one semester who have demonstrated ability to do satisfactory college work. Applications for loans are made to the Committee on Loans and Scholarships through the offices of the Dean of Men or Dean of Women.

# ADMISSION AND REGISTRATION

## GENERAL ADMISSION REQUIREMENTS

High school graduates and other applicants possessing equivalent preparation may be admitted to this college upon evidence of fitness to profit by college instruction, such fitness to be shown by previous scholastic records, by evidence of good moral character and personal qualifications, and by satisfactory scores on tests which the college may require. Due to crowded conditions the college probably will have to refuse all qualified applicants who do not file application blanks and official transcripts prior to the dates indicated in the calendar.

## ADMISSION OF HIGH SCHOOL GRADUATES

(1) A high school transcript must be presented showing satisfactory scholarship, and (2) applicants must demonstrate readiness for college instruction by making satisfactory scores on such tests as the college may designate.

**Regular status** will be granted if the student has earned A or B grades in not less than 16 semester courses during the tenth, eleventh, and twelfth grades.

**Provisional status** will be granted if the student has earned A or B grades in not less than 12 semester courses during the tenth, eleventh, and twelfth grades. Individuals who fall slightly below the above standard may be admitted to provisional status if qualifying examination scores indicate probable success in college. One year is allowed for transfer to regular status which may be attained upon completion of 24 or more units of college work with grade average of C or better. Full credit is allowed for all regular college work completed.

**Adult special status** may be granted an applicant who is over 21 years of age or is a veteran of World War II, provided that he demonstrates through qualifying examinations satisfactory ability to do college work. Such students may be transferred to regular status upon removal of all matriculation deficiences and after completion of 24 or more units of college work taken in residence with grade average of C or better. Full credit is allowed for all regular college work completed.

## ADMISSION BY EXAMINATION

Certificates of successful examination before the College Entrance Examination Board will be accepted when candidates cannot meet the above scholarship requirements.

## SPECIAL STUDENTS

In exceptional cases, persons over 21 years of age or veterans of World War II who do not fully meet the college entrance requirements may be admitted as special students upon presentation of evidence showing good character and ability to do satisfactory work at this college. Non-high school graduates shall be required to complete, in addition to the usual requirements for the A.B. Degree, three semester units of college work for each two semester courses lacking high school graduation. College graduate students who do not qualify for admission to graduate status (see admission to graduate status) may be admitted as special graduate students.

## ADMISSION WITH ADVANCED STANDING

Credit earned in recognized institutions of collegiate grade will be evaluated and advanced standing allowed accordingly toward the graduation requirements of this institution. Applicants must show an average grade of C or better for all college work, for the last college attended, and for the last semester of attendance in order to qualify for regular status. A student who enters with advanced standing is one who has completed at least 12 units of passing work in another collegiate institution. However, no applicant may disregard his collegiate record and apply for admission only on the basis of his high school work. No credit earned after a student has accumulated 64 units of work in all types of collegiate institutions may be transferred from a junior college.

Students seeking admission with advanced standing must furnish complete transcripts for all work attempted beyond the eighth grade. If an official evaluation is desired, a deposit of $2 must accompany the application and be received together with all transcripts at least 30 days before the date of registration. At least 45 semester units must be completed before a student may apply for an evaluation.

## ADMISSION TO GRADUATE STUDY

**Graduate status** may be granted to applicants who have regularly applied and have filed official transcripts as evidence of their possession of a bachelor's degree from an accredited institution.

**Graduate special status** is granted to those who are provisionally admitted to graduate study. It is given to a student (1) who has not completed all admission procedures required for graduate status and (2) to a student whose bachelor's degree was earned at an unaccredited college. A student from an unaccredited college will be eligible for graduate status when he has earned a grade point average of 1.5 on 12 or more units of approved upper division work at this College and has cleared all undergraduate deficiencies.

**Admission to candidacy** for the master's degree or for a teaching credential may be achieved by meeting the respective specific requirements.

**Admission to "200" numbered courses** requires graduate status and the meeting of specific prerequisites. A graduate student who may be permitted to enter a "200" numbered course pending full graduate status will be given only upper division credit if graduate status is not achieved by the end of the term in which the course is given.

## DEGREES OFFERED

The following degrees are offered by the College: Bachelor of Arts, Bachelor of Science, and Bachelor of Education. The Master of Arts degree is offered for persons holding valid California teaching credentials.

## EXTENDED DAY PROGRAM

In order to meet the needs of adults in the community for work on the college level, courses are offered in the late afternoon and evening under an extended day program. These courses are on the upper division and graduate levels and carry full college credit. Classes offered under this program consist of those courses normally scheduled as part of the regular college offerings and are taught by staff members of the college, but moved to a late afternoon or evening hour to permit in-service teachers, public personnel, businessmen, and others to attend. These courses cover a wide range of academic and educational subjects including education, commerce, public administration, engineering, and the sciences. A special bulletin describing the current offerings is issued each semester and may be obtained upon request from the Office of the Director of Extension and Extended Day Services.

## EXTENSION PROGRAM

In order to serve more adequately the needs of the community, the college cooperates with off-campus organizations and groups in arranging extension classes in response to expressed needs when the group is sufficiently large to finance the instruction. Offerings are made each semester in a number of departments including education, commerce, and the arts and sciences. Classes may be organized on campus, or at various points within San Diego and Imperial Counties. A minimum of 15 to 20 students is usually required in order to establish a class. The usual class carries two units of credit and meets once a week, either in the late afternoon or evening. The minimum basic fee is $6 per unit. Interested persons desiring detailed information regarding organization of classes or current offerings should contact the Director of Extension Services.

## AUDITORS

Properly qualified persons may apply for admission to attend classes as auditors. Such students pay the same fees as those who take equivalent work for credit.

## TESTS REQUIRED AT REGISTRATION TIME AND LATER

1. A physical examination is required of all students entering or reentering the college after an absence of one semester or more, except that students carrying six units or less are not required to take the physical examination. This examination is scheduled during the orientation period.
2. All entering students are required to take a college aptitude test. Exceptions may be made for graduate students and for those who register for five units or less and for those registered only in Extended Day classes.
3. All entering freshmen and college transfer students who present less than a minimum of 12 units of college credit must take the regular battery of achievement and aptitude tests. The freshman English course which a student will take will be determined by results of these tests.
4. Students entering teacher education should see admission requirements outlined under Admission to Teacher Education.

## LATE REGISTRATION

Students who register after the scheduled registration days are subject to a late registration fee of $2. Students may be accepted for late registration with the approval of the Registrar within two weeks after scheduled registration days. Registration will be closed after that date. Students failing to complete all registration requirements within the period allowed, as announced in registration instructions, are subject to cancellation of registration.

## CHANGES IN REGISTRATION

Petitions for changes in program may be secured at the Registrar's office. A fee is charged for changes in program after registration books are filed.

# FEES AND EXPENSES

## PROBABLE EXPENSES FOR ONE SEMESTER

An estimate of the expense of attendance for one semester is given below. No estimate is made as to the cost of clothing, or other personal items, since these figures vary with the demands of the individual. Laboratory fees are additional.

### A Partial Estimate of Expenses

One Semester

| | *Minimum* | *Maximum* |
|---|---|---|
| Fees | $24.00 | $31.50 |
| Books | 18.00 | 30.00 |
| Board and room | 275.00 | ---- |
| Transportation, lunches, incidentals | 20.00 | 60.00 |
| Miscellaneous | | 5.00 |

Before enrolling in college, the student should possess sufficient resources to meet the minimum expenses for one semester. A limited amount of clerical work in offices and in the library may be offered from time to time but ordinarily it is not sufficiently remunerative to reduce expenses materially.

## LIST OF FEES AND DEPOSITS (SUBJECT TO REVISION)

### Enrollment Fees and Deposits

(Payable at time of registration)

| | |
|---|---|
| By all students: | |
| Tuition (auditors pay same fees as other students): | |
| Regular students (carrying over 5 units) | $6.50 |
| Limited students (carrying 5 units or less) per unit | 2.50 |
| Materials and service: | |
| Regular students | 7.50 |
| Limited students per unit | .75 |
| Student activity fees (not a State Fee): | |
| Regular students | 10.00 |
| Limited students | 2.00 |
| Associated Students Group Accident Insurance | 2.50 |

### Miscellaneous Fees and Deposits

(Fees payable when service is rendered)

| | |
|---|---|
| Change of program | $1.00 |
| Failure to meet administratively required appointment or time limit | 2.00 |
| Evaluation of records for nonmatriculated students | 2.00 |
| Late registration | 2.00 |
| Transcript of record (first copy free) | 1.00 |

### Graduation Fees

| | |
|---|---|
| State teaching credentials (each credential) | $4.00 |
| Diploma | 1.00 |

The credential fee is collected through the college by cashier's check or post office money order made payable to the State Department of Education.

### Summer Session Fees

| | |
|---|---|
| Term I, six units | $36.00 |
| Term II, six units | 36.00 |
| Term IIA, three units | 24.00 |

# GENERAL REGULATIONS

## INFORMATION

All inquiries relative to the college should be directed to the Registrar's Office.

## NUMERING OF COURSES

Courses numbered 1 through 99 are in the lower division; those numbered 100 through 199 are in the upper division; and those numbered 200 or over are in the graduate division. Courses numbered 300 or over are professional education courses on the graduate level.

## SCHOLARSHIP, GRADES, AND GRADE POINTS

The following grades are used in reporting the standing of students at the end of each semester: A, excellent; B, good; C, fair; D, passed; F, failed; I, incomplete; E, conditioned (may be made up to grade of D); Cr. credit (without grade); WP, withdrawal passing; and WF, withdrawal failing.

Grades of I or E must be made up by the end of the next semester; otherwise the grade of F will be recorded.

Grade points are assigned as follows: Grade A, 3 points per unit; B, 2 points per unit; C, 1 point per unit; D, no point per unit; F or WF, no point per unit. Grades of I, Cr, or WP are disregarded in computing grade points. The grade of E is treated as no point per unit until a final grade is recorded. The number of grade points a student has earned in a subject is determined by multiplying the number of points he has received by the number of units allowed. The grade point average is determined by dividing the grade points earned by the number of units attempted. A student must earn at least a C average in all work undertaken at the college to qualify for a degree or a transcript of record with recommendation to another collegiate institution. Any course may be repeated, but not for additional credit; however, only the second grade earned is considered in the student's average.

## CLASS, UNITS OF WORK, AND STUDY LIST LIMIT

Students who have completed 0 to 29 units of work are classified as freshmen; 30 to 59 units as sophomores; 60 to 89 units as junior; and 90 or more as seniors.

A unit of credit represents 50 minutes of lecture or recitation combined with two hours of preparation per week through one semester, or three hours of laboratory or field work in the case of laboratory credit.

Students are not ordinarily permitted to enroll for more than 16 units * for credit toward graduation. A normal semester's program is 15 units.

Certain exceptions to this rule exist. If during the preceding semester the student has carried at least 12 units *: (1) If a grade point average of at least 1.5 was earned, 17 units * may be carried for credit toward graduation; and (2) if a grade point average of 2.0 (B) was earned, 18 units * may be carried.

Exceptions to these regulations may be secured only through a petition to the Scholarship Committee.

No student may register for less than 12 units (the minimum full-time load) without the approval of the Dean of Arts and Sciences or the Dean of Education.

## PROBATION AND DISQUALIFICATION

### PROBATION

Any student whose scholarship record shows a cumulative deficit of nine or more grade points below a C average for all college work undertaken or for all work taken at this College will be placed on probation. Probation may be continued provided the

---

* In addition to the required one-half unit physical education activity courses.

student does not increase his grade point deficiency. The student will remain on probation until the grade point deficiency has been reduced below nine for all work undertaken and all work taken at this College.

A student in provisional status who does not reclassify to regular status upon the completion of 24 units of work will be placed on probation. Probation may be continued until the student is reclassified to regular status, provided the grade point deficiency is not increased.

A student with advanced standing from another college who has been admitted on probation by the Board of Admissions will remain on probation until all grade point deficiencies have been removed and an over-all grade point average of 1.0 has been attained.

### DISQUALIFICATION

Any student on probation whose scholarship falls belows a grade point average of 1.0 in any single semester is disqualified from further attendance at the College.

Any student who fails to pass two-thirds of the units attempted during any single semester is disqualified from further attendance at the College.

A disqualified student may be reinstated for reasons satisfactory to the Board of Admissions. Applications for reinstatement must be made on forms which may be obtained at the Office of the Registrar.

## WITHDRAWALS FROM CLASS

Forms for withdrawal from class may be obtained at the Registrar's Office. If a student withdraws from class during the first seven weeks of a semester, a grade of WP will be recorded upon his permanent record for each class which he has dropped. If he withdraws during the remainder of the semester, either a WP or WF will be recorded, depending on whether he is passing or failing the course at the time. WF is equivalent to a failing grade.

## TRANSCRIPTS OF RECORD

Students may secure upon request one transcript of record without fee. Thereafter, a fee of $1 is charged for each transcript secured upon request. Once a student has matriculated in this college, transcripts from other schools will not be returned, or copies of them made. No fees are charged for transcripts required for military purposes.

Transcripts in the possession of students are to be regarded as unofficial records.

## EVALUATIONS

An evaluation of credit for graduation should be requested by a student as soon as 45 units have been earned. Applications may be made at the Office of the Registrar. Students having met all admission requirements for the arts and sciences or teacher education curricula, who are carrying 6 units, or more, of college work in a regular semester, will not be charged the evaluation fee.

## ELIGIBILITY FOR DIRECTED TEACHING

No student shall be eligible for directed teaching (Education 116) leading to the Kindergarten-Primary, General Elementary, General Junior High, and Special Secondary Credentials who has not completed 75 units, been admitted to Teacher Education, and whose entire record, as well as for the preceding semester, does not average at least a 1.2 grade for all credentials except the Junior High and General Secondary Credentials which require a 1.5 grade average.

No student shall be eligible for directed teaching (Education 316) leading to the General Secondary Credential who has not been admitted to the teacher education program prescribed for admission to candidacy for this credential.

## THE HONORS GROUP

All students who at the end of the sophomore year have attained a grade-point average of 2.5, and such others as have attained a high average in the department in which their major is selected, and who have received the recommendation of that department and the consent of the Committee on Honors, may if they so elect, constitute an honors group, for special treatment in their major subject.

Such students, so far as the facilities of the department and the best interests o the students under its charge allow, shall be treated as benefits their individual need and as their individual capacities warrant. They shall be eligible to enroll in honor or special study courses, although credit in such courses shall be limited to 5 units semester. They shall not be held to regular attendance in the established courses of thei departments if, in the opinion of the instructor, the course requirements can be me through special assignments and examinations or by satisfactory performance in th regular examinations in the course. With the consent of the major department, requirements concerning minors and specific courses or sequences in the major may be se aside. Each honor student shall be assigned to a member of his major department fo advice and direction.

Students in the honors group who fail to take advantage of the opportunitie there offered may at the end of any semester be transferred by the department to th general course. Students in the general course who show unusual capacity, upon recommendation of the department and the Committee on Honors, may at the end of an semester, be transferred to the honors group if such transfer appears practicable.

Students who wish to apply for entrance into the Honors group may do so b filling out cards to be obtained from the Registrar's Office. The application should b approved by the major department and by the Honors Committee within the first wee of registration. Units earned by students doing individual study under this plan will b recorded under the symbol 166 and will be subject to the formulated rules dealing wit limitations of student load.

## THE DEGREE WITH HONORS AND WITH DISTINCTION

Upon recommendation of the Committee on Honors, graduation with honors shall be granted to the upper 10 percent of the graduating class. Each department shall determine which students it will recommend for distinction in the major field at graduation, and report its recommendation to the Committee on Honors for transmission to the faculty.

## EXAMINATIONS

No final examination shall be given to individual students before the regular time. Any student who finds it impossible to take a final examination on the date scheduled must make arrangements with the instructor to have an incomplete grade reported and must take the deferred final examination not later than the end of the first semester of attendance following that in which the incomplete was given. No exception shall be made to this rule without the approval of the Dean of Arts and Sciences or the Dean of Education and the instructor concerned.

## CREDIT FOR EXTENSION COURSES

The amount of credit for extension and correspondence courses acceptable in fulfillment of the requirements for the Bachelor of Arts Degree will depend upon the nature of the courses, the quality of the work done, and the student's preparation for work in the field of the course. The college ordinarily limits credit to such courses as have been approved, and the total of such acceptable credit to 12 units. **Extension courses are not accepted for graduate credit.**

## CREDIT GRANTED FOR MILITARY SERVICE

Six units of lower division elective credit will be granted to students who have served in the armed forces of this country upon the completion of the prescribed basic training program before January 1, 1947. Documentary evidence bearing the signature of the proper commanding officer must be filed before credit will be accorded to the student.

Additional units of credit may be granted to students who can document the fact that they have completed officer's or other specialized training, and have been assigned to active military duty before January 1, 1947.

Completion of one semester's work, or 12 units, at this college after military service, is required before military credit will be granted.

# THE BACHELOR OF ARTS DEGREE

## GENERAL REQUIREMENTS FOR THE BACHELOR OF ARTS DEGREE IN TEACHER EDUCATION AND IN ARTS AND SCIENCES

### TYPES OF CURRICULA

San Diego State College offers two types of curricula leading to the A.B. degree.
(1) The curricula leading to the California teaching credentials,
(2) The arts and sciences curricula.

### GRADUATION REQUIREMENTS

(a) A minimum of 120 semester units of college work representing a four-year course is required for graduation.

(b) Twenty-four units of work, ordinarily taken in the senior year, must be earned at this college.

(c) At least a C average in scholarship must be maintained in all college work attempted, in all work within the major field, and in all work taken at this college.

(d) At least 40 units must be completed in the upper division, 30 of which must be earned after all lower division requirements have been satisfied.

(e) Student must comply with the State requirements in United States Constitution, American history, institutions, and ideals.

(f) All major, minor, and specific curriculum requirements must be met.

## LOWER DIVISION REQUIREMENTS FOR ALL CURRICULA

| | *Units* |
|---|---|
| Physical Education | 2 |
| Health Education 21 | 2 |
| English | 6 |
| Psychology | 3 |
| Foreign Language (not required in commerce, engineering, or in teacher education in the elementary, junior high and special secondary curricula) | 0–6 |
| Mathematics A and B, 6 units, or high school algebra and geometry | 0–6 |
| Social Sciences | 12 |
| Natural Sciences | 12 |
| Electives to make total of 60 units, including lower division preparation for the major and minor. | |

### EXPLANATION OF LOWER DIVISION REQUIREMENTS

**English**

The English requirement should be satisfied in either the freshman or sophomore year. Unless departmental regulations specify other courses, the student should satisfy this requirement by taking English 1 and either English 2 or any optional course approved by the English Department. The prerequisite for English 1 is a passing mark n the English A qualifying examination or completion of the course in English A. Credit in English A may be used toward graduation but not in satisfaction of the 6-unit ower division requirement in English.

**Psychology**

The requirement in psychology should ordinarily be satisfied in the freshman year by completion of Psychology 1.

**Foreign Languages**

At least six units in one foreign language are required in the lower division except that no language is required in commerce, engineering, or in teacher education in the elementary, junior high, and special secondary curricula.

*Reduction of unit requirement.* Each year-course in one foreign language completed in high school will reduce the lower division requirement by three units; thus, two years in one foreign language completed in high school will satisfy the requirement in full. The last year of a foreign language completed in high school may be repeated in college for credit not to exceed three units toward graduation.

### Social Sciences

Twelve units, at least eight of which are in the lower division, selected from two or more of the following fields in social science are required: anthropology, economics, geography (except 1 and 3), history, political science, social science, and sociology. Eight of the 12 units must be in the lower division. (Note: Courses in commerce, home economics, library science, philosophy, or psychology may not be used in satisfaction of this 12-unit social science requirement.)

*Reduction of unit requirement.* Two high school semester courses in the fields of history, political science, sociology, and economics taken in the senior year with grades of B or better may be used to reduce the 12 unit social science requirement to nine units.

### Natural Sciences

Twelve units, at least eight of which are in the lower division, selected from courses representing each of the following groups, are required:

*(a) Life sciences.* Courses must be selected from one of the following fields: bacteriology, biology, botany, physiology, or zoology. This requirement may be satisfied by completion of a year course in high school or by a semester course in college (recommended: Biology 1). If laboratory credit is desired, select from life science courses listed in section (c) below.

*(b) Physical sciences.* Courses must be selected from the following fields: astronomy, chemistry, Geography 1 or 3 (but not both), geology, physical science, or physics. A semester course in college in any one of these subjects will satisfy this requirement. This requirement may also be satisfied by completion of a year course in high school chemistry or physics. (Students who expect to satisfy this requirement by a physical science course in college should register for the following: those who have not completed a year course in high school in either physics or astronomy, should take Physical Science 1A; those who have not completed a year course in high school in either chemistry or geology should take Physical Science 1B). If laboratory credit is desired, select from physical science courses listed in section (c) below.

*(c) Laboratory course in natural sciences.* This requirement may be satisfied by completion of a year course in high school with grade of C or better for the final semester of the junior or senior year in one of the following fields: botany, chemistry, physics, or zoology. The laboratory requirement may be satisfied by one of the following college courses:

| *Life Sciences* | *Physical Sciences* |
|---|---|
| Bacteriology 1 | Chemistry 1A |
| Biology 10A and 10B | Chemistry 2A and 2B |
| Botany 2A | Geology 1A and 1B |
| Physiology 1C | Physics 4A and 4B |
| Zoology 1A | Physics 2A, 2B, 3A, and 3B |
| | Astronomy 1 and 9 and 10 |

*Reduction of unit requirements.* The 12 unit natural science requirement may be reduced to nine units by completion of a high school year course in biology, botany, chemistry, physics, physiology, or zoology taken in the senior year with grade of B or better for the final semester.

### Mathematics

Mathematics A (elementary algebra) and Mathematics B (plane geometry) are required. This requirement may be satisfied by completion of a year course in high school in algebra and a year course in plane geometry with grade of C or better for the final semester of each course. College credit will be granted for completion of Mathematics A or B unless the corresponding high school course was completed with grade of C or better in which case the repeated course will be classified as a "refresher" course carrying no college credit. Students having one semester high school credit in trigonometry, intermediate algebra or solid geometry may repeat the corresponding course in college for 1½ units of college credit.

### Physical Education

With the exceptions listed, all lower division students must elect one or more courses each semester. Two units of activity credit must be offered for graduation. Exceptions: (a) veterans of World War II; (b) students over 25 years of age. Students carrying fewer than 12 units during any semester may postpone taking physical education, but not be exempted therefrom. No permanent excuses from required activity courses will be granted. The college physician, in conjunction with the chairman of the department, will consider stringent cases on an individual basis and make a recommendation.

### Health Education

The requirement in health education will be satisfied in the freshman year by completion of Health Education 21.

### Lower Division Preparation for the Major and Minor

For description of requirements for majors and minors in teacher education, see section entitled: Upper Division Requirements for the Bachelor of Arts Degree in Teacher Education.

For description of requirements for majors and minors in arts and sciences, see section entitled: Upper Division Requirements for the Bachelor of Arts Degree in Arts and Sciences. Specific requirements for each major and minor are listed in connection with the description of courses in each major field. See section entitled: Announcement of Courses.

# UPPER DIVISION REQUIREMENTS FOR THE BACHELOR OF ARTS DEGREE IN ARTS AND SCIENCES

## MAJORS IN ARTS AND SCIENCES

The arts and sciences curricula lead to the Bachelor of Arts degree with majors in **art, botany, chemistry, commerce, economics, engineering, English, French, geography, history, life science, mathematics, music, physics, political science, psychology, romance languages, social science, sociology, Spanish, speech arts, and zoology** and qualify for graduate work in these fields in recognized American colleges and universities. Completion of the requirements of these curricula also enables the graduate to satisfy undergraduate requirements for the general secondary credential which, with graduate work, will enable the holder to teach in a senior high school or junior college.

## MINORS IN ARTS AND SCIENCES

Minors must be established in one of the following fields: **anthropology, art, astronomy, bacteriology, botany, chemistry, commerce, comparative literature, economics, education, engineering, English, French, geography, geology, health education, history, home economics, industrial arts, journalism, life science, mathematics, music, philosophy, physical education, physics, political science, psychology, recreation, sociology, Spanish, speech arts, and zoology.**

## UPPER DIVISION REQUIREMENTS

### Preparation for Upper Division

Students must complete the lower division requirements for all curricula. In addition, lower division requirements for the major and minor must be completed. Refer to the section of this bulletin entitled: Announcement of Courses, and to the outlines of curricula in the section entitled: Preprofessional and Vocational Curricula.

### Minimum Units and Credit Limitations

| Major and minor work are required as follows: | *Units* |
|---|---|
| Minor (minimum in upper division courses) | 9 |
| Major (upper division courses) | 24 |

At least 40 units in upper division courses must be completed, 30 of which must be earned after all lower division requirements have been satisfied. If a student is approaching upper division standing, he may carry sufficient lower division units to complete the required minimum of 60 units and carry upper division units for the remainder of his study load. Students with sophomore standing may carry upper division courses for upper division credit provided that they have the written approval of the chairman of the department and the Dean of Arts and Sciences or Dean of Education.

## MAJORS AND MINORS

### Majors

The specific requirements for each major are listed at the beginning of each departmental division among the description of courses. (See Announcement of Courses.) The student is advised to choose his major as early in his college course as practicable so that he may be able to plan his work according to the major requirements. Failure to meet the lower division requirements of the major department before the junior year may make it impossible to satisfy the upper division requirements within the normal period of two years. In addition to the majors in arts and sciences listed above, the following major is also offered:

**The General Major:** The general major of 36 upper division units must be chosen from three fields with not more than 15 units nor fewer than six to nine units from any one field. A minimum of a year course in each field must be completed in the lower division as foundation for upper division work in the general major. A minor is not required; however, four additional upper division elective units must be completed to meet the minimum requirement of 40 upper division units for graduation.

The general major is planned for students who are preparing for home arts, law, journalism, library work, public administration, social work, theology, recreation, or for any other vocation requiring a background of general training. The program of the student should be planned in consultation with the Dean of Arts and Sciences and approved, revised, or rejected by the departmental advisers of the three majors concerned.

### Minors

A minor consists of at least 15 units of work completed in one of the above fields of study. At least nine of these units must be earned in upper division courses. The entire requirement for a minor may be met with upper division courses provided these courses have no lower division prerequisites. Prerequisites for each course are listed among the course descriptions. (See section on Announcement of Courses.)

## EXAMINATION REQUIREMENTS IN THE UNITED STATES CONSTITUTION AND AMERICAN HISTORY, INSTITUTIONS, AND IDEALS

Each student of a state college to qualify for graduation shall demonstrate competence in the United States Constitution and American history, institutions and ideals, by passing satisfactorily a comprehensive examination on these fields prepared and administered by the college. Students transferring from other institutions of collegiate grade who have already met this requirement may have this examination waived, except that candidates for a teaching credential must meet the United States Constitution requirement by examination or by completion of a course covering the Constitution in a California institution of collegiate grade. The examination ordinarily should be taken in the junior year.

This graduation requirement may be fulfilled by any one of the following alternatives:

1. Passing satisfactorily comprehensive examinations in both United States Constitution and American history, institutions and ideals.
2. Completion of History 17A and 17B, or History 171A and 171B, or History 172A and 172B, or Political Science 71A and 71B, or Political Science 139A and 139B.
3. Completion of Political Science 101, or 137A and 137B, plus satisfactory completion of an examination in American history, institutions and ideals.
4. Completion of History 8A and 8B, or History 173A and 173B, or History 179A and 179B, plus satisfactory completion of an examination of the United States Constitution or the substitutes for that examination enumerated in item 3.
5. Completion of comparable courses in other institutions of collegiate grade, except that candidates for the A.B. degree and a teaching credential must have completed the course covering the United States Constitution in a California institution of collegiate grade.

## PROFESSIONAL, PREPROFESSIONAL, AND VOCATIONAL CURRICULA

For description of professional curricula in education, see section entitled: Professional Curricula in Education; for preprofessional and vocational curricula, see section entitled: Preprofessional and Vocational Curricula.

# UPPER DIVISION REQUIREMENTS FOR THE BACHELOR OF ARTS DEGREE IN TEACHER EDUCATION

## TEACHING CREDENTIALS

San Diego State College is authorized by the State of California to recommend students for the teaching credentials listed below. To be recommended, students must complete, or have completed, the A.B. degree in one of the curricula offered for teachers.

| *The credential* | *Subjects and grades for which it is valid* |
|---|---|
| General Elementary | All grades through the eighth. |
| Kindergarten-Primary | Kindergarten through third. |
| General Junior High (Must be taken with another credential) | All subjects in grades seven, eight and nine in all elementary or secondary schools. |
| General Secondary | All subjects in the public schools in grade 7 and above. |
| Health and Development | Authorizes to serve as supervisor of health in the capacity of a school physician, school nurse, school oculist, school optometrist, school otologist, school audiometrist, school dentist, school chiropdist, or school dental hygienist. |
| Special Secondary in Art | Art in all grades of the public schools. |
| Special Secondary in Business Education | Business education subjects in all grades of the public schools. |
| Special Secondary in Music | Music in all grades of the public schools. |
| Special Secondary in Physical Education | Physical education in all grades of the public schools. |
| Special Secondary in Speech Arts | Speech in all grades of the public schools. |
| Special Secondary in Correction of Speech Defects | Correction of speech defects in all grades of the public schools. |
| Special Secondary for teaching the Mentally Retarded Child | To teach mentally retarded children in elementary and secondary schools. |
| School Psychologist | To serve as school psychologist. |
| School Psychometrist | To serve as assistant to the school psychologist. |
| Administration in Elementary Education | Authorizes for certificate to serve as superintendent, deputy superintendent, assistant superintendent, principal, vice principal, and supervisor of instruction in elementary schools. |
| Supervision in Elementary Education | Authorizes for certificate to supervise instruction in elementary schools. |
| Administration in Secondary Education | Authorizes for certificate to serve as superintendent, deputy superintendent, assistant superintendent, principal, vice principal, and supervisor of instruction in secondary schools. |
| Supervision in Secondary Education | Authorizes for certificate to supervise instruction in secondary schools. |
| Special Subject Supervision | Supervision in the special subject in all grades. |

## COMBINATION OF CREDENTIALS

Students who seek more than one teaching credential must complete in full the curriculum for each, with only such exceptions as are indicated in the statement of requirements.

A combination of the elementry school credential and the junior high school credential may be secured by completing the requirements for the elementary school credential and the following additional requirements.

(a) A junior high school teaching major.
(b) Education 100B in the major field.
(c) Three units of directed teaching, or equivalent, in a junior high school.
(d) Education 115B.

A combination of the junior high school credential and a special secondary credential may be secured by completing the requirements for the special secondary credential and the following additional requirements:

(a) A junior high school teaching major, excluding the special secondary credential majors.
(b) Education 100B in the junior high school teaching major.
(c) Three units of student teaching in the junior high school teaching major.

## EXAMINATION REQUIREMENTS IN THE UNITED STATES CONSTITUTION, AMERICAN HISTORY, INSTITUTIONS, AND IDEALS

This requirement is the same as that for the degree in arts and sciences. For specific explanation, refer to the section entitled: Upper Division Requirements for the Bachelor of Arts Degree in Arts and Sciences.

## UPPER DIVISION REQUIREMENTS

### Preparation for Upper Division

Students in teacher education curricula must complete the lower division requirements for all curricula as indicated in the section entitled: General Requirements for the Bachelor of Arts Degree in Teacher Education and in Arts and Sciences. Additional pattern requirements are outlined under each specific curriculum on the following pages.

### Minimum Units and Credit Limitations

A minimum of 40 units in upper division courses must be completed, 30 units of which must be earned after all lower division requirements have been satisfied. If a student is approaching upper divison standing, he may carry sufficient lower division units to complete the required minimum of 60 units and carry upper division units for the remainder of his study load. Students with sophomore standing may carry upper division courses for upper division credit provided that they have the written approval of the chairman of the department and the Dean of Education.

A maximum of 40 units of credit in any one subject matter field or in education courses may be applied toward the requirements of the A.B. degree.

### Preparation for Graduate Work

Students who take the A.B. degree with a special credential and who contemplate doing graduate work for a master's degree in an academic field or for the general secondary credential, will find it advantageous to use their electives to provide a foundation for that work.

## MAJORS AND MINORS

All teaching curricula require one major and one minor.

### Major and Minor for the Elementary Credential

**Education** shall be the major for the kindergarten-primary and general elementary school credentials. Its requirements are outlined under those curricula. It is recommended that the minor for these credentials be chosen from the academic fields of **English, foreign languages, mathematics, science or social science.** The minor in social science must include 6 upper division units in history or in geography and 3 units selected from anthropology, economics, geography, history, political science, or sociology. The minor in English must include three units in American Literature. A second minor, though not required, may be chosen from one of these fields or from art, home economics, industrial arts, music, physical education or speech arts. Students taking an elementary credential in combination with a special secondary credential may use the special major for their minor in elementary education.

### Teaching Major for Junior High School and Special Secondary School Credentials

A teaching major for the junior high school credential consists of a minimum of 24 units of which a minimum of 18 units must be in the upper division. An average of C in scholarship is required in all upper division courses in the field of the teaching major. Teaching majors may be established in the following fields: **English, foreign languages, general science, mathematics, and social science.** A teaching major in the special secondary credential curricula of art, business education, music, physical education, and speech arts ranges from 24 to 40 units, depending upon the curriculum; these may not be used for a junior high school credential major. Refer to the following pages for outlines of requirements for these credentials.

*A Teaching Major in English* shall include English 1 or 41, and nine units selected from lower division English electives, of which six units must be in a year-course, and 18 units of upper division work. This credit must include three units in American Literature and three units in Shakespeare. Recommended: English 192.

*A Teaching Major in General Science* shall incclude a minimum of 24 units, not less than 18 of which are upper division, including a college year course in a biological science, a year course in high school or college physics and a concentration of 12 units, at least six of which are upper division, in one major subject (botany, chemistry, physics, zoology). See definition of teaching majors.

*A Teaching Major in Social Science* shall include a minimum of 24 units, not less than 18 of which are upper division. There shall be a concentration of 12 units, at least six of which are upper division, in one major subject (anthropology, economics, geography, history, political science, or sociology). A year course in American History must be included. See definition for teaching majors for the junior high school credential.

### Teaching Minor for Junior High and Special Secondary Credentials

A teaching minor consists of 15 units in a given field, of which nine or more must be in upper division courses. Teaching minors may be established in the following fields: **art, business education, English, foreign languages, general science, health education, home economics, industrial arts, mathematics, music, social science, physical education, recreation, and speech arts.** (See requirement above for elementary school credentials.)

*A Teaching Minor in English:* Candidates for the teaching minor in English must include English 1 or 41 and three units of lower division electives; and nine elective units in upper division English. This credit must include three units in American Literature, taken either in lower division or in upper division. Credit in journalism and speech arts may not be used to fulfill the requirements for the English minor.

*A Teaching Minor in Health Education* shall include: Physical Education 51, Health Education 65 and 90 in the lower division; Health Education 152, 153, Physical Education 199 or equivalent in the upper division. For physical education majors, Health Education is allowed only as a second minor area.

*A Teaching Minor in Home Economics* shall include: Home Economics 5, or 62, and 11 in the lower division; Home Economics 101, 105, and 150, in the upper division. Three units of electives may be chosen from Home Economics 1, 62, 135, or 170.

*A Teaching Minor in Industrial Arts:* This minor shall consist of a minimum of 15 units of work in industrial arts, nine units of which must be from courses carrying upper division credit. Required: Industrial Arts 2 or 21, and 121, and at least one lower division and one upper division course in two of the following areas: woodworking, metalworking, and electricity.

*A Teaching Minor in Music:* Candidates for the teaching minor in music are required to take music aptitude tests at the time the minor is chosen and to enroll in at least one music activity each semester. In special cases this requirement may be waived by permission of the faculty of the Music Department.

Applicants for music minors must maintain a grade average of C in all music courses. All students must show credit for Music 1A or clear this requirement by examination. Music 7A is required of all candidates for the elementary credential.

In the lower division, with the proper regard for course sequences, 6 units may be chosen from the following courses: Music, 1A-1B-1C-1D, 2A, 3A, 4A, 4B, 5A, 5B, 6A, 16, 17, 18, Aesthetics 1A, 1B. Nine units of upper division music are required, not more than two of which may be selected for credit from the activity courses ( Treble Clef, orchestra, etc.).

*A Teaching Minor in Physical Education:* Men must show credit for: two professional activity courses and Physical Education 51, 53, and 72 in the lower division; Physical Education 170, 190, and at least four units in upper division professional activity courses approved by the department.

Women must show credit for: four semesters of physical education activity courses, Physical Education 53, and 3½ units of electives in the lower division; nine units chosen from Physical Education 190, 156A-156B, 161, 164, and 170A in the upper division.

*A Teaching Minor in Recreation:* Lower division requirements: Four semesters of physical education activity courses and in addition a minimum of six lower division units to include Physical Education 51, 53, and electives chosen from Art 61B or fields of dance, drama, or music. Upper division requirements: A minimum of nine units, including Physical Education 165, 170A-170B, and 184A. For physical education majors, Recreation is allowed only as a second minor area.

*A Teaching Minor in Social Science:* A teaching minor in social science must include the general education lower division requirement and in addition a minimum of nine units of upper division social science courses, selected from anthropology, economics, geography, history, political science, or sociology, six units of which must consist of a year course sequence. Six units in American History or three units in American History and three units in Political Science must be included.

### Teaching Majors for General Secondary Credential

Teaching majors may be established in the following fields: **art, business education, chemistry, economics, English, history, life science, mathematics, music, physical education, physical science, physics, romance languages, social science, Spanish, and speech arts; also psychology as a nonteaching major with two teaching minors.** In most fields, 12 semester units are required in the lower division and 24 semester units in the upper division. Some departments permit six units of these 24 upper division units to be selected from related fields with the approval of the departmental representative. In addition to these undergraduate requirements two to six semester units of graduate work are required in the major field during the postgraduate year. For the programs for each department, refer to the sections entitled: Curricula Leading to the General Secondary School Credential. This section also explains the requirements for admission to candidacy for the General Secondary Credential. Candidates for the General Secondary Credentials should consult with the Director of Secondary Education during their first registration period at San Diego State College.

### Teaching Minors for the General Secondary Credential

Teaching minors may be established in the following fields: **art, business education, chemistry, economics, English, French, health education, history, home economics, industrial arts, life science, mathematics, music, physical education for men, physical education for women, physics, recreation, Spanish, and speech arts.** In most fields, six semester units are required in the lower division and nine semester units in the upper division for the A.B. degree. This credential requires enough additional units to make a minimum of 21 semester units to be completed by the date of recommendation for the credential. For the programs for each department, refer to the section entitled: Curricula Leading to the General Secondary School Credential.

## ADMISSION TO TEACHER EDUCATION

Students who expect to become teachers should apply for admission to teacher education during the first semester of the sophomore year. Students entering the college at the end of the sophomore year will apply at the beginning of the junior year. No courses in education may be taken until admission is granted; any exception to this rule must have the approval of the Dean of Education. The standards for admission to Teacher Education are different from those for admission to the college; therefore, *admission to the college* does not guarantee that the student will be admitted to teacher education. The following requirements must be met for admission to the teacher education curricula:

1. A satisfactory score on the college aptitude test taken at the college.
2. Evidence of competence in the use of the English language and of satisfactory ability in arithmetic, handwriting, reading, and spelling indicated by having passed the Fundamentals Test. (See college calendar for dates of test which should be taken in the second semester of the *freshman year*.)
3. Assurance of correct speech habits and voice control by having satisfactorily completed a course in corrective speech or by having passed a speech test given by the college.
4. Assurance of physical fitness.
5. If the student is to be a candidate for the general secondary credential or one of the special secondary credentials, he must furnish a recommendation from the chairman of that department stating that the student has ability and shows promise of teaching success in his field and that the department looks with favor upon his application.
6. The completion of the first two years or more of a given curriculum, or its equivalent, and of subsequent work with a grade point average of 1.2 or better for all credentials except the general junior high school or the general secondary, for which shall be required a grade point average of 1.5 or better in all work and 1.75 in the major field.
7. If the student is a candidate for any credential on the secondary school level (general junior high school, special secondary, or general secondary), he must have a satisfactory score on a General Culture Test.
8. If the student is a candidate for the General Secondary credential he must have a tentative program approved by the authorized departmental representative of his major field, minor field, and the education department.
9. All applicants need to be approved by an interviewing committee of the college faculty. In its evaluation the committee will consider the following factors established by the State Board of Education: intelligence, scolarship, professional aptitude, personality and character, speech and language usage, and many-sided interests.

### Transfer Students

Students who have completed two or more semesters of work in another college, upon transferring to San Diego State College, should make application for admission to teacher education as soon as they enroll in the college. Transfer students admitted to the college with either upper division or graduate standing must take the necessary tests for admission to teacher education given during the orientation period at the beginning of their first semester at the college. (See college calendar for dates.)

### Transfer Students With Emergency Credentials in Elementary Education

Certain adaptations in the education courses have been made to meet the needs of experienced teachers who hold an emergency credential in elementary education. See the Director of Elementary Education for details.

### Advanced Standing in Teacher Education

A student transferring into San Diego State College with advanced standing must complete a minimum of six units of professional education work in residence at San Diego State College before recommendation for a credential, regardless of extent of education work already completed elsewhere. Whenever a transfer student has had teaching experience, the college requires that a statement from the employer(s) be filed with the Registrar.

### Evaluation of Credits

After an interval of five years, courses in education are reevaluated and subject to deduction in credit, in light of such new requirements as may have been put into effect and changes in educational procedures. Students formerly in attendance will not be considered to be working in the curriculum until an evaluation and statement of credit has been secured from the Registrar's office. All courses taken either at this college or elsewhere must be approved by an official adviser in order to be credited toward meeting degree requirements.

# PROFESSIONAL CURRICULA IN EDUCATION

Professional curricula in education, requiring from four to five years to complete, lead to the teaching credentials.

All candidates in teacher education curricula should observe carefully the requirements for admission to teacher education and be prepared to meet them at the end of the sophomore year. Students in other colleges who contemplate transferring to San Diego State College should arrange their programs so as to meet the requirements of their particular curriculum as early as possible. See college calendar for dates when the Fundamentals Test and General Culture Test will be given. Refer to the section entitled: Admission to Teacher Education.

## CURRICULA LEADING TO THE GENERAL ELEMENTARY, KINDERGARTEN-PRIMARY, OR GENERAL JUNIOR HIGH SCHOOL CREDENTIAL

### A.B. DEGREE WITH GENERAL ELEMENTARY OR KINDERGARTEN-PRIMARY CREDENTIAL

One teaching minor is required. Refer to the section entitled: Upper Division Requirements for the Bachelor of Arts Degree in Teacher Education.

| | Gen. Elem. | | Kdg.-Primary | |
|---|---|---|---|---|
| **Freshman Year** | *1st Sem.* | *2d Sem.* | *1st Sem.* | *2d Sem.* |
| Physical Education (activity courses) | ½ | ½ | ½ | ½ |
| Art 6A-6B, Design | 2 | 2 | 2 | 2 |
| English 1, Freshman Comp., English 2, Freshman Lit. | 3 | 3 | 3 | 3 |
| Health Educ. 21, Principles, Psychology 1, General | 2 | 3 | 2 | 3 |
| Physical Science 1A-1B, Introduction (if chemistry and physics completed in high school, substitute other science. See course description.) | 3 | 3 | 3 | 3 |
| Electives, including social science, minor, or other lower division requirements | 6 | 6 | 6 | 6 |
| | 16½ | 16½ | 16½ | 16½ |
| **Sophomore Year** | | | | |
| Physical Education (activity courses) | ½ | -- | ½ | -- |
| Art 61A, Crafts in the Elementary Schools | 2 | -- | 2 | -- |
| Biology 1, Survey (if no laboratory course in high school, take 10A-10B or Botany 1) | 3 | -- | 3 | -- |
| Geography 1, Elements (natural science credit) and Geography 2, Regions (social science credit) | 3 | 3 | 3 | 3 |
| Music 1A, Musicianship, and 7A, Materials for Elem. School | 3 | 3 | 3 | 3 |
| Music 28A-28B, Piano (or equivalent by examination) (may be taken in the junior year) | -- | -- | 1 | 1 |
| Speech Arts 1, Voice and Diction | -- | -- | -- | 3 |
| Spanish 70, Span. for Elem. Sch. Teachers (not required but recommended if no high school Spanish) | -- | 3 | -- | -- |
| Physical Education 53, P.E. in Elem. Sch. | -- | 2½ | -- | 2½ |
| Electives (complete lower division requirements and minor) | 4 | 4 | 3 | 3 |
| | 15½ | 15½ | 15½ | 15½ |

### Junior Year

Students transferring from another curriculum in lower division or from another college or junior college may interchange this semester with semester II of the senior year. (Forty units of upper division work are needed.) The Education Department will probably find it necessary to ask some students who have met all requirements to defer entering practicum until the second semester of the junior year in order to equate class size. Those who defer entering the practicum should use this semester to

1. Complete lower division requirements in art, music, Physical Education 53, natural science, social science and others as needed.
2. Complete minor requirements.
3. Meet requirement for American History and U. S. Constitution.
4. Elect Education 102A or 102B if needed to complete program. Permission to enter these courses must be secured from the instructor.

| | Gen. Elem. | | Kdg.-Primary | |
|---|---|---|---|---|
| | *1st Sem.* | *2d Sem.* | *1st Sem.* | *2d Sem.* |
| Educ. 102A, Measurement, and 102B, Child Growth and Development | 3 | 3 | 3 | 3 |
| Health Educ. 151, For Teachers (taken with practicum) | 2 | -- | 2 | -- |
| Education 147, Practicum-Primary Level | 10 | -- | 10 | -- |
| Reading and Elem. Methods (3), Arithmetic (3), Elem. Music Educ. (1), Elem. Art Educ. (1), Language Arts (2) | | | | |
| Proficiency in use of audio-visual equipment is required by examination. Specific instruction in audio-visual materials is given in each subject matter methods course. | | | | |
| Education 148, Practicum-Intermediate Level | -- | 12 | -- | 8 |
| Elem. Social Studies and Science Educ. (3), Elem. Art Educ. (1), Elem. Music Educ. (1), Educ. Psychology (3), Additional 4 units for Gen. Elem. but not Kdg.-Primary, Curriculum in Elem. Educ. (2), Directed Teaching (2) | | | | |
| Education 116, Directed Teaching, primary grades | -- | -- | -- | 4 |
| | 15 | 15 | 15 | 15 |

### Senior Year

| | Gen. Elem. 1st Sem. | Gen. Elem. 2d Sem. | Kdg.-Primary 1st Sem. | Kdg.-Primary 2d Sem. |
|---|---|---|---|---|
| Education 116, Directed Teaching | 7 | -- | 4 | -- |
| Education 146, Kdg.-Primary Practicum (follows Education 148) | -- | -- | 4 | -- |
| Education 115A, Hist. and Phil. of Educ. (or in second semester) | 2 | -- | 2 | -- |
| Electives (complete the minor) | 3 | 15-17 | 3 | 15-17 |
| | 12 | 15-17 | 13 | 15-17 |

## A.B. DEGREE WITH GENERAL JUNIOR HIGH SCHOOL CREDENTIAL

This credential is granted only in conjunction with a general elementary or a special secondary credential. For information regarding combinations of credentials and for descriptions of majors and minors, refer to the section entitled: Upper Division Requirements for the Bachelor of Arts Degree in Teacher Education. Students who intend to work for a general secondary credential or the master's degree should counsel with the Director of Secondary Education upon application to teacher education.

| Freshman Year | Units 1st Sem. | Units 2d Sem. |
|---|---|---|
| P.E. (activity courses) | ½ | ½ |
| Natural Science (include Geog. 1, Elements, Biol. 1, Survey, and Phys. Sci. 1A or 1B, Intro. See lower division requirements) | 6 | 3 |
| Engl. 1, Comp., and 2, Lit. | 3 | 3 |
| Health Ed. 21, Prin. | 2 | -- |
| Geog. 2, Regions (social science credit) | -- | 3 |
| Electives (to complete lower division requirements) | 4 | 6 |
| | 15½ | 15½ |

| Sophomore Year | Units 1st Sem. | Units 2d Sem. |
|---|---|---|
| P.E. (activity courses) | ½ | ½ |
| Psychology 1, General | 3 | -- |
| Speech 2A, Fundamentals | -- | 3 |
| Electives (to include preparation for major and minor and completion of lower division requirements) | 12 | 12 |
| | 15½ | 15½ |

| Junior Year | Units 1st Sem. | Units 2d Sem. |

| Educ. 184B, Devel. and Learning | -- | 4 |
| Electives (to include major and minor) | 9 | 11 |
| | 15 | 15 |

| Senior Year | Units 1st Sem. | Units 2d Sem. |
|---|---|---|
| Educ. 100B, Methods in major and minor subjects. (Fall only) | 3 | -- |
| Educ. 184C, Teaching Process | 4 | -- |
| Educ. 116, Directed Teaching | 3 | 3 |
| Electives (to include major and minor) | 5 | 12 |
| | 15 | 15 |

## CURRICULA LEADING TO THE SPECIAL SECONDARY CREDENTIALS

### A.B. DEGREE WITH SPECIAL SECONDARY CREDENTIAL IN ART

This course leads to the A.B. degree and to the Special Secondary Credential in Art which entitles the holder to teach art in senior high, junior high, and elementary schools.

| Lower Division | Units |
|---|---|
| P. E. (activity courses) | 2 |
| Aesth. 5, Art Orientation, or 51, Survey of Mexican Art | 2 |
| Aesth. 50, Hist. and Appreciation of Art | 2 |
| Art A-B, Draw. and Comp. | 2–4 |
| Art 6A-6B, Design | 4 |
| Art 14A, Lettering | 2 |
| Art 61A, Crafts in Elem. Schs. | 2 |
| Art 61B, Crafts | 2 |
| Electives in Art | 6–8 |
| Engl. 1, Comp., and 2, Lit. | 6 |
| Health Educ. 21, Principles | 2 |
| Natural Sciences (see lower division requirements) | 9–12 |
| Psychology 1, General | 3 |
| Social Sciences (see lower division requirements) | 9–12 |
| Electives, including minor | 7–10 |
| | 60 |

| Upper Division | Units |
|---|---|
| Aesth. 150, Appreciation and Hist. of Art | 2 |
| Art 160A, Printmaking | 2 |

## A.B. DEGREE WITH SPECIAL SECONDARY CREDENTIAL IN BUSINESS EDUCATION

This course leads to the A.B. degree and to the Special Secondary Credential in Business Education, which entitles the holder to teach business subjects in junior and senior high schools and in junior colleges.

In addition to the following academic requirements, satisfactory evidence of one-half year, or 1,000 hours of approved experience in the field named in the credential must be submitted.

Six areas of specialization are possible for the student majoring in Business Education: *Accounting, Accounting-Secretarial, Merchandising, Real Estate and Insurance, Secretarial,* and *Supervision and Management.*

| **Lower Division** | *Units* |
|---|---|
| Com. A, Bus. Arith. | 1 |
| Com. 1A-1B, Typewriting (placement exam. before enrollment) | 6 |
| Com. 16A-16B, Secretarial Acctg. | 6 |
| Com. 18A-18B, Com'l Law (should be taken in junior year) | (6) |
| Bus. Educ. Subfield requirements: | 9–10 |
| *Accounting:* Any 9 units selected from Com. 20, 21, 24, 25, or 27. | |
| *Acctg.-Secretarial:* Com. 5A-5B (placement exam. before enrollment. May be taken in junior year). | |
| *Merchandising:* Com. 20, 24, 25. | |
| *Real Estate and Ins.:* Any 9 units selected from Com. 20, 21, 24, 25, or 27. | |
| *Secretarial:* Com. 5A-5B (placement exam. before enrollment. Should be taken in sophomore year). | |
| *Supervision and Mgmt.:* Any 9 units selected from Com. 20, 21, 24, 25, or 27. | |
| General college requirements: | 34–40 |
| P. E. (activity courses) (2) | |

## A.B. DEGREE WITH SPECIAL SECONDARY CREDENTIAL IN MUSIC

Students intending to become applicants for this credential must show evidence of musical ability before entering the course. They must be able to play artistically upon the piano, music of the grade of the simpler *Songs Without Words* of Mendelssohn or else possess a corresponding degree of proficiency in voice or an orchestral instrument. No credit is given to music majors for the basic courses of Music 1A and Music 7A, but if a deficiency exists in the field of general musicianship, the student will be required to take either or both of these courses without credit.

All music majors are required to enroll in one musical activity each semester. Activities should be included from *both* instrumental and choral groups. In special cases this requirement may be waived by petition to the Music Department. All students are required to pass examinations in applied music in order to receive credit. No credit is allowed to majors in voice or orchestral instruments for any work in piano which is below the level of artistic hymn playing.

Applicants for the Special Secondary Credential in Music must maintain a grade average of C or better in music courses.

This course leads to the A.B. degree with a Special Secondary Credential in Music which will authorize the holder to teach music in the elementary, junior and senior high schools of the State.

A maximum of 40 units in Music may be used toward the A.B. degree. Of these 40 units a maximum of 3 may come from the field of musical activities: Band, choir, chorus, glee clubs and orchestra.

General Language "B" is advised as an elective.

| **Lower Division** | *Units* |
|---|---|
| P. E. (activity courses) | 2 |
| Engl. 1, Comp., and 2, Lit. | 6 |
| Social Science | 9–12 |
| Natural Science | 9–12 |
| Psychology 1, General | 3 |

| Educ. 116, Directed Teaching | 6 |
| Minor | 9 |
| | 60 |

(Recommended electives: Art 61B, Health Educ. 90, 65, Home Econ. 61A-61B, Music 1A, Phys. Educ. 11A-11B.)

## A.B. DEGREE WITH SPECIAL SECONDARY CREDENTIAL IN SPEECH ARTS

The following program when satisfactory completed will lead to the A.B. degree with Special Secondary Credential in Speech Arts.

| **Lower Division** | *Units* |
|---|---|
| P.E. (activity courses) | 2 |
| Social Science | 9–12 |
| Natural Science | 9–12 |
| English 1, Comp., and 2, Lit. | 6 |
| Psychology 1, General | 3 |
| Health Educ. 21, Principles | 2 |
| Speech 2A-2B, 11A-11B, 60A-60B, 81. | 6 |
| Speech 55A-55B, or 56A-56B or 55A-56A or 55A-56B or 82, 83 | 6 |
| Speech 1, 61A, B, C, D, or 81 | 3 |
| Speech electives | 5 |
| Minor | 6 |
| Electives | 0–3 |
| | 60 |

| **Upper Division** | *Units* |
|---|---|
| Speech 150 and 176 or 179A | 6 |
| Speech electives selected from 108, 140A, 155, 159A, 161, 182, 191, 192A or 192B | 6 |
| Speech electives | 6 |
| Upper division electives from English Literature | 6 |
| Minor | 9 |
| Health Educ. 151, For Teachers | 2 |
| Education | 22 |
| Educ. 184A, Sec. Sch. | (4) |
| Educ. 184B, Devel. and Learning | (4) |
| Educ. 184C, Teaching Process | (4) |
| 100B-SA, Methods in major and minor | (4) |
| 116, Directed Teaching | (6) |
| Electives | 3 |
| | 60 |

## HEALTH AND DEVELOPMENT CREDENTIAL

Requirements for this credential include:

1. Possession of a valid license issued by the official California state board or agency in charge of his profession in California.
2. Two years of successful experience in the special service to be named in the credential, except for the school nurse.
3. For school nurse only: The completion of six semester hours of work, including courses in:
   - A. Educational Psychology (Education 130)
   - B. Administration of the School Health Program (Health Education 153)
   - C. Social case work, or rural education or child hygiene.

Pattern to be approved by adviser appointed by the Dean of Education.

## SPECIAL SECONDARY CREDENTIAL IN CORRECTION OF SPEECH DEFECTS

This credential is granted only to students who can verify two years of successful teaching experience or four semester hours of superior student teaching completed in an approved teacher education institution and who hold a valid California teacher's certificate, credential, or life diploma of elementary or secondary school grade. Such students must show credit in the following subjects:

| **Lower Division** | *Units* |
|---|---|
| Psychology 1, General | 3 |
| Speech Arts 2A, Fundamentals of Public Speaking, or equivalent | 3 |
| Speech Arts 11A or 11B, Interpretation | 3 |
| Speech Arts electives | 6 |
| **Upper Division** | |
| Speech Arts 150, Phonetics | 3 |
| Speech Arts 221, Articulatory Problems of Speech or Education 176, Problems of Speech Correction and Articulation | 3 |
| Speech Arts 179A-179B or Education 179A-179B, Nervous Speech Disorders | 6 |
| Psychology 131, Foundations of Personality | 2 |

## SPECIAL SECONDARY CREDENTIAL FOR TEACHING THE MENTALLY RETARDED CHILD

An applicant for the special secondary credential for teaching the mentally retarded child must have completed the following minimum requirements:

1. Possession of a valid kindergarten-primary, general elementary, junior high school, or general secondary credential.
2. Completion of 18 semester hours of professional work selected from the following fields:
    - a. Required group: Education 102B or 102C, 181, 182, Art 61A or 161A, directed teaching of the mentally retarded, 3 units.
    - b. Additional work to complete the required total of 18 semester hours selected from any of the following electives: Education 176, 144, Psychology 132, 150, or 151.
3. The 18-unit requirement will be reduced 4 units for each year of verified, successful experience in teaching special classes for mentally retarded children, the total not to exceed 12 units.
4. At least six semester units of the 18 required must have been completed within five years of the time application is made for the credential.
5. Twelve units of work must have been completed at this college.

## SCHOOL PSYCHOLOGIST CREDENTIAL

Each applicant for recommendation for the school psychologist credential shall have completed the following minimum requirements:

1. Possession of a valid general elementary or general secondary credential.
2. One year of successful teaching experience.
3. Possession of a master's degree in psychology or educational psychology.
4. Each applicant must complete the following course requirements:

A. Child development, mental hygiene, and counseling and guidance, including interviewing:

| | *Units* |
|---|---|
| Education 102B, Child Growth and Development, or Psychology 106, Development Psychology | 3 |
| Psychology 132, Personality Adjustment | 2 |
| Psychology 152, Introduction to Methods of Counseling or Education 233, Guidance Counseling Techniques | 3 |

B. Psychology and education of exceptional children, social case practice including field work and clinical psychology:

| | |
|---|---|
| Education 181, Exceptional Children | 3 |
| Sociology 231, Field Work in Social Case Work | 3 |
| Psychology 151, Introduction to Clinical Appraisal or Psychology 211, Advanced Clinical Psychology | 3 |

C. Educational psychology and educational measurements including field work and elementary statistics:

| | |
|---|---|
| Psychology 130, Educational Psychology | 2 |
| Education 102A, Measurement and Evaluation in Elementary Education or Education 102D, Measurement and Evaluation in Secondary Education | 2 |
| Psychology 104A, Statistical Methods in Psychology | 3 |

D. Individual and group mental tests including field work:

| | |
|---|---|
| Psychology 105A, Introduction to Psychological Testing | 3 |
| Psychology 105B, Individual Mental Testing | 3 |
| Psychology 205, Advanced Mental Testing | 3 |

E. Remedial instruction including laboratory or classroom practice:

| | |
|---|---|
| Education 144, Diagnosis and Remedial Treatment of Difficulties in Reading | 3 |
| Education 176, Problems of Speech Correction and Articulation or Education, 179A, Nervous Speech Disorders | 3 |

These courses include laboratory practice.

### SCHOOL PSYCHOMETRIST CREDENTIAL

An applicant for the school psychometrist credential must have completed the following requirements:

1. Possession of a California general teaching credential (General Elementary, Junior High School, or General Secondary) or a four-year college course with a bachelor's degree.

2. As a part of the undergraduate or graduate program the applicant must have completed 18 semester units of training distributed approximately as follows and approved by the credential adviser:

- A. Six units selected from the following: Education 102A or Education 102D; Education 102B or Education 102C; and Education 130.
- B. Six units as follows: Education 181 and Psychology 151.
- C. Six units as follows: Psychology 105A and Psychology 105B.

## CURRICULA LEADING TO THE GENERAL SECONDARY SCHOOL CREDENTIAL

### INFORMATION CONCERNING THE GENERAL SECONDARY SCHOOL CREDENTIAL

A candidate for this credential must complete the requirements for the bachelor's degree from an accredited institution with a major and a minor commonly taught in the secondary schools of California. Admission to candidacy for this credential should be sought during the second semester of the sophomore year or immediately upon admission to San Diego State College with advanced or graduate status. For admission requirements, refer to the section entitled: Admission to Teacher Education.

Students desiring a major in art, business education, music, physical education or speech arts should complete the requirements for the Special Secondary Credential in the respective area desired, then continue with the graduate program. For further details regarding these majors, refer to the sections entitled: Curricula Leading to the Special Secondary Credentials and to Majors and Minors for the General Secondary Credential.

Students desiring one of the other areas as a major for which San Diego State College is authorized should complete a program leading to the A.B. degree at the end of four years and the General Secondary Credential upon completion of the graduate year requirements outlined on the following pages. For a list of majors and minors, refer to the section entitled: Upper Division Requirements for the Bachelor of Arts Degree in Teacher Education.

Any person desiring this credential should consult with the Director of Secondary Education during his first semester of attendance at San Diego State College.

### RECOMMENDED PROGRAM FOR THE GENERAL SECONDARY SCHOOL CREDENTIAL

The following courses should be completed before receiving the bachelor's degree (in the order listed):

| | *Units* |
|---|---|
| Education 184A, The Secondary School | 4 |
| Education 184B, Development and Learning | 4 |
| Education 184C, The Teaching Process | 4 |
| Health Education 151, Health Education for Teachers | 2 |

The graduate work must consist of a minimum of 24 semester units of upper division or graduate work including the following specific requirements:

1. At least 12 semester units must be completed at San Diego State College.
2. At least one course of graduate level work (200 number) in the major field.
3. Enough units to complete a 21 semester unit minor. Refer to the section entitled: Majors and Minors for the General Secondary Credential.
4. Professional Education—completion of the courses listed above and the following:

| | |
|---|---|
| Education 100B, Methods of Teaching (in the major and minor subjects) (available Fall Semester only) | 4 |
| Education 250, Curricular Problems of the Secondary School | 3 |
| Education 230, Guidance Problems of the Secondary School | 3 |
| Education 316, Directed Teaching (or equivalent) | 6 |

## MAJORS AND MINORS FOR THE GENERAL SECONDARY CREDENTIAL

The following pages outline tentative programs for the majors and minors for which San Diego State College is authorized to recommend for the General Secondary Credential. Every candidate for the General Secondary Credential must have a program approved in writing by the departmental representatives in his major and minor teaching fields and in education.

### Major in Art

The requirements for the A.B. degree and the Special Secondary Credential in Art should be completed simultaneously. (Students transferring from another institution with the A.B. degree and a major in art should consult with the departmental representative for special program planning.) Refer to the section entitled: A.B. degree with Special Secondary Credential in Art. After the above requirements have been met, and the candidate has been accepted by the art staff for graduate work in art, the candidate for the General Secondary Credential shall complete a graduate year including the following courses in his major:

| *Graduate Year* | *Units* |
|---|---|
| Art 200A-200B, Special Problems in Art | 4 |

### Minor in Art

A minimum of 21 semester units, of which at least nine units shall be upper division or graduate courses, must be completed.

| | |
|---|---|
| *Lower Division* | |
| Art A-B, Drawing and Composition | 2–4 |
| Art 6A-6B, Design | 4 |
| Art elective (Art 14A, Lettering, recommended) | 0–2 |
| Aesthetics 50, Appreciation and History of Art | 2 |
| Aesthetics 5, Art Orientation, or Art 51, Survey of Mexican Art | 2 |
| *Upper Division* | |
| Upper division electives in Art | 9 |
| Aesthetics 150, Appreciation and History of Art | 2 |

### Major in Business Education

The requirements for the A.B. degree and the Special Secondary Credential in Business Education must be completed simultaneously. Refer to the section entitled: A.B. degree with Special Secondary Credential in Business Education. After the above requirements have been met, the candidate for the General Secondary Credential shall complete a graduate year including the following courses in his major:

| *Graduate Year* | *Units* |
|---|---|
| Select four units from the following: | |
| Commerce 203, Secretarial Administration | 2 |
| Commerce 213, Problems in Business Education | 2 |
| Commerce 223, Problems of Distributive Business | 2 |
| Commerce 233, Administration and Supervision of Business Education | 2 |
| Commerce 260, Advanced Problem Analysis (Accounting) | 2 |

### Minor in Business Education

A minimum of 21 semester units, of which at least nine units shall be upper division or graduate courses, must be completed.

This minor is not approved as part of the requirements for the A.B. degree unless the degree and a credential are awarded simultaneously. It is recommended as a second minor area only.

| | |
|---|---|
| *Lower Division* | |
| Commerce 14A-14B, Principles of Accounting | 6 |
| Economics 1A-1B, Principles of Economics | 6 |
| *Upper Division* | |
| Upper division commerce courses selected with approval of the departmental representative | 9 |

### Major in Chemistry

| | Units |
|---|---|
| *Lower Division* | |
| Chemistry 1A-1B, General | 10 |
| Chemistry 5, Quantative Analysis | 3 |
| Mathematics 7A-7B, Mathematical Analysis, or 3A-3B, Plane Analytic Geometry and First Course in Calculus, and 4A-4B, Second and Third Course in Calculus | 6–12 |
| Physics 2A-2B, General, and 3A-3B, Physical Measurements (or 4A-4B-4C, Principles) | 8–12 |
| *Upper Division* | |
| Chemistry 101, 102, 103, Organic Chemistry | 10 |
| Chemistry 105, Advanced Quantitative Analysis | 3 |
| Chemistry 110A-110B, Physical Chemistry | 6 |
| Electives in upper division chemistry, or electives in a related field approved by the departmental representative | 5 |
| *Graduate Year* | |
| Chemistry 200, Seminars | 4 |

### Minor in Chemistry

A minimum of 21 semester units, of which at least nine units shall be upper division or graduate courses, must be completed.

| | |
|---|---|
| *Lower Division* | |
| Chemistry 1A-1B, General | 10 |
| Chemistry 5, Quantitative Analysis | 3 |
| Physics 2A-2B, General, and 3A-3B, Physical Measurements (or 4A-4B-4C, Principles) | 8–12 |
| *Upper Division* | |
| Chemistry 101, Organic | 4 |
| Electives in upper division chemistry selected with approval of departmental representative | 5 |

### Major in Economics

| | |
|---|---|
| *Lower Division* | |
| Economics 1A-1B, Principles of Economics | 6 |
| Lower division year course in history, political science or sociology | 6 |
| *Upper Division* | |
| Economics 100A-100B, Intermediate Economic Theory | 6 |
| Economics electives, including a maximum of six units in a related field approved by the departmental representative | 18 |
| *Graduate Year* | |
| Economics 200A-200B, Seminar in the Development of Economics | 4 |

### Minor in Economics

A minimum of 21 semester units, of which at least nine units shall be upper division or graduate courses, must be completed.

| | |
|---|---|
| *Lower Division* | |
| Economics 1A-1B, Principles of Economics | 6 |
| A year course in another social science area | 6 |
| *Upper Division* | |
| Economics 100A, Intermediate Economic Thought | 3 |
| Upper division economics courses selected under the supervision of the departmental representative | 6 |

### Major in English

| | Units |
|---|---|
| *Lower Division* | |
| English 1 or 41, Composition | 3 |
| One year-course from lower division English electives | 6 |
| Lower division English electives | 6 |
| *Upper Division* | |
| Upper Division English courses selected under the supervision of the departmental representative | 24 |
| *Graduate Year* | |
| One of the graduate seminars | 2 |
| English 192, The English Language (if not taken as an undergraduate) or 191, 195, or an additional seminar | 2–3 |

### Minor in English

A minimum of 21 semester units, of which at least nine units shall be upper division or graduate courses, must be completed.

| | |
|---|---|
| *Lower Division* | |
| Lower division English courses to be selected under supervision of departmental representative | 9 |
| *Upper Division* | |
| Upper division English courses to be selected under the supervision of the departmental representative | 12 |

### Minor in French

A minimum of 21 semester units, of which at least nine units shall be upper division or graduate courses, must be completed.

| | |
|---|---|
| *Lower Division* | |
| French 1, 2, 3, 4, 5, 6 or equivalents | 15–16 |
| History 4A-4B, History of Modern Europe, or equivalent | 6 |
| *Upper Division* | |
| French 101A-101B, Conversation and Composition | 6 |
| French Literature (select one course) | 3 |

### Minor in Health Education for Men or Women

A minimum of 21 semester units, of which at least nine units shall be upper division or graduate courses, must be completed from courses listed below, and from courses in related fields, to be selected on the basis of student's vocational goal under supervision of departmental representative.

Students majoring in physical education may use this as a second minor only. Students contemplating advanced degree work should plan to complete an academic minor as well as this minor.

| | Units |
|---|---|
| *Lower Division* | |
| Health Education 21, Principles of Healthful Living | 2 |
| Physical Education 51, First Aid and Safety Education | 2 |
| Health Education 65, Community Health | 3 |
| Health Education 90, Physiology of Reproduction | 1 |
| *Upper Division* | |
| Health Education 151, Health Education for Teachers | 2 |
| Health Education 152, Health Education Programs | 3 |
| Health Education 153, Administration of School Health Program | 3 |
| Health Education 199, Special Study in Health | 1–3 |

### Major in History

*Lower Division*

| | |
|---|---|
| History 4A-4B, History of Modern Europe, or 8A-8B, History of the Americas, or 9A-9B, History of the Pacific Ocean Area | 6 |
| Political Science 1A-1B, Introduction to Government, or Political Science 71A-71B, American Government and Politics, or Economics 1A-1B, Principles | 6 |

Two of the above history courses are recommended for students planning to major in history, and it is suggested that History 4A-4B be included as one of the courses.

*Upper Division*

| | |
|---|---|
| History 199, Special Course for Advanced Students | 2 |
| United States History course | 3–6 |
| Select from three of the following areas with approval of departmental representative | 16–19 |

1. Ancient and Medieval
2. Modern European
3. Latin America
4. Pacific Area and Far East

*Graduate Year*

| | |
|---|---|
| History 270A-270B, Seminar | 2–2 |

### Minor in History

A minimum of 21 semester units, of which at least nine units shall be upper division or graduate courses, must be completed. A year course in United States History must be included.

*Lower Division*

| | |
|---|---|
| History 4A-4B, History of Modern Europe, or 8A-8B, History of the Americas, or 9A-9B, History of the Pacific Ocean Area | 6 |
| Electives chosen from anthropology, economics, geography (except Geography 1, or 3), political science, sociology | 6 |

*Upper Division*

| | |
|---|---|
| Upper Division History selected with approval of departmental representative | 9 |

### Minor in Home Economics

A minimum of 21 semester units, of which at least nine units shall be upper division, must be completed. Candidates selecting this minor must have their programs approved by the departmental representative.

| *Lower Division* | *Units* |
|---|---|
| Home Economics 5, Food Preparation | 3 |
| Home Economics 11, Clothing Design | 3 |
| Electives in Home Economics | 0–3 |
| *Upper Division* | |
| Home Economics 101, Clothing Selection | 3 |
| Home Economics 105, Family Meals | 3 |
| Home Economics 150, Home Management | 3 |
| Home Economics 170, Child Care and Development | 3 |
| Electives in Home Economics | 0–3 |

### Minor in Industrial Arts

A minimum of 21 semester units, of which at least nine shall be upper division courses, must be completed. The candidate must demonstrate competence in mechanical drawing. All candidates selecting this minor must have their programs approved by the departmental representative.

| | | |
|---|---|---|
| *Lower Division* | | |
| Industrial Arts 2, Mechanical Drawing | | 2 |
| Select at least two courses from the following: | | 6 |
| Industrial Arts 41, Elements of Metalwork | 3 | |
| Industrial Arts 51, Elements of Woodwork | 3 | |
| Industrial Arts 61, Elements of Electricity | 3 | |
| *Upper Division* | | |
| Industrial Arts 121, Advanced Mechanical Drawing | | 3 |
| Select at least two courses from the following: | | 4 |
| Industrial Arts 141, Advanced Metalwork | 2 | |
| Industrial Arts 151A-151B, Furniture Making | 2 | |
| Industrial Arts 152, Finishing and Painting | 2 | |
| Industrial Arts 153, Patternmaking and Woodturning | 3 | |
| Electives from Industrial Arts courses selected with approval of departmental representative to complete requirement | | 6–8 |

### Major in Life Science

| | |
|---|---|
| *Lower Division* | |
| Zoology 1A-1B, General | 8 |
| Botany 2A-2B, General or 1, Introduction | 4–8 |
| Zoology 20, Human Anatomy and Physiology | 3 |
| Chemistry -A-1B, General, or 2A-2B, Fundamentals | 6–10 |
| Physics 2A-2B, General, and 3A-3B, Physical Measurements | 8 |
| Geology 1A, Physical, and Astronomy 1, Descriptive, recommended. | |
| *Upper Division* | |
| Upper division Zoology and Botany, of which units may be from a related field with the approval of the departmental representative | 24 |
| *Graduate Year* | |
| Zoology 200, Seminar | 3 |
| Zoology 202, Hydrobiology, or Zoology 213, Advanced Studies in Ornithology | 2 |

### Minor in Life Science

A minimum of 21 semester units, of which at least nine units shall be upper division or graduate courses, must be completed.

| | |
|---|---|
| *Lower Division* | |
| Biology 10A-10B, General Biology, or Zoology 1A-1B, General Zoology | 6–8 |
| Botany 2A-2B, General Botany, or Botany 1, Introduction | 4–8 |
| Chemistry 1A, General, or 2A-2B, Fundamentals | 5–6 |
| *Upper Division* | |
| Upper division courses in Zoology and Botany to be selected with approval of the departmental representative | 9 |

**Major in Mathematics**

| | *Units* |
|---|---|
| Mathematics 3A, Plane Analytical Geometry | 3 |
| Mathematics 3B, First Course in Calculus | 3 |
| Mathematics 4A, Second Course in Calculus | 3 |
| Additional mathematics or work in related areas | 3 |

*Suggested courses in related areas:* Astronomy 1, Descriptive Astronomy; Commerce 2, Mathematics of Finance; Engineering 1A, Plane Surveying; Engineering 21, Descriptive Geometery; Physics 4A, Mechanics of Solids and Fluids; Physics 2A, General.

*Upper Division*

| | |
|---|---|
| At least one course in Algebra | 3 |
| At least one course in Geometry | 3 |
| Mathematics 140A, Mathematical Statistics | 3 |
| Mathematics 117, Intermediate Calculus (unless 4B, Third Course in Calculus taken in lower division) | 3 |
| Mathematics 104, History of Mathematics | 3 |
| Additional upper division units, six of which may be in related areas | 9 |

*Graduate Year*

Four units selected from the following:

| | |
|---|---|
| Mathematics 201, Concepts of Geometry from an Advanced Point of View | 2 |
| Mathematics 202, Concepts of Algebra from an Advanced Point of View | 2 |
| Mathematics 204, Advanced Work in the History of Mathematics | 2 |

**Minor in Mathematics**

A minimum of 21 semester units, of which at least nine units shall be upper division or graduate courses, must be completed.

*Lower Division*

**Pattern I**

| | |
|---|---|
| Mathematics 7A-7B, Elementary Mathematical Analysis | 6 |
| Two courses selected from courses in related areas | 6 |

(See above under teaching major in mathematics)

**or Pattern II**

| | |
|---|---|
| Mathematics D, Trigonometry (or high school equivalent for which pattern credit may be allowed) | 3 |
| Mathematics 3A, Plane Analytic Geometry | 3 |
| Mathematics 3B, First Course in Calculus | 3 |
| One course selected from courses in related areas | 3 |

(See above under teaching major in mathematics)

*Upper Division*

| | |
|---|---|
| Upper division units in mathematics selected with the approval of the departmental representative | 9 |

One course in each of the areas, algebra, geometry, and history of mathematics, is desirable.

**Major in Music**

The requirements for the A.B. degree and the Special Secondary Credential in Music should be completed simultaneously. Students transferring from another institution with the A.B. degree and a major in Music should consult with the departmental representative for special program planning. Refer to page 33 for the recommended program for the Special Secondary Credential in Music. After the above requirements have been met, the candidate for the General Secondary Credential shall complete a graduate year including 4 units selected from the following courses in his major:

*Graduate Year*

Four units selected from the following:

| | |
|---|---|
| Music 200A-200B, Special Problems in Music | 2–2 |
| Music 203, Musicology | 2 |
| Music 206, Composition | 2 |

### Minor in Music

A minimum of 21 semester units, of which at least nine units shall be upper division or graduate courses, must be completed.

| *Lower Division* | *Units* |
|---|---|
| Music 1A or equivalent, and 1B, Musicianship | 2–5 |
| Music 4A-4B, Elementary Harmony | 6 |
| Aesthetics 1A-1B, Survey of Music | 4 |
| Music activities selected from Music 11, 12, 13, 15, 20, 26, 30 | 0–2 |
| *Upper Division* | |
| Elect 9 units with approval of departmental representative from: | |
| Aesthetics 102A-102B, Music History | 4 |
| Aesthetics 100, Great Music | 3 |
| Music 105A-105B, Advanced Harmony and Composition | 6 |
| Music 106, Counterpoint | 2 |
| Music 107, Form and Analysis | 2 |
| Music 119A, Instrumental Conducting | 1 |
| Music 120A, Vocal Conducting | 1 |
| Music 121A-121B, Instrumentation and Arranging | 4 |
| Music 117A-117B, Advanced Individual Study of Voice | 2 |
| Music 118A-118B, Advanced Individual Study of Piano or Organ | 2 |

### Major in Physical Education for Men

The requirements for the A.B. degree and the Special Secondary Credential in Physical Education must be completed simultaneously. Refer to the section on A.B. degree with Special Secondary Credential in Physical Education. After the above requirements have been met, the candidate for the General Secondary Credential shall complete a graduate year including the following courses in his major:

Select two courses from the following:

| | |
|---|---|
| Physical Education 200, Evaluation Procedures in Health, Physical Education and Recreation | 2 |
| Physical Education 201, Developmental Physical Education | 2 |
| Health Education 202, Problems in Health Education | 2 |
| Physical Education 203, Problems in Physical Education | 2 |
| Physical Education 204, Problems in Recreation | 2 |

### Minor in Physical Education for Men

A minimum of 21 semester units, of which at least nine units shall be upper division or graduate courses, must be completed.

A student contemplating advanced degree work should plan to complete an academic minor as well as this minor.

| *Lower Division* | |
|---|---|
| Physical Education 51, First Aid and Safety Education | 2 |
| Physical Education 53, Physical Education in the Elementary Schools | 2 |
| Physical Education 72, Introduction | 2 |
| Electives | 2–4 |
| *Upper Division* | |
| Professional Activity courses selected with approval of departmental representative | 4 |
| Physical Education 190, Administration of Physical Education in Secondary Schools | 3 |
| Physical Education 170, Recreational Leadership | 2 |
| Electives | 2–4 |

### Major in Physical Education for Women

The requirements for the A.B. degree and the Special Secondary Credential in Physical Education must be completed simultaneously. Refer to the section on A.B. degree with Special Secondary Credential in Physical Education. After the above requirements have been met, the candidate for the General Secondary Credential shall complete graduate year including the following courses in his major:

Select two courses from the following:

| | Units |
|---|---|
| Physical Education 200, Evaluation Procedures in Health, Physical Education, and Recreation | 2 |
| Physical Education 201, Developmental Physical Education | 2 |
| Health Education 202, Problems in Health Education | 2 |
| Physical Education 203, Problems in Physical Education | 2 |
| Physical Education 204, Problems in Recreation | 2 |

### Minor in Physical Education for Women

A minimum of 21 semester units, of which at least nine units shall be upper division or graduate courses, must be completed.

A student contemplating advanced degree work should plan to complete an academic minor as well as this minor.

*Lower Division*

| | |
|---|---|
| Physical Education 1A, Fundamental Skills | ½ |
| Physical Education 2A, Folk Dancing | ½ |
| Physical Education 3A, Modern Dance | ½ |
| Physical Education 4, 5, 6, Team Sports | 1½ |
| Physical Education 53, Physical Education in Elementary Schools | 2½ |
| Physical Education electives | 3½–4 |

*Upper Division*

| | |
|---|---|
| Physical Education 156A-156B, Sports Methods | 4 |
| Physical Education 161, Folk Dancing Materials and Advanced Techniques | 2 |
| Electives selected from Physical Education 190, 170B, 164A-164B | 3–6 |

### Major in Physical Sciences

This teaching major may be used as a major for the A.B. Degree if the lower and upper division requirements listed below are completed and the student has been admitted to candidacy for the General Secondary Credential and has completed at least nine units of professional courses in education by the date of degree candidacy.

*Lower Division*

| | |
|---|---|
| Chemistry 1A-1B, General Chemistry | 10 |
| Physics 4A-4B-4C, Principles (or 2A-2B, General, and 3A-3B, Physical Measurements) | 8–12 |
| Mathematics 3A, Plane Analytic Geometry, 3B, First Course in Calculus, 4A, Second Course in Calculus (recommended 4B, Third Course in Calculus) | 9–12 |
| Biology 1, Survey | 3 |

*Upper Division*

| | |
|---|---|
| Twenty-four units in chemistry and physics, with a minimum of nine units in each of these two departments. Six units may be selected from related fields with approval of the departmental representative | 24 |

*Graduate Year*

Select four units from the following:

| | |
|---|---|
| Chemistry 200, Seminar | 2–4 |
| Physics 200, Seminar | 2–4 |

### Major in Physics

| | Units |
|---|---|
| *Lower Division* | |
| Physics 4A-4B-4C, Principles, or equivalent | 12 |
| Chemistry 1A-1B, General | 10 |
| Mathematics 3A-3B, Plane Analytic Geometry and First Course in Calculus | 6 |
| Mathematics 4A-4B, Second and Third Course in Calculus | 6 |
| *Upper Division* | |
| Physics 105A-105B, Analytical Mechanics | 6 |
| Physics 110, Alternating Current Circuits | 3 |
| Physics 102, Basic Electronics or 170, Electromagnetic Theory | 3 |
| Physics 199, Special Study | 2 |
| Electives from upper division physics, with a maximum of six units selected from related areas upon approval of departmental representative | 10 |
| *Graduate Year* | |
| Select four units from the following: | |
| Physics 200, Seminars (both semesters) | 2–2 |

### Minor in Physics

A minimum of 21 semester units, of which at least nine units shall be upper division or graduate courses, must be completed.

| | |
|---|---|
| *Lower Division* | |
| Physics 4A-4B-4C, Principles, or equivalent | 12 |
| Chemistry 1A-1B, General | 10 |
| Mathematics 3A, Plane Analytic Geometry, 3B, First Course in Calculus, 4A-4B, Second and Third Course in Calculus | 12 |
| *Upper Division* | |
| Upper division courses to be selected with approval of departmental representative | 9 |

### Major in Psychology

This major can be used for a General Secondary Credential only if the candidate completes *two* teaching minors.

| | |
|---|---|
| *Lower Division* | |
| Psychology 1, General | 3 |
| Psychology 5 and 6, Principles | 6 |
| *Upper Division* | |
| Psychology 104A, Statistical Methods | 3 |
| Psychology 105B, Individual Mental Testing | 3 |
| Psychology 131, Foundations of Personality | 2 |
| Psychology 132, Personality Adjustment | 2 |
| Psychology 151, Introduction to Clinical Appraisal | 3 |
| Psychology 160A, Experimental Psychology | 3 |
| Electives to be selected with approval of the departmental representative | 8 |
| *Graduate Year* | |
| Psychology 201, Seminar in Psychology | 2 |
| Education 230, Guidance Problems in Secondary Education | 3 |

### Minor in Recreation for Men or Women

A minimum of 21 semester units, of which at least nine units shall be upper division or graduate courses, must be completed.

Students majoring in Physical Education may use this only as a second minor. Students contemplating advanced degree work should plan to complete an academic minor as well as this minor.

| | |
|---|---|
| *Lower Division* | |
| Physical Education 51, First Aid and Safety Education | 2 |
| Physical Education 53, Physical Education in Elementary Schools | 2 |
| Electives selected from Art 61B, Crafts, or from the fields of dance, drama or music | 2 |
| *Upper Division* | |
| Physical Education 165, Administration of Community Recreation | 3 |
| Physical Education 170, Recreational Leadership | 3 |
| Physical Education 184, Field Work in Recreation | 1–3 |

### Major in Romance Languages

| | Units |
|---|---|
| *Lower Division* | |
| Spanish 1, 2, 3, 4, 5, 6, or the equivalents | 16 |
| French 1, 2, 3, 4, 5, 6, or the equivalents | 16 |
| History 4A-4B, or 8A-8B | 6 |
| *Upper Division* | |
| Spanish 101A-101B, Conversation and Composition | 6 |
| French 101A-101B, Conversation and Composition | 6 |
| Spanish 199 or French 199, Comprehensive Reading and Survey Course | 3 |
| Courses in Spanish literature, French literature or Spanish-American literature, selected with the approval of the departmental representative | 9 |
| *Graduate Year* | |
| Spanish 201, Old Spanish | 2 |
| Spanish 204, Seminar in Spanish-American Literature | 2 |

### Major in Social Sciences

This teaching major may be used as a major for the A.B. degree if the lower and upper division requirements listed below are completed and the student has been admitted to candidacy for the General Secondary Credential and has completed at least 9 units of professional courses in education by the date of degree candidacy.

*Lower Division*

A student must complete a minimum of six units in each of at least three fields he may select from the departments named below:

- Economics
- Geography
- History
- Political Science
- Sociology and/or Anthropology

*Upper Division*

A student must complete a minimum of 30 units with the approval of the departmental representative as follows:

| | |
|---|---|
| 1. A minimum of 12 units from any field named above | 12 |
| 2. A minimum of six units from each of two fields named above, excluding the field selected for the major upper division concentration | 12 |
| 3. Electives from social science fields | 6 |

*Graduate Year*

| | |
|---|---|
| Post-bachelor work selected with approval of the departmental representative | 4 |

### Major in Spanish

| | |
|---|---|
| *Lower Division* | |
| Spanish 1, 2, 3, 4, 5, 6, or the equivalents | 16 |
| French A-B, or German A-B, or Latin A-B, or their equivalents | 6 |
| History 4A-4B, or 8A-8B | 6 |
| *Upper Division* | |
| Spanish 101A-101B, Conversation and Composition | 6 |
| Spanish 199, Comprehensive Reading and Survey | 3 |
| Upper division courses in Spanish or Spanish-American literature with a maximum of six units which may be selected from related fields with the approval of the departmental representative | 9–15 |
| *Graduate Year* | |
| Spanish 201, Old Spanish | 2 |
| Spanish 204, Seminar in Spanish-American Literature | 2 |

### Minor in Spanish

A minimum of 21 semester units, of which at least nine units be upper division or graduate courses, must be completed.

| | Units |
|---|---|
| *Lower Division* | |
| Spanish 1, 2, 3, 4, 5, 6, or equivalents | 15–16 |
| History 4A-4B, History of Modern Europe, or 8A-8B, History of the Americas, or equivalent | 6 |
| *Upper Division* | |
| Spanish 101A-101B, Conversation and Composition | 6 |
| Spanish Literature (select one course) | 3 |

### Major in Speech Arts

| | |
|---|---|
| *Lower Division* | |
| Speech Arts 1, Voice and Diction, or 2A, Fundamentals of Public Speaking, or 2B, Extemporaneous Speaking, or 11A, Interpretation | 3 |
| Speech Arts 55A-55B, Elementary Acting, or 81, Survey of Radio, and 82, Radio Announcing, or 83, Radio Acting and Directing | 6 |
| *Upper Division* | |
| Speech Arts 150, Phonetics | 3 |
| Speech Arts 154A-154B, History of the Treatre, or 155, Advanced Acting, and any first semester upper division course, or 140A-140B, Stage Design, or 179A-179B, Nervous Speech Disorders, or 192A-192B, Advanced Public Speaking | 6 |
| Speech Arts 179A-179B, Nervous Speech Disorders, or 159A-159B, Stage Direction, or two courses selected from the following: 181, Radio Sales and Advertising, 182, Advanced Radio Production, 183, Radio News Writing and Broadcasting, 184, Radio Writing, or 191, Organized Discussion | 6 |
| Speech Arts 108, Advanced Interpretation, or 118A or 118 B, Playwriting, or 145, Stage Lighting, or 152, Stage Costume, or 154A or 154B, History of the Theatre, or 162, Advanced Argumentation, or 176, Problems of Speech Correction and Articulation | 3 |
| A maximum of six units may be selected from related fields with approval of departmental representative | 0–6 |
| *Graduate Year* | |
| Select four units from the following courses: | |
| Speech Arts 260, Seminar in Oral Interpretation | 2 |
| Speech Arts 221, Seminar in Articulatory Problems in Speech | 2 |
| Speech Arts 245, Seminar in Technical Practice | 2 |
| Speech Arts 259, Seminar in Stage Direction | 2 |
| Speech Arts 200, Seminar in History or Oratory | 2 |

### Minor in Speech Arts

A minimum of 21 semester units, of which at least nine units shall be upper division or graduate courses, must be completed.

| | |
|---|---|
| *Lower Division* | |
| Speech Arts 2A-2B, Fundamentals of Public Speaking and Extemporaneous Speaking; or 55A-55B, Elementary Acting; or 56A-56B, Dramatic Production; or 55A, Elementary Acting, and 2A, Fundamentals of Public Speaking, or 2B, Extemporaneous Speaking; or 55A, Elementary Acting, and 11A or 11B, Interpretation, or 1, Voice and Diction; or 81, Survey of Radio | 12 |
| *Upper Division* | |
| Upper division Speech Arts electives selected with the approval of departmental representative | 9 |

# CURRICULA LEADING TO CREDENTIALS IN ADMINISTRATION AND SUPERVISION

## CURRICULA LEADING TO CREDENTIALS IN ELEMENTARY SCHOOL ADMINISTRATION AND SUPERVISION

In addition to the general requirements of the State of California for all degrees, the candidate shall meet the following requirements:

(a) Possess a valid General Elementary Credential.
(b) Present written evidence of two years of successful teaching experience in the elementary schools.
(c) Complete 30 semester units for the Administration Credential (24 units for the Supervision Credential) of upper division or graduate work in addition to the holding of the General Elementary Credential. These units shall include specific courses designed by the State Department of Education and the college.
(d) Maintain a grade point average of 1.75 in work taken subsequent to receipt of the General Elementary Credential.
(e) Complete a minimum of 15 units of work in residence at San Diego State College.
(f) Make formal application to the Director of Elementary Education.
(g) Earn the recommendation of the Department of Education.

Students applying for the Elementary Administration or Supervision Credentials should register with the office of the Dean of Education and confer with the Director of Elementary Education concerning the courses which may be offered in satisfaction of the requirements. Outlines of pattern requirements for either the Elementary Supervision or Administration Credentials may be obtained by writing the Director of Elementary Education.

## SPECIAL SUBJECT SUPERVISION CREDENTIAL

This credential is available for persons who wish to supervise in a special subject area. Those desiring this credential should see the Dean of Education.

## CURRICULA LEADING TO CREDENTIALS IN SECONDARY SCHOOL ADMINISTRATION AND SUPERVISION

In addition to the general requirements of the State of California for all degrees, the candidate shall meet the following requirements:

(a) Possess a valid General Secondary Credential.
(b) Present written evidence of two years of successful teaching experience.
(c) Complete 18 semester units for the Administration Credential (15 semester units for the Supervision Credential) of upper division or graduate work after holding a valid General Secondary Credential. These units must include a specific pattern of courses designed by the State Department of Education and the college.
(d) Maintain a grade point average of 1.75 on units under (c).
(e) Complete a minimum of 12 units of work in residence at San Diego State College after holding the General Secondary Credential.
(f) Make formal application to the Director of Secondary Education.
(g) Earn the recommendation of the Department of Education.

Students applying for the Secondary Administration or Supervision Credentials should register with the office of the Dean of Education and confer with the Director of Secondary Education concerning the courses which may be offered in satisfaction of the requirements. Outlines of pattern requirements for either the Secondary Supervision or Administration Credentials may be obtained by writing the Director of Secondary Education.

# THE BACHELOR OF EDUCATION DEGREE AND THE GENERAL ELEMENTARY CREDENTIAL

## ELIGIBILITY FOR CANDIDACY

Teachers holding the Provisional General Elementary School Credential are eligible for candidacy for the Bachelor of Education Degree. The purpose of this degree is to increase the professional competence of teachers who do not hold a bachelor's degree. The educational program of each applicant shall be determined on the basis of his previous preparation and of the services he is to render. In the period of professional preparation the applicant shall be guided into those learning experiences designed to meet his cultural and professional needs.

## MINIMUM REQUIREMENTS

An applicant for the General Elementary Credential and the Bachelor of Education Degree shall comply with the procedures for application and with the requirements for personal qualifications and general training and shall have completed a program including the following minimum requirements:

a. A four-year college course of 120 semester units, or the equivalent.

b. Eighteen semester units, or the equivalent, of professional work in education, constituting an organized program designed to prepare candidates in the following areas:

  (1) The evolution of educational thought and practice as to the function of the school in a democratic society, with emphasis on the elementary school.

  (2) The nature of individual growth and development; the psychological aspects of learning; child study, with emphasis on directed observation of children; mental hygiene and personality development; parent education; guidance practices.

  (3) The selection and arrangement of learning experiences, instructional materials, learning methods and appraisal techniques related to all statutory requirements for teaching, including reading, writing, spelling, language study, arithmetic, geography, history of the United States and of California, civics including the Constitution of the United States, music, art, physical education, healthful living, morals and manners, safety education, and fire prevention.

  (4) The use of audio-visual aids in instruction.

c. Directed teaching in the elementary school, eight semester units, or the equivalent, under the supervision of superior teachers in actual classroom situations of the elementary school level.

d. Sixty-one semester units or the equivalent in basic subject fields, distributed approximately as follows:

  (1) *Social Studies.* Twelve semester units, or the equivalent, with emphasis upon current economic, political, and social problems and world history and geography, sociology and anthropology. The legal requirement in United States Constitution and American history, institutions, and ideals shall be included in the social studies program.

  (2) *Science.* Twelve semester units, or the equivalent, in the fields of physical and biological science, with emphasis upon the study and use of the environment.

(3) *English*, including speech. Twelve semester units, or the equivalent, including oral and written expression, world literature, children's literature, dramatics, detection and correction of speech defects, and the use of books and libraries.

(4) *Mathematics.* Three semester units, or the equivalent, including subject matter and techniques essential in the teaching of mathematics in the elementary school.

(5) *Health and Hygiene.* Three semester units, or the equivalent, including personal hygiene, subject matter and techniques essential in health education to elementary school pupils.

(6) *Physical Education.* Three semester units, or the equivalent, including subject matter and techniques essential in the teaching of physical education to elementary school pupils.

(7) *Music.* Eight semester units, or the equivalent, including content and techniques appropriate for the elementary school.

(8) *Art.* Eight semester units, or the equivalent, in graphic art and industrial arts applicable to learning experiences appropriate for elementary school children.

e. The remaining units necessary to complete the requirements for the Bachelor of Education degree shall be distributed among those offerings of the institution that best serve the cultural and professional needs of the candidate.

## EVALUATION OF TEACHING EXPERIENCE AND SUBJECT MATTER FIELDS

a. A candidate with two or more years' teaching experience may be awarded a maximum of 8 semester units of credit, or the equivalent, in directed teaching provided he demonstrates satisfactory skill to a representative of the institution under whose direction he is completing his degree program, or provided other conditions set by the institution to insure classroom skill are met. This credit shall not be applied until the candidate has completed at least 112 semester units, or the equivalent, of his program.

b. Credit toward the B. Ed. degree may be secured by passing comprehensive examinations in the fields of study mentioned in paragraphs (b) and (d) above.

## INSTITUTION AND RESIDENCE REQUIREMENTS

a. A minimum of 30 semester units, or the equivalent, must be secured from the college conferring the degree.

b. A least 12 semester units, or the equivalent, must be earned in campus residence course work at the college conferring the degree and must be secured after completion of at least 90 semester units, or the equivalent.

c. A maximum of 30 units may be secured by examination.

The Bachelor of Science Degree will be offered in certain curricula to be designated at a later date. Students interested in this degree should obtain supplementary information from the Office of the Registrar.

# THE BACHELOR OF SCIENCE DEGREE

The Bachelor of Science Degree will be offered in certain curricula to be designated at a later date. Students interested in this degree should obtain supplementary information from the Office of the Registrar.

# THE MASTER OF ARTS DEGREE

## NATURE OF THE DEGREE

The Master of Arts degree is offered at San Diego State College for members of the teaching profession. Students may elect to concentrate in a subject matter major or in education. The following areas of concentration are now available:

*Teaching Majors:* Chemistry, commerce, English, foreign language, health and physical education, history, life science (botany and zoology), physics, psychology, and social science.

*Education:* Elementary, secondary, administration and supervision, and student personnel services.

*School Psychologist:* Psychology or educational psychology.

## REQUIREMENTS

Students who meet the following requirements are eligible for graduation with the master's degree:

A. 30 units of approved graduate work beyond the bachelor's degree. To earn both the general secondary credential and the master's degree usually requires 36 units of graduate work, which may include six units in directed teaching. Additional units will usually be required if the student has earned less than 12 units in education courses as an undergraduate student.

B. 24 units in residence. Courses taken prior to summer session 1946 at San Diego State College, or any other California State College, may **NOT** be used as graduate work.

C. Grade point average of 2.0 in all work taken after the bachelor's degree. (Grade of A, 3 grade points; B, 2 grade points; C, 1 grade point; D, 0 grade points).

D. Completion of the requirements for an approved California teaching credential, or the holding of one, such as the general elementary, general secondary, junior high, and special secondary school credentials.

E. Satisfactory completion of the candidate's degree program as approved by the Graduate Committee.

## ADMISSION TO GRADUATE STUDY

A. Graduate Status may be granted to applicants who have regularly applied and have filed official transcripts as evidence of their possession of a bachelor's degree from an accredited institution.

B. Provisional admission to graduate study, Graduate Special Status, may be granted to one who holds a bachelor's degree from an unaccredited college. Such a student will be eligible for Graduate Status when he has earned a grade point average of 1.5 on 12 or more units of approved upper division work at this college and has cleared all undergraduate deficiencies. Special Status is given also to those students who have not completed the regular admission procedures.

## ADMISSION TO CANDIDACY

A candidate for the master's degree must qualify as follows:

A. Apply for admission to candidacy at the Office of the Dean of Education. Students should apply during the first graduate term in attendance. Admission cannot be completed, however, until the student has earned 12 units at San Diego State College, or six units if his undergraduate grade point average was 1.5 or better.

B. Earn and maintain a grade point average of 2.0 on all graduate work.

C. Satisfactorily complete the following: (1) scholastic aptitude test for graduates, (2) scholastic achievement test, (3) personal interviews and speech test, and (4) health and physical examination.

D. Secure adviser's approval of: (1) a complete program of study for the degree, and (2) a master's project or thesis.

## GENERAL REGULATIONS

A. Extension and correspondence courses are not acceptable toward the degree.

B. Maximum study load: Summer session, one unit per week of attendance; fall or spring, 15 units per semester of full-time attendance. If employed full time, five units of courses numbered 100-199 or 3 units of courses numbered 200-298.

C. All candidates shall complete two units in Education 290 and one additional unit in a course in bibliography (290) in the major department.

D. Each applicant shall complete a project or thesis for three units of credit.

E. The minimum requirement for concentration in a major shall be four units of courses numbered 200-298; six additional units in the major or an approved related field, selected from upper division or graduate courses; a project or thesis; and one unit in bibliography.

F. 12 units of work must be earned after admission to candidacy.

G. 10 units must be in courses numbered 200-299.

H. The examination on the thesis will consist of two conferences between the student and his Thesis Committee; one for planning, which is to be held immediately after the appointment of the committee, and one for evaluation at the time of completing the first draft of the thesis.

# PREPROFESSIONAL AND VOCATIONAL CURRICULA

Preprofessional and vocational curricula, ranging in length from two to four years of collegiate work, are offered. Curricular outlines of preprofessional study, which are presented on the following pages, meet the typical requirements for admission to professional schools. Students expecting to complete their professional training at other institutions should modify the suggested outlines of study to meet the requirements of the professional schools of their choice. Curricular outlines for complete training leading to vocations are also presented on the following pages.

Curricular outlines are presented for agriculture, commerce, dentistry, education, engineering, home arts, inter-American relations, journalism, law, life science occupations, medicine, nursing, optometry, pharmacy, recreation, and veterinary science. Students desiring to modify these curricular outlines in terms of liberal arts majors should consult the advisers in the respective curricula.

## PRE-AGRICULTURAL CURRICULA

The high school program should include the following subjects: Elementary algebra, 1 unit; plane geometry, 1 unit; intermediate algebra, 1 unit; trigonometry, ½ unit; chemistry, 1 unit; physics, 1 unit; mechanical drawing, 1 unit; foreign language, 3 units in one language.

Students should ascertain the lower division requirements of the agricultural college they expect to enter.

### CURRICULUM IN PLANT SCIENCE

| | *Units* | |
|---|---|---|
| **Freshman Year** | *1st Sem.* | *2d Sem.* |
| P.E. (activity courses) | ½ | ½ |
| Health Ed. 21, Principles | 2 | – |
| Chem. 1A-1B, General | 5 | 5 |
| Botany 2A-2B, General | 4 | 4 |
| Physics 2A-2B, General | 3 | 3 |
| English 1, Composition | – | 3 |
| Electives | 2 | 1 |
| | 16½ | 16½ |
| **Sophomore Year** | | |
| P.E. (activity courses) | ½ | ½ |
| Econ. 1A-1B, Principles | 3 | 3 |
| English 2, Literature | – | 3 |
| Chem. 101, Elem. Organic, and 102, Laboratory | 4 | 3 |
| Geology 1A, Physical, or 2A, General | 3 | – |
| Bact. 1, General | – | 4 |
| Zoology 1A, General | 4 | – |
| Psychology 1, General | – | 3 |
| Elective | 2 | – |
| | 16½ | 16½ |

### CURRICULUM IN ANIMAL SCIENCE

| | *Units* | |
|---|---|---|
| **Freshman Year** | *1st Sem.* | *2d Sem.* |
| P.E. (activity courses) | ½ | ½ |
| Chem. 1A-1B, General | 5 | 5 |
| Zoology 1A-1B, General | 4 | 4 |
| Physics 2A-2B, General | 3 | 3 |
| English 1, Comp. and 2, Lit. | 3 | 3 |
| | 15½ | 15½ |
| **Sophomore Year** | | |
| P.E. (activity courses) | ½ | ½ |
| Health Ed. 21, Principles | 2 | – |
| Psychology 1, General | 3 | – |
| Econ. 1A-1B, Principles | 3 | 3 |
| Bact. 1, General | – | 4 |
| Botany 1, Introduction | 4 | – |
| Chem. 101, Intro. Organic, and 102, Laboratory | 4 | 3 |
| Zoo. 100, Embryology | – | 3 |
| Zoo. 20, Human Anatomy and Physiol. or 8 Human Anatomy | – | 3 |
| | 16½ | 16½ |

## COMMERCE CURRICULUM

The first two years of the curriculum are introductory. During this period the student acquires a basis for further study and an understanding of the place that business fills in modern economic life. The choice of the major field should be made at the beginning of the junior year. The student then follows a program of studies that is designed to provide a vocational ability in at least one particular area: (A) Accounting; (B) Banking and Finance; (C) Business Administration; (D) Marketing; (E) Insurance; (F) Personnel Administration; (G) Office Management; and (H) Secretarial.

### Lower Division

| | *Units* |
|---|---|
| P.E. (activity courses) | 2 |
| Engl. 8, Bus. Engl., and 2, Lit. | 6 |
| Health Educ. 21, Principles | 2 |
| Psychology 1, General | 3 |
| Natural Science (including Geog. 1, except for Marketing field) | 9–12 |
| Hist., Pol. Sci., or Sociology | 3–6 |
| Geog. 10, Economic, except for Marketing field | 3 |

| | *Units* |
|---|---|
| Econ. 1A-1B, Principles | 6 |
| Com. 2, Math of Finance, except for Marketing, Personnel Administration, and Secretarial fields | 3 |
| Com. 14A-14B, Prin., (or 16A-16B for Secretarial field) | 6 |
| Com. 18A-18B, Com'l Law | 6 |
| Electives | 5–11 |
| | 60 |

### *Sub-fields*

Sub-fields, designated below, must include the following courses:

| | |
|---|---|
| **Marketing:** | |
| Com. 20, Consumer Problems | 3 |
| Com. 24, Merchandising | 3 |
| Com. 25, Salesmanship | 3 |
| Com. 27, Advertising Prin. | 3 |
| Art 7, Line, Color, Display | 2 |
| **Personnel Administration:** | |
| Com. 3A, Rotary Calculator | 1 |
| Com. 3B, Key-driven Calculator | 1 |
| Com. 3C, Printing Calculator | 1 |
| Com. 20, Consumer Problems | 3 |
| Psych. 11, Applied | 3 |

| | |
|---|---|
| **Office Management:** | |
| Speech Arts 2A, Fund | 3 |
| **Secretarial:** | |
| Com. A, Business Math | 1 |
| Com. 1A-1B, Typewriting | 6 |
| Com. 5A-5B, Shorthand | 10 |

(Students knowing typewriting or shorthand must take placement examinations in these subjects before enrolling in 1A-1B or 5A-5B. It is recommended that shorthand be taken in the junior year).

### Upper Division

| | *Units* |
|---|---|
| Minor (in addition to courses applied toward the major) | 9 |
| Major | 24–25 |

For (A) *Accounting;* (B) *Banking and Finance;* (C) *Business Administration;* (D) *Marketing;* (E) *Insurance;* (F) *Personnel Administration*, the following courses must be included: Economics 111, Economic History of the United States, or 170, Government and Business, or Commerce 123, Marketing Principles; Economics 140, Statistical Methods; Commerce 121, Business Administration; and 15 units selected from one of the following groups:

A. *Accounting:* Com. 118A-118B, 160A-160B, 161A-161B, 162, 164A-164B, 165A-165B, 166.

B. *Banking and Finance:* Com. 133, 134, 137, 154; Econ. 131, 135, 142.

C. *Business Administration:* Com. 118A-118B, 123, 125, 126, 127A, 133, 134, 137, 153, 154, 184; Econ. 128, 135, 142, 150, 166, 170.

D. *Marketing:* Com. 120, 123, 124, 137, 153, 154, 184, 185, 186, 187A-187B, 188, 189, 196; Home Econ. 160A-160B.

E. *Insurance:* Com. 118A-118B, 125, 126, 127A-127B, 128A-128B, 128C-128D, 128E-128F, 133, 134; Econ. 133. Recommended: Econ. 170; Soc. 50, 51, 153.

F. *Personnel Administration:* Com. 103A, 121, 153, 154; Econ. 150, 151, 154, 185; Psych. 105A, 121, 145, 152.

For G. *Office Management:* Major: 24 units to include the following courses: Com. 103A, 105A-105B, 108, 121, 153, 154, 161A; plus nine units of directed electives selected from: Com. 113A-113B, 137, 162; Econ. 135, 140, 142, 150, 170; Psych. 121.

For H. *Secretarial:* Major: 24 units to include the following courses: Com. 103A, 105A-105B, 108, 113A-113B, 153; plus nine units of directed electives selected from: Com. 121, 123, 164A-164B, 186, 188; Econ. 111, 135, 142, 150, 170, with approval of the departmental representative.

| | |
|---|---|
| Electives (to include minimum 40 upper division unit requirement) | 17–27 |
| | 60 |

## PRE-DENTAL CURRICULUM

Candidates for a degree in dentistry should ascertain the entrance requirements of the dental college to which they expect to transfer and should make whatever changes in the following typical requirements that may seem desirable in satisfying the requirements of the specific dental college.

The high school program should include the following subjects: Elementary algebra, 1 unit; plane geometry, 1 unit; chemistry, 1 unit; physics, 1 unit; foreign language, 3 units in one language; mechanical drawing, 1 unit.

### Lower Division

| Freshman Year | *Units* *1st Sem.* | *Units* *2d Sem.* |
|---|---|---|
| P. E. (activity courses) | ½ | ½ |
| Health Ed. 21, Principles | 2 | – |
| Chem. 1A-1B, General | 5 | 5 |
| Phys. 2A-2B, General | 3 | 3 |
| Phys. 3A-3B, Physical Meas. | 1 | 1 |
| Engl. 1, Comp., and 2, Lit. | 3 | 3 |
| Psych. 1, General | – | 3 |
| Elective | 0–2 | 0–1 |
| | 16½ | 16½ |

| Sophomore Year | *Units* *1st Sem.* | *Units* *2d Sem.* |
|---|---|---|
| P. E. (activity courses) | ½ | ½ |
| Chem. 5, Quant. Anal. | 3 | – |
| Zoo. 1A-1B, General | 4 | 4 |
| Math. C, Int. Alg., and D, Trig. | 3 | 3 |
| Social Science (year course selected from Anth. 1A-1B, General; Econ. 1A-1B, Principles; History 4A-4B, Modern Europe or 8A-8B, the Americas, or 17A-17B, Amer. Civilization; Pol. Sci. 1A-1B, Intro. to Government | 3 | 3 |
| Electives (a course in public speaking is recommended) | 3 | 6 |
| | 16½ | 16½ |

### Upper Division

The following courses are suggested for a third year in preparation for dentistry for those who fail to receive an acceptance from a dental college after completing the prescribed 60 units.

### Junior Year

| | *Units* *1st Sem.* | *Units* *2d Sem.* |
|---|---|---|
| Chem. 101, Intro. Organic, and 102, Lab. | 4 | 3 |
| Zoo. 106, Comp. Anat. of Vertebrates | 4 | – |
| Zoo. 100, Embryology | – | 4 |

| | *Units* *1st Sem.* | *Units* *2d Sem.* |
|---|---|---|
| Art 119 A, Ceramics (see prerequisite) | 2 | – |
| Psych. 11, Applied | – | 3 |
| Additional Year Course in Soc. Sci. | 3 | 3 |
| Electives | 3 | 3 |
| | 16 | 16 |

The curriculum for Dental Hygiene is essentially the same as the above for pre-dentistry.

# ENGINEERING CURRICULA

The engineering program is designed to give a student a sound training in the fundamentals of engineering with a minimum of specialization, and at the same time provide the broad training and experiences which constitute a liberal education. The program leads to the degree of Bachelor of Science in Engineering.

Students graduating in engineering will find employment in various functions of their chosen field of specialization. For example, a student who has selected the mechanical engineering option may find employment in the operation of a steam plant, or in the application and sales of construction equipment.

The program is intended to provide the essential training in those functions which are within the scope of a four year program. These, specifically, are the production, operation, maintenance, serivce, sales, and management functions of engineering. Curricula and individual courses are designed to emphasize these functions. Students who desire training for work in such fields as research and development should plan to complete their education at the University.

## FIELDS OF SPECIALIZATION

In the freshman and sophomore years all students are expected to take the courses listed below. In the junior and senior years optional programs are available which provide limited specialization in aeronautical, chemical, civil, electrical, electronic and mechanical engineering, and in engineering economics. Normally, students are expected to elect one of these basic options. In certain cases equivalent programs may be worked out which will better suit the needs of an individual student.

## MINOR FIELD

Students majoring in engineering must elect a minor in one of the following fields: Chemistry, economics, mathematics, or physics.

## HIGH SCHOOL PREPARATION

The high school program should include the following subjects: Elementary algebra, 1 unit; plane geometry, 1 unit; intermediate algebra, 1 unit; solid geometry, ½ unit; trigonometry, ½ unit; chemistry, 1 unit; physics, 1 unit; mechanical drawing, 1 unit.

### Lower Division

Courses must be included to satisfy all requirements for the A. B. degree pending final approval for the requirements of the B. S. degree. See section entitled: Lower Division Requirements for all Curricula.

| | *Units* | |
|---|---|---|
| **Freshman Year** | *1st Sem.* | *2d Sem.* |
| P.E. (Activity courses) | ½ | ½ |
| Math. 3A, Anal. Geom. | 3 | – |
| Math. 3B, 1st Course Calculus | – | 3 |
| Phys. 4A, Mechanics | – | 4 |
| Chem. 1A-1B, General | 5 | 5 |
| Engl. 1, Freshman Composition | 3 | – |
| H.Ed. 21, Principles | 2 | – |
| Psych. 1, General | 3 | – |
| Electives | – | 3 |
| | 16½ | 15½ |

| | *Units* | |
|---|---|---|
| **Sophomore Year** | *1st Sem.* | *2d Sem.* |
| P.E. (Activity courses) | ½ | ½ |
| Math. 4A, 2d Course Calculus | 3 | – |
| Math. 4B, 3d Course Calculus | – | 3 |
| Phys. 4B, Electricity | 4 | – |
| Phys. 4C, Heat, Sound, Light | – | 4 |
| Econ. 1A-1B, Principles | 3 | 3 |
| Engr. 21, Descriptive | 3 | – |
| Engr. 23, Materials | – | 2 |
| *Electives (see below) | 3 | 4 |
| | 16½ | 16½ |

---

* One of the following groups of courses is required, dependent upon the field of specialization desired in the upper division:

| | *Units* | |
|---|---|---|
| *For Civil Engineering* | *1st Sem.* | *2d Sem.* |
| Engr. 1A-1B, Plane Surveying | 3 | 3 |
| *For Mechanical, Electrical and Aeronautical Engineering* | | |
| Engr. 1A, Plane Surveying | 3 | – |
| Engr. 22, Machine Drawing | – | 3 |

| | *Units* | |
|---|---|---|
| *For Chemical Engineering* | *1st Sem.* | *2d Sem.* |
| Chem. 5, Quantitative Analysis | 3 | – |
| Chem. 101, Organic Chemistry | – | 4 |
| *For Engineering Economics* | | |
| Com. 14A-14B, Accounting | 3 | 3 |

Students should, if possible, complete all of the college lower division requirements in the sophomore year. Any not completed must be completed in the junior year.

## Upper Division

All upper division requirements for the A. B. degree must be met pending final approval for the requirements of the B. S. degree. These include:

Examination in American History and United States Constitution.

Completion of a minimum of 24 upper division units for the major.

Completion of nine upper division units for a minor in one of the following fields: Chemistry, economics, mathematics, or physics.

The courses required for the engineering major include a core group plus those required for each field of specialization. These are indicated below.

The choice of field of specialization and the choice of electives must be approved by the engineering department. Students normally will submit master plans for their upper division program, for departmental approval, at the beginning of the junior year. Any subsequent deviation from this plan must be approved by the department.

Required of all engineering students:

| Junior Year | Units 1st Sem. | Units 2d Sem. |
|---|---|---|
| Engr. 102A-102B, Anal. Mechanics | 3 | 3 |
| Engr. 100A-100B, Elec. Engineering | 3 | 3 |
| Engr. 140, Strength of Materials | – | 3 |

| Senior Year | Units 1st Sem. | Units 2d Sem. |
|---|---|---|
| Engr. 128, Engr. Thermodynamics | 3 | – |
| Engr. 105, Hydraulics | – | 3 |
| Engr. 199, Senior Report | – | 2 |

Additional requirements for various fields of specialization:

### Aeronautical Engineering

| Junior Year | Units 1st Sem. | Units 2d Sem. |
|---|---|---|
| Engr. 122, Machine Design | 3 | – |
| Engr. 141, Materials Engr. Lab. | – | 2 |
| Math. 118A or 119 or 124 | 3 | – |
| Engr. 101A-101B, Elec. Engr. Lab. | 2 | 2 |
| Electives | 2 | 3 |
| | 16 | 16 |

| Senior Year | Units 1st Sem. | Units 2d Sem. |
|---|---|---|
| Engr. 156, Aerodynamics | – | 3 |
| Engr. 142, Stress Analysis | 3 | – |
| Engr. 129, Heat, Power Lab. | 2 | – |
| Econ. 131 or 150 or 170 | 3 | 3 |
| Electives | 5 | 5 |
| | 16 | 16 |

### Chemical Engineering

| Junior Year | Units 1st Sem. | Units 2d Sem. |
|---|---|---|
| Chem. 102, Organic Chem. Lab. | – | 3 |
| Engr. 141, Materials Engr. Lab. | – | 2 |
| Math. 118A or 119 or 124 | 3 | – |
| Econ. 131 or 150 or 170 | 3 | – |
| Electives | 3 | 2 |
| | 15 | 16 |

| Senior Year | Units 1st Sem. | Units 2d Sem. |
|---|---|---|
| Chem. 110A-110B, Physical Chem. | 3 | 3 |
| Chem. 144A-144B, Chem. Engr. | 3 | 3 |
| Engr. 106, Hydraulics Lab. | – | 2 |
| Engr. 129, Heat, Power Lab. | 2 | – |
| Econ. 131 or 150 or 170 | – | 3 |
| Electives | 5 | – |
| | 16 | 16 |

## Civil Engineering

| | Units | |
|---|---|---|
| **Junior Year** | *1st Sem.* | *2d Sem.* |
| Engr. 130, Route, Constr., Survey | 3 | – |
| Engr. 131, Adv. Surveying | – | 3 |
| Engr. 141, Materials of Engr. Lab. | – | 2 |
| Math. 118A or 119 or 124 | 3 | – |
| Astr. 3, Surveyor's Astron. | 3 | – |
| Electives | – | 2 |
| | 15 | 16 |

| | Units | |
|---|---|---|
| **Senior Year** | *1st Sem.* | *2d Sem.* |
| Engr. 106, Hydraulics Lab. | – | 2 |
| Econ. 131 or 150 or 170 | 3 | 3 |
| Electives | 9 | 6 |
| | 15 | 16 |

## Electrical Engineering

| | Units | |
|---|---|---|
| **Junior Year** | *1st Sem.* | *2d Sem.* |
| Engr. 101A-101B, Elec. Engr. Lab. | 2 | 2 |
| Engr. 141, Materials Engr. Lab. | – | 2 |
| Math. 118A or 119 or 124 | 3 | – |
| Econ. 131 or 150 or 170 | 3 | – |
| Electives | 2 | 3 |
| | 16 | 16 |

| | Units | |
|---|---|---|
| **Senior Year** | *1st Sem.* | *2d Sem.* |
| Phys. 107, Elect. Measurements | – | 2 |
| Phys. 102, Electronics | 3 | – |
| Engr. 129, Heat, Power Lab. | 2 | – |
| Econ. 131 or 150 or 170 | – | 3 |
| Electives | 8 | 6 |
| | 16 | 16 |

## Mechanical Engineering

| | Units | |
|---|---|---|
| **Junior Year** | *1st Sem.* | *2d Sem.* |
| Engr. 101A-101B, Elec. Engr. Lab. | 2 | 2 |
| Engr. 141, Materials of Engr. Lab. | – | 2 |
| Math. 118A or 119 or 124 | 3 | – |
| Econ. 131 or 150 or 170 | 3 | 3 |
| Electives | 2 | – |
| | 16 | 16 |

| | Units | |
|---|---|---|
| **Senior Year** | *1st Sem.* | *2d Sem.* |
| Engr. 122, Machine Design | 3 | – |
| Engr. 129, Heat, Power Lab. | 2 | – |
| Engr. 106, Hydraulics Lab. | – | 2 |
| Engr. 145, Internal Combust. Engr. | – | 3 |
| Electives | 8 | 6 |
| | 16 | 16 |

## Engineering Economics

| | Units | |
|---|---|---|
| **Junior Year** | *1st Sem.* | *2d Sem.* |
| Com. 121, Business Admin. | – | 3 |
| Econ. 133, Corp. Finance | 3 | – |
| Com. 18A, Commercial Law | 3 | – |
| Econ. 140, Statistics | – | 3 |
| * Electives | 3 | – |
| | 15 | 15 |

| | Units | |
|---|---|---|
| **Senior Year** | *1st Sem.* | *2d Sem.* |
| Econ. 170, Gov't and Business | 3 | – |
| Econ. 150, Labor Problems | 3 | – |
| Econ. 131, Public Finance | – | 3 |
| * Electives | 6 | 8 |
| | 15 | 16 |

---

* Electives must include at least one of the following engineering laboratory courses: 101A, 101B, 106, 129, 141.

### Electronics Engineering

| | *Units* | |
|---|---|---|
| **Junior Year** | *1st Sem.* | *2d Sem.* |
| Phys. 102, Basic Electronics | 3 | – |
| Engr. 104 or Phys. 104, Commun. | – | 3 |
| Phys. 122, Electronics Lab. | 2 | – |
| Math. 118A or 119 or 124 | – | 3 |
| Econ. 131 or 150 170 | 3 | – |
| Engr. 101A, Elect. Engr. Lab. | 2 | – |
| | 16 | 15 |

| | *Units* | |
|---|---|---|
| **Senior Year** | *1st Sem.* | *2d Sem.* |
| Engr. 124 or Phys. 124 Radio Meas. | – | 2 |
| Engr. 150, Industrial Electron. | 2 | – |
| Phys. 152, Advanced Electronics | – | 2 |
| Phys. 107, Elect. Measurements | – | 2 |
| Econ. 131 or 150 or 170 | 3 | – |
| Engr. 101B, Elect. Engr. Lab. | – | 2 |
| Electives | 8 | 3 |
| | 16 | 16 |

## PRE-FORESTRY CURRICULUM

Students desiring to enter professional training in forestry should ascertain the entrance requirements of the college to which they expect to transfer and should make whatever changes in the following suggested pre-forestry courses that may seem desirable in satisfying the requirements of that college.

The high school program should include the following subjects: English, 4 units; Elementary Algebra and Plane Geometry, 2 units; Intermediate Algebra, 1 unit; Solid Geometry, ½ unit; Trigonometry, ½ unit; Physics, 1 unit; Chemistry, 1 unit; History, 1 unit; Geometrical Drawing, 1 unit; foreign language, 2 to 4 units, preferably German or French.

| | *Units* | |
|---|---|---|
| **Freshman Year** | *1st Sem.* | *2d Sem.* |
| P.E. (activity courses) | ½ | ½ |
| Chem. 1A-1B, General | 5 | 5 |
| Botany 2A-2B, General | 4 | 4 |
| Engl. 1, Comp., and 2, Lit. | 3 | 3 |
| Math. 3A, Plane Anal. Geom. | 3 | – |
| Math. 3B, first course in Calculus | – | 3 |
| | 15½ | 15½ |

| | *Units* | |
|---|---|---|
| **Sophomore Year** | *1st Sem.* | *2d Sem.* |
| P.E. (activity courses) | ½ | ½ |
| Physics 2A-2B, General | 3 | 3 |
| Physics 3A-3B, Phys. Meas. | 1 | 1 |
| Engr. 1A-1B, Plane Surveying | 3 | 3 |
| Econ. 1A-1B, Principles | 3 | 3 |
| Geology 2A, General | 2 | – |
| Health Ed. 21, Principles | – | 2 |
| Psychology 1, General | 3 | – |
| Chem. 101, Intro. Organic | – | 4 |
| | 16½ | 16½ |

## HOME ARTS CURRICULUM
